J. H. CROSS, Proprietor.

BOOKSELLERS, STATIONERS, ETC.—Messrs. Payot, Upham & Co., No. 204 Sansome Street, are one of the oldest, most enterprising and reliable firms in the book and stationery trade in San Francisco. Scientific, industrial and foreign publications are a specialty with them. They are also noted for their first quality of blank book and fine stationery line of goods.

"THE CHINESE AND THE CHINESE QUESTION."—Eighty-seven pamphlet pages under the above title by Prof. Jas. A. Whitney, is a work that should be read by the studious-minded on the question. Prof. W., who visited this coast twice while editor of the *American Citizen*, is now a prominent patent lawyer at No. 140 Nassau St., N. Y.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
B. W. CROWELL—Yuba and Sutter counties.
D. W. KELLEHER—San Joaquin, Amador and Calaveras counties.
A. C. KNOX—State of Nevada.
C. E. WETMORE—Alameda county.
E. A. WEED—California.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

Traveling Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

Removal Notice!

What Volcanoes are Not.

"What is a volcano?" This is a familiar question, often addressed to us in our youth, which "Catechisms of Universal Knowledge" and similar school manuals have taught us to reply to in some such terms as the following: "A volcano is a burning mountain, from the summit of which issue smoke and flames." This description, says Prof. Judd, is not merely incomplete and inadequate as a whole, but each individual proposition of which it is made up is grossly inadequate and, what is worse, perversely misleading. In the first place, the action which takes place at volcanoes is not "burning," or combustion, and beats, indeed, no relation whatever to that well-known process. Nor are volcanoes necessarily "mountains" at all; essentially, they are just the reverse—namely, holes in the earth's crust, or outer portion, by means of which a communication is kept up between the surface and the interior of our globe. When mountains do exist at centers of volcanic activity, they are simply the heaps of materials thrown out of these holes, and must, therefore, be regarded not as the causes but as the consequences of volcanic action. Neither does this action always take place at the "summits" of volcanic mountains when such exist, for eruptions occur quite as frequently on their sides or at their base. That, too, which popular fancy regards as "smoke" is really condensing steam or watery vapor, and the supposed raging "flames" are nothing more than the glowing light of a mass of molten material reflected from these vapor-clouds.

The name of volcano has been borrowed from the mountain Vulcano, in the Lipari islands, where the ancients believed that Hephæstus, or Vulcan, had his forge. Volcanic phenomena have been at all times regarded with a superstitious awe, which has resulted in the generation of such myths as the one just mentioned, or of that in which Etna was said to have been formed by the mountains under which an angry god had buried the rebellious Typhon. These stories changed their form, but not their essence, under a Christian dispensation, and Vulcano became regarded as the place of punishment of the Arian Emperor Theodosius, and Etna as that of Anne Boleyn, who had sinned by perverting the faith of King Henry VIII.—*From "Volcanoes, their Action and Distribution," in Popular Science Monthly.*

THE LATE TRANSIT OF MERCURY.—We learn that very successful observations of the late transit of Mercury were taken at Honolulu. C. H. Rockwell, of Tarrytown, N. Y., the astronomer who went to Honolulu to observe the transit of Mercury on the 7th ult., returned to this city by the *Zealandia*, and reports his observations as having been highly successful. The phenomena of the transits of the inferior planets, Venus and Mercury, across the disk of the sun are always looked for with great interest by astronomers as enabling them to test the accuracy of their tables, and to bring their theories face to face with actual facts. The object of these observations is to learn with increased accuracy the relative distances of the planets from each other and from the sun, which is technically known as determining the solar parallax. The distance in latitude between two points from which observations of a transit are made serves as a base line to calculate the difference of position between the parallels on which the planet is seen projected on the disk of the sun. The value of these observations of Mercury is much less than the corresponding observations of Venus, for the reason that the smaller planet is nearer to the sun than to us, and the long leg of the triangle is on our side, whereas with Venus the conditions are reversed, the distance from the sun to the larger planet being about two and a half times as great as our distance from the planet, and the chances of error in observations are diminished in this proportion.

Luminous Paint.

The London *Building News* says: The comparatively recent discovery that luminous paint can be applied as ordinary whitewash, considerably expands the field of its usefulness. Sheets of glass coated with the paint form Alladin's lamps, which are in use in some of the vessels of the navy, at the Waltham Powder Factory, at Young's Paraffine Works, and in the spirit vaults of several docks; but now that, by increased production and the use of water as the medium, the cost is reduced by one-half, it will probably be extensively used for painting walls and ceilings. The ordinary form of oil paint has already been applied in many ways to clock-faces, to name-plates and numbers and house doors, and to notice boards, such as "mind the step," "to let," etc. The paint emits light without combustion, and, therefore, does not vitiate the atmosphere. Several experimental carriages are now running on different railways, the paint being used instead of lamps, which are necessary all day on account of the line passing through occasional tunnels. It is reported that a paper at Turin called *Light* is to appear shortly, printed in ink which will be luminous when darkness sets in. Who can say, indeed, that a policeman, when smeared in this luminous composition, will not be sometimes visible on his beat at night?

How to Make a Luminous Paint.

The following method of procedure will, it is said, give a very satisfactory luminous paint: Take a number of oyster shells cleaned from organic matter as thoroughly as possible, and burn them in a strong coal fire for about half an hour, at the end of which time take them out and allow to cool. When quite cold, pound them fine, removing, during this operation, any particles of gray matter that may show themselves, as these are useless. When finely powdered, make an intimate mixture of this with flowers of sulphur. Introduce the mixture into a crucible, luting on a lid to the vessel with clay, or other convenient luting material. When this is dried, place the crucible in the fire and allow it to remain for an hour; then remove, and allow to cool before opening. The mixture then should appear pure white. Any gray particles that have escaped removal at the first preparation, should be removed now. The resulting powder should be mixed with gum water to a thin paint, as two thin applications are better than one thick one. This paint will remain luminous far into the night, provided it is exposed to the light during the day.

THE FIRST COMPOUND MARINE ENGINE IN AMERICA.—The engine was a compound, working steam at 80 lbs. pressure, and the cylinders were arranged one inside of the other. The designs were by Erastus W. Smith, the well-known engineer of this city. It belonged to the steamboat *Buckeye State*, which was built at Buffalo, we think, about the year 1850. The engine was at that time a great novelty, and the boat ran for many years on Lake Erie. What became of her finally we do not know, and we make these facts public in the hope of eliciting from our friends in that section some more positive and decided details than we are able to give, ours being derived from a personal visit 30 years ago, to the boat itself. The visit was not prolonged, for, learning that 80 lbs. of steam were on the boiler, we found our time was very limited. We believe this to be the first compound marine engine used in this country, but will correct this statement if it is erroneous. —*Mechanical Engineer.*

LIME BRICKS.—Among the patents issued in September last, was one to Jacob Reese, of Pittsburg, Penn., for making lime brick. The method consists in burning and indurating lime or limestone at a high temperature, then grinding it and mixing it with water charged with silicate of lime until it assumes a plastic condition, and then molding and burning the brick in the usual manner.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, *and all Chronic and Nervous Disorders.*

ACTS DIRECTLY upon the great nervous and organic centres, and *cures by a natural process of revitalization.*

HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.

HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer *by permission.*

IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*

THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.

SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address

Drs. STARKEY & PALEN,

ADMINISTERED BY INHALATION. 1109 and 1111 Girard St., Philadelphia, Pa.

Depository on Pacific Coast.

WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.

All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.

Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order than we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

M. T. Brewer, P. G. M. W.

With this issue we present to our readers an excellent portrait of M. T. BREWER, P. G. M. W., which we have engraved for this number. It is a well-earned tribute to a pioneer and hearty worker, who has aided in moulding and building up this great organization on this coast, and it is timely that we should give a short history of one of our representative Workmen.

He is now in the prime of manhood, about 44 years of age; fine physique; 5 ft., 11 inches in hight, and turns the scales at 200 lbs.

The subject of our sketch was born in St. Johns, New Brunswick, on the 21st of May, 1838, where, at the age of ten years, he commenced to earn his own livelihood, his father having died during Bro. Brewer's infancy. His occupation in his youthful days was that of a surveyor, in which he showed great proficiency.

Married at an early age to an amiable and accomplished woman, his hymenial relations have been unexceptionably happy; to which has been added a family of five children, four promising sons and one lovely daughter.

He came to California in the year 1863, and opened a bookstore in San Francisco soon after, and continued in this branch of business a year or so. In the year 1865 he engaged in the fruit business as one of the firm of J. W. Nye & Co., San Francisco, in which he continued until 1868. During this year he changed his location to Sacramento and formed a copartnership with J. F. Farnsworth, P. M. W. of No. 80, a man of integrity, sagacity and sterling business habits. From this business connection the firm of M. T. Brewer & Co. has become the largest shipping house of green fruit on the Pacific coast, and through their enterprise in making a market for the fruit of California, hundreds of thousands of dollars has been realized for our surplus fruit, that otherwise would have been almost valueless. Some idea of the extent and magnitude of the interest may be gathered when it is known that this firm employs 400 men, uses $300 worth of boxes, and sends as high as 50 tons of green fruit daily to the East, in some portions of the fruit season.

There is a feature of this house which is worthy of mention. They have made a practice of giving large quantities of fruit to those in need, and also to benevolent institutions.

Bro. Brewer is emphatically a humanitarian and society man. He has been a member of Abou Ben Adhem Lodge, I. O. O. F., for 15 years; a charter member of Union, No. 21, A. O. U. W., and its first Past Master Workman; Grand Foreman in 1879, Grand Master Workman in 1880, and Supreme Representative to the Supreme Lodge which met in Boston, in 1880, where he rendered material aid as a counselor, and in harmonizing conflicting interests. He was elected a Representative to the Supreme Lodge in 1881, but owing to sickness did not attend the session. He is a Knight of Pythias; has passed through all the chairs in the Red Men; and is an active member of several other prominent and popular benevolent societies and humane local institutions.

He is a good speaker and debater, avoiding personalities or words that will in the least injure the feelings of anyone. He is often called upon or takes it to himself to make an appeal for charity in the Lodge-room, and as he, with his deep, sonorous voice, while walking up and down the room, asks his brethren to assist, his appeals are seldom in vain. He visits the sick, and will be found at the poor man's funeral, even in the busy season when business demands his services 16 and 18 hours each day.

It is well known that he has been urged repeatedly to accept civil office, which he has positively declined, and ever refused to enter the political arena or accept even very high positions. As characteristic of Bro. Brewer, his home is his paradise—his best and happiest hours when he is doing something for his brethren, or visiting and assisting the poor, sick and distressed of his neighbors.

His life has been active and busy, toiling early and late. Sagacious, farseeing and energetic, with great force of character, his mind is capable of grasping large projects, and by his frankness and candor he impresses men, and carries out large undertakings to a successful termination.

We have thus briefly alluded to the history and characteristics of one of our pioneers, who has labored continuously for our Order; one who loves his brethren and fellow-men, and one that is held in high esteem by those who know him. This addition to our illustrated gallery of Workmen, will no doubt be appreciated by many of our readers.

M. T. BREWER, PAST GRAND MASTER WORKMAN OF CAL.

GRAND RECORDER PRATT has in his possession an interesting relic, being a receipt for $156 in part payment for the first beneficiary certificate ever paid by the Order. This took place in Pennsylvania, in 1871. The mode of collecting and paying money was then very crude. The Order was in its swaddling clothes, and it is doubtful if its most enthusiastic supporter would dare to dream that it would attain its present proportions. In nothing has the Order progressed so much as in the perfection and simplicity of its business methods, each year's experience having been fashioned into practice by the Order's wisest heads. It is doubtless very gratifying to our veteran Grand Recorder, who has been with the Order so long and witnessed and has been an active participant in its struggles and triumphs, to see the record the A. O. U. W. has made, and the powerful influence for good it at present possesses. That it may forever continue in its beneficent mission, is our sincere wish.

THE reports from Lodges, elections, etc., somewhat interferes with our usual make-up, and prevents our giving the usual variety of reading. We are under obligations to officers of Lodges and others for the various notes they have sent us. We have endeavored to make room for all, and this issue of the WATCHMAM is valuable as showing the activity of the Order.

WE print an extra number of copies of this issue of the WATCHMAN for circulation throughout the Order. All members have an interest in seeing the A. O. U. W. progress and prosper, and those receiving extra copies, should place them in the hands of those who are likely to become worthy members of our great fraternity. They are also invited to speak a good word for this paper whenever they can.

Do Your Duty.

The Ancient Order of United Workmen is an institution which was founded upon the necessities of man. It had its origin in the sincere desire of one of the humblest citizens of this republic to elevate the moral, social and intellectual status of its members. Father Upchurch saw, and it gave him pain, the constant warring of employee against employer, and the misery which always followed to those who depended upon their daily labor for the bread they ate. He sought a remedy for this, and thus it occurred to him that if they could be brought together in bonds of fraternal love and friendship through the medium of a Lodge many of the bickerings which had heretofor resulted could be avoided. Thus was it that the A. O. U. W. had its birth. The payment of a specified sum of money was an afterthought. It came as a natural sequence to the organization. The early organizers reasoned that if men could join together for mutual aid and protection while living, they could also assess themselves a small sum to protect the families of their deceased brothers in case of death. So has it been step by step that the Order has progressed toward perfection until it stands to-day a monument of nearly absolute perfection, bringing joy, comfort and happiness to thousands of homes which, without its aid, would be scenes of desolation, grim want and despair.

Such being the status of the A. O. U. W., and it being also certain that without the fraternal principle being encouraged, nourished and cherished, it would be impossible to carry out the business feature of the Order, it is certainly short-sighted policy for any brother to decry or make light of that which has proved of such great good to the Order. Take away from the A. O. U. W. the fraternal associations of the Lodge-room, and you have left a cold business skeleton, devoid of life, of charity, hope and protection. Societies such as ours can only be held together by a thorough exemplification of the fraternal principle, and any brother who neglects, or who speaks deprecatingly of it, is endangering that object which was, perhaps, his principal reason in becoming a member. The A. O. U. W. affords protection to one's family at about one-third less than in a purely business association. There are thousands of families who would, perhaps, be left nearly destitute were it not for the Order, and we think many heads of families comparatively poor are more negligent in their fraternal duties than are the more fortunate of their brothers in worldly goods. This should not be; they should foster that which helps them.

THERE is not another jurisdiction in the United States that can compare with California in the activity of the Order, and the interest which the members manifest in its progress. This issue of the WATCHMAN is proof of this. There are notes of progress from different sections of the State, all showing how thoroughly interested the members are in the work. What is worth doing at all, is worth doing well, is the motto which the members of the A. O. U. W. in the Golden State adopt as their rule of action.

A NEW Lodge will soon be instituted at San Luis Obispo, with a goodly number of charter members. The petition has 46 names.

Home Miscellany.

Nate Weston's Debt.

It was, let me see, in '69 or '70. Being an old Californian, I ought to tell you the exact date; but then, I'm not a '49er. If I had come to California in that magic year, or even in the early fifties, the case might have been different. As it is, I must refer you to some one who did. If you will ask any genuine pioneer what year it was that——& Co. made a rule forbidding ladies to ride on the outside of their stage coaches, you will have the date of my story. It was a day in August. Gardener, the driver, sauntered into the company's office in Stockton, and glanced over the register. "Whew!" whistled he; "six white men, eight Chinies and one lady. A sweet ride it'll be for the lady! I unly wish one of the bosses had to ride inside with eight of those pig-tails; for that's the way it'll be fixed."

And that was the way. Every white man was registered for an outside seat, and the Celestials had to be content with what was left. And the lady——she came quietly down the gang-plank of the *Julia*, a young girl, fair and sweet to look upon. "This way Miss," called the busy agent, and May Weston took the place assigned her. One Oriental form after another then filed in filling up the eight remaining seats.

May glanced timidly about her. "Don't be a-feared Miss," said the agent, reassuringly, "them uns is harmless."

"Umph!" grunted the driver. "It's a shame," said the other passengers.

However there was no time for talk. "All Aboard," shouted the agent. Crack! sounded the driver's whip, and the horses sprang to their work with gallant pace.

It was one of those sultry days when the heat seems as intense at 6 o'clock as at noon. Relentlessly the sun poured his beams on man and beast. No wind, scarce a breath of air, and the dust rising just high enough to float in at the open windows and settle stiflingly on all within.

For a while May watched the strange faces about her, and forgot the trials of the road. But after a time the peculiar smell that she had noticed from the first, the smell that proclaims the opium smoker, grew more and more sickening. She leaned far out the window, but the baneful drug seemed to permeate the air.

"Sixteen Mile House," shouted the driver, as he drew up his panting team before a low-built, country inn. "Get out and rest a bit, won't you?" he asked presently of May as he opened the coach door.

"Oh, if you please," answered poor May, pale now, even to her lips.

"Are you sick?" he kindly asked.

"A little," she replied; "perhaps it's the heat. I shall be better now that I can sit in here."

The driver, seeing her cared for by the hostess, turned toward the stables.

"I say, Gardener," said a tall young fellow, accompanying him, "it's abominable to make that girl ride inside with those Chinese; can't you break the rules for once?"

"Fur once," repeated Gardener, puffing hard at his cigar; "once, why, that there law has ben in force well nigh onter a year, and I have broke it about fifty times. Yer see, if a lady is stage sick, and some passenger helps her up the side of the stage whilst I'm lookin' t'other way, it's blamed likely I'd order her down agen; now, ain't it?"

"U———m, I understand;" said Charlie Haywood. Then walking to the door of the tavern, he raised his hat to May and said: "I beg your pardon, but the driver says if you will ride on the outside of the coach, you will not be sick; besides, it is much more pleasant."

"You are very kind," she replied, as a thought of the eight Chinamen, and of that vile odor, came into her mind. "But can I ride there?" "Yes, indeed; ladies generally prefer to do so," he answered; and soon May was in her lofty seat, with the driver on her right hand and a corpulent, grey-haired man, whom the others called "Cap," on her left. Ah, this was a change! The dust could not reach them now; the air, if hot, was pure; the country novel and interesting.

"Friends in Columbia?" said Gardener suddenly to May, "I see you're booked for that camp." "Yes sir;" she answered, "my father lives there; are you acquainted in Columbia?" "I reckon if I ain't I oughter be by this time," he replied.

"Because," she continued, you may know my father; his name is Weston."

"Nate Weston?" querried the driver. "Yes, sir," said May, after a momentary hesitation. The staid old aunties at home had always called him Nathaniel.

"Why, bless you, I've known Nate Weston for the last ten year; and I've known nothin' but good of him, either," he added.

A look of pleasure came into May Weston's bonnie brown eyes; for the driver's words sounded like genuine praise; and it is sweet to hear well of those we love.

"How pleasant," she said, "that you know him. Perhaps you will tell me when we reach his home. You see," she explained, "father, in his last letter, gave me particular directions as to what I should do, if anything prevented him from meeting me in Stockton. He said I need not go quite to Columbia. That the stage passed near his door, and that you would point it out to me." "Jess so," Gardener answered. "I remember me now, the old man told me a week ago that his little girl was coming out from the States, but I took it that his little girl was a child."

"How delightful!" cried May, with the gleesome air of a child indeed. "No doubt papa imagines I'm the same little girl he left at school nine years ago. You see," she continued, "I wrote him we would leave the middle of August, and instead, Mr. and Mrs. Sawyer, who took me in their care to San Francisco, concluded to start the first; so here I am, and papa don't expect me for two weeks. Won't he be pleased when I surprise him to-night:"

The passengers looked pleased, in sympathy.

"Well, Cap," said the driver, addressing the old man, "I'll have yer ter home soon; here we be at the ferry."

Dinner over and the tired, dusty horses changed for fresh ones, once more they started. Through the covered bridge that crosses the Stanislaus, past the toll house, where a young girl gave them a basket of California's luscious peaches; up, up, they began to rise, and May's spirits rose too; for was not this the beginning of the mountains, the mountains that were to be her home?

On they went, till at the foot of the "Big Hill" the driver drew in his horses and called upon the gentlemen to get out and walk.

Deprived of its ballast, the stage rolled and tumbled over croppings of bowlders, so bare and large that May wondered how the horses kept their feet.

Near the top, Gardener pointed to Charley Haywood, and said: "That young feller there, who spoke ter you at the Sixteen, said as how he'd give up his seat and ride on the boot ef I'd break over the rules and let you ride out here. So now's Cap's seat is vacant, I suppose it's no more'n fair ter let him have it."

"Of course not," replied May; "but I don't understand about the rules which you say you have broken."

"You don't!" ejaculated he, surprisedly; "then why in time did you think we put you inside with yon heathen?"

"I don't know, really; I supposed you thought it safer and more pleasant."

"Not much," responded the driver, emphatically. "Once we had an accident on this road, a regular turnover. Don't be skeared, we never have but one in five year, and this was only a year ago. There was a lady on the driver's seat, as you are now; so the company held, that, if a lady was riding in front, the driver could not attend to his business. To be sure, there was a bolt made of poor iron that gave way and let the stage down, but then it was more convenient to charge it to the lady. So the rule was made forbidding women to ride here. Still whenever a lady has been sick and wanted to come out here, I've been too blind to see."

"But is it not known?" querried May.

"Yes," answered Gardener, "always. Some one always blows on me. At first they were wrathy; talked of losing me my place. But, bless you, there's no danger. Sam Smith and I've been on this line too long to git our walking papers for a trifle like that. Halloo, Charlie," continued he, as they came up with the men at this point, "you ken take Cap's place unless you're stuck after your seat on the boot."

"Not in this dust," replied Charlie, mounting to his place.

"By the way," said Gardener turning to May, and striving, as he always did when speaking to a lady, to use his best English, "my friend Haywood is a great pardner of your father's; she's a daughter of Nate Weston's," he added to Charlie. Charlie gave a start of surprise. Nate Weston's daughter, he reiterated.

"Yes," said May, "I have come out to see my father, to live with him."

"What's the matter with you, Charley? You look as if you had seen a ghost," said Gardener. "Haven't you heard Weston say he was looking for his daughter?"

"I thought she was but a little girl," replied the young man, apologetically.

"Papa will be surprised to see me," cried May, eagerly. "I've taken such pains to learn to keep house. Oh, we will be so happy!"

Truth to tell, May Weston was not naturally at home with strangers; but these strangers knowing her father, seemed like oldtime friends.

But Charley did not join in the pleasant conversation, and May, noticing his reserve, grew silent too. At "Taylor's," Charley jumped from the coach, and followed the driver into the stable.

"I say, Gardener," he began, "at Knight's Ferry I had a telegram from father telling me to hurry home; that Nate Weston had been caved on and is dead." "Caved on," echoed the driver.

"Yes, they had finished that shaft and were drifting in, when I came away. Now, what's to be done? I guess I had better take her to our house and let mother tell her," decided Charley. "But," objected Gardener, "she knows the old man cabined at Springfield Flat, and I've promised to set her down there."

"Then, you must tell her, I can't," responded Charley.

The driver shook his head. "You're used to women folks and I ain't," and he walked away, to prevent further discussion.

After that, there were two silent men, while May wondered at the change. On they rolled, through Chinese, Montezuma, Jamestown, Sonora; still neither of the men spoke. Shaw's Flat came in sight, as they rounded the top of the long hill. Charley knew he could postpone no longer, and made one desperate effort. "Miss Weston," he began, "your father has been a friend of ours for many years. My mother and sisters will be glad to see you, if you will go to our house to-night, and will go home with you to-morrow."

"You are very kind," she murmured, "but perhaps you can understand how anxious I am to see papa. It seems to me I could not pass his door."

"But I have another reason," urged Charlie. "I had a message at Knight's Ferry, saying that your father had been hurt by dirt falling on him. Doubtless my mother has been there to-day and can tell you about it."

Poor May turned from one face to the other. She could see the pity with which they regarded her.

"Oh, what is it, what is it!" she cried. "Your words are kind and gentle, but your faces tell me that this is not the worst. My father, oh, my father!"

"God help you, poor child, for you must indeed bear the worst," said Gardener, pityingly.

May made no more outcry; the blood seemed stilled in her veins. At last Charlie spoke again: "So I hope you will come to my mother for to-night."

But she only shook her head and said, piteously, "Please do not ask me."

Soon they stopped abreast a small house, little more, indeed, than a cabin; but with roses and sweet jessamine growing over its porch in a loving, home-like way. At the door a group of men conversed in low, earnest tones.

"I will walk up by-and-by," said Charlie to Gardener, as he assisted May to alight. She followed him silently, making no moaning.

The men rose as they approached, and Charlie talked with them for a moment, in an undertone; then led her through the door.

In the stillness that followed, those rough miners heard her sobs and moans, and the quick tears sprang to many an eye. Not for the man who crushed and pale lay dead within. Such accidents were not infrequent. Many of them were exposed to the same danger, day by day, and they were in a manner hardened. But the sight of this young girl brought to mind thoughts of mother, wife, sister, sweetheart, and their hearts melted in sympathy.

We pass over the funeral; over the kindness and sympathy of strangers. May felt it all, and when Mrs. Haywood took her to her own home, and said, "Give yourself no thought for the future, my child, till you are rested," she realized that she had found friends. So a week passed; then she could be content with idleness no longer.

"Can you tell me how my father's business was left?" she asked Mr. Haywood one morning.

"I cannot," replied he, "but if you wish, I will ask his old partner, Rocky Canyon, to come up this afternoon and explain matters."

Afternoon found May alone, when her father's partner called; and as Mrs. Haywood and the girls were engaged, she answered the bell herself.

"I reckon you're Miss Weston?" he began, awkwardly enough, for Rocky Canyon was ill at ease among women.

"Yes. This is Mr. Canyon, is it not?" asked May simply, as she led the way to the family sitting-room.

"I reckon these yere books o' yer father's hain't no mo' need o' lawyerin' then I hev," began he, plunging at once into the subject, "though I 'low they'll hev ter tek a small dose enyhow. Th' ole man kep' 'em like clock work. Haywood'll tell yer what yer mus' do. I'll leave 'em with yer now. This yere las' claim," he continued like a boy who had learned his lesson, and was hurrying to get through, "we paid $1,200 apiece fur; we cleaned up $2,000 the fust month; las' June, that war. But arter that we los' vein, and it hain't no more'n paid expenses sence. But th' pay-streak's thar, somewhar, and I'll give yer the same fur th' ole man's shear, as he paid fur it, 'lowin' yer wants ter sell." And having thus delivered himself, he rose to leave, evidently much relieved.

"I thank you, Mr. Canyon, for your trouble," said May, rising, too; but he was gone before she could finish. Mrs. Haywood was still busy, and May did not speak of her visitor until they all drew around the pleasant tea table. Then she said: "Mr. Canyon came this afternoon, Mr. Haywood, and left papa's books. He said you would advise as to what I am to do."

"Whom did you say?" asked Charley, with a twinkle in his eye."

"Mr. Canyon," replied May.

"Did you call him Mr. Canyon?" he querried, while a smile went round.

"Why yes; I was alone when he called, and that is what you call him."

"We call him Rocky Canyon, because he was found well nigh dead, from a full into a gulch of that name, but I believe his real cognomen is Augustus Montgomery."

When Nathan Weston's books were examined, his accounts were, as Rocky Canyon had said, like clockwork. But there was one matter of which May Weston had not the slightest previous knowledge.

Before he sought California the first time, in '53, he had failed in a business venture in New Orleans, to the amount of $30,000. Little by little, for he had never been a lucky miner, during his whole life in the Golden State, he had aimed to pay his creditors. No year had passed without some reduction of the debt, until but little more than $6,000 remained unpaid. Ah, how this sum confronted May in all her plans. She had a small amount of money left, and Rocky Canyon had offered her $1,200 for the claim. Her purpose had been to earn her livelihood by teaching. If she sent the $1,200 to New Orleans there would still be $5,000 unpaid.

After all her father's years of patient toiling could she leave this debt uncancelled? Surely not.

"I cannot hope to make more than $600 a year," she reasoned to herself, "and it will cost me $300 to live. It will take me over sixteen years at that rate." Then came a thought of the claim. Every one has faith in its worth, I will hold to that; she decided, and she did. But for herself, she depended on her teaching.

For some time matters moved slowly at the claim. The "pay-streak" kept persistently hid, and water being low in the upper reservoir, mining ceased. After a time word came that a full stream would be turned on, so Mrs. Haywood and May resolved to pay a long-talked-of visit to the claim.

There was a shaft of 30 ft., at the bottom of which quite a room had been drifted out, and in this they stood while Rocky Canyon explained.

"When we'd sunk thet thar shaft this fur, we reckoned we'd struck it rich agen. And so we did till thet thar bowlder stopped us. 'Pears like we're ter be shut off by 'em eternally. We drift in away, on'y to be brought up by one o' them thar blasted stuns."

"Let me try this sport," cried May. She picked at the place awkwardly enough, but the dirt was gravelly and yielded at once. Rocky Canyon watched her at first with an amused look, then seriously.

"I'll be dog-hided ef she haint struck it," he shouted excitedly. "Thet thar gravel's got the right rattle." Taking the pick he struck vigorously, blow after blow, but no bowlder appeared.

"Let us go up again," suggested Mrs. Haywood, "and try it." One by one they entered the bucket and were drawn up. Then came a bucket of the dirt, and Rocky brought his mining pan. Carefully, and with a dextrous movement of his hands, he washed a panful.

As he finished, Mrs. Haywood leaned forward, interestedly.

"It's a fact," she said, "she has struck it, Rocky."

May looked eagerly. She had seen some wonderful specimens of the shining metal, and her hopes were raised. Now she saw a rusty pan, some muddy water, a quantity of black sand, and a few, yes quite a number of gold grains, but the largest not much more than a pin's head in size. May looked at her companions in surprise. Evidently, they were excited, and she wondered at what.

"As much as a dollar!" said Mrs. Haywood.

"I wouldn't teck seven bits for thet thar pan," observed Rocky Canyon.

"A dollar seven bits," repeated May; "that does not seem to me a large sum."

"I reckon yer dunno how many of them thar pans we ken wash in a day," replied Rocky Canyon. "Ef it don't peter out, we're made." And it didn't, at least not till Nate Weston's name was fully cleared.

There was but little left for May after that, if we can call it little, when a clear conscience, and youth and health are left.

Besides, she had her friendships, particularly the friendship of Charlie Haywood. That was what she called it. There came a day when Charlie taught her to call his friendship by a shorter, sweeter name, and May proved herself an apt scholar. Perhaps because Charlie did not rely on some text book. He believed in oral instruction.

So it was settled that there would be a wedding, and a trip to the Bay. Of the first, Rocky Canyon said, "I reckon it's natur for young uns to teck to young uns; but I'll be blowed ef I hain't ben dead stuck arter thet thar gal, ever sence she tuck thet thar pick as peart's a peacock, and struck thet thar gravel streak."

While of the latter, May said, "Charley, dear, let us go in the stage to Stockton. It will be delightful to take that trip once more; that is, if we may ride on the outside."

"There is no trouble about that now, my love" replied Charley. "I heard that when——& Co. learned that a lady was made to ride inside one of their coaches, with eight of our Celestial friends, they removed the obnoxious rule. However, that may be, since then ladies of all ages and degrees of beauty, have occupied at times the seat beside the driver; yet there has been no accident, thanks to good iron."—*Mrs. Rancher in Rural Press.*

"Darling, wake up and stop snoring," said a Detroit woman to her husband. "Eh? whazza matter now?" he asked, as he half raised up in bed. "Won't you please stop snoring? If you only knew how home-sick it made me I'm sure you would." "Home-sick! How the deuce can my snore make you home-sick?" "Why, you know, darling, that the home on the coast from which you took me, a joyous bride, was only half a mile from a government fog-horn, and every time you snore it reminds me so of home that I just can't stand it. Please lay on your side, and have some little respect for my feelings." And then the brute spread himself out on his back and in five minutes had her bathed in tears, as visions of the old home crept upon her.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of thirteen letters.
My 1, 4, 11, 9, is a bound.
My 6, 2, 8, is a kind of meat.
My 3, 12, 10, 13, is a place for drying.
My 7, 5, 4, is a unit.
My whole is a large New England lake.

JAMES.

Hidden Proverb.

[One word of the proverb is concealed in each sentence.]

There's many a slip 'twixt the cup and the lip.
Economy is in itself a good income.
A guilty conscience needs must trouble its possessor.
Honesty is the best policy.
As the twig is bent the tree is inclined.
A fool and his money are soon parted.
A rolling stone gathers no moss
Before you jump the wall consider well its hight.

JOSEPH.

Quotation Acrostic.

The earth was sad—the garden was a wild—
And man—the hermit—sighed, till woman smiled.

Love drew your picture in my "heart of heart,"
And memory preserves it beautiful.

The old oaken bucket, the iron-bound bucket,
The moss-covered bucket which hung in the well.

But virtue bruised exhales a purer breath,
Sighs fragrance forth, and triumphs over death.

One crash, the death hymn of the perfect tree,
Declares the close of its green century.

A friend is gold: if true, he'll never leave thee;
Yet both, without a touchstone, may deceive thee.

The initials of the authors of the above lines give the name of the author of the following:

Beware of desperate steps!—The darkest day,
Live 'till to morrow, will have passed away.

JERRY.

Decapitations.

1. Behead a man's surname and leave a fish.
2. Behead a vessel and leave a domestic animal.
3. Behead a plant and leave a kind of drink.

The Animals and the Telegraph.

A writer in *Youth and Pleasure* says: If you will kick or pound on a telegraph pole, or place your ear against one on a windy day, what will the noise remind you of? A hive of bees? Precisely. So it does the bears in Norway. Bears are passionately fond of honey, and when in one of the wild districts bruin hears the humming of the wires, he follows the sound to the posts where it is loudest, and begins to tear away the stones heaped round the poles in rocky places to steady them, in order to get at the hive, which he imagines to be there. In his disappointment and disgust he usually leaves savage marks of his claws in the wood. Nor is he the only victim of the wires. In the electric exhibition at Paris they show the top of a thick pine telegraph post, through which a woodpecker has drilled a hole several inches in diameter. The bird had apparently perched on the pole and taken the humming of the wires for the buzzing of a nest of insects in the wood, and set himself manfully—or birdfully—to dig them out. Wolves will not stay in Norway where a telegraph line has been built. It was formerly the custom to protect farms by planting poles round them strung with cords, something like rabbit snares, and gradually the wolves came to respect these precautions, so that a line stretched across the neck of a peninsula would protect the whole district. The wolves take the telegraph for a new and improved snare, and promptly leave the country when a line is built. On our own treeless plains the buffalo hails the telegraph pole as ingenious contrivance for his own benefit. Like all cattle, he delights in scratching himself, and he goes through the performance so energetically that he knocks down the post. An early builder of telegraph undertook to protect the posts by inserting brad-awls into the wood, but the thick-skinned buffalo found the brad-awl an improvement, as affording him a new sensation, and scratched down more poles than ever. In Sumatra the elephants are systematically opposed to telegraph lines, and at least 20 times a year make raids on them. In May, 1870, the elephants tore down the poles for a distance of several furlongs, and hid the wires and insulators in the cane jungle, and for three nights in succession they repeated the performance as regularly as the repairers built the line during the day. The monkeys and apes are about as formidable enemies, as they use the wires for swings and trapezes, and carry off the glass insulators as valuable prizes; then, when the repairer goes to correct the mischief, he may be pounced upon by a tiger or driven to the post by a mad buffalo. In Japan the special enemies of the telegraph are the spiders, which grow to an immense size, and avail themselves of the wires as excellent frameworks for their webs. So thick are the cords the Japanese spiders spin that often, especially when they are covered with dew, they serve to connect the wires with each other or the ground, and so to stop them from working. In the sea the wires are not any safer, as a small worm has developed itself since cables came into fashion which bores its way through iron wire and gutta-percha, lets in the water, and so destroys a line worth millions of dollars. When a great storm comes on in the center of the ocean, and the cable breaks while it is being laid or threatens to break, no one is alarmed. They fasten the cable to a buoy and come back afterwards and pick it up, or if it is at the bottom of the sea, they drop a dredge, with a mile or so of rope, and fish out the precious thread, as large as one of your fingers, almost as easily as you would fish up a penny from the bottom of a tub of water with the tongs. But the little worm no bigger than a needle is more formidable than the elephant on shore or the hurricane at sea.

Humorous.

Chips.

WHEN is a girl like a music book? When she is full of airs.

MOST men are anxious for long life, but the lawyer enjoys a brief existence.

IN mercantile circles a hanging is now alluded to as a forced suspension.

THE deepest insult that can be given in Deadwood is to say: "You ain't worth lynching."

THE man who was born with a silver spoon in his mouth must have lived in stirring times.

THE watchmaker can't afford to do a cash business because he makes all his profits on time.

NO matter how obstinate a man may be, he generally hauls in his horns after entering a tavern.

NATURALIST: Can a wolf become fond of a man? He can, and would just as soon have him raw as cooked.

"KNOW thyself" may be an excellent sort of proverb, but it's forcing a pretty tough acquaintance on some folks.

A RECIPE for lemon pies vaguely adds, "Then sit on a stove and stir constantly." Just as if any body could sit on a stove without stirring constantly.

A LITTLE boy remarked: "I like grandpa because he is such a gentlemanly man; he always tells me to help myself to sugar."

"COLONEL," said a man who wanted to make out a genealogical tree, "Colonel, how can I become thoroughly acquainted with my family history?" "Simply by running for Congress," answered the colonel.

Household Hints.

SWEDISH RYE BREAD.—Set a sponge at night with warm water and rye flour, adding yeast, salt and a little sugar. In the morning work the risen sponge into a stiff dough, using wheat flour or Indian meal, or both, but no more rye. Mold into smooth loaves and lay them on a clean bread-cloth to rise, with a single fold of the cloth over them. When ready for the oven, wet each loaf with cold water, then take it from the cloth and place it in the oven—not in a pan, but on the bottom of the oven. According to Olga's theory, that is how rye bread is to be baked. Furthermore the baking must be slow and long, and when about two-thirds completed the loaves are treated to another cold water bath, which makes the thick crust just as it ought to be, both tough and tender, and results in very good and wholesome bread.

CIDER JELLY.—Soak two ounces of gelatine in a quart of cold water for an hour; then add to it a stick of cinnamon, broken into pieces, a blade of mace and a few cloves, also the juice of a lemon, the beaten white of an egg, one pound of white sugar and a quart and a pint of cider. Let it come slowly to a boil, and boil 15 minutes. Pass through a jelly bag into molds which you have rubbed with butter. You may put in only one quart of cider, and not boil it at all, but strain it after you have let it stand for half an hour in a warm room.

CLAM SOUP.—Have 25 clams opened, saving as much of their liquor as is possible. Put the liquor over the fire, with water sufficient to make it palatable. Let it boil, and skim well. Chop the clams quite fine and add to the boiling liquor, with a blade of mace, if liked, and a large tablespoonful of butter rubbed in two of flour. At the last, add a quart of boiling milk, and stir all well. Beat a fresh egg up very light and put in the bottom of the tureen, over which pour the soup. Send to the table with toasted bread cut in dice.

OLD ENGLISH PLUM-PUDDING.—To make what is termed a pound pudding take of raisins well-stoned and currants thoroughly washed one pound each; chop a pound of suet very finely and mix with them; add a quarter of a pound of flour, or bread very finely crumbled, three ounces of sugar, one ounce of grated lemon-peel, a blade of mace, half a small nutmeg, one teaspoonful of ginger, half a dozen eggs, well-beaten; work it well together, put it into a cloth, tie it firmly, allowing room to swell, and boil not less than seven hours. It should not be suffered to stop boiling.

Health Column.

An Important Question—How do You Sleep?

One of the most important things to know about any man upon whom you are going to place any dependence, is how he sleeps. Sleeplessness may sometimes be involuntary. There may have been some shock to the man's nerves which has made him insomnolent; but sleeplessness is more frequently voluntary. Men choose to push their studies or their work into those hours when they should sleep. It does not matter for what cause any man may do this, the mere fact of not sleeping spoils his case. He may spend his nights in the theater, in the study, or in the "protracted meeting." It will make no difference; the result to the body will be the same. The sleep was not had, and for that the man must pay.

One man may do with a little less sleep than another; but, as a general rule, if you want a clerk, a lieutenant, a lawyer, a physician, a legislator, a judge, a president or a pastor, do not trust your interests to any man that does not take eight good solid hours of sleep out of every 24. Whatever may be his reason for it, f he does not give himself that, he will snap some time just when you want him to be strong.

The intellectual and moral connections of sleeping have, I think, not been sufficiently appreciated. Men and boys have been praised for "burning the midnight oil." Now this "midnight oil" is a delusion and a snare. The student who is fast asleep at 11 o'clock every night, and wide awake every morning at 7 o'clock, is going to surpass another student of the same intellectual ability who goes to bed after 12 and rises before 5. In sleep, the plate on which the picture is to be taken is receiving its chemical preparation; and it is plain that that which is the best prepared will take the best picture.

Men who are the fastest asleep when they are asleep, are the widest awake when they are awake.

Great workers must be great resters.

Every man who has clerks in his employ ought to know what their sleeping habits are. The young man who is up till 2, 3 and 4 o'clock in the morning, and must put in his appearance at the bank or store by 9 or 10 o'clock, and work all day, cannot repeat this process many days without a certain shakiness coming into his system, which he will endeavor to steady by some delusive stimulus. It is in this way that many a young man begins his course to ruin. He need not necessarily have been in bad company. He has lost his sleep; and losing sleep is losing strength and grace.—*Rev. Dr. Deems.*

HOW VOLTAIRE CURED THE DECAY OF HIS STOMACH.—In the "Memoirs of Count Segur" there is the following anecdote: "My mother, the Countess de Segur, being asked by Voltaire respecting her health, told him that the most painful feeling she had arose from the decay in her stomach, and the difficulty of finding any kind of aliment that it could bear. Voltaire, by way of consolation, assured her that he was once for nearly a year in the same state, and believed to be incurable, but that, nevertheless, a very simple remedy had restored him. It consisted in taking no other nourishment than yolks of eggs beaten up with the flour of potatoes and water." Though this circumstance concerned so extraordinary a person as Voltaire, it is astonishing how little it is known and how rarely the remedy has been practiced. Its efficacy, however, in cases of debility, cannot be questioned, and the following is the mode of preparing this valuable article of food as recommended by Sir John Sinclair: Beat up an egg in a bowl and then add six tablespoonfuls of cold water, mixing the whole well together; then add two tablespoonfuls of farina of potatoes; let it be mixed thoroughly with the liquid in the bowl; then pour in as much boiling water as will convert the whole into a jelly, and mix it well. It may be taken alone or with the addition of a little milk in case of stomachic debility or consumptive disorders.

NEAR-SIGHTEDNESS.—Persons living in cities begin to wear glasses earlier than country people, from the want of opportunities of looking at things at a distance. Those who wish to put far off the evil days of "spectacles" should accustom themselves to long views. The eye is always relieved and sees better if, after reading a while, we direct the sight to some far-distant object, even for a minute. Great travelers and hunters are seldom near-sighted. Sailors discern objects at a great distance with considerable distinctness, when a common eye sees nothing at all. One is reported to have such an acute sight, that he could tell when he was going to see an object. On one occasion, when the ship was in a sinking condition, and all were exceedingly anxious for a sight of land, he reported from the look-out that he could not exactly see the shore, but he could pretty near do it.—*Journal of Health.*

TOOTHACHE.—There should be a remedy for toothache in every house where there are children. The following is reported by medical authority as reliable: Take of carbolic acid (saturated solution), chloral hydrate (saturated solution), paregoric, fluid extract of aconite—of each one ounce; oil of peppermint, half an ounce; saturate a piece of cotton and pack tightly in the cavity.

Worth Knowing.

HOW CAN YOU TELL A GOOD CIGAR?—They used to say that a good cigar could be known by the light brown specks on it. These were made by worms, the story was, and the worms were epicures in tobacco, and would touch only the best. But the chemists soon found a way of simulating these worm specks. So that spoiled the test. Then there was no other guide but the ashes. If these burned white, the cigar was good; if not, bad. But the enterprising tobacconists soon found a way to make the vilest cabbagenia burn as spotlessly white as the best Havana. Another test gone. Finally the makers of choice cigars put a little red label around each. This was thought to be something which would always be a sure guide. And so it would be, but unfortunately some of the manufacturers have, by a strange mistake, put the labels on the cabbagenias as well as the Havanas.—*Boston Transcript.*

TO STAIN DRIED GRASSES.—Bunches of dried grasses can readily be dyed of a great variety of tints by dipping them into an alcoholic solution of the various aniline colors. Some of these have a beautiful rose shade, others red, blue, orange, purple, etc. The depth of color can be regulated by diluting the dyeing solution with water or diluted spirits. When taken out of the dye, the grasses should be exposed to the air to dry off the spirit. Then they are ready to be arranged into bunches or bouquets, but not until they are quite dry. The pink saucers sold by most druggists contain enough rose dye for two ordinary bouquets. The best way to use it is to wash it off with water and lemon juice.

IMITATION GROUND GLASS.—A very useful kind of varnish is made known by Leon Vidal, which is excellent for producing imitation of ground glass, and will doubtless be found available for other purposes. The formula is: Sandarac, 18 parts; mastic, 4 parts; ether, 200 parts; benzol, 80 to 100 parts. It would be well if the ether in its composition could be replaced by some less expensive liquid, otherwise the cost of coating a large window would be rather considerable. Perhaps some one will be able to improve upon this formula. One great advantage of such a varnish is that it can be easily removed when no longer required to produce an opaque or semi-translucent window.

CHESTNUT FLOUR is made by drying, or, rather, roasting fresh chestnuts for three days and nights in a drying room, on a latticed floor covering a chamber in which a fire is lighted. The husk is then easily removable, and the kernel is ready to be ground into flour, which is of a pinkish color. This is mixed to the consistence of cream with water, and poured on fresh chestnut leaves to be baked into small circular cakes between heated stones. Chemical analysis shows it to contain 40% of nutritious matter soluble in pure water, and it ought to be easy of digestion and suitable for children's food.

BROWN BRASS.—The following recipe is said to produce a good brown tone upon brass: The article, after having been thoroughly cleansed and freed of all traces of grease, then polished, is dipped for about half a minute into a cold solution of 10 grams of hypomanganate of potash, 50 grs. green vitriol, 5 grs. muriatic acid, and 1 liter water; then rinse well and dry in fine soft sawdust; if a reddish cast is desired, dip the article into a second bath heated to 60° C., of 10 grs. chromic acid, 10 grs. chloric acid, 10 grs. hypomanganate of potash, and 50 grs. blue vitriol (sulphate of copper) dissolved in 1 liter water. The latter mixture alone produces a light bronze. The article may afterward be heated in an oven, which operation, it is said produces a very rich tone.

CEMENT FOR GLASS.—To make a cement for glass that will resist acids, take 10½ lbs. of pulverized stone and glass, and mix with it 4¾ lbs. of sulphur. Subject the mixture to such a degree of heat that the sulphur melts. Stir until the whole becomes homogeneous, and then run into molds. When required for use it is to be heated to 248°, at which temperature it melts, and may be employed in the usual manner. It resists the action of acids, never changes in the air and is not affected in boiling water. At 230° it is said to be as hard as stone.

COLORING GLASS.—Colors are usually imparted to glass in the melting pot; for blue, oxids of cobalt is used; for red or gold, sub-oxide of copper. Glass is stained by painting its surface with a fusible-colored glass ground to a fine powder and mixed up with gum water or turpentine, and, after trying, then heating the painted glass in a furnace until the coating fuses. Collodion, shellac or spirit-copal varnishes, properly colored with one of the coal-tar dyes, can in some cases be advantageously employed as a colored wash for white glass.

TO PROTECT ROOFS.—It is claimed that a coat of lime, salt and fine sand or wood ashes, applied as in whitewash, will make an ordinary shingle roof 50% safer from fire through falling cinders, and will also protect the shingles against rotting from exposure to the weather and against warping. Indeed, the more weather-beaten the shingles, the greater benefit they derive.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

Installation of the Officers of Hercules.

Friday evening, Jan. 6th, Deputy Smith, with the assistance of Bros. E. M. Reading, as P. G. M.; Isaac Birnbaum, G. F.; F. J. Symmes, G. O.; T. A. Farless as G. Guide, installed the officers of Hercules. The work was done in an admirable manner. The following were elected Representatives to the Grand Lodge: P. E. Hilton, W. W. Morrison, J. W. Reid. There was a good attendance and a lively meeting. The new officers entered upon their duties with good spirit, especially the veteran parliamentarian, L. M. Manzer, M. W.; Bros. J. W. Blake, and Sidney Worth were elected Med. Exs.; Jos. L. McKee long term and W. W. Morrison unexpired term as Trustees. After the business of the Lodge had finished, Deputy Smith, Bros. Farless, Reading and Symmes, of Fidelity; Pierce, Organist of Excelsior, and Birnbaum, of Washington, made speeches that were acceptable, and received a hearty and warm greeting from all present. The officers of Hercules, consisting of Bros. Carroll, Manzer, Congdon, Miller, Powell, Megowan, Leitch, Mersfelder, Jr., made congratulatory remarks, and pledged anew their fidelity to Hercules. Bro. Manzer, in the course of his speech, advanced ideas and features in this Order that should be preserved, and in due time we shall produce them in the WATCHMAN.

Fidelity, 136.

As an evidence of the steady growth of our Order in San Francisco, this Lodge gave the M. W. degree to 13 men in the prime of life on Wednesday evening, Jan. 11th, and a number of applications received for the degrees.

Harmony, No. 9.

H. H. Mayhew, D. D. G. M. W., assisted by P. M. Ws. Booth, Poland, McCann, Henry and Fishbeck, installed the officers of Harmony. The report of the Recorder showed an increase of 34; sick benefits paid out, $452. After the business of the Lodge had been finished, Bro. Cohn, Financier, in a real good speech, recited the arduous labors of Wm. Decker, acting P. M. W., saying he had never missed a meeting during his administration, and, as a token of the appreciation which was held by brother Workmen, he herewith presented him, on the part of his Lodge, with a fine gold watch of exquisite finish and excellence. Bro. Decker did not seem to be in a speaking mood, but we heard him say that he would give his *time* and talent for the advancement of Harmony Lodge.

Myrtle, 42.

Myrtle Lodge, No. 42, celebrated its 14th quarterly meeting at Pythian Castle, 913 Market street, on New Year's eve. The exercises consisted of addresses by H. L. Sanborn, M. W., and J. H. Barry, P. M. W. By request, H. L. Sanborn, M. W., presided. The musical and literary part was arranged by Bro. A. W. Bogart, and he deserves great credit for the selection of his talent. The election of officers caused a little delay in the production of the programme, for which an apology was made, to the ladies especially, for their patience. There was no need of an apology, for the ladies are very partial to Myrtle Lodge. Prof. C. S. Hoffman performed a piano solo; Chas. E. Baker delivered a song, and received an encore; recitation by S. S. Johnson; solo, "Lorena," by Mrs. H. Lincoln; duet by Chas. E. Baker and Miss F. Lincoln; song, A. W. Bogart; encored; duet, Mesdames Joost and Bolte; recitation, W. H. Ormed; Prof. Eastman gave a recitation, and was recalled, when he gave an imitation of two men going home late at night from the Lodge (not the A. O. U. W.); closing ode, by Chas E. Baker, in which he invited all present to join in chorus. H. L. Sanborn then thanked the audience for their kind attention, and mentioned that as they passed out they would receive a token of respect in memory of Myrtle Lodge, which was a New Year's card, with compliments. Reported by C. H.

Installation of Officers, of Friendship, 179.

The officers of this Lodge were installed by Caleb Brind, D. D. G. M. W., assisted by G. Falkenstein, as P. G. M. W., and Wm. F. Cady, as G. G. During the evening, Chas. M. Creighton, P. M. W., was the recipient of a fine and magnificent silver pitcher, on which was inscribed "Chas. M. Creighton, P. M. W., from Friendship Lodge, No. 179, A. O. U. W., Jan. 1, 1882". Bro. Daniel C. Bruton, M. W., made the presentation speech in his happy manner, which was feelingly responded to by Chas. Creighton, P. M. W. Under head "Good of the Order" Bros. Brind, Cady, Dr. Jewell, and Bro. Irvine, of Oregon, together with Bros. Mann and Kittridge, made acceptable and pleasing remarks. The word was suggested by Dr. Jewell and passed along the line on this evening, to increase their membership largely this term. Friendship has very good clerical officers, and that the Lodge appreciates their services was evident from the fact, that Recorder Gambs, Financier Keefe and Receiver Titscher, were re-elected to their respective offices.

Presentations.

At the Lodge-room of Sts. John Lodge after the installation services on Thursday evening, the retiring P. M. W., J. O. Jephson, was the recipient of a magnificent P. M. W. badge. It is made of solid gold, with C. H. P. on the upper bar, with a fine emblem made of a fine specimen of haliotus or abalone shell, representing the seal of the Lodge suspended from the Holy Bible. On the lower bar there is engraved these words: P. M. W., Sts. John Lodge 73, A. O. U. W. On the reverse side are these words: "Presented to Bro. J. O. Jephson, P. M. W. of Sts. John Lodge, No. 73, A. O. U. W., in token of his faithfulness in office, and our esteem for him as a brother, Dec. 29, 1881." The presentation speech was made by Bro. John E. Purdy, whose inimitable manner gave zest to the occasion, and made our faithful P. M. W. recognize the fact that his zealous care and labors in Sts. John Lodge were appreciated. Bro. Jephson seemed to be more than pleased, made a fine speech, and in the fullness of his heart promised to guard and promote the welfare of Sts. John Lodge, A. O. U. W. This gratifying exhibition of good feeling was followed by the presentation of a fine gold pen to J. D. Wheelock, Receiver of Sts. John Lodge for four terms. J. D. Prather, P. M. W., in a humorous way made the speech on this occasion, Bro. Wheelock answering in the same pleasant vein, hoping to be able to write good balances for the brethren of Sts. John Lodge in the coming term. The P. M. W. badge presented on this evening was manufactured by Bro. R. W. Jackson, 614 Market street.

Noe Valley, 185

The officers elect of Noe Valley Lodge, No. 185, were installed on Tuesday evening, Jan. 3d, by A. A. Egleston, D. D. G. M. W., assisted by J. D. Thompson as P. G. M. W., and Chas. D. Coon as G. G. There are four members of the same family (Thompson), belonging to Noe Valley. Three have been elected successively as M. W. The sitting P. M. W. is a son of the present M. W. This Lodge, although situated on the outskirts of town, is in a thriving condition, and has a membership of 43. The question of sick benefits has come up but has not yet been settled.

Olympic, 127.

The officers elect of this Lodge were installed on Tuesday evening, Jan. 3d, by Wm. B. Smith, D. D. G. M. W., assisted by R. A. Lindsay as P. G. M. W., and E. M. Reading as G. G. After installation, a recess was declared, and social converse ruled for a short time. The regular business was then proceeded with, and D. L. Dunlap and W. F. Rossbach were elected as representatives to the Grand Lodge. When "Good of the Order" was reached, E. M. Reading, P. M. W., spoke a few felicitous words, being followed by Deputy Smith and members of Olympic. The Lodge is now well equipped for a successful term. The 100 mark has been reached and passed. Several propositions for membership are on the way, and no doubt the next term will be as successful as the last.

Unity 27.

The officers of No. 27 were installed on Tuesday evening, Jan. 3, 1882, by Caleb Brind, D. D. G. M. W., assisted by G. Falkenstein, P. M. W., acting as G. P. M. W., Jas. H. Baird as G. F., and P. T. Hollings, G. O., and J. Davis, as G. G., with the adjunct of Bro. Jas. Booth as organist. There was a goodly number present, and the installation services were happily performed, and there was apparently a feeling of confidence and pride among members that the executive officers would prove worthy of their important trust. The election of Representatives resulted in the choice of P. Abrahamson, G. Winehill, P. T. Hollings and S. Rosenfeld. A vote of thanks was extended to the Grand Officers for their services in installing the officers. After the election of officers, Bro. T. P. Williams, Orator of Unity, 27, in an eloquent and appropriate speech, presented S. Rosenfeld a magnificent P. M. W. badge made of solid gold and unusually elaborate finish. On the front of the badge is, "Unity, 27, A. O. U. W." On the back are the words, "Presented to Bro. S. Rosenfeld, P. M. W., by the members of Unity Lodge, No. 27, A. O. U. W., Jan. 3, 1882." Bro. Rosenfeld seemed to overflow with gratitude, and in his kindly and considerate manner, responded with thanks and good wishes to the brethren of Unity, individually and collectively. After the meeting, Bros. Winehill and Rosenfeld, Representatives, set the boys up with a collation, which was interspersed with toasts, speeches and general rejoicing.

Washington, 60.

The solid members of Washington met in force on Thursday evening, Jan 5th. Bro Smith, D. D. G. M. W., installed the officers, with P. M. W. Lindsay, Wolfsohn and Schunhoff, of Washington, assisting, in that admirable manner for which he justly has the reputation. After the business, Bros. Smith, D. D. G. M. W., and Reading, of Fidelity, made good speeches, especially Bro. Reading. A pleasant surprise was in waiting for Bro. Smith. Isaac Birnbaum, P. M. W., in a few well-chosen words, presented him with a beautiful basket of flowers, for which he expressed his gratitude and thanks. Bro. Triest, for a long time Financier of this Lodge, has kindly consented to act as Guide this term, and is our agent to receive subscriptions for the WATCHMAN.

The brethren of Washington, No. 60, with their wives, daughters and guests, assembled in their Lodge-room, B'nai B'rith building, on Thursday evening, Jan. 12th, 1882. The pleasant affair was an informal family gathering and at request of Bro. Geo. A. Knight, Deputy Smith presided, and the exercises were opened by a piano solo by Prof. Arrilligo in one of his grand efforts. Reading, comic, Bro. Porter, which was quite amusing. Solo, Mr. Loganstein, Prof. Arrilligo accompanist; an artistic effort, in deep basso voice, that was given a hearty encore. Recitation, Eugene Davis, "The Hero Boy of the Ship;" feelingly rendered and received a hearty recall, which was kindly answered. Solo, Mrs. Lidia Schunhoff, wife of P. M. W. Schunhoff; this lady has a rich, sweet voice, and her pleasing effort was awarded a hearty recall, and at the close she was presented with a large basket of flowers. Original essay, "Tobacco and Temperance," Miss Rachel Wolfsohn, daughter of Henry Wolfsohn, P. M. W., a bright little girl of 10 years; this was the hit of the evening, and deservedly so, which the whole audience enthusiastically endorsed. At the close she was presented with a beautiful bouquet. The essay will be published in the WATCHMAN. Address, J. Meredith Davies, P. M. W. of the jurisdiction of Iowa. Bro. Davies is a great favorite among California Workmen, and on this evening, by his interesting speech, he contributed to his popularity. A pleasing part of Bro. Davies' address was the presentation of a magnificent souvenir to Isaac Birnbaum, acting P. M. W. This remembrance was a silver water pitcher and goblets mounted on a framework of silver standing two ft. high, artistically wrought and ornamented with flowers, little angels, etc. Inscribed thereon are these words; "Presented by the members of Washington Lodge, No. 60, A. O. U. W., to their P. M. W., Isaac Birnbaum, Jan. 12, 1882." Bro. Birnbaum was evidently taken by surprise, and in words of tenderness, thanks and gratitude to his brethren, accepted this token of their esteem, pledging to them his life devotion. Wm. H. Barnes, G. M. W., made one of his grand speeches, that carried his audience to a point of enthusiasm seldom seen in a Lodge room. As Bro. Barnes was about to take his departure, he was urgently asked to give a solo. Chinese impersonations, Mr. Goff, who was very amusing, and was recalled. Solo, Geo. A. Knight, organist of Washington, a fine effort that was well received. Recitation, Mrs. Evalyne Ludlum, "The High Tide on the Coast of Lincolnshire." A sentimental piece that was feelingly and beautifully rendered, and at the close she was presented with a large basket of flowers. This most interesting and pleasing entertainment was brought to a close by a solo, by Mr. Meyer.

Silver Spray, 3, D. of H.

The last meeting of Silver Spray, D. of H., on Jan. 9th, was well attended, and the following officers installed by Deputy Shaw: Sister Mrs. H. Jones, W. S. of H.; Sister Mrs. Robt. Caldwell, S. of H.; Sister Miss Lincoln, S. of C.; Sister Miss L. McNear, S. Sec'y; Sister Mrs. T. H. Macdonald, S. T.; Sister Mrs. Matt Lindsey, S. Usher; E. H. Black, I. W.; R. Mayow, O. W. After installation, C. C. Terrill, P. M. W. of Valley, in his peculiar and happy manner, presented Miss Nettie Thompson a fine, heavy gold P. S. of H. badge, on which was inscribed, "Presented to Miss Nettie Thompson, P. W. S. of H., by the members of Silver Spray, D. of H." Sister Thompson received her well-earned souvenir with modesty and grace, thanking her sister and brothers, and promising her best efforts for Silver Spray in the future. This pleasant remembrance was followed by a magnificent gift to Robt. Mayow, O. W., since the organization. Geo. T. Shaw, D. D., in a pleasing manner, handed to him a full set of silver knives and forks, tablespoons and teaspoons. Bro. Mayow, in accepting this magnificent gift, deemed himself unworthy of such regard. As it was in a common box, he dryly remarked, that he thought it was a box of soap. After which a fine collation was spread in the banquet room.

Aurora, 8, D. of H.

Tuesday evening, Jan. 10th, was a brilliant event in Aurora's fraternal history. Extensive preparations had been made to receive guests, and it was also vaguely whispered that something of unusual import was to occur during the evening. The newly elected officers for the ensuing term were installed by G. W. Dixon, acting as G. M. W.; F. W. Rossbach as G. P. M. W.; and Edward Holland as G. G., as follows: Mrs. C. D. Dunn, P. W. S. of H.; Mrs. Edward Holland, W. S. of H.; Mrs. F. W. Rossbach, S. of H.; Mrs. J. P. Keating, S. of C.; Mrs. A. H. Cummins, S. Treas.; Miss Alice Doud, S. Sec'y; Miss Annie Congdon, S. Usher; W. H. Barkley, I. W.; S. F. Freeman, O. W.; Mrs. H. B. Congdon, Mrs. E. S. Doud, Maids of Honor. After the installation the following programme was rendered: Piano solo, Prof. H. B. Passmore; song, Bro. T. J. Gough. A few remarks were then made by Bro. A. H. Cummins, in which he eloquently, earnestly and pathetically pictured the goodness of fraternal societies, his remarks having an added significance from the fact that he mourns the loss of a beloved brother. He paid a graceful tribute to Bernal Lodge (of which his brother was a member) for the devotion and zealousness to duty they manifested when death entered his family. Piano duet, Misses Congdon and Sutton; recitation, Mrs. Edward Holland, W. S. of H.; song, Prof. Passmore; recitation, Prof. H. G. Eastman. Then the event of the evening took place, being the presentation of a handsome gold badge to the retiring W. S. of H., Mrs. C. D. Dunn. The badge is in the form of a heart, the front side being the California coat of arms, with a diamond set near the top, and Aurora's light shedding its refulgent rays. On the back is engraved: "Presented by Aurora Lodge, No. 8, D. of H., to Mrs. C. D. Dunn, P. W. S. of H., Jan. 10, 1882, A. O. U. W." The presentation speech was made by Dr. C. T. Deane, and responded to by the recipient with evident feeling. Sister Dunn has earned the respect and sincere good will of the Lodge by the creditable manner in which she has presided. Coming into the Lodge when it was organized, as a stranger, and her installation as presiding officer being the result of a little strategy, she has nevertheless taken hold of the work earnestly and heartily, and retires with the highest honors. But there was something else on the programme, and when F. W. Rossback, P. M. W., of Olympic, stepped to the front and presented, in a neat speech, Mrs. G. W. Dixon, P. W. S. of H., a gold badge, there was evident satisfaction. The badge is similar to that of Sister Dunn's, the lettering on the back only being different. After this manifestation of the Lodge's regard for worthy officers, an invitation was extended for all to repair to the banquet-room, and each brother procuring a sister (not his wife), marched in order to where a bountiful collation had been prepared by Chas. F. Seaburg. After a thorough sampling of the good things furnished, the company adjourned, all apparently satisfied with a well-spent evening.

Oakland Lodge Locals.

Occidental, 6.

On Dec. 29, 1881, this Lodge gave an entertainment and social dance at their Lodge-room at Kohler's hall, Oakland. It was given by the members in honor of the officers of their last term, of which Bro. J. J. Schutz was M. W. Without exception, this Lodge has actually done wonders during the past term. They have, to commence with, increased their membership to over 150 members, which entitles them to three delegates to the Grand Lodge. They have also been more than charitable during that time, and not only paid promptly their sick benefits, but donated wherever needed, and have over $1,200 on hand, and the New Year's present to their members was the payment of assessment No. 1 out of the general fund. It is no wonder then that their social gathering that evening was more than a success; it looked more like a triumph or ovation. Only members and their families were present. The literary part was opened by some well chosen remarks of their Master Workman, J. J. Schutz. Then followed an opening march, played on the piano by Mr. and Miss Hammer; recitation by Bro. Osborne, M. W. of Oak Leaf Lodge; duett (nicely sung), by Misses Hoyt; recitation, "The Orphan Boy," by Master Stevens; grand aria (most charmingly and artistically sung), by Mrs. H. Reinhart; song, by Chas. E. Baker, of Myrtle Lodge, S. F.; the master of ceremonies, (Bro. Schutz), then in his happy style introduced the great West Oakland quartette, Mrs. W. G. Hawkett, Miss Webb, Bros. Carroll and Newcomb, who had hardly finished their beautiful "Moonlight Song," when the large assemblage demanded an encore. Dancing was then in order, and at about 11 o'clock the whole force of Occidental converted, in less than five minutes, the dancing hall into a dining hall, which was with no little pleasure enjoyed by everybody. This is the first of a series of entertainments to be given by this splendid Lodge during their next term.

Oakland, 2.

The Lodge editor sends the following: At the conclusion of the installation ceremonies, Bro. M. Eaton arose and addressed the Lodge, and Past Master Workman Griffin as follows:

BROTHERS:—The pleasing duty has devolved upon me to perform one of those happy offices, which give to life in general, and associational life in particular, its most happy and peculiar charm. For the past 12 months this Lodge has been presided over by an officer who not only has filled his chair in person during the 52 weeks of his incumbency, but has done so with equal dignity to himself and satisfaction to the Lodge. He has been not only the Master Workman of the Lodge, but its zealous and efficient guardian, as well as the courteous friend and brother of all its members. Bro. Past Master Workman Griffin, the members of Oakland Lodge, No. 2, A. O. U. W., have chosen this as a suitable occasion of showing to you their appreciation of your merit—both as a man and their past-presiding officer. Accept this badge as a token of their esteem and with it the hope of the Lodge, that its wearing may be as pleasurable to yourself as was your incumbency of office profitable to the Lodge. Past Master Griffin, taken completely by surprise, blushed like a school boy, thereby proving his modesty as he had previously proved his merit. Rallying quickly, however, he replied in a few earnest words replete with thanks, good feeling and good sense. Thanks for the bestowal, good feeling for the Lodge and its members and good sense in the sound advice given for the conduct and government of the Lodge. The presentation consisted of a handsome solid gold Past Master's jewel, for which $40 had been paid by the members. On the converse side of the pendant were arranged the words, "Presented to Past Master Workman, H. Griffin, of Oakland Lodge No. 2, A. O. U. W., Jan. 6th, 1882." The badge is a beautiful one, and was fairly won by meritorious services freely rendered. During the past official term Oakland Lodge has increased its membership by 13, and now numbers 150 in good standing. During the term it had three

rejections and one death. It has paid sick benefits to the amount of $473, and yet increased its reserve fund by $106. This latter fund now reaches the handsome figure of $1,478. One unfortunate brother has been on the sick list for six months, and is still in receipt of his weekly stipend of $10 per week. The workings of the Lodge are harmonious, and its members believe that

> Of all the Lodges in the land
> 'Twixt mountain top and ocean strand,
> No other Lodge so strong and true
> As Oakland Lodge, old No. 2.

Bro. H. Griffin and S. H. Mitchell were chosen representatives to the Grand Lodge.

Lodge Locals.

Alameda, 5.

A pleasant affair, which we take pleasure in recording, occurred in Alameda Lodge, No. 5, on the first regular meeting night of the present year. After the installation of new officers for the ensuing term and under the good of the Order, the Recorder, C. H. Haile (who is also Grand Receiver of the Order in this State, and a P. M. W. of this Lodge), called forward the retiring M. W., John Yablonsky, and in the following neat and appropriate speech presented to him in behalf of the Lodge an elegant gold Past Master's jewel appropriately inscribed:

Brother Master Workman:—Along the great highways that lead to Rome, broken and dusty, are placed seats in alcoves covered by vines and flowers interlaced, upon which the traveler, foot-sore and weary, may rest and refresh himself. So in our journey of life, beset as we are by cares and toils and troubles, it is well if we can reach a period at which, for a moment, we may pause, rest ourselves, indulge in pleasant memories, open the flood gates of our hearts and allow the kindly feelings and the love therein imprisoned to well up and overflow. No man in life, whatever may be his situation, or wherever he may be placed, will fail to win the gratitude and esteem of his fellow man if he discharges faithfully and honestly every duty incumbent upon him; and whether he be upon the lowest step in the stairway of fame or whether he occupies a more exalted position, if, with an eye single to the discharge of his duties, he goes forward without murmur or repining, it is there, as sure as the eternal law of truth, that in time he will win the esteem of his fellow man. For instance, one of our brothers, at first occupying but a humble position among us, is selected to fill a position of importance. We find that he discharges the duties of that position with remarkable fidelity, zeal and ability. The result is, we place him in a different and more important position, and by the skill which he displays and the fidelity to duty exhibited by him, he wins the attachment and esteem of every brother. This kind of rectitude and fidelity in place, should not be forgotten; yet it is proper we should, when occasion offers, afford such evidence of our esteem and our approbation as lies in our power. In accordance with the theory thus entertained by us, it is my pleasant duty on this occasion to be the humble instrument through which the officers and members of this Lodge desire to present to our esteemed brother this evidence of their respect and esteem. Brother Yablonsky, on behalf of your many warm-hearted friends in this Lodge, I am delighted to present to you this Past Master's badge, wear it with pleasure to yourself and with honor to this Order.

Brother Yablonsky responded felicitiously, expressing his surprise and gratification, and thanking the members for their courtesy and good will during the year he had occupied the afore-mentioned position.

Galt 113.

The brethren of Galt and vicinity turned out in force, considering their membership, on Thursday evening, Dec. 29, 1881. The members and visitors met in their cozy Lodge-room at an early hour and transacted their business with quick dispatch, among which was the election of officers and instruction in the secret work in both degrees, by Wm. H. Barnes, G. M. W. Bro. J. K. McKinstry, M. W., together with the officers, showed a marked degree of proficiency and correctness in their Lodge work. The membership of this Lodge is small but is composed of good material, and situated as it is in the center of a rich and populous section of our State, Galt 113 will gain a large membership. After the Lodge had been closed an adjournment was had to the Dramatic hall, where a large audience of ladies and gentlemen were in waiting to hear addresses from invited speakers. Bro. J. K. McKinstry, as master of ceremonies, introduced Wm. H. Barnes, G. M. W., who, in his happiest manner, entertained his hearers with a practical, logical address, interspersed with humorous points, that kept his audience in a happy frame of mind for an hour or more. Bro. E. M. Reading, Secretary of the Guarantee Fund, was then introduced, and, as usual, made a short fraternal speech that was well received. The Grand Master, by request, then entertained the audience with music and recitation a short time, which, if his hearers had their desire, would have been prolonged to the morning hours. Bro. J. A. McKinstry then announced that the Workmen and their friends, which included all present, were invited to the Fuggit house to a collation, which proved to be a banquet gotten up in fine style. A large company joined in this feast with gusto and pleasure, especially so to those who were fortunate enough to secure lovely and beautiful ladies as partners from among daughters of our Workmen who were in attendance. At a late hour the company separated, all agreeing that this entertainment was a grand success, and, we unhesitatingly say, it was very creditable to the little Spartan band at Galt. The next day there was an instruction meeting held in the Lodge-room, a goodly number being in attendance, who desired to be instructed.

Gridley, 67.

Editors Watchman:—The officers of Gridley Lodge, No. 67, were installed Monday eve, Jan. 2, 1882, by F. F. Carnduff, D. D. G. M. W. Bro. Carnduff compliments our district, both for the quality and quantity of its membership, and is proud to preside over such a body. We think both compliments and thanks are due Bro. Cardnuff for the able and efficient manner he has performed the duties assigned him. In the discharge of his duties he has been punctual to a minute, and in the work, correct to a letter. Any brother visiting Gridley should remember that our latchstring always hangs outside. We were called upon to participate in the funeral of our late brother, Wm. Fleming, of Biggs Lodge, No. 102, Jan. 1, 1882. On Jan. 4, '82, at the same (Gridley) cemetery, was buried our late brother, Sam. J. Davis, of Oroville Lodge, No. 40. This latter case deserves especial notice. The brother met with misfortune and reverses of late. He suffered with a protracted spell of sickness, winding up with his death. I am credibly informed that Oroville Lodge, of which he was a member, kept his dues and assessments paid up, also furnished sustenance for his family, which consisted of a wife and several small children. He was once a prominent merchant of our town, and later, County Treasurer of Butte county for two terms. The day of the funeral was very rainy and disagreeable, and the cemetery a distance of 18 miles from Oroville, yet Oroville Lodge, also Gridley Lodge, turned out and paid the last tribute of respect to the deceased brother, the inclemency of the weather causing many old friends outside of the brotherhood to forget the occasion. There are none so rich but they may need the tender cares of the A. O. U. W. Verily, it is well to be a member of the Order. I am, fraternally—An Observer.

Mission, 56.

A correspondent sends some personal matter which, as it concerns only those interested and its publication will do no good, and is not for the "good of the Order," we omit it. He further says: On Saturday last Bro. Fisher, our retiring Recorder, was "chained" with a handsome gold chain by our Lodge. The presentation speech was made by Bro. Dusterberry, P. M. W., and afterwards a fine collation was served. District Deputy Horton installed the officers elect on Saturday last. The last term has been very successful. Good talent has joined the Lodge; we have added about $300 to our General Fund, and will soon be able to purchase a lot for a hall. Bro. Fisher has become a land owner, having purchased a fine piece of land, which he is getting in shape for a vineyard. Most of the new officers of our Lodge are new members. Bro. Calkin, our Recorder, only received the M. W. degree a few weeks ago. He is editor of the Alameda County *Reporter*, and a good and able officer. Mission Lodge has now 78 members, and as intelligent a class as you can find. Almost all nationalities are represented.

Mt. Hamilton, 43.

After the installation of officers of Mt. Hamilton Lodge, reported elsewhere, and when good of the Order was reached Wm. Osterman, M. W., presented, in a very neat speech, to Past Master Workman, A. B. Hamilton, a Past Master Workman gold badge. Bro. Hamilton was taken by surprise, but responded in a few well-chosen remarks. Speeches were made by Past Master Finch, Church, Blumenthal and Overseer W. B. Hardy. After the meeting, a splendid collation was supplied.

Placer, 95.

Editors Watchman:—The 9th of Jan., 1882, is a day long to be remembered by Placer Lodge. The brothers of this enterprising Lodge had decided to have a re-union of the members of the several Lodges in this district, and had settled on Jan. 9th as the time fixed for holding the same. At an early hour, our hall was filled to overflowing with brothers from Covenant, No. 97, Lincoln, No. 83, and Rocklin, No. 196, their wives and daughters. After an address of welcome by S. F. Woodworth, M. W., a song from the glee club, and several duets and solos, our G. M. W., Wm. H. Barnes, was introduced, and held the audience spell-bound for about one hour in one of his happy speeches, illustrating the objects and aims of the Order, which was listened to with the greatest attention. He interspersed his remarks with comical sayings that were well calculated to provoke laughter, and which was indulged to the fullest extent. All then adjourned to the lower hall, where awaited a beautiful repast of the many good things of this earth. After satisfying the inner man, an adjournment was had to the Lodge-room, and until past midnight enjoyed themselves with songs and recitations and social converse. All present pronounced it a success in a social point of view.—Com.

San Rafael, 24.

Editors Watchman:—Our Lodge has gained very little in membership last term, but we are taking a fresh start. We have applications and are admitting members every meeting. Our membership on the first of January was 47; we have admitted three since, making 50 now, and more coming.—Thos. Hansen, Ex-Rdr.

Smartsville, No. 119.

Editors Watchman:—Maybe a few facts regarding our Lodge will be of interest. We have 26 Master Workmen in our Lodge, and they consist of the best material in our vicinity. We work harmoniously, and for the good of the Lodge and Order. Our Financier and Recorder are now entering on their third term, and your humble servant has had the honor of filling the office of M. W. two terms, and is now entering on the third. We hope soon to have some new members, as times begin to revive. I noticed a communication on graded assessments in the Watchman, and I am glad to see you take the position you do on that subject. I believe if the Supreme Lodge adopts graded assessments as a law into our now well-to-do Order, it will be the worst thing that could happen our noble Order. Hoping that the gallant ship of the A. O. U. W. may ever float proudly and smoothly over the sea of time, and prove as good in the future as she has in the past; that her anchor may never drag, nor her shield ever give way, but prove a protection to the orphan and widow as long as time shall last, I remain yours truly, in C. H. & P., Daniel Cory, M. W., of Smartsville, No. 119.

Temple, 11.

The officers of this Lodge were installed by T. F. Graber, of Berkeley, No. 10, acting as D. D. G. M. W. By invitation, the brothers of the Lodges of the district were present. After installation, a sumptuous repast was announced as in readiness. Business was then hastily brought to a close, and all went to the dining-room, feasted on the good things spread, and had a jolly good time. Remarks by various brothers, singing, etc., was the order, the whole being interspersed by passing the fragrant Havana—R. B. N.

Union 21.

Union No 21, Sacramento, held a grand meeting on Saturday evening, Dec. 31. One petition was received and the usual routine of business was carefully and correctly done by J. H. Norton, M. W., particular attention being paid to the sick and distressed. A motion was made that a committee procure a fine large frame that would hold at least 12 cabinet photos for all the Past Master Workmen of Union No. 21. After the election of officers the representative of the Watchman made a few remarks, followed by Bro. M. T. Brewer, P. G. M. W., in one of his short, eloquent speeches, that was full of noble sentiments and congratulations. During his interesting remarks he paid the Pacific States Watchman a compliment, by saying, "I have seen all the papers published in the interest of our Order and the Watchman is the best one published. The proprietors are responsible, enterprising men, who secure able talent to make this great auxiliary worthy of the Grand jurisdiction of California, the best in the United States." Bro. A. D. Jordan, of San Francisco, was invited to speak. He responded in an interesting, unique and humorous manner, giving the Watchman reporter some hard hits, and complimenting the brethren of Sacramento on the success of their entertainment, and the generous manner in which they had treated their visitors from San Francisco, in furnishing each one the fairest of Sacramento's daughters as partners at the banquet. From what we saw and heard at Sacramento and in the Lodge rooms we are quite sure the Workmen there are in the morning of a prosperous season.

Notes from Deputy Wilson's District.

J. M. Wilson, D. D. G. M. W., writes: I installed the officers of Point of Timber Lodge, No. 92. I also instituted Somerville Lodge, No. 210, about Dec. 1, 1881, with 32 charter members. They have taken in some since, and it bids fair to be a large Lodge. I installed the officers of Mt. Diablo, No. 91. This is the largest Lodge in my district, has 57 members, owns its own hall, 36x60, and well furnished. I installed the officers of San Pablo, No. 86; Carquinez, No. 90, Martinez; and Antioch, No. 37. [We give the list of officers elsewhere.] In regard to your valuable paper, I find, by reading it, that it saves me from asking many questions, and would recommend that every brother that belongs to the A. O. U. W., to take it, who is able. It is not only instructive as a fraternal organ, but it is a paper that is read by men that do not belong to any fraternal society.

Vallejo, 75.

The officers of Vallejo Lodge, given elsewhere, were installed by A. J. Buckles, D. D. G. M. W. The members turned out in force, and after the ceremonies, the brethren, in company with their ladies, adjourned to Farragut hall, where extensive preparations had been made to celebrate the anniversary of the institution of the Lodge, three years since, by a grand ball. The various committees had been engaged for several weeks in preparations for the event, and the result proved that the right parties had been in charge. The utmost sociability prevailed, and everything passed off very pleasantly. The Reception Committee consisted of Messrs. M. G. Winchell, J. W. Williams, G. J. Campbell, D. Rutherford, H. L. Howard, Chas. Daly, F. E. Brown, Wm. McWilliams, Dr. J. Frost, C. L. Hardy, A. S. Carman, G. H. Greenwood, S. F. Mowder and J. G. Smith. Floor Committee—The floor was in charge of A. M. Street, assisted by F. T. Winchell, W. R. Lambert, O. K. Doane and Fred Larsen. A feature of the evening was an ice-cream and lemonade stand, presided over by Mrs. M. J. Wright, Mrs. E. S. Davis and Miss Lorraine Englebright, the proceeds of which were for the benefit of the Orphans' Home. An elegant supper was served at midnight, in the Bernard House restaurant, by Jasper Doan, to which full justice was done by nearly every couple present. The Vallejo *Chronicle* gives a partial list of those who were present, and it shows the leading ladies and gentlemen of Vallejo. The music was that of Cassidy's band, and as usual was excellent, and the programme of dances consisted of 20 numbers. There were 75 couple in the grand march, and a number arrived afterward. The party was a very enjoyable one throughout, and reflects great credit on the parties in charge of the arrangements, and it is to be hoped is but the first of many more anniversary entertainments to be given by this well deserving society.

Indianapolis Chair Manufacturing Co.

One of the leading houses in San Francisco in their line is the "Indianapolis Chair Manufacturing Co." The firm consists of Bros. F. Rentschler, C. Wollpert and J. Schwerdt, practical workmen. This house has been in business eight years, in San Francisco, being a branch of the original house at Indianapolis, which has been in existence 25 years, Bro. Rentschler was sent out to this city as agent, some eight years ago, and met with such success that, in connection with his associates, and with the approbation of the parent house, he opened a branch on Market street. Steadily they have increased their business, and the necessity for more room induced them to occupy four large warerooms, 25x100 ft. each, on new Montgomery street, near Howard, Nos. 156, 158, 160 and 162, with basement; and also a large manufacturing place at 135 Natoma. Formerly they were almost exclusively a chair manufacturing company, but now make every variety of furniture, from the finest and most elaborately carved sets to those of everyday use. Customers who commenced using the goods of the Indianapolis Chair Manufacturing Co. eight years ago have continued up to the present time, and dealers in Oregon and the interior forward their orders by mail, trusting the known integrity and honor that is characteristic of this firm. The branch house at 160 New Montgomery, has added upholstering, mattress and bed manufacturing, as also a full line of carpets, oil cloths, etc., their design being to furnish a house complete, from the floor up. Their home factory is situated in the heart of the walnut country of the west. They own their own saw-mills, consequently commence their work at the root of the tree. Labor being cheap, and their goods "knocked" down and shipped in bulk, hiring their own cars, they claim an advantage of 25% in cost over houses who do not follow the same course. They have the reputation of being square dealers, selling goods as represented. Although practical and skilled workmen, they employ 25 men in their business here, and expect to increase their force soon. This house is the sole agent for the "Perfect Rest Chair," which combines comfort, durability and cheapness. They have also secured the right to manufacture and sell exclusively the new "Patent Perfect Sofa Bed." On a recent visit we found a large variety of writing desks of a late pattern and design which had just arrived, as also bed-room sets which were models of taste and beauty. This firm carries a large stock of every class of goods in their line and sell at bottom prices.

Cotton Hose.—The universal use of hose for irrigating purposes, hydraulic mining, factories, hotels, steamships, fire engines, etc., etc., in California, has induced the Eureka Fire Hose Co. to put the celebrated brands of seamless cotton hose and rubber lined hose in stock, of following brands: "Garden Hose," "Red Cross," "Paragon," "Eureka," and Bro. W. T. Y. Schenck, of 36 California St., is the Pacific coast agent. For fire engines this hose is used in most of the large cities, it being stronger, safer, and more durable. Climatic influences do not affect it, and it can be put away indefinitely and gain strength.

The Standard Soap Co., under the management of Bro. J. J. Applegate, is one of the industries of California of which we may be proud. The variety, excellence and standard worth of their soaps for toilet or domestic use, places them in the very front rank, not only in this State, but of any in the United States. The Standard soap palace, at 637 Market street, is one of the attractions for the ladies. Toilet soap, that will cure skin diseases, and soap that will preserve healthy skin, can be procured here, as also that for kitchen, laundry and household use.

More Light.—The Beacon Light Oil Co., 322 Washington street, of which Bro. A. Blackman is manager, are prepared to supply the best oil for family use. The Beacon Light oil is white water color, free from smoke or smell, and is said to be less expensive than other oils. The genial manager can supply "millions of it" if desired. Give him a call.

Bro. John Reid, as a reliable merchant tailor, is not excelled in this city. He has a fine line of Scotch, English and American suitings, at his tailoring parlors, under the "Windsor House," Market street, near Fifth. A fit guaranteed in every suit he makes.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

Do Not Delay.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits and give our enterprise the benefit of their friendship and substantial support as far as possible. Our terms of subscription are usually to be found on the eighth page of each issue. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

By Telephone.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

Mrs. Garfield on Women's Duties.

The late number of the *Student*, a little paper published by the students of Hiram College, quotes an extract from a letter written by Mrs. Garfield to her husband over ten years ago, and intended for no eye but his. It fell into the hands of President Hinsdale, who made use of it in a lecture to the students, and, as it showed the qualities of Mrs. Garfield's mind and her opinions upon the subject of women's work, he gave it to the students. The extract is as follows: "I am glad to tell that out of all the toil and disappointment of the summer just ended, I have risen up to a victory: that silence of thought since you have been away has won for my spirit a triumph. I read something like this the other day—'There is no healthy thought without labor, and thought makes the labor happy.' Perhaps this is the way I have been able to climb up higher. It came to me one morning when I was making bread. I said to myself, 'Here I am, compelled by an inevitable necessity to make our bread this summer.' Why not consider it a pleasant occupation, and make it so by trying to see what perfect bread I can make? It seemed like an inspiration, and the whole of life grew brighter. The very sunshine seemed flowing down through my spirit into the white loaves, and now I believe my table is furnished with better bread than ever before; and this truth, old as creation, seems just now to have become fully mine—that I need not be the shrinking slave of toil, but its regal master, making whatever I do yield me its best fruits. You have been king of your work so long that maybe you will laugh at me for having lived so long without my crown, but I am too glad to have found it at all to be entirely disconcerted even by your merriment. Now, I wonder if right here does not lie the 'terrible wrong,' or at least some of it, of which the woman suffragists complain. The wrongly educated woman thinks her duties a disgrace, and frets under them or shirks them if she can. She sees man triumphantly pursuing his vocations, and thinks it is that kind of work he does which makes him grand and regnant; whereas it is not the kind of work at all, but the way in which and the spirit with which he does it."

A ROCKLAND man saw advertised "a sure cure for drunkenness." He forwarded the necessary dollar and received by return mail, written on a postal card, the words, "Don't drink."

Cheerful Women.

When men choose a wife they should select a cheerful, happy-tempered woman, no matter whether she is handsome or not. They make a great mistake when they marry for beauty and style, or for talents and accomplishments, if there is not a cheerful heart to go with them, a bright, sunny soul.

The sweetest, most lovable wives are those who possess the magic power of being bright and cheerful under almost any circumstances, provide their husbands treat them with the courtesy and due forbearance which is their right. Rich or poor, high or low, it makes little difference provided the bright little fountain of cheerfulness bubbles up like a continual spring in their hearts and scatters its drops everywhere. Was ever the stream of trouble and trial so dark and deep that the sunshine of a cheerful face falling acoss its turbidness would fail to awaken an answering gleam? No, indeed! So cultivate a joyous, cheerful, happy disposition, friends, and see for yourselves how much good you can do in this life by its aid.

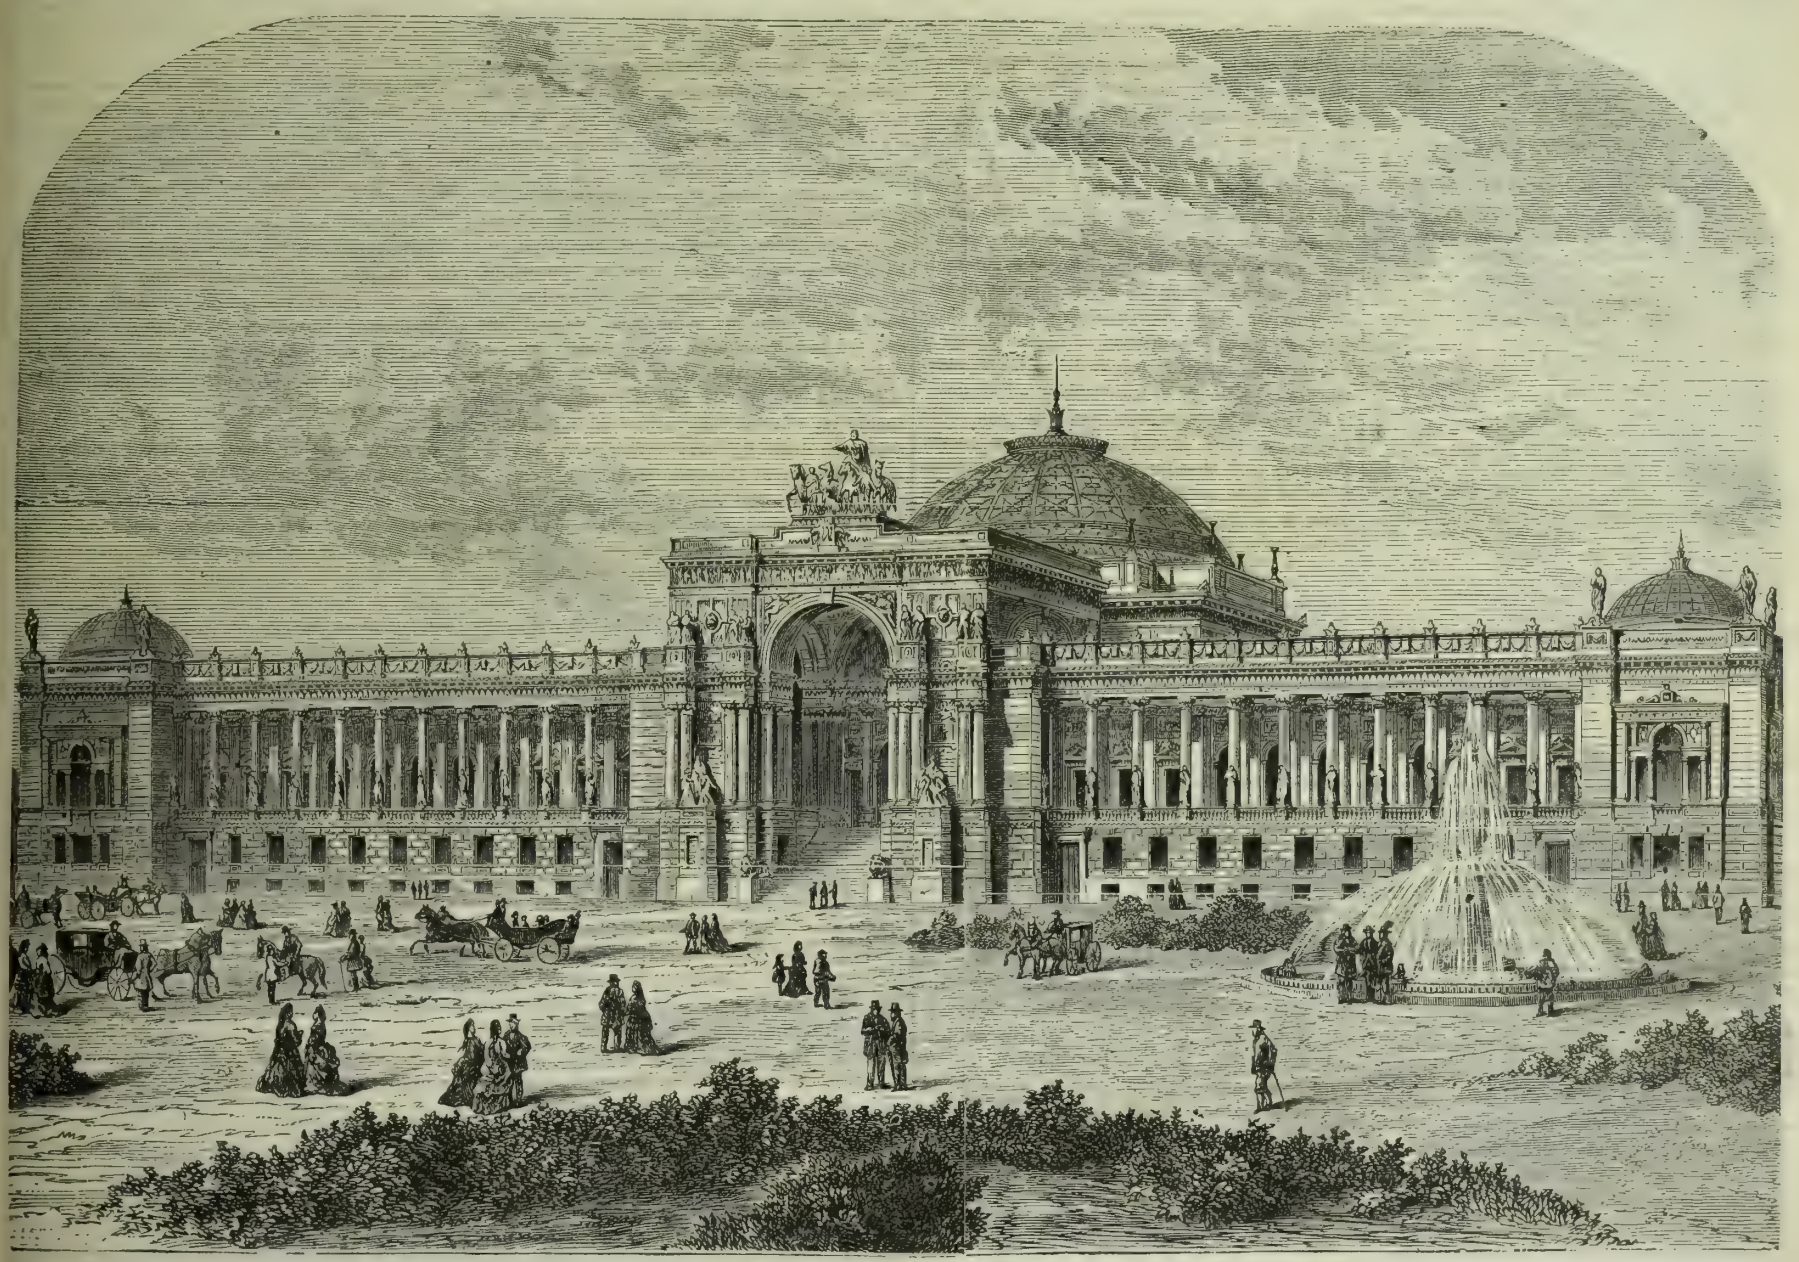
No matter how cross and crabbed one may feel, no matter if the brain is filled with meditations upon the great afflictions of life, or that the stomach is drenched with pills and mixtures and tonics; just let one of these cheery women come across you, and, my word for it, she will rouse you from your fit of the "blues." The long wrinkles about your mouth will shorten, the black gloom of your brow will disappear, and almost before you know it you are laughing heartily at some little anecdote she is relating, and your desponding fit vanishes.

Ah! what a blessing are these cheerful women. How often do their little hands assuage the grief of the mourner, and their bright, sunny smiles bring sunlight to the gloomy heart! No one can estimate the good they do until the judgment-day will reveal the secrets of many aching hearts and show us how much we owe to these cheerful, hopeful, helpful, happy souls. Their own lives may have been filled with grief, but the darkened cloud revealed to them its silvery lining. They may have felt the stings of stern penury, but with the little they possessed they have wasted not one jot.

THE great progress of Chicago as a money center is shown in the increase of surplus and undivided earnings and of the deposits of Chicago banks and bankers. In '80 the former were $3,413,659; in '81, $5,778 000. The deposits in '80 were $59,975,866; in '81 they reached $90,479,708.

Inventors and Progress.

One who signs himself "Inventor," writes in answer to some strictures passed upon inventors by a Stockton paper, claiming that inventors are idle, designing persons, who are always endeavoring to live without work, always looking for the opportunity to entrap some unwary capitalist into investing money in their inventions. Such remarks applied to the inventors in general is a base, ungrateful slander. One has only to look into the present working of any department of the arts or manufactures to learn the service of invention to industry. Every item of progress, from the rude processes and appliances of the ancients, has been the work of the inventors. As a rule, the improvements have cost a great amount of experiment and effort and actual outlay to those who have achieved them. There is, of course, now and then, a happy thought; but the average of effort for each invention is very great. It is but natural that the successful laborer in the field of invention should desire to enjoy a part of the fruits of his labor, and the people of the United States and other civilized countries, have decided that his claim is a just one. What would farming be without the triumphs of the inventor? Contrast the labor it is now possible to accomplish by one man's labor with what was done by a man in the early days. Contrast the gang plow with the forked stick, the self-binding reaper with the sickle, the thrashing outfit with the flail. People who decry the service of the inventor to the industries are relics of a bygone age. They have no part or parcel in the progress of the day. Agriculture has enjoyed her full share of the inventors' attention, and while she has been advanced, they, in turn, or many of them, have become enriched. It is a case of useful labor well requited; and there is much more of it to do. Excellent as are our agricultural tools and machines, no one can tell what farther improvement may come to them through the inventor's earnest efforts.



THE coinage at the United States Mints during Dec., 1881, was: Gold, 1,260,476 pieces; value, $10,220,530; silver, 2,445,100 pieces; value, $2,418,908; minor, 5,542,025 pieces; value, $58,263.

ELEPHANTS are now quoted at $7,100 each, but most people would rather have a $1.50 turkey, even if it won't last quite as long.

Parliament House, Berlin.

The engraving on this page shows the Parliament House, at Berlin, capital of the German Empire. It is a large and striking structure, well calculated to stand as an exponent of the greatness of the nation, whose law makers and counselors assemble in its halls. The German Empire does not figure in the daily transcripts of European news nearly so largely as its importance would warrant, and yet the general reader knows that some of the most engrossing subjects of modern legislation have arisen lately in Germany, and are being discussed and investigated so thoroughly that the new truths will be generally accepted and benefit the world at large.

SWEET HOME.—When two young people love each other and marry, writes James Freeman Clarke, they restore the picture of the Apostolic Church. They are of one heart and soul. Neither do they say that anything they possess is their own, but they have all things in common. Their mutual trust in each other draws all that is best in both. Love is the angel who rolls the stone away from the grave in which we bury our better nature, and it comes forth. Love makes all things new; makes all cares light, all pain easy. It is the one enchantment of human life which realizes Fortunio's purse, and Aladdin's palace and turns the "Arabian Nights" into mere prose by comparison. Before real society can come, true homes must come. As in a sheltered nook in the midst of a great sea of ice which rolls down the summit of Mt. Blanc is found a little green spot full of tender flowers; so in the shelter of home, in the warm atmosphere of household love spring up the pure affections of parent and child, father, mother, son, daughter, of brothers and sisters. Whatever makes this insecure and divorce frequent makes of marriage not a union for life, but an experiment which may be tried as often as we choose, and abandoned when we like. And this cuts up by the roots all the dear affections of home, leaves children orphaned, destroys fatherly and motherly love, and is a virtual dissolution of society. I know the great difficulties of this question and how much is required to solve them. But whatever weakens the permanence of marriage tends to dissolve society; for permanent homes are to the social state what the little cells are to the body—they are the commencement of organic life, the centers from which of necessity, all organization must proceed,

THE PARLIAMENT HOUSE AT BERLIN, CAPITAL OF THE GERMAN EMPIRE.

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.

At No. 252 Market Street, San Francisco, Cal.
☞ *Take Elevator No. 12 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and hand some," and first class in all respects—to the benefit o both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U. W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - January 15, 1882.

"Sound It Along the Line."

Ever onward and upward is the motto of the A. O. U. W., and with the success of the Order is the Watchman's progress. There are, however, some Workmen who are not subscribers, and we wish to draw *their* attention to the merits of our journal. Those of our readers who have been with us from the start, and also those who have come later, can do much to not only aid our enterprise, but also that of our organization. They have been with us, seen our work, and can best tell whether the Watchman has not been an earnest advocate of the Order's interests.

Members of the A. O. U. W. have a pecuniary interest, which renders an able exponent of their rights and privileges of paramount importance. Therefore, every member of the Order should take the paper, read it, and if he has some friend who is morally and physically qualified, lend him the paper for the purpose of hastening action.

Members of the Watchman family who have felt strength and received encouragement from a perusal of the Order's doings in its columns would do well, also, to pass it occasionally around to the lukewarm, that they may be partakers in the faith which moves them.

The privileges we now enjoy by reason of our membership will last while life is in us, and when we are gone others will be ready to fill our places. If the Order should ever perish, lukewarmness will be the rock upon which we will split, and one of the greatest preventives of this will be the enthusiasm that is kept alive by a careful reading of the Watchman.

We will send copies free for samples to those who are willing to assist in the circulation of our paper.

Installation, Valley, No. 30.—The meeting of Valley, No. 30, on Jan. 4, 1882, was immense, their large hall being full. Two received the J. W. degree, after which Geo. T. Shaw, D. D. G. M. W., formed the Grand Lodge by inviting C. W. Likins, of Nevada, to act as G. P. M. W., Henry Hoeber as G. O., and Daniel McLeod and others assisting, with Ernest Lichau, of Triumph, as G. Guide. Bro. Shaw made the installation services particularly interesting and impressive, as he delivered the whole work from memory letter perfect. The services were materially aided by the efficiency of the Grand Guide, Bro. Lichau. As the last word fell from the lips of Bro. Shaw's musical voice, there was a general clapping of hands. As their membership entitled them to two more representatives, an election was had, and Bros. Wm. Patterson and Wm. Broderick were chosen, together with E. H. Black, W. G. Buchanan, G. A. Case, F. Fillmore, J. J. Hayes, Henry Hoeber, C. E. Hunt. A. Heussler, W. B. Lyon, E. F. Loud, D. McLeod, J. P. McMurray, T. H. Macdonald, and C. C. Terrill.

Level vs. Graded Assessments.

Under the above caption W. Warne Wilson, Grand Recorder of Michigan, makes reply in the last issue of the *Michigan Herald* to an article on graded assessments which appeared in this paper several months ago. He says he feels a great interest in the question; that it is well-known he is in favor of graded assessments; yet he is not so bigoted as not to be open to conviction, but that after examining in the main all arguments against that system, has not been able to find anything to shake his confidence therein. He gives the table published by Grand Recorder Pratt in the proceedings of the last session of our Grand Lodge, and even that does not seem to shake his confidence in the graded system. Nevertheless he admits that the arguments—the tables we suppose he means—"seem plausible at first sight," but they are "calculated to deceive." "For instance," says he, "the same table shows us that of those admitted at the age of 22 the rate is one in 87, and of those admitted at the age of 48 the rate is one in 48. The average death rate is one in 115. By accepting the table after the manner of the Watchman, viz.: That whatever any portion of it will prove is *fact* sufficient to overturn the experience of a century, we can not only prove the error of the argument adduced, but also prove the negative of the proposition, viz.: *That experience has already indicated that our present plan or system is unjust.* For instance, to every 3 that die of the 22 class there are 5 that die of the 48 class, consequently it is manifestly unjust that with this wide difference they should be classed as equals. The very fact that the table itself will furnish so-called facts supporting two opposed propositions, is evidence that the facts so-called are worthless in connection with the present argument."

Bro. Wilson does not treat us or the subject fairly. The table, after giving the death rate in each class respectively from those who joined at 21 up to 49, then classifies the rates by periods of five years for the very purpose of avoiding the charge which is made against it by our good brother. Now, we do most stoutly maintain that the table above referred to is an argument against the table of "American experience" as a guide by which to construct a system of graded assessments and of a character so weighty as not to be demolished except by other tables, made from A. O. U. W. experience in the same manner; *i. e.*, by actual records. To attempt to weaken the force of the argument contained therein by the fact that many of our death losses were of persons who were not fit to be insured, is unworthy of a man of Bro. Wilson's intelligence, for he knows as well as we, that graded assessments never did and never will better this condition of affairs, and he also knows that unfit risks are quite as likely to be found amongst the older as the younger of our members, and in even greater proportion.

Five and a half years is not a very great period of time, but it is long enough to give a pretty fair idea of what the future has in store for us—long enough, certainly, to give at least some symptoms of confirming the theory of Bro. Wilson, if such a thing is ever to happen. And yet our experience for that time shows an almost uniform death rate amongst our members without regard to age at time of admission to the Order. If the old men ought to die twice as many to the thousand in a given time as the young ones, and yet, despite the experience tables, will not die any faster, what shall we do? Shall we still say that tables are right and our old men wrong, and then, for very spite, proceed to double-tax them for knocking our beloved theory into smithereens? No, Bro. Wilson, this will hardly do. You have our facts. Suppose you go to your records and see how the matter stands in your jurisdiction. Possibly they may tell a different tale. Fire them at us, but no more of your old experience tables, if you please.

We don't claim that the level assessment plan is just. We only claim that experience in the Order (and that, by the way, is all the experience that concerns us) bids fair to prove it *less unjust* than any other in vogue. Our Grand Recorder has been paying his regular assessments for more than 12 years. When he comes to die, his beneficiary will get no more than did that of him who died before paying any, except the advance deposit. There is no justice in that, surely.

Bro. Wilson gropes. Hear him: "Why the Watchman cannot be content to accept the English or the American tables of experience (which were founded for the express purpose), but must fain have the work done over again in the vain expectation of obtaining a different result, is something I cannot understand. I, for one, am content to take either of these tables, for the following reason: They were arranged for the special purpose of determining whether life insurance could be reduced to a science, and thereby made a safe investment for speculators. This was done from a purely mercenary standpoint, without regard to the interests of those who were to be insured; but merely to ascertain the basis on which lives could be insured. The correctness of the tables is vouched for by the fact that they are the recognized statute authority in almost every State on which the computations of insurance are based, and had there been any flaws or errors in them they would have been found out long ere this, consequently I am willing to accept them as knowledged authority."

We are not content because the tables of experience, so-called, do not agree with facts when applied to life insurance; in fact, are what we have before characterized them, a hypocritical abomination; and because their fallacy has not been before seen, or, being seen, has not been exposed and denounced, is no reason why we should be silent, and allow the old fallacy a continued lease of life, any more than that we should try to revive that other old fallacy that made the world flat and square, and had the whole firmament spinning around it every 24 hours. Once, that was as thoroughly and religiously believed as is the accuracy of these tables, for the purpose intended. We speak guardedly, for the approximate accuracy of the tables as giving the expectancy of life of mankind in general, we are not prepared to dispute. It is in the application that the error lies. That for assurance they are deceptive, we can show to any unprejudiced and intelligent person. They were made, we are told, from selected persons, say 100,000, taken in extreme youth, and a true record of the deaths made from the class, to extreme old age. If not so made, they are of no value as tables of expectancy of human life. Now, if assurance societies would take from such selected persons, or from others of like condition and character, an average lot, so to speak—good, bad and indifferent, healthy and unhealthy, moral and immoral, disregarding occupation or other circumstances—then the death rate, age by age, should correspond with the tables. This is so plain as to admit of no possible question, assuming the tables to be correct. But none of us select risks that way; not if we can help it. We cull the lot, taking only the best, and in this procedure we utterly destroy the use for which it is claimed the tables were created. Again, suppose the tables were made from insured lives, which, in the nature of the case they could not have been, but suppose, for argument, they were. Then, to be of practical use, we must first assume that the tables were made from insurable lives, selected at the age 21 years, and that from them a table of expectancy had been made; then, that another lot had been selected in like manner, at the age of 22, and another table made, and so on, up to the extreme limit of life. We think it safe to say that they were not so made. Moreover, we should have also to assume that every member who enters our organization must remain in till he dies, whereas experience shows that probably not more than one-fifth will so remain. The expectancy of life of an average member is about 35 years. Therefore, the expectancy of membership is about seven years.

Now we are ready to answer Bro. Wilson's concluding conundrum:

"Do I understand the Watchman to assert that the Order entails a liability of $2,000 "on each member," which liability will accrue and become payable at the end of seven years? I await a reply."

The Watchman does not wish to be understood as making any such assertion. The Order does entail a probable liability on each member of about $400 who shall die in the Order, because five times $400 is $2,000; and, in equity, each certificate should be paid with that amount deducted from its face less what the member paid into the beneficiary fund of the Order; or if he had paid more than $400, then the excess of payment should be added to the full face of his certificate when paid. This would no doubt be almost exact equity, making each pay the same amount for the benefit received; and yet we doubt if such a scheme would work as well and satisfactorily as our present system.

We have no desire to assume the role of iconoclast and go about smashing cherished images indiscriminately; but when this old graded assessment fraud is sought to be set up in the midst of the Workmen's temple, our righteous indignation is aroused, and we are ready to hew the hideous monster down before the Lord. And we intend to do it.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Three hundred and fifty-four certificates were issued in December last, and probably about 200 will be issued this month. The business of changing officers, settling accounts, etc., has of course checked the influx of new members.

The Lodge with the best mortuary record in this jurisdiction is unquestionably San Francisco, No. 4. It is the mother of several others, contributing largely of its members in their formation, and yet there has never been a death in the Lodge, nor has, we believe, any one died who ever belonged to it.

When a member is suspended as a penalty for an offense, any moneys he may have to his credit in the beneficiary fund should be forwarded to the Grand Recorder, and then on reinstatement, if the penalty was suspension for even any period less than six months, there should be collected from him just the same amount as he would have paid had he remained in good standing. If the penalty be suspension for three months or less, re-instatement can be accomplished by simply paying up arrears, if done at once on expiration of sentence, but if not then paid, a re-examination and majority vote in favor becomes necessary. This is also required in case of a sentence of suspension for a period exceeding three months and less than six months. If the period be more than six months, it suspends the member from the Order altogether, and re-instatement can only be had in the manner provided in case of suspension from the Order for non-payment of assessments or for six months' arrearages. Of course no moneys can be received from a member suspended under the penal laws of the Order, for that would be equivalent to attempting his re-instatement against the judgment of suspension.

The newly-elected officers of Magnolia, No. 41, after the close of the Lodge session, on Monday evening, Jan. 9th, invited the Lodge to Tyler's restaurant, corner Sixth and Market, to discuss a bounteous supper which had been prepared. As the proprietor of this restaurant is M. W. of Magnolia, he saw to it that the "boys" were well treated. What with sampling the eatables, etc., enjoying choice Havanas, and merry jest and repartee from many of Magnolia's sons, a very pleasant evening was the result.

J. J. Schutz, acting P. M. W. of Occidental, No. 6, at the close of installation services presented the Lodge with a large emblem of the Order in heavy plate silver, on which was the words Occidental No. 6, with the letters A. O. U. W. at each angle of the shield. The M. W., R. Stevens, responded in a happy and complimentary manner to the members of Occidental, and Bro. Schultz in particular.

We met Bro. J. S. Morse, of Kaw Valley Lodge, No. 20, Kansas, in Triumph Lodge-room. He reports the Order as flourishing in Kansas, and getting along finely. Bro. Morse is on a visit to California, and has had, he says, a fine reception among California Workmen.

Bro. Geo. T. Shaw, one of the very efficient Deputies, has had a year of prosperity and pleasure in his official duties, and at the close of the term has had added to his family a daughter. Mother and child are getting along finely.

C. E. Brinsmade, Rdr. of Fidelity, 136, since its organization, has attended every Lodge meeting during that time. The Lodge was instituted in October, 1879.

Notes from Nevada.

EDITORS WATCHMAN:—I think it is about time you and your readers were made acquainted with the affairs of the Order in this State. No one seems to have sufficient energy and courtesy to even write you a friendly letter, and to me falls the responsibility, and I assure you, Mr. Editor, it is a pleasant one. The A. O. U. W. in this State is doing just as well as can be expected. We, of Gold Hill, feel sufficiently elated over the success of our Deputy in Idaho to warrant us in laboring harder than ever to muster the 2,000 members we so much desire.

This is the grand object of one and all, and surely must be attained. The fearful prostration of every industry that we are suffering just now on the Comstock, is rather discouraging to the minds and efforts of the most energetic worker; consequently we are waiting, like Micawber, for something to turn up that will lift us out of this slough of despond.

Gold Hill Lodge, No. 2, still takes the lead in point of numbers, having 146 Master Workmen in good standing. If a person from your large and thriving city, should stroll through the streets of our town after or before dark, they would wonder where we get our members from, and how we hold them. "Herein lies the secret:" Each and every one considers it his duty to attend the meetings, encourage the officers with their presence, take part in debates and discussions, serve on committees, speak a piece or sing a song, when called on so to do. Our success here is largely due, however, to some few of our officers, Brothers Thorburn and Cowan, especially. Being Grand Lodge officers, their interest is, of course, twice fold, and they are working with a will to spread all needed information of our objects and aims.

Our Grand Master, J. V. McCurdy, I am sorry to say, is unable, through force of circumstances, to give his time and attention and what is expected from everyone holding positions in a Grand Lodge.

And in this connection, my idea is that if a person holding an important position in secret societies, unable to give a portion of his time and talents to the Order's interests, should, out of respect to those who placed him there, acknowledge his inability and resign without waiting to carry off the honors he has been unable to earn. This should apply to officers of all grades.

Now, Mr. Editor, you will excuse me for running away from my subject. I started in to tell about our Lodge, and the good time we had at our installation last Wednesday night. Invitations having been sent to our sister Lodges, three of them sent delegations, whom we cordially received and entertained the best we knew how.

After the business of the Lodge was disposed of, Grand Foreman A. G. Cowan proceeded to install the newly elected officers, and the manner in which he performed his part of the duty was certainly very creditably done. This part of the services finished, under the head of Good of the Order, the Master Workman elect made some very appropriate remarks, giving the brothers an outline of his policy, and adjuring them to do their duty, and to be true brothers in fact as well as in name.

Then came a cause for a little merriment, Bro. P. M., W. H. Hand, in a neat and caustic speech, presented Bro. M. W. Galland with an immense gavel, which, owing to its size, caused much laughter; then, fearing that the new Foreman might feel jealous, one of a similar kind was presented to him. But the general laugh came when Bro. Grand Rdr. Thorburn, in a few remarks, presented Bro. P. M. Hand, a huge stuffed club, with the admonition that he see, that he, himself, as well as the other officers, do their duty. Then came the grand feast and collation; this was prepared by Bro. C. Haub, and reflected much credit upon himself and daughters.

After all had satisfied the inner man, the Lodge was called to order, and speeches and toasts were the rule of the evening. The mental senses were well pleased and edified, after which the brothers, with the light of the friendly cigar, parted company with their guests with the hope that this noble Order will live as long as does the earth. Yours in C. H. and P. VARIETY.

Gold Hill, Nev., Jan. 7th.

EDITORS WATCHMAN:—If I can interest you to my idea of thought, the purpose intended will be achieved. All human classes, no matter of what standing, are possessed alike of certain grades of vanity in some shape or other, and while I am no exception to the rule, its prevalence is fairly enough balanced. This fortunate circumstance, perhaps, saved you from having heard from me before.

Knowing the high literary grade of the WATCHMAN, for every issue of the past year I have eagerly read, how am I in my first attempt at such presumption, to approach you with a communication.

It looks to me as though some amateur musician was trying to place his musical production in the repertoire of a Patti. However, a circumstance occurred, through which cause I was prevailed upon by some brethren to communicate to you.

The cause, as transpired, will ever blossom in the memory of its participants. But what cares my neighbor how I enjoyed myself, and here comes my task. I will endeavor to prove it was the intrinsic value of our noble Order which secured us such pleasure.

On the 4th instant Gold Hill Lodge, No. 2, whose member I have the honor to be, installed their officers, on which occasion they invited all neighboring Lodges.

Lucille, No. 8, of Sutro, responded nobly, in the very face of a cold, rainy night. Well, we had a pretty good time. On the 9th instant Lucille, No. 8, installed their officers and Gold Hill, No. 2, returned the visit, but how?

Eighteen of us—three ladies, families of Bros., were lowered down the Yellow Jacket shaft, 1,500 ft., from thence conveyed over the track with lightning speed, to Sutro. Time of travel, 50 minutes; distance, 5 miles.

How this subterranean journey impressed me my power of description is not adequate to the task, the only conclusion I can arrive at, is the sublime impression of a diver, when, for the first time, he descends to the bottom of a deep sea. Imagine a space 10 ft. wide, by 9 ft. high, 5 miles long, lit up by the miners' torch, with a continual move of the mule ornamented with a flaming torch on the harness of his right shoulder.

Temperature for two-thirds of distance at a sweating heat.

This subterranean trip was much enjoyed, I assure you, and its pleasant termination is to be ascribed to the kind efforts of our Bro. Cosgrove, foreman of the Yellow Jacket mine, and the very gentlemanly, genial exertion of Mr. Mehan, foreman of the Sutro Tunnel Co.

Both these gentlemen have done everything that showed their kindness of heart, in every little detail to make their sweating fellow-travelers comfortable. It remains only for me to say that our brethren of Lucille, No. 8, have demonstrated to us the fact that their mode of treating a visiting brother is royal in effect, while the very minutest act in every instance was brimful of fraternal kindness.

When perusing the above recital, bear in mind that actions speak louder than words.

An Order whose members would travel for hours on a cold, rainy winter night for the purpose of visiting a sister Lodge—an Order whose members would descend 1,500 ft. below their surface level for the purpose of visiting a sister Lodge, must necessarily possess a fascination that is destined to make it the grandest Order of Orders.

I have the honor, besides being an M. W., to belong to two most noble benevolent Orders; and I contend that the A. O. U. W., besides being a safeguard to its members, is the greatest blessing to every other benevolent association.

I will illustrate my assertion by such instance: Supposing I die; my family gets $2,000 from the A. O. U. W.; does not such a sum relieve the immediate responsibility of care from my widow and orphans, from those benevolent Orders?

There are many more such select objects enthralled in our great Order, which the most profound student only can elucidate. In reserving such for a future time, I will bring this to a close, and remain, yours in C. H. and P.—G.

A Grand Celebration at Sacramento.

One of the grandest celebrations and social entertainments of the year was held at Turner hall, Sacramento, on Friday evening, Dec. 30, 1881, under the auspices of Union and Sacramento Lodges. The hall was beautifully and elaborately decorated, and at an early hour the large room was packed (not even standing room left), with the elite of Sacramento. Bro. A. S. Hopkins acted as master of ceremonies. The programme was commenced by an overture by Bros. Jones, Beebee and Graht's orchestra of eight pieces. The chairman then, in a few appropriate remarks, introduced Gov. Perkins, who was greeted with a storm of applause. He commenced his very interesting and eloquent remarks by saying: "He only consented to be an alternate to address this meeting, and as the principal was here, the eloquent Grand Master, he would make a few introductory remarks only." But the inspiration of the scene before him, 1,000 of Sacramento's selected audience, caused the Governor to take a new departure, and before he knew it he was delivering an eloquent address, full of humane sentiments and cheering words. Among the many good things he said were these: "There is no society that should receive our encomiums more freely than this humane organization. It is a grand fraternity—elevating, ennobling and purifying. It is not only a great fraternal society, but it is a great beneficiary institution, which has over 13,000 members as guardians and trustees to give our families protection. We have written in living letters of light the bond of Charity, Hope and Protection to each one who has entered our mystic tie. I am proud to be with you and of you, to bear testimony to the great good we have done and are doing; happy to know that we are united in harmony as the sweet music of our orchestra was to-night, who are all Workmen. Let us go on in this grand scheme of Protection; our lives will be happier, we will be better neighbors, better husbands, better sweethearts, and more completely solve the problem of life."

Song, "The Bend in the River," Mrs. W. C. Fitch; a sweet sentimental song that was finely executed and received a hearty recall, which was kindly answered by rendering "Milking Time." Reading, "Hannah Jane," by "Nasby," Miss Mattie K. Powers, daughter of Bro. A. H. Powers; this young lady has a strong, clear and cultivated voice and her effort in reading the life picture was listened to with close attention and at the close heartily encored. Piano solo, "Silver Spring," Miss Millie Gregory, sister of Eugene J. Gregory, D. D. G. M. W.; an artistic effort and brilliant performance that was received with much favor, as evinced by the hearty applause, which was answered by performing some classic selections. Address, Wm. H. Barnes, G. M. W., in one of his best and grandest efforts. He said: "Powerful as we are we spring from the little band who gathered in Meadville 14 years ago with only this motto we carry to-day, Charity, Hope and Protection. Brethren what has it cost you in the last year to send $176,000 to the desolate and widowed home. The answer is $14 each, and 13,500 homes have had obsolute and certain protection. While I am enthusiastic and believe in fraternal societies, I counsel you not to belong to so many that you neglect your family, your home or your church, and make yourselves more valuable dead than alive. Fathers and mothers, wives and sweethearts, send your stalwart sons, husbands, and friends to us and we will give you that protection that is necessary for you. With the intelligent and associate action of thinking men we have attained the glorious results we see to night." His interesting and entertaining address was interspersed with humor and pathos and his pleased audience gave their plaudits so generously that it was a spontaneous ovation. He closed with these impromptu lines, penned while the Governor was delivering his speech:

> God bless No. 80 and old 21,
> Recorded on high is the good they have done;
> May their glorious names and merited fame
> For ages to come be ever the same.
> Success to your city, and love to your homes,
> And on your fair altar's pure flames ever burn;
> And our banner so noble, so beauteous and bright
> Float ever as proudly as it does on this night.

Solo, "Good night, Farewell," Mrs. G. W. Godley, wife of Bro. Godley, with orchestra accompaniment. This lady has a rich, sweet, cultivated voice, and her very pleasing effort was received with much favor, and at the close was given a hearty recall, which was kindly answered by a sweet song entitled, "Fly Forth, Gentle Dove." Recitation, "Memory Bells," Bro. Albert Hart, Private Secretary of the Governor. This was a sentimental and instructive piece, feelingly and eloquently recited, and well received. This very select and well arranged literary programme was happily brought to a close by a quartet, consisting of Mrs. W. C. Fitch, Mrs. C. W. Godley, Messrs. Fritz and Beaumont, Miss Martha Littlefield accompanist, who sang "Midnight Hour," from the opera of "Martha." The chairman, Bro. Hopkins, then announced that the first section was completed, thanking the audience for their patience, and the speakers and musicians for their good work. The hall was put in order for dancing, and the grand march was headed by Wm. H. Barnes, G. M. W., and Mrs. Emma Gregory, wife of Eugene J. Gregory, D. D. G. M. W. The Grand Master, with the assistance of the large company, formed the letters A. O. U. W., the merry company constituting the lines. Spirited dancing and social and enlivening conversation was then indulged through a programme of 14 dances with extras that trespassed largely on the morning hours. At 12 o'clock a large part of the company sat down to a choice banquet prepared by the favorite caterer of Sacramento, Bro. H. Fisher. This was a grand, well arranged and pleasing entertaiment, and appropriate to a triumphant year of the Ancient Order of United Workmen in California. This reunion was jointly carried out by an equal number selected from each Lodge at Sacramento, who worked with unanimity, and that whole-souled fraternal feeling that characterizes the brethren of the capital city. To them for 14,000 noble Workmen we extend congratulations, and herewith print their names: Committee of Arrangements—W. A. Henry, A. S. Hopkins (Recorder), S. A. Wolfe (P. M. W.), D. M. Blank, Eugene J. Gregory (P. M. W.), F. Dustman (Foreman). Reception Committee—H. J. Norton, M. W.; John Bradley, F.; Foster Cady, O.; Charles Cooley, Rdr; J. D. Kent, M. W.; F. Dustman, F.; D. M. Blank, O.; Geo. B. Katzenstein, Rdr. Floor Director—Eugene J. Gregory, P. M. W. Floor Managers—S. P. Milligan, W. E. Burnside, Harrison Bennett, Charles Van Heusen, Wallace A. Briggs, T. W. Stevens.

THE brethren of Woodland and Yolo counties, after the installation of the officers of that Lodge, admitted members of their families and friends to the hall, where a splendid banquet was waiting them. After supper, a season of unrestrained sociability was indulged in. The Ellis brass band favored the company with well-rendered selections of choice music. At a late hour, the company dispersed, well pleased with their evening's visit.

Iowa Loyal to the Core.

EDITORS WATCHMAN:—In one of your late issues of the WATCHMAN you say, "Nothing heard from Iowa; what will she do?" As a member of that jurisdiction since its organization, permit me to say that, in my judgment, knowing the rank and file of the great army composing the jurisdiction of Iowa as well as I do, that at the next session of the Grand Lodge, which convenes in Cedar Rapids, Tuesday, the 7th of February, that Iowa will *wheel into line*. The following is the keynote of action that will be taken:

The meeting of the A. O. U. W. of Davenport, in their hall, Saturday evening, Dec. 10th, to discuss the "Relief Law" passed by the Supreme Lodge at its last session, resulted in resolutions sustaining that law. By its provisions any State, after paying the maximum assessments rated upon it under the schedule adopted by the Supreme Lodge, is entitled to receive such "relief" from the membership of the Order at large as will pay all its additional assessments for that year. The "relief" thus extended is in the nature of a loan, to be repaid within three years by the State receiving aid. For this purpose such State is required to levy assessments to the full maximum rate for three years, applying the surplus over ordinary assessments to repayment of the loan, at the expiration of which time so much as remains unpaid, if any, becomes a donation from the Order. The schedule fixes Iowa's maximum assessments at 18, some exceptionally unhealthy States being rated at 48 per annum. Iowa is now the only State under A. O. U. W. jurisdiction that has not accepted the "Relief Law." The matter comes up for final disposition at the ensuing Grand Lodge session in Cedar Rapids, and the meeting of Saturday evening was to ascertain the sense of the Davenport Lodges in relation thereto. The amount of "relief" sought is only 10 cents per member, to date; yet, levied, as it is, upon a membership of 115,000, yields almost enough to pay the full face of six beneficiary certificates, and becomes a valuable "relief" to the membership of any State temporarily burdened with excessive death losses. The amount of "protection" pledged by the certificates of the Order aggregates $230,000,000. For this vast sum her sole available assets are the promises and good faith of the members, and relying solely upon these a payment of $1,500,000 has been made to the widows and orphans of deceased members this current year. The average time of payment of these death losses has been within 60 days of date of death, showing that the good faith of the Order is based upon a true sense of brotherly relation and responsibility, demonstrating their just claim to the honorable name of United Workmen.—*Davenport Gazette.*

Iowa made the mistake of legislating for biennial sessions, otherwise this relief question would have been settled long ago. A biennial sessions was a step backward no jurisdiction can afford to take, because it retards the growth of the Order. The old members of my jurisdiction fully realize the necessity of annual sessions for conference and legislation, and hereafter, Iowa will not be caught napping. No jurisdiction realizes the value of the Order more than Iowa. The members are *loyal*. In our ranks are numbered some of the leading men of the State. We will stand side by side with the Grand jurisdiction of California. And if I am not sadly mistaken, Iowa will vote for the next Supreme Master to be given California. It will be my pleasure and privilege to state on the floor of the Grand Lodge, matters in which the jurisdiction of California excels, not only Iowa, but all other jurisdictions that I am acquainted with. I am not ashamed to confess publicly, that my sojourn in your midst for the past two years has made me a better Master Workman.

Yours Fraternally,
J. MEREDITH DAVIES.

San Francisco, Jan. 8, 1882.

Since the above from Bro. Davies was in type, we have received the following from Cedar Falls, Iowa. It is self-explanatory:

The following resolution was unanimously adopted by Cedar Falls Lodge, No. 32, A. O. U. W., at a regular meeting, held Tuesday, Dec 20, 1881:

WHEREAS, Prosperity has thus far attended the Order under the supervision and direction of the Supreme Lodge, and

WHEREAS, "In union there is strength," but in secession destruction; therefore, be it

Resolved, That it is the sense of this Lodge that the Grand Lodge of Iowa comply with the laws of the Supreme Lodge of the U. S., and that our representative be, and is hereby instructed to that effect.

WORKING UNDER WATER.—We learn from the Des Moines, Ia., *Leader*, that the Wabash Railroad Co. have a diver at work in the construction of their bridges across the Des Moines river at Des Moines, who remains under water five hours at a time, digging and shoveling mud from the bottom of the river. He is dressed in a diver's costume and is let down into a large cylinder. Promptly at 7 o'clock in the morning he goes down and shovels a large tub full of dirt at the bottom of the cylinder; the dirt is hauled to the top and dumped on the outside. The iron cylinder is sunk deeper as he removes the dirt from the inside. At the present time he is working about 10 ft. under water. He is hauled up at noon for dinner, afterward returns to work and remains until 6 o'clock. Two men turn the wheels which work an air pump that supplies the man under water with air by means of a rubber tube, which is attached to the diver's helmet. About a dozen of the large iron cylinders are to be sunk in the bed of the river, and several pilings driven inside of them deep into the bottom of the river, and then they will be filled with 500 lbs. of rock and grout and cement, and these will furnish the foundation and support of the bridge.

EVIDENCES OF A LUNAR ATMOSPHERE.—Prof. Alexander brought forward at the last meeting of the National Academy of Sciences, a variety of evidence tending to indicate some envelope, like an atmosphere, for the moon. The evidence was principally drawn from observations during eclipses. The explanations usually offered for the bright band seen around the moon at such times were fully considered, and shown to be inadequate, though good as far as they would apply. The ruddy band of light is much too broad to be the sun's chromosphere. Various experiments proved that it was not a consequence of contrast alone. It was most apparent in those instances where the moon was nearest the earth. It could best be accounted for by supposing an atmosphere to the moon—a thin remnant of ancient nebulosity, comparable to that which accompanies the earth and gives rise to the appearance of the aurora borealis.

TO PREVENT WOOD FROM SHRINKING.—Carefully conducted experiments have shown that wood, well saturated with oil, when put together, will not shrink in the driest weather. Wheels have been known to run for many years, even to wearing out the tires. Very many dollars might be saved annually if this practice was adopted. Boiled linseed oil is the best for general use, although it is now known that crude petroleum, on even old wheels, is of great benefit.

The Fresh Air Habit.

Early impressions are very enduring, and can make useful habits as well as evil ones a sort of second nature. In order to forestall the chief danger of in-door life, make your children love-sick after fresh air; make them associate the idea of fusty rooms with prison life, punishment and sickness. Open a window whenever they complain of headache or nausea; promise them a woodland excursion as a reward of exceptionally good behavior. Save your best sweetmeats for out-door festivals. By the witchery of associated ideas a boy can come to regard the lonely shade tree as a primary requisite to the enjoyment of a good story book. "Only the movement of my feet seems to set my brains a-going," says Rousseau. And it is just as easy to think, debate, rehearse, etc., walking as sitting; the peripatetic philosophers derived their name from their pedestrian proclivities, and the Stoic sect from their master's predilection for an open porch. Children who have been brought up in hygienic homes not rarely "feel as if they were going to be choked" in unventilated rooms, and I would take good care not to cure them of such salutary idiosyncrasies.

Every observant teacher must have noticed the innate hardiness of young boys, their unaffected indifference to wind and weather. They seem to take a delight in braving the extremes of temperature, and, by simply indulging this *penchant* of theirs, children can be made weather-proof to an almost unlimited degree; and in nothing else can they be more safely trusted to the guidance of their protective instincts. Don't be afraid that an active boy will hurt himself by voluntary exposure, unless his chances for out-door play are so rare as to tempt him to abuse the first opportunity. Weather-proof people are almost sickness-proof; a merry hunting excursion to the snow clad highlands will rarely fail to counteract the consequences of repeated surfeits; even girls who have learned to brave the winter storms of our northwestern prairies will afterward laugh at "drafts" and "raw March winds."—*Dr. Felix L. Oswald, in Popular Science Monthly.*

CLOUD INDICATIONS.—When the whole sky is covered with clouds, their further formation and increase in bulk and density is indicated by their descent to a lower level, and their decrease by their ascent. Accordingly, when clouds begin to sit down upon the tops of the hills, it prognosticates rain, and when they begin to rise above the hills, it prognosticates dry weather.

The trade supplied

Some Great Engineering Projects.

The shortening of commercial routes by means of ship railways and ship canals seems to be the great ambition of the engineers of to-day.

In addition to the De Lesseps ship canal at Panama, the Eads ship railway at Tehuantepec, the Florida ship canal, the Chesapeake and Delaware ship canal, the Cape Cod canal, and others in the interior of this country, there are several other important projects of like nature under way or in prospect in various parts of the world. The old project of connecting the bay of Fundy and Baie Verte, on the Gulf of St Lawrence, across the Isthmus of Chignecto, has lately taken new form. It is now proposed to make the connection by a ship railway 18 miles long, thus making a short cut for navigation between the United States and the ports on the St. Lawrence gulf and river, and saving the long and dangerous voyage around Nova Scotia.

The projector of the ship railway, Mr. H. G. C. Ketchum, writes us that the plan grew out of a desire to save lockage and a deep channel in the design of the Baie Verte canal. His first plan was to lift vessels by hydraulic power on pontoons and then float them through the canal. The idea then occurred that they might as well be lifted to the surface of the ground and hauled across the neck of land on rails. The road may be level and perfectly straight from end to end. The plan has been submitted to the Dominion government and is favorably entertained. Mr. Ketchum has issued an interesting pamphlet relative to the project, which may be considered at greater length elsewhere.

Across the ocean, the construction of the tunnel under the British channel, connecting England with the continent, is being prosecuted with an energy which is indicative of ultimate success, and thus far no obstacles have been encountered to make the undertaking a difficult or exceptionally hazardous one.

In France the connection of the Atlantic with the Mediterranean by a ship canal, to save the long and stormy voyage around the Spanish peninsula, is under serious consideration, and the Council-General of the Seine have just adopted a resolution approving of the project.

The ship canal across the Isthmus of Corinth, in Greece, to shorten the route to Constantinople and the ports of the Black sea, has, we believe, been definitely determined upon.

In the far east a bolder and more important project is in contemplation, with a view to shortening the commercial route to China and Japan by 600 miles or more. At the head of the Malay peninsula is the Isthmus of Kraw, connecting Upper with Lower Siam; and by the cutting of a ship canal at this point, about 30 miles in length, the need of sailing around the peninsula might be obviated. At Kraw, the Malayan peninsula, which stretches southward for 500 miles to Singapore, is at its narrowest breadth, and the distance across from the side of the Indian ocean to that of the China seas is further decreased by the existence of natural waterways for some distance inland from both shores. From side to side it is no more than 50 miles, and the Pakchan river, on the western coast, and the Htassay on the eastern, afford the ready means of further reducing it. The distance, therefore, over which it would be necessary to cut a canal would probably not exceed 30 miles. The neighboring districts are known to be fertile and to contain great mineral wealth. A tin mining company has been established for more than 10 years at Malewon, on the Pakchan, and gold has been found in the neighboring stream of the Lenya. So far as known, the engineering difficulties are not of a stupendous character, and political drawbacks and considerations fortunately do not exist.

The French appear to have taken the lead in proposing this important commercial short cut, and, if the opinion of the London *Times* is well founded, the government of British India will not decline to actively participate in its execution.—*Scientific American.*

NEW MATERIAL FOR METALLIC SHIPS.—A London company has recently built, by way of experiment, a small steam yacht of phosphor-bronze. The vessel is built entirely of that material. Her length is only 35 ft., her beam about 6 ft., and she attained a speed of 12½ miles per hour, which, considering her size, is a creditable performance. The chief object of the company in having so small a craft built was to test the rigidity of the phosphor-bronze sheet and angle pieces used in her construction, prior to having boats built on a large scale. The results of the trial trip have been beyond the company's expectation as regards rigidity and absence of vibration. As the cost of phosphor-bronze boats will not much exceed that of steel boats, and as the metal is not subject to corrosion like iron or steel, and also retains its value, the use of the material in the construction of steam launches, torpedo boats, etc., is probable.

BRO. R. SCHAEZLEIN is doing some excellent work in the emblem line for many of our Lodges. He recently presented his Lodge—Olympic—with a tasteful emblem, and as noted elsewhere, he has manufactured one for Occidental. Some of his badges made for presentation are gems of art, and denote a thorough master in his business. He also designs for presentation silverware, race and yachting cups, wedding pieces, etc. Judging by the work he has already performed, persons desiring artistic execution and finish in the engraving line, will be abundantly satisfied by entrusting it to Bro. Schaezlein.

SWAIN'S family bakery and dining saloon, 636 Market St., is one of the oldest and most popular resorts in the eating line in this city. It is now under the management of Bro. C. E. Pearson, who maintains its former reputation as a first-class bakery and dining saloon. For the bridal banquet, the choicest of wedding cakes are supplied; also oysters, ice cream, jellies, etc. Families desiring choice confections and eatables will be supplied promptly and efficiently.

ONE of the leading dealers and importers of furniture, carpets and upholstery, etc., at 411 K St., Sacramento, Bro. J. G. Davis, is receiving from Grand Rapids, Michigan, a line of black walnut goods that are first-class in every respect. His stock is large, and embraces all classes of goods in his line, with a fine stock of carpets, lambrequins, curtains, etc.

THE enterprising commission house of Nordbruch, Witzel & Co., will continue at the old stand, 324 Clay, under the firm name of Witzel & Baker. They are reliable and trusty men, and their increasing business is the result of their endeavors to please their patrons. They deal in all classes of provisions; butter, cheese, eggs, etc.

MT. HAMILTON, at San Jose, celebrates on the 25th inst., and Los Gatos on the 26th; at which time it is expected the latter will dedicate its new hall.

THE Pacific Surgical Institute, 305 Kearny street, is a branch of the great Northwestern Surgical Institute,

Resolutions of Respect.

[IN MEMORIAM.]

HALL OF BIGGS LODGE, No. 102, A. O. U. W., Biggs, Cal, Jan. 4, 1882.

To the Officers and Members of Biggs Lodge, No. 102, A. O. U. W.—SIRS AND BROTHERS:—Your committee, appointed to draft resolutions of respect to the memory of our deceased Bro. WILLIAM J. W. FLEMING, who was Foreman of our Lodge, respectfully submit the following:

WHEREAS, For the first time in the history of our Lodge, death has invaded our fraternal home, and bereft us of an honored officer and a charter member; and

WHEREAS, The members of Biggs Lodge, No. 102, A. O. U. W., recognizing the many social and moral virtues of our deceased brother, are thereby better enabled to join in full sympathy with his kindred and friends in mourning his departure; therefore, be it

Resolved, That this Lodge extend to her, who has been the partner of his joys and sorrows, his hopes and fears, their full and heartfelt sympathy; also to his children, and to all others, who with us, cherish and respect his memory.

Resolved, That we tender to his afflicted parents the sympathy born of true "Charity," and bid his brothers and sisters to "Hope" for the great future, and commend them all to the "Protection" of the Supreme Master of the Universe.

Resolved, That as a slight outward token of our feelings, the charter of this Lodge be draped in mourning for the period of thirty days; and be it further

Resolved, That these resolutions be spread upon the records of this Lodge; that the Recorder be instructed to transmit a copy, properly attested, to his wife and family, and the bereaved parents of our deceased Bro., and that a copy be sent to the PACIFIC STATES WATCHMAN and the Biggs *Recorder* for publication.

Fraternally submitted in C. H. and P.

PHIL GREIN,

E. M. READING, Sec'y,
38 St. Ann's Building, Cor. Powell & Eddy Sts., S. F

WE herewith give a front view of one of the largest furniture houses on the Pacific coast. The house was built especially for this firm. It has a frontage of 40 ft. on Market St., and 170 ft. deep, running through to Stevenson St. The building is four stories with basement; the upper floor is used for manufacturing purposes, the third story as a wareroom, and the first and second stories as sales-rooms. A large elevator is used in this building; and there are employed by this firm from 40 to 50 skilled workmen all the year. The immense stock represents all kinds of furniture used in humble life, and also of the finest class used in our palatial residences, ranging in price for bedroom sets from $20 to $500, and side-boards from $15 to $800. Combining home manufactured goods with all the latest pattern and newest design of imported goods. Although this house deals in a general line of furniture, curtains, window draperies and lambrequins, pedestals, Louis, XV. ebony furniture, etc., still they are prepared to furnish a private house or hotel from the floor up. Bro. F. S. Chadbourne is a representative Workman; one of the leading and enterprising men of this great city, and with the assistance of an able and polite corps of assistants, takes great pleasure in showing visitors through this labyrinth of furniture, etc. It is with pleasure and pride that we have frequent occasion to refer to our leading citizens and solid business men as one of the great organizations who are helping us and each other in this humanitarian work.

New Workman Diploma.

Electricity and the Telephone.

Of late several European observers appear to have been studying the effects of certain meteorological phenomena on the telephone, the latter being connected with a wire stretched, for instance, between the roofs of two houses, and in connection with the water or gas pipes. On the occurrence of lightning, more especially, sounds are heard, and at the same instant (according to M. Rene Thury, of Geneva) as the flash is seen, whatever the distance of the latter. Even when no thunder was heard, and the discharge must have been at least 35 km. off, M. Thury observed those induction effects. He says the sound is like that of a Swedish match rubbed on the box. The telephone affords an easy method of studying the velocity of transmission and other features of this electrical influence. M. Lalagade, who has experimented similarly for some time past, thought to amplify the sounds, and did so by placing two microphones on the plate of the receiving telephone. The arrangement is set up in a quiet room, where all foreign vibrations are guarded against, and the author is able to hear the least sound at a distance of one meter or more from the second telephone.

Again, M. Landerer, at Tortosa, finds currents produced in his telephone-circuit by atmospheric electricity in three different ways. First, the condensation of aqueous vapor results in a sound recalling the cry of tin. A sensitive galvanometer in the circuit is not, or hardly, affected. These sounds are strongest at night. Next, there are the sounds which occur during lightning (and the currents producing which affect a galvanometer considerably). Thirdly, the wind generates currents which do not act on the telephone, but act on the galvanometer strongly. At Tortosa, the very dry west winds produce the greatest oscillations. Telluric or earth currents act both on the galvanometer and on the telephone; they are distinguished from atmospheric currents by the regularity and continuity of their action during pretty long intervals.

ARRANGEMENTS are being made for the speedy formation of a National Association of the Disabled Veterans. The plan proposed was to get a list of all fully disabled veterans on the pension roll of the United States and then call a convention and elect officers for a permanent national organization, delegates to be chosen by Congressional districts.

An Elastic Lacquer.

According to the *English Mechanic*, a patent has been taken out in Germany for a new description of elastic lacquer, which will not peel off, and which is suitable for the coating of carriage-cloths, plans, and other articles to be rolled or folded, as well as for wood and iron-work, walls, etc. It may also be employed as an isolating layer for damp rooms, as a means against dry rot, and in rendering stuffs waterproof.

To produce the lacquer, 50 kg. of linseed-oil varnish are heated up to boiling point. In another vessel about 15 kg. of lime are slaked in 20 kg. of water. As soon as the lime boils, about 50 kg. of hot melted raw caoutchouc are added to the lime water, and the whole is then stirred until it has become thoroughly mixed. This composition is poured into the boiling varnish, the whole being stirred all the time. Further stirring takes place until a homogeneous mass is formed, which is afterward strained or filtered, and left to cool. After cooling, the lacquer has a pap like consistency. To apply the lacquer it is diluted with the desired quantity of varnish, and put on with brushes, either in a warm or cold state; but it is said to be better to apply it warm, as then no varnish is required for diluting it. In rendering linen water-proof, the lacquer may be put on by means of brushes or rollers. After treatment, the linen or other stuffs, paper, etc, are hung up to dry. Stuffs are perfectly dry and ready for use in two days. The product is stated to be lustrous, elastic, not sticky, and perfectly water proof.

A NEW ELECTRIC LIGHT.—Two Frenchmen have recently introduced into Paris a new electric lamp which, because of its mellow luster, they call the "Sunlight." The light is formed by boring two conveying holes into a small brick of marble and inserting two carbon rods which nearly penetrate the brick and are separated at their points by a partition of the marble. Their upper ends are connected to the dynamo-electric machine, and the current in traversing the wall of marble between the points makes it white hot. The gas escapes by the bore holes, which are wider than the rods, while the light is emitted by the bottom of the brick, which becomes calcined.

THE artist's adieu to his pictures—You be hanged.

The Materials of Paleontology.

Although paleontology is a comparatively youthful scientific specialty, the mass of materials with which it has to deal is already prodigious. In the last 50 years the number of known fossil remains of invertebrated animals has been trebled or quadrupled. The work of interpretation of vertebrate fossils, the foundations of which were so solidly laid by Cuvier, was carried on with wonderful vigor and success by Agassiz in Switzerland, by Von Meyer in Germany, and last, but not least, by Owen in this country, while, in later years, a multitude of workers have labored in the same field. In many groups of the animal kingdom the number of fossil forms already known is as great as that of the existing species. In some cases it is much greater; and there are entire orders of animals of the existence of which we should know nothing except for the evidence afforded by fossil remains. With all this it may be safely assumed that, at the present moment, we are not acquainted with a tithe of the fossils which will sooner or later be discovered. If we may judge by the profusion yielded within the last few years by the Tertiary formations of North America, there seems to be no limit to the multitude of mammalian remains to be expected from that continent, and analogy leads us to expect similiar riches in Eastern Asia whenever the Tertiary formations of that region are as carefuly explored. Again, we have as yet almost everything to learn respecting the terrestrial population of the Mesozoic epoch—and it seems as if the Western Territories of the United States were about to prove as instructive in regard to this point as they have in respect of Tertiary life. My friend Prof. Marsh informs me that, within two years, remains of more than 160 distinct individuals of mammals, belonging to 20 species and nine genera, have been found in a space not larger than the floor of a good-sized room; while beds of the same age have yielded 300 reptiles, varying in size from a length of 60 or 80 ft. to the dimensions of a rabbit.

The task which I have set myself to-night is to endeavor to lay before you, as briefly as possible, a sketch of the successive steps by which our present knowledge of the facts of paleontology and of those conclusions from them which are indisputable has been attained; and I beg leave to remind you at the outset that, in attempting to sketch the progress of a branch of knowledge to which innumerable labors have contributed, my business is rather with generalizations than with details. It is my object to mark the epochs of paleontology, not to recount all the events of its history.—*Prof. T. H. Huxley, in Popular Science Monthly.*

THE MOTOR OF THE FUTURE.—In the opinion of most of the scientists of Great Britain, electricity is to take the place of steam in driving machinery and moving cars, and is to be generated by the action of tides, winds and falling water. They predict that wind power will be utilized to a greater extent than any persons in a previous age ever believed it would. Wind will generate electricity for moving machinery, for lighting streets, and warming dwellings in Ireland, Belgium, Denmark and other countries where there are few streams that afford water power. The movement of tides will produce the same effects in most countries that have an extensive sea coast, while the fall of water in rivers and streams will generate electricity in all mountain regions. The great electrical exhibition at Paris did much to draw attention to what is called the motor power of the future. A picture called "The Queen of the Nineteenth Century" hangs in many of the shop windows. It is a female figure surrounded with a halo, and emitting rays of light from the hands, which are raised as if to enable the being to fly. The light gives the arms the appearance of wings. The artist is an enthusiast, and is regarded by many as a prophet. We all hope that his fair predictions will be realized. The steam engine is a good thing, but we are ready for something better. It has done so well that till recently scientific men and inventors have not troubled themselves to make something better.

IMPROVEMENT IN TELEGRAPHY.—An exhibition was made at the Paris Exhibition, by John Mackenzie, of an improvement in telegraphy, which promises to become of much importance. By this device it is claimed that any number from 1 to 999 can be automatically signalled on one wire by a single movement of the transmitter, so that on opening the box at the receiving station the number will be found correctly recorded.

PIANOS TO RENT.

COMPOUND OXYGEN — NOT A DRUG

A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, *and all Chronic and Nervous Disorders.*

ACTS DIRECTLY upon the great nervous and organic centres, and *cures by a natural process of revitalization.*

HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.

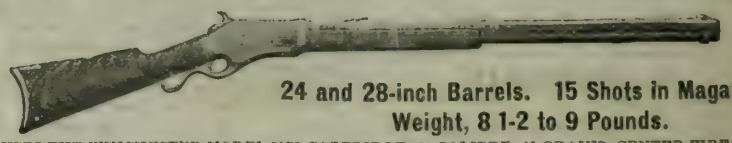
HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer *by permission.*

IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*

THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.

SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address

ADMINISTERED BY INHALATION. Drs. STARKEY & PALEN, 1109 and 1111 Girard St., Philadelphia, Pa.



Depository on Pacific Coast.

WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States. All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco, Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.

Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order that we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

DRS. STARKEY & PALEN, Nos. 1109 and 1111 Girard Street, Philadelphia, Pa.

THE KENNEDY REPEATING RIFLE.

24 and 28-inch Barrels. 15 Shots in Magazine.

Weight, 8 1-2 to 9 Pounds.

USES THE WINCHESTER MODEL 1873 CARTRIDGE, 44 CALIBRE, 40 GRAINS, CENTER FIRE.

Out of 500 Glass Balls thrown from a trap, 479 were broken with this Rifle. Prices Low. Circulars on application to

A Colorado Mountain.

We give on this page an engraving of one of the most notable mountains in Colorado. It is called Whiterock peak, and is described by Prof. Hayden in his explorations of that section. It takes its name from the fact that a seam of white or light gray igneous rock, sixty ft. wide, passes through the middle of the summit vertically. The material is quite soft, disintegrating into moderately coarse sand. The rocks composing the mountain are quite varied in texture, though all evidently of igneous origin. The jointage is in many cases vertical, separating the mass into blocks varying from a few inches to two or three ft. cube. This vertical jointage gives a sort of columnar appearance to the sides of the peak in the distance. The sides are also deeply furrowed. There are three sets of master-joints, with a multitude of smaller ones. The consequence is that the sides of the mountain and the several amphitheatres are covered with immense quantities of *debris*. The whole mass is filled with water and ice during the winter, and in the spring, as the ice and snow melt, it moves down the declivities slowly, like a glacier. Sometimes cavities or reservoirs are made, and the melted snows form beautiful little lakes.

WHITEROCK PEAK, COLORADO.

From the summit of Whiterock Mountain the view on every side is most remarkable, presenting the aspect of chaos, as if the entire group of stratified rocks, which originally covered the area now occupied by the Elk mountains, had rested on a vast pasty mass of the granite, but which, by forces generated in this pasty mass, had been lifted up and tossed, as it were, in every direction. The faults are very numerous and of huge dimensions. Sometimes a group of strata is broken off, so that one portion is from 100 to 2,000 ft. above the other portion. Sometimes 1,000 to 2,000 ft. will be elevated by a force acting very nearly vertically, so that some of the loftiest peaks, as Maroon Peak, 14,000; Black Pyramid, 13,000, and many others nearly as high, are composed entirely of stratified rocks inclining at small angles. Again the beds are tipped off from the granite core at all angles from 10° to a vertical, and not unfrequently past a vertical, and there are in the Elk range the most wonderful instances of the complete overturning of immense groups of beds, so that for several miles there is a double series, from the Silurian up to the Cretaceous, inclusive, and then rising upward in inverse order, as is shown at the head of East river and near Snow Mass peak.

BRO. D. F. FOX, D. G. M. W., of the jurisdiction of Nevada, is still adding to the roll of Lodges of that jurisdiction. He has recently organized Capital Lodge, No. 2, at Helena and Union, No. 3, an Missoula, Montana Ter. The charter list was closed at the latter place with 35 members. Bro. Fox has proven himself a wideawake and energetic Deputy, and we expect soon to have Nevada added to the separate jurisdictions. Brothers of these outside Lodges should send in the news to the WATCHMAN. Tell what you are doing, prospects, etc. The Order will be glad to hear from you.

UKIAH LODGE, No. 33, has an artist and ex-editor for its past officer, a lawyer for its chief, a preacher for its first assistant and another preacher for money collector, an editor for its third officer, a postmaster for treasurer, a singing-master for secretary, and about sixty-five gentlemen as privates.

BESIDES the large circulation of the WATCHMAN in California, we have quite an extended subscription list in Nevada, Montana, Idaho, Utah, Oregon, Washington Territory, British Columbia, Arizona and in most of the Eastern States and Canada.

THE grand total contributed to the Upchurch fund, as per report of S. S. Davis, Supreme Receiver, is $3,660.53. California has contributed a little over $1,000 of this amount.

Men Without Occupation.

A man without a particular occupation is to be pitied. Thrown as he is from one kind of labor to another, depending upon the prosperity of business for employment, and not having either the ability or knowledge to rise above a certain plane, it is no wonder that such a person will feel disappointed, and rail at the world which affords him so poor a chance for accumulating sufficient money to make his declining years cheerful and contented. The fact that a man is without steady employment, is in great measure due to the vanity of parents, or of allowing the boy who is to be the man drift as his own inclinations may direct. A boy of small ability is placed in a store to run errands. In course of time he is promoted to a higher station. There he remains, and there he will remain, not having the ability to reach the highest pinnacle in the business world. Suddenly times get dull, expenses must be curtailed, and our unfortunate friend suddenly finds himself without occupation, and drifts out into the great world to swell the army of men similarly situated as himself. Now, this same boy if he had been put at some useful, honorable, mechanical work, might have risen to the very highest position in the workshop. True, his hands would have got soiled, and his dress would not be so clean and neat, but he would be a man for all that in the estimation of those whose opinion is worth having, and not be a pensioner upon the bounty of friends, or an eager searcher for those light occupations, always overcrowded, and requiring little mental training for their routine duties.

The fact that we would like to impress upon young men just starting in life is this: That by having a trade or even a profession, if you have the ability to thoroughly master it and by industry and honesty seek to advance, you are fortified against depressions that may periodically occur. But above all things, we would advise the young man who is not possessed of superior abilities, but thinks he is, to seek the advice of some mature man of large experience in worldly affairs, and ask him whether it would be best to earn an honorable living by learning a mechanical trade, or eke out a miserable existence as a briefless lawyer, or patientless physician. The time spent in learning a trade is never lost. If one does not wish to follow it in after years, it need not be done. Some of the most honored men this country has produced received their first lessons in industry by learning a mechanical trade. Events in later years caused them to follow other callings, and they were more fitted for them by the drill they received in early youth. In fact, they were better fitted to grapple with the problem of life. The many small economies they were compelled to practice, the drill received in mastering the trade they sought to learn, made them more self-reliant, and they put forth their best endeavors when duty called to more extended fields of labor. A young man who has nothing to push him forward in the struggle for place and honor but his own individual efforts, is false to his best interests if he looks with contempt upon a mechanical calling. There will come a time in life when the poor boy will surely regret when his youthful fancies led him to engage in what are called the well-dressed and "soft" places. There are always those who by reason of social connections generally get the best places, and it is only by the hardest kind of a struggle that any really high position is gained. Whereas, if a trade was learned, the battle will be won by the most studious and intelligent, and happiness instead of discontent in after life will be the result.

FOR faithful work and in appreciation of his services in adding to the roll of membership of Spartan Lodge, 36, Bro. T. H. Bethel, was presented with a new Workman diploma, beautifully framed. The presentation speech was made by David McClure, P. M. W., and fittingly responded to by Bro. Bethel.

BRO. JOHN H. BABBATT, of Valley, No. 18, Salem, Oregon, son of Samuel T. Babbatt, of this city, paid a visit to Harmony, on Saturday evening, Jan. 14th. He gives glowing accounts of the progress of our Order in Oregon.]

Home Miscellany.

The Mountain.

Through time's dim vista looking down,
Perhaps frowning o'er some ancient sea,
Dark clouds then resting on thy crown,
And all around thee mystery.
Thou watchest the fiery craters flow,
And mountains heaving at their birth,
Amid the molten lava's glow;
Before mankind had touched the earth.

Still towering upward into space
A landmark when the morning breaks,
Yet men are delving at thy base,
And heeding not thy darksome peaks.
Time fades; yet ever rolling on
Men come and go and gaze on thee;
Like fleeting shadows they are gone,
But thou art for eternity.

—*"Sierra Buttes," in Mountain Messenger.*

A Woman's Heart.

He made me a wife and mother;
He answered my young heart's call;
He came, he sought my spirit,
He made and fastened love's thrall!

He holds me fast; shall I struggle
For aught beyond his breast?
Nay; here is my life's sweet haven,—
Love hath an indwelling rest.

Back ever my heart must turn;
Humbly it sues to its own;
Love, "be ye reconciled,"
Is the clearest voice of the Throne!

—*Hope Haywood, in Rural Press.*

The Piece that was Lost.

There was promise of a capital hay day; so Silas Rogers decided as he stood in the back porch after milking, polishing his face with a coarse towel and noting the weather signs between the rubs.

A capital hay day; but a "spell of weather" might be expected soon; for did not the almanac say "About this time look out for storms!"

So all hands were warned to be in readiness to mow the lower intervale in the morning, and lose no time in getting at it, for the lower intervale was swampy after a rain.

The chores were done, the supper eaten; Silas, with his chair tilted against the wall, was sleeping the sleep of the just, while his good wife pattered about the kitchen setting her sponge, beating up some "riz" griddle cakes for breakfast, grinding the coffee, and, in a dozen provident ways, squeezing out of the tired day a little help for the morrow.

Reuben went to the store for a new scythe snath; Abner, the hired man, hung over the barnyard gate with the beloved pipe that tried the housewife's soul, and pretty Mistress Hetty wrinkled her forehead and pricked her fingers over the new dress she was trying to make in the few leisure minutes snatched from housework. She made a charming picture in the frame of the vine-wreathed window, her sleeves still rolled above her plump elbows, the bright hair drawn back from the rosy face which was turned full to the lamp as she threaded her needle, or paused to flirt some deluded moth away from the dangerous flame that fascinated him.

A charming picture, but no one to look at it; for the great Norway pine held up a screen of solid blackness between the window and the road, even if any belated traveler had chanced to walk that way, and only Hetty's white cat crept stealthily along the top of the garden fence with murderous designs upon an untimely brood of chirping birds in the currant bushes. Only this—ah, beware, Mistress Hetty! Evil eyes are looking at you; eyes from which a heathen mother would cover your face with her hands, and breathe a prayer to break the unholy spell they might cast upon you—a woman's eyes peering from a thick jungle of lilacs and syringas, so near it seems as if Hetty must feel them. But Hetty feels nothing, sees nothing but the troublesome dress; and, as the perplexing ruffles are conquered one by one, her heart grows light, the little frown smooths away and Hetty begins to sing. What a sweet voice she has! It reaches the tired mother and lightens her heart, too. It wakes her father, and then lulls him pleasantly to sleep again. Now Abner hears it, and draws his hickory shirtsleeve across his eyes, and that watcher in the green tangle—who can guess what she thinks or feels as she sinks down with her chin upon her hands, and her face quite in the dark, and listens to the pathetic story of "The Ninety and Nine?" Hetty herself is not half conscious of the pathos with which she bewails the lost one,

"Away on the mountains bleak and bare,
Away from the tender Shepherd's care,"

and goes on through the tender story to the final rejoicing when the Shepherd brings back his own. She is still humming it fitfully over and over when her mother opens the door of the keeping room and bids her go to bed and not ruin her eyes with sewing by lamplight.

"Just a minute," says Hetty; "as soon as I finish this sleeve."

And the minutes glide on and on, the sleeve is finished, held up and admired, and Mistress Hetty takes off her shoes and slips softly up stairs to bed. She does not even close the window. What should come into the house unbidden, save the cat and the cool night air? Everything is silent. The mother bird broods her little ones securely, unconscious of the cruel eyes near by, until Reuben comes whistling along the road and, boy like, stops to shy a stone at the tempting white mark on the garden fence. The prowler leaps away with long bounds over the wet grass, and a tragedy is averted with nothing to show for it but dirty tracks upon the piece of "factory" spread out to bleach.

By and by there is a little stir in the lilac jungle; a woman comes cautiously out of her hiding place and steals away to the barn.

The cows are lying here and there under the long shed, sleeping, perhaps, in a cow's uneasy fashion, but with a certain air of motherliness and content about them. They do not even wonder at the later comer as she threads her way among them, enters the barn, mounts the scaffold already well filled with the sweet new hay, and is soon asleep, hearing now and then a broken twitter from the restless swallows under the eaves, or perchance a faint, sweet voice singing, with lingering pity in its tone,

"Sick and wounded, and ready to die."

Who can tell when the summer day begins? One instant a dusky silence, cool, moist and fragrant, hanging over the hill, the next, a burst of song from some tree-top, caught up from a hundred green coverts, swelled and repeated and prolonged in mad chorus that presently settles again into silence. Then the slow stir of life awakening, the bustle among the poultry, the lowing of some impatient cow, or the sound of her companions nipping the short, juicy grass, the unwilling creak of a rheumatic pump handle, and here and there the dull thud of an improvident ax preparing the kindlings for the kitchen fire.

The day was well under way in Silas Rogers' household before a majority of his neighbors had reached this point. The cows were milked and turned into the green lane to make their own way to the pasture, the steady whirl of the grindstone, and the sharp ring of steel, told that the moments before breakfast were being made the most of, and even at the table there were few words spoken, and no useless lingering. But after breakfast Silas Rogers took down the leather-covered Bible that had been his old mother's daily companion for 80 years, and all the family sat reverently down to worship.

The golden moments might speed as they would, but no day in that household began without its portion from the Bible. It might have been a lingering recollection of Hetty's song, it might have been one of those celestial providences which we call chance, which led him to read from the gospels the story of the wandering sheep and the lost piece of silver. It is doubtful if any of them were very deeply touched by it. It was a familiar story to the good wife, and she could not keep her thoughts from straying anxiously to the loaves rising perilously in the pans, while Hetty glanced at the clock and secretly hoped her father had not chanced upon a long chapter. The reading came abruptly to an end with the heavenly rejoicing over one sinner that repenteth, and with an earnest though homely prayer, the service was ended.

Abner and Reuben almost stumbled over a woman sitting absorbed in the doorway. Silas looked at her but did not stay to question, and when they were gone she rose and said abruptly, "Will you give me some breakfast?"

Mrs. Rogers looked at her. She was a tall and not uncomely woman of about 30, but with something indefinably evil about her face. The hard mouth, the bold, defiant eyes repelled her, yet seemed as if at any instant they might break into scornful tears.

"Who are you?" asked the good wife, coming nearer with the pan of bread in her hand. Again the face lightened, grew hard, and then yielded with the sudden declaration:

"I am the piece that was lost."

Martha Rogers had not a particle of poetry in her nature, but she had the most profound reverence for the scripture, therefore the words both puzzled and shocked her. But she was a woman not to refuse bread to the hungry, so she placed food upon the table, and motioned the woman to a chair, with a brief "Set up and eat."

All the time that the woman was eating, and she did not hasten, her eyes followed the mistress and Hetty, until Martha Rogers grew nervous and sent Hetty to "right up the chambers."

As soon as she was gone, the woman turned abruptly from her breakfast.

"Will you give me work to do?" she demanded, rather than asked.

"Who are you?" asked Mrs. Rogers again, simply to gain time.

"I thought you knew. I am Moll Pritchett; they have turned me out of my house; burned it over my head," and the eyes grew lurid with evil.

"What can you do?" asked Mrs. Rogers, feebly.

"Anything that a woman can do, or a man. I can work in the field with the best of them; I have done it many a time; but I should like to do what—to be like other women."

"Are you a good woman?"

The question came straight and strong, without any faltering. She had heard of this Moll Pritchett, a woman who lived alone in an old tumble-down hut below the saw-mill, and won a meager living by weaving rag carpets, picking berries for sale, and it was suspected in less reputable ways, but Martha Rogers took no stock in idle rumors. If she had not divine compassion, she had something very like divine justice, which is altogether a sweeter thing in its remembering of our frame than the tender mercies of the wicked.

The woman looked at her curiously. At first with a mocking smile, then with a sullen, and at last with a defiant expression.

"Is it likely?" she said fiercely. "A good woman? How should I be a good woman? I tell you I'm 'the piece that was lost,' and nobody ever looked for me. If I was a good woman, do you suppose I should be where I be—only 28 years old, well and hearty, and every door in the world shut in my face? I tell ye the man that wrote that story didn't know women; they don't hunt for the piece that is lost; they just let it go. There's enough on 'em that don't get lost."

Poor Martha Rogers was sorely perplexed, all the more that her way had lain so smooth and plain before her that she might have walked in it blindfolded. If this was a lost piece of silver it was not she who lost it; but what if it were the Master's, precious to his heart, and a careless hand had dropped it, and left it to lie in the dust? And what if he bade her seek it, and find it for him? Should she dare to refuse? On this very day, when she needed so sorely the help which she had looked for in vain, had not this woman been sent to her very door, and was it not a plain leading of Providence? It is a blessed thing for us that we are usually driven to act first and theorize afterward, even though the afterthought sometimes brings repentance. The bread was ready for the oven and the woodbox was empty.

"You may fetch in some wood," said Martha Rogers; and the woman promptly obeyed, filling the box with one load of her sinewy arms, and then stood humbly waiting. Hetty came into the room and began to clear the table, but her mother took the dishes from her hands.

"Go up stairs and fetch a big apron and one of your sweeping caps, and then you may get at your sewing and see if you can finish up your dress."

Away went Hetty, her light heart bounding with unexpected release, and her mother turned to the woman, furnished her with a coarse towel and sent her to the wash-house for a thorough purification. Half an hour afterward, with her hair hidden in the muslin cap, her whole figure enveloped in the clean calico apron, a comely woman was silently engaged in the household tasks, doing her work with such rapid skill that the critical housewife drew a sigh of relief.

"There's a han'ful of towels and coarse clothes left from the ironing; you might put the iron on, Mary, and smooth 'em out."

The woman turned a startled face upon her, and then went quickly for the clothes, but something—was it a tear?—rolled down the swarthy cheek, and mingled with the bright drops she sprinkled over them. When had she ever been called Mary? When had she heard any name but Moll? Not since away among the hills of New Hampshire a pale woman had laid her hand upon the tangled curls of her little daughter and prayed that from the strange world to which she was speeding, she might be allowed to watch over these wayward feet, lest they should go astray. Had she watched? Did she know? Moll hoped not; it made her shudder to think of it. What would heaven be worth if she could see and know? And yet, what did she hear about joy in heaven over one sinner that repenteth? If there was, it must be that they knew; or perhaps only good news was carried there.

That night Hetty sang again at her sewing by the lamp, and from the attic window far above her head, the wanderer leaned out into the dark to listen. The little chamber was bare of ornament; there was not a picture on the cleanly whitewashed walls, and the straight curtain was for decency, not drapery; but it seemed to this one a very chamber of peace. The great Norway pine almost brushed her cheek with its resinous plumes, balmy with moist night air, and a bird, hidden somewhere among its branches, sent out a startled, half-awake cry, and then dropped off to sleep again. There was a pale young moon low in the western sky, with black clouds scudding across it, and the dull, steady sound of the river pouring over the great dam in the valley, seemed to come nearer and nearer, like the tramp of feet. Martha Rogers went out to the milk-room, and stood for a moment in the door, shading the flickering candle in her hand. She was only taking a housewifely observation upon the gathering storm; but it seemed to the wanderer that she might well be the woman who had lighted a candle to search for the lost piece of silver, and with a dim comprehension of love on earth and joy in heaven, she tried to pray, and fell asleep.

Silas Rogers listened to the day's story as he sat mending a bit of harness with clumsy fingers. He may be forgiven if his thoughts sometimes wandered to the hay so fortunately secured from the storm, or ran over the grist to be sent to the mill in the morning if it proved a wet day, or speculated curiously on the superhuman knowledge of almanac men; but on the whole, he was tolerably attentive, and certainly grasped the idea that his wife had secured a valuable and much needed helper.

"It seems a risk to run," said Martha, anxiously; "and I don't know but its presumptuous; there's Hetty, and there's Reuben—"

"And there's the Lord," said Silas, stopping to open his knife.

"Yes," said Martha, with a little start, "and I can't quite get rid of what she said about the piece that was lost; though to be sure, the woman that lost it ought to hunt for it."

"She never does; folks are always losing things for somebody else to find; 'tain't many of 'em can say, 'those that thou hast given me have I kept,' right straight along."

"But if you lose your own piece looking after other folks—"

Silas cut off his waxed end and gave the harness an experimental pull before he answered. "Well, there's risks, as you say, but I'd rather take a risk for the Lord than agin Him."

Martha Rogers took the risk for the Lord, and he abundantly justified and rewarded her faith. For the piece that was lost becomes peace to the heart that finds it and lays it again in the Master's hand; and locking the story of the wanderer in her own breast, it was only to the angels that she said, "rejoice with me."

And when, years afterward, the woman herself said, before the committee of the church, "I am a woman over whom there is great joy in heaven," there were not wanting those who thought she was presumptuously claiming to be a saint.

Death of the Old Wife.

She had lain all day in a stupor, breathing with heavily labored breath, but as the sun sank to rest in the far-off western sky and the red glow on the wall of the room faded into dense shadows, she awoke and called feebly to her aged partner who was sitting motionless by the bedside; he bent over his dying wife and took her wan, wrinkled hand in his.

"Is it night?" she asked in tremulous tones, looking at him with eyes that saw not.

"Yes," he answered softly. "It is growing dark."

"Where are the children?" she queried; "are they all in?"

Poor old man! how could he answer her?—the children who had slept for long years in the old churchyard—who had outlived childhood and borne the heat and burden of the day, and growing old, had laid down the cross and gone to wear the crown, before the old father and mother had finished their sojourn.

"The children are safe," answered the old man, tremulously; "don't think of them Janet, think of yourself; does the way seem dark?"

"My trust is in Thee; let me never be confounded. What does it matter if the way is dark?

"I'd rather walk with God in the dark, than walk alone in the light.

"I'd rather walk with Him by faith than walk alone by sight.

"John, where's little Charlie?" she asked. Her mind was again in the past. The grave dust of 20 years had lain on Charlie's golden hair, but the mother had never forgotten him! The old man patted her cold hands, hands that labored so hard that they were seamed and wrinkled and calloused with years of toil, and the wedding ring was worn to a mere thread of gold—and then he pressed his thin lips to them and cried. She had encouraged and strengthened him in every trial of life. Why, what a woman she had been! What a worker! What a leader in Israel! Always with the gift of prayer or service. They had stood at many a death-bed together—closed the eyes of loved ones, and then sat down with the Bible between them to read the promises. Now she was about to cross the dark river alone.

And it was strange and sad to the old man, and the yellow-haired granddaughter left them, to hear her babble of walks in the woods, of gathering May flowers and strolling with John, of petty household cares that she had always put down with a strong resolute hand; of wedding feasts and death-bed triumphs; and when, at midnight, she heard the bridegroom's voice, and the old man bending over her, cried pitifully, and the young granddaughter kissed her pale brow, there was a solemn joy in her voice as she spoke the name of her children one by one, as if she saw them with immortal eyes, and with one glad smile put on immortality. They led the old man sobbing away, and when he saw her again the glad morning sun was shining, the air jubilant with the song of birds, and she lay asleep on the couch under the north window where he had seen her so often lie down to rest while waiting for the Sabbath bell. And she wore the same best black silk, and the string of gold beads about her thin neck, and the folds of white tulle. Only now the brooch with his miniature was wanting, and in its place was a white rose and a spray of cedar—she had loved cedar—she had loved to sing over her work:

"Oh, may I in His courts be seen,
Like a young cedar fresh and green"

But what strange transformation was there! The wrinkles were gone. The traces of age, and pain, and weariness were all smoothed out; the face had grown strangely young, and a placid smile was laid on the pale lips. The old man was awed by this likeness to the bride of his youth. He kissed the unresponsive lips and said softly:

"You've found Heaven first, Janet, but you'll come for me soon! It's our first parting in more than 70 years, but it won't be for long—it won't be for long!"

And it was not. The winter snows have not fallen, and there is another grave, and to-day would have been their diamond wedding! We had planned much for it, and I wonder—I wonder—but no! Where they are there is neither marriage nor giving in marriage.—*Detroit Free Press.*

"She stoops to conquer." Can this refer to the fond mother who bends over her wayward boy with a number five slipper?

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of thirty-two letters.
My 7, 1, 8, 8, 12, 16, is a measure.
My 6, 31, 7, 8, 25, 22, 3, is a nation.
My 32, 23, 19, 4, 24, was a king.
My 26, 30, 14, 22, are small animals.
My 13, 21, 18, 31, 27, is in advance.
My 22, 5, 23, 16, 32, is to remain.
My 2, 11, 30, 10, 25, 31, 7, is the employment of many girls and women.
My 9, 17, 15, 30, 31, is a large body of water.
My 29, 20, 28, is an interjection.
My whole is a very true proverb.

A. B. C.

Curtailments.

1. Curtail a shrub and leave warmth.
2. Curtail to draw tightly and leave a sticky substance.
3. Curtail an animal and leave a mark of distinction.
4. Curtail an author of Queen Elizabeth's time and leave a bundle of goods.
5. Curtail a bird and leave a brave man.

JERRY.

Diamond Puzzle.

1. Found in perpetual poverty.
2. Before.
3. To talk idly.
4. Supplications.
5. An important article of food.
6. A mineral.
7. A consonant.

JOSEPHUS.

Concealed Trees and Fruit.

1. Do, ma, please let me go.
2. Oh, Grace, dare you go over that bridge.
3. Do not let them lock the door.
4. You must go for Angeline to night.
5. Give me the map, please, I want it.
6. Auction sale, Monday, January 25th.

E. M. V.

Islands.

1. Modern, ardor, and a conjunction.
2. A quaker and an adverbial ending.
3. Modern, wrath, and a soil.
4. Part of a fish, and a masculine name.
5. A heavy weight, a consonant and a vowel.

JAMES.

How a Boy Became an Editor.

Once upon a time there lived in the little town of S——— a boy whose energy even exceeded his means. His father was a well-to-do blacksmith, who wished that George—for his name was George Vink—would go to school until he had obtained a common school education, and then learn the blacksmith trade. George was willing to go to school, but determined to be a printer if an opportunity offered itself.

As there was no printing office in his town, George studied the harder, and when he read an advertisement in an Eastern paper, in which it was stated that for $4 he could get a small printing press, some type and ink, he concluded that here was his chance, and went to work and earned the necessary $4, and in due time obtained the printing material, and he soon learned to set the type and run the press, on that necessarily small scale. He was soon printing cards, etc., to his own satisfaction, and encouraged by his success, he purchased limited quantities of type, and finally concluded he would try to start a printing office, and so a small room adjoining his father's blacksmith shop was set apart for his printing office. It was small, to be sure, yet it contained a new $80 job press, several fonts of type, a keg of ink, and paper, cards, etc.

All the small handbills, posters, cards, etc., which were formerly sent to a town twenty miles distant, were now given to him. He improved in his business rapidly, and to make a long story short, he is now the owner of as fine a country office as is to be found in the State. He is also editor of an eight-page, five-column weekly newspaper, and the husband of a fine and intelligent lady, whose parents, some years before, upon reading a copy of his paper sent them by friends in S———, were induced by the glowing accounts of the mild climate and other advantages to leave the Eastern States for California.

A YOUNG lady who graduated from a high school last July is teaching school up in New Hampshire. A bashful young gentleman visited the school the other day, and was asked by the teacher to say a few words to the pupils. This was his speech: "Scholars, I hope you will always love your school and your teacher as much as I do." Tableau—giggling boys and girls and a blushing school-ma'am.

A YOUNG man proposed for the hand of a beautiful girl. As she hesitated about replying, he said: "I await your answer with bated breath." The girl, who is a good deal of a humorist, said: "Well, Mr. Man, you will have to bait your breath with something besides high wines and Limburgher cheese to catch your humble servant. Good evening."

Humorous.

Chips.

OUT West the agents take care of the Indians, and the Indians reciprocally take hair of the agents.

IN proof of the assertion that cattle will stray into strange places, we have seen a cow hide in a shoemaker's shop.

A MAN who buys Confederate bonds will make a permanent investment. They will be just as good in the year 2000 as they are to-day.

A TALL man having rallied a friend on the shortness of his legs, the friend replied: "My legs reach the ground; what more can yours do?"

A TENNESSEE girl went out for a sail with a man who was panting to die for her. A squall upset the boat, and he panted for shore and let a negro rescue her.

A PRIEST once asked a condemned criminal in a Paris jail: "What kind of a conscience have you?" "It's as good as new," replied the prisoner, "for I have never used it."

"WHAT is the action of disinfectants?" asked the examining board of a medical student. "They smell so badly that people open the doors, and fresh air gets in," was the reply.

"THAT'S what I call a finished sermon," said a lady to her husband, as they wended their way from church. "Yes," was the reply; "but, do you know, I thought it never would be."

WHEN the girl who has encouraged a young man for about two years suddenly tells him that she never can be more than a sister to him, he can for the first time see the freckles on her nose.

A FRENCH artist gave his last work to a porter to convey it to the salon. "Be careful, be careful," said he, "the picture is scarcely dry." "Oh, never mind," exclaimed the porter; "my clothes are old."

"DOES our talk disturb you?" said one of a company of talkative ladies to an old gentleman sitting in a railway station the other afternoon. "No, ma'am" was the naive reply, "I've been married nigh on to 40 years."

A YOUNG man proposed for the hand of a beautiful girl. As she hesitated about replying, he said: "I await your answer with bated breath." The girl, who is a good deal of a humorist, said: "Well, Mr. Man, you will have to bait your breath with something besides high wines and Limburger cheese to catch your humble servant. Good evening."

Household Hints.

STONGE PUDDING.—Rub six ounces of butter or beef dripping into a pound of dry flour, in which a level dessert-spoonful of ground ginger and six ounces of brown sugar have been mixed; dissolve two level teaspoonfuls of carbonate of soda in half a pint of milk, mixing it smooth and free from lumps before adding to the flour. Beat all together into a soft batter, and pour into a buttered basin. Allow the pudding plenty of room to swell in the cloth, which it does considerably; plunge into very fast boiling water and keep boiling two hours and a half. Turn it out, and serve with wine sauce; some prefer to eat it dry.

CANVAS-BACK DUCKS.—Select young, fat ducks; pick them nicely; singe and draw them carefully without washing them, so as to preserve the blood and consequently the full flavor of the bird; then truss it and place it on the spit before a brisk fire, or in a pan in a hot oven for at least fifteen or twenty minutes; then serve it hot with its own gravy, which is formed by its own blood and juices, on a hot dish. It may also be a little less cooked, and then carved and placed on a chafing-dish with red currant jelly, port wine and a little butter.

ALMOND JUMBLES.—Beat half a pound of butter to a cream, with half a pound of loaf sugar, pounded fine; mix with a pound of flour, and a quarter of a pound of almonds, blanched and shred fine, or beaten to a paste with the juice of a lemon; work it well together, roll it out, then cut it into small round cakes, and bake them in a quick oven.

GINGERBREAD.—Three cups of flour, one of sugar, one of butter, and one of molasses; three eggs beaten light, one tablespoonful of ginger, one teaspoonful of pearl-ash and some cloves. Beat the butter in sugar as for pound cake, then add the other ingredients, putting in the pearl-ash last. Bake them in cake tins.

SOFT GINGERBREAD.—Six cups of flour, two of sugar, two of butter, two of molasses, two of milk, four eggs, a tablespoonful of ginger and a little allspice; beat the butter, sugar and eggs light; then stir in the other ingredients. Add a teaspoonful of pearl-ash dissolved in vinegar.

ENGLISH BUNS.—One pound of flour, half pound of sugar, quarter pound butter, same of cinnamon, half pint of raisins; rub them all together and mix with milk and four or five drops of pearl-ash. Wash them after they are baked with sugar and water.

ROCK CAKE.—The whites of four eggs beaten very light, one pound of loaf sugar added to them, three-fourths of a pound of sweet almonds slightly bruised. Bake on paper in tins.

Health Column.

The Tape Worm.

Most readers know that the domestic pig is subject to a disease known as "measles," in which the muscles are more or less filled with *cysts*, which render the pork unfit for food; but I think few are acquainted with its cause.

Man, it is well known, is occasionally infested by a parasite—the so-called "tape-worm" (*Tænia solium*)—which may be described as having a tape-like body of varying length, with a differentiated "head" or *scolex* at one extremity.

This apparently single animal is in reality a colony of mothers and daughters, the scolex being the parent of all.

This "head" is provided with a *rostellum*, or, as it might be called, proboscis, encircled by a crown of hoods, below which are the suckers; each segment added to the scolex is a complete individual containing a complicated and perfect reproductive system.

The last segment—*proglottides*—which are filled with eggs, break off at intervals, and either the eggs are set free within the intestine of their host, when they are passed out with the fæces, or the segments themselves are evacuated.

The tape worm feeds on the juices of the bowel by absorbing the nutriment through its skin, and does not appear to seriously inconvenience its host in any way. In Abyssinia *tænia helminthosis* is constant and general; indeed the animal is there regarded as a sort of hygienic agent and cultivated rather than discouraged, yet the people are healthy; certain it is also that wild animals, almost without exception, harbor at least one species of tape worm as a natural condition.

But what has this to do with "measles?" Now to the point. Let us suppose one of the before-mentioned eggs taken into the stomach of a pig, either by its eating the excrement of a person affected or through the water or air; here it hatches, not into a tape-worm, but into an animal of oval form, transparent, contractile, in the middle of which are six stylets arranged in pairs; with these it cuts its way through the tissues until the muscles are reached, when, having arrived at its destination, it stops burrowing and surrounds itself with a sheath.

Here the stylets atrophy, a new and quite different crown of hooks is produced, and the parasite becomes a *cysticercus* or vesicular worm, the cyst being about the size of a hazel nut. This constitutes "measles;" the exhaustion or even death attendant on the disease is caused by the scores, hundreds, or even thousands of animals boring through the tissues; once encysted there is no further suffering or danger.

The cysticercus remains encysted for months or years, or until the piece of flesh enveloping it *is introduced into the stomach of man*, in which case it instantly quits its torpid condition, leaves its sheath, makes its way to the intestine, where, attaching itself by its suckers and hooks, it grows—or rather reproduces—so rapidly that in a few weeks a tape worm of several yards in length is formed, which reproduces eggs, and so *ad infinitum*—from pig to man, from man to pig.

Should the eggs be introduced into man himself or animal other than the hog, the cysticercus penetrates the tissues in the same manner, but it is "not at home," and instead of resting in the muscles it makes its way to other organs, such as the brain, heart, or eye, where its presence has caused in man several instances of insanity and death. Should a piece of meat containing a vesicular worm be eaten by a pig or animal other than man a *tænia* is developed, but it also is "not at home," and does not attain its full development.

Both eggs and cysticerci are killed by a temperature of 200° Fah., so there is no danger in eating well-cooked pork, even if it contains cysticerci.

To prevent hogs contracting "measles" it is only necessary to prevent them having access, either through their food or water, to the secretions of man, and they will not suffer.

Throughout the genus *Tænia* we find this dual life; for instance, the cat has a tape worm, the cysticercus of which she gets from the mouse, and the dog one which he obtains from the sheep.—*Scientific American.*

PRESCRIBING BY TELEPHONE.—A few evenings ago a physician of North Adams, Massachusetts, was called by telephone about one o'clock at night. The call came from Briggsville, about two miles away. A child was there suffering with the croup and in a critical condition. The night was dark and stormy, and the doctor found nothing pleasant in the contemplation of the trip which he was asked to make. When preparing to go out into the darkness and rain, his mind conceived a bright thought, which was immediately followed by acts. He called the Briggsville house in which the little sufferer lay, and requested the parents to bring it to the telephone transmitter. This was done. The child coughed its croupy cough, and the doctor listened intently to every sound which came from his patient. He prescribed a remedy, and one of the members of the family prepared and administered it. The relief was immediate and the recovery rapid. The doctor waited at the telephone until he heard of the favorable results of his prescription, and then sought again the repose of his couch, pronouncing blessings on the inventor of telephones.—*Hartford Post.*

Worth Knowing.

The Match Business.

It may not be generally known, yet it is nevertheless a fact, that a monopoly exists in the match-making business at the East as fully equipped and as well organized as that of the Standard Oil Company. There may be more money invested and larger profits growing out of the latter, but the monopoly of the former is not less perfectly organized.

The head office of this mammoth match-making concern is in New Haven, Conn., and it is said to have but a single important opposition—a factory at Trenton, N. J. The company has 15 factories in operation, scattered throughout the Eastern, Middle and Western States. It is well supplied with the most perfect labor-saving machinery, by which it is enabled to perform its vast labor by the aid of only about 3,000 hands in all its factories.

In one room in one of the two factories at St. Louis there is $12,000 worth of machinery used for the making of paper boxes. The whole process is mechanical. At Akron, O., where probably the largest factory is located, the machinery is so perfected that one might say a tree is put in one end of a machine and it comes out matches at the other. The company has about $5,000,000 invested in machinery and buildings.

What is the annual yield of matches?

It would be difficult to estimate it. Some idea may be gained by a glance at the figure paid for stamps. The Government exacts a revenue of one cent per 100 on matches manufactured. During the year ending May, 1881, the company paid for stamps, $4,500,000. This year the amount paid will be increased $50,000. You may figure it out yourself. There are 200 matches in a box. The tax is two cents; they are sold to the grocer for three cents, and retailed at five cents.

Figuring upon this basis, $4,500,000 represents that 455,000,000 one-cent stamps were used during the year, and as each stamp represented 100 matches, the grand total manufactured is 45,500,000,000 matches, or 277,500,000 5-cent boxes. This would give 910 matches per annum, for every man, woman and child in the country, and an expense of 22¾ cents for each.

CLEANING BRASS.—The government receipt for cleaning brass, used in the arsenals, is said to be as follows: Make a mixture of one part common nitric acid and one-half part sulphuric acid in a stone jar; then place ready a pail of fresh water and a box of sawdust. Dip the articles to be cleaned in the acid, then remove them into the water, after which rub them with sawdust. This immediately changes them to a brilliant color. If the brass is greasy, it must be first dipped in a strong solution of potash and soda in warm water; this cuts the grease so that the acid has power to act. The *Manufacturer* says that rusted steel can be cleaned by washing with a solution of half an ounce of cyanide of potassium in two ounces of water, and then brushing with a paste composed of half an ounce of cyanide of potassium, half an ounce of castile soap, an ounce of whiting and sufficient water to make the paste.

FOR THE PRESERVATION OF BELTS.—*Wood and Iron* gives its readers a recipe for the preservation of belts: Resin oil and 10% of mica. Resin oil will make a belt grip for a little while, and then put a glaze on it, making it necessary for another dose of oil, etc. If it is a leather belt, resin oil will make it stiff and harsh, and cause it to slip and crack. Resin oil is not a "grease," as stated by *Wood and Iron*. It is more of a varnish. It is used to make cheap grades of printers' ink; being ground up with lamp-black in roller mills. Mica is recommended as a lubricant for heavy journals, and has no place on a belt. *Wood and Iron* says that a belt coated with resin oil and mica is not affected by "corrosion," whatever that is. Our Eastern belts never "corrode." Boilers sometimes do. We have known belts to *rot*, but never to "corrode."—*United States Miller.*

RECOVERING SOAP FROM SOAPSUDS.—At Ivry-sur-Seine, a manufactory of toilet soaps has prospered for a considerable time. The soap, which is perfumed with oil of roses, is obtained from the treatment of washing water in Paris, which, instead of being run into the sewers, is now collected in casks.—*Druggists and Chemists' Circular.*

CLEANING PAINT.—Frequent scrubbing with soap and water will invariably destroy the freshness and brilliancy of paint. Whiting will remove spots and clean paint much better than soap, and with no injury to the most delicate colors. Make a paste of whiting and hot water, rub it on well with a flannel cloth and rinse off with tepid water and a clean flannel.

TO MAKE A GOOD COLOGNE.—Take alcohol 95%, 1 quart; oil of cedrat, 9 drams; oil of thyme, 2 drams; oils of bergamot and lemon, 6 drams; oil of Portugal, 4 drams; oils of neroli, vervain and rosemary, 2 drams; oil of mint, 2½ drams; eau de melisse, 2 drams; tincture of musk, 24 drops. Mix, and after standing 24 hours, filter till clear.

MASONIC.

Officers Grand Lodge.—Clay W. Taylor, Shasta, G. M.; John (Quincy) Adams, Vallejo, D. G. M.; Moses Heller, G. Treas., S. F.; A. G. Abell, G. Sec'y, S. F.

Masonry in Utah.

From the "Annual" of the Salt Lake *Tribune* we take the following interesting account of Masonry and its progress in Utah: Free Masonry, being a purely Gentile organization, has, since its first introduction into Utah in 1866, kept a steady pace with the Gentile immigration in the Territory. Ten years ago the Grand Lodge of Ancient, Free and Accepted Masons was instituted. Then there were but three Lodges in the Territory, with 124 members; to-day eight Lodges are on the Grand Lodge register, with a membership of 422. In other Western States and Territories the Lodges and membership have more rapidly increased; in Utah the Brotherhood pursues a prudent course, has more of an eye for members than numbers, and, no doubt, will gain by it at the end.

The annual meetings of the Grand Lodge ar held on the third Tuesday in each year. The several Lodges in the jurisdiction report their doings to the Grand Secretary on the day of St. John, the evangelist—December 27th. The eleventh annual communication will be held in this city January 17th, 1882, and will be presided over by the Most Worshipful Philip Henry Emerson, who was elected Grand Master at the annual meeting in 1880. The transactions of the meeting will be recorded by the Right Worshipful Christopher Diehl, who has been Grand Secretary ever since the organization of the Grand Lodge.

The annual receipts of the Grand Lodge amount to nearly $1,400, which are derived from a *per capita* tax levied on each member in the jurisdiction, and paid in the Grand Lodge treasury by the Lodges at the end of every year. The amount thus received is used for carrying on the business of the Grand Lodge, such as salaries, printing and a very liberal donation to the library.

The Grand Lodge of Utah, although small in Lodges and membership, is well and favorably known throughout the globe, and wherever a craftsman hailing from Utah makes himself known as such, he is a welcome visitor and is recognized as a true Brother. The study of Masonry is a science, and it has been said and written in every language that there are a few Masons in this Territory who are equal to any on this continent, as far as a knowledge of the history, jurisprudence, etc., of this ancient society are concerned. A reputation like this is certainly enviable, but it could not be obtained without hard work and labor on the part of those who have delved into the deep and separated the chaff from the pure wheat. Free Masonry exists solely of itself. It eclipses all the institutions and orders of the whole world, which ever have been or shall be. It is to be hoped that the Grand Lodge of Utah will continue in its onward march, and that its members will never forget the Masonic motto: "Light, more light."

The following is a list of the constituent Lodges in Utah, with membership, funds in the treasuries, disbursements for charitable purposes during the past year, and Masters and Secretaries for the year 1882:

Wasatch Lodge No. 1, Salt Lake City, has 100 members; funds in treasury, $2,500; expended for charity, $510; John Cunnington, Master; Julius Malsh, Secretary.

Mt. Moriah Lodge, No. 2, Salt Lake City, has 111 members; funds in treasury, $4,978; expended for charity, $498; Parley L. Williams, Master; Hugh Anderson, Secretary.

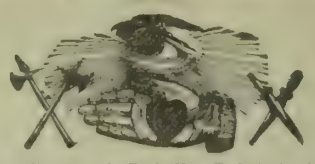
Argenta Lodge, No. 3, Salt Lake City, has 75 members, funds in treasury, $553; expended for charity, $150; Obed Alley Palmer, Master; Moses Casper Phillips, Secretary.

Storey Lodge, No. 4, Provo, has 37 members; funds in treasury, $764; expended for charity, $93; Alexander George Sutherland, Master; Ben Bachman, Secretary.

Corinne Lodge, No. 5, Corinne, has 12 members; funds in treasury, $172; expended for charity, $76; Alexander Toponce, Master; Edsom Meacham Quimly, Secretary.

Weber Lodge, No. 6, Ogden, has 44 members; funds in treasury, $708.55; expended for charity, $154; James Thomas Parkinson, Master; Alvin Charles Emerson, Secretary.

Uintah Lodge, No. 7, Park City, has 30 members; funds in treasury, $253.50; expended for charity, $182; Albion Bernard Emery, Master; C. M. Wilson, Secretary.



St. John's Lodge, U. D., Frisco, has 14 members, and was organized by the Grand Master, Nov. 14, 1881; Harry Craig Hill, Master; George Wilson Crozier, Secretary.

Total membership, 422; total in treasuries, $9,929.05; total disbursements for charitable purposes, $1,163.

Alameda Chapter, No. 36, R. A. M., has about 125 members in good standing. The membership has increased about 33⅓% during the past two years, and is in a prosperous condition.

Indp't Order of Odd Fellows.

Grand Officers. Davis Louderback, G. M., San Francisco; Leon D. Freer, D. G. M., Oroville; D. M. Burns, G. W., Sacramento; W. B. Lyon, G. Sec'y, San Francisco; H. B. Brooks, G. Treasurer, San Francisco.

The officers of Isabella Rebekah Degree Lodge, No. 17, Santa Cruz, were installed by D. D. G. Master Thompson, Duncan McPherson editor of the *Sentinel* delivered the address: In the *Country Gentleman*, an English magazine, an Odd Fellows' Lodge is represented, as early as 1745, as a capital place in which to spend an evening, and James Montgomery, a Scotch poet, in 1788, referred to Odd Fellows as a "band of brothers" whose motto was "friendship, love and truth." The Odd Fellows of the United States, seeing the necessity of the co-operation of woman, appointed a committee of three—ex-Vice-President Colfax being its chairman—to draw up the ritualistic work of a degree to which ladies could be admitted. The Rebekah Degree was adopted in 1851. To become a member of this degree, it is necessary to be an Odd Fellow of the scarlet degree, in good standing; or the wife of a scarlet-degree member in good standing; or the daughter, 18 years of age and unmarried, of a scarlet-degree member in good standing; or the widow of a scarlet-degree member who died while in good standing. In this State there are 57 Rebekah Degree Lodges, containing 3,105 members, the membership being almost equally divided between brothers and sisters, the increase in membership last year being 339. The Santa Cruz membership is 84, the Lodge having been organized in 1874. No weekly or other benefits are paid to the sick, and the dues are but $1 per annum. The objects of the society are charitable and social—the bringing together of fathers, mothers, sisters and brothers; moral improvement and intellectual advancement. In a humorous way, the history of Rebekah, from whose Biblical record the Order takes its name, was given. When Isaac's people wanted him to take a wife they sent a servant into a strange land. Arriving at the home of Rebekah the servant stopped. Rebekah came down to the well for water, filled her pitcher and placed it on her head. The servant asked her to give him drink. She said she would, and to his camels also. He asked if accommodations could be obtained at her people's house. She said they could, for man and beast. She hastened to the house and told her people. They went out and welcomed the traveler. The servant told his newly made friends of the object of his visit, and that he was satisfied that Rebekah was the woman he sought for a wife for his master. The mother said Rebekah could go to the land of Isaac in ten days. The servant said, "Nay; let us depart on the morrow." The mother said she would let Rebekah decide. Now Rebekah had shown herself charitable at the well, and a good girl all the time, and it is expected that when called for she was at work in the kitchen relieving her mother of the more arduous household duties. Rebekah was a sensible girl, and when called before the servant for her decision, she said she was ready to depart, probably concluding that by going immediately she would save her folks the expense of long nights of courtship, oil, candles, gas, electricity, or whatever they burned in those days. Gathering about her her maid servants and preparing her personal apparel, she, the next day, mounted a camel and started for the land of Isaac. Arrived there, she saw a man in the field and asked who he was. On being informed that he was Isaac she dismounted and covered her face with a veil. Rebekah was not only charitable and industrious and kind, but she was modest; she was beautiful and comely to look upon, and Isaac fell in love with her at first sight, just as Adam fell in love with Eve, and as young Isaacs have been falling in love with Eve's daughters ever since.

A correspondent of the *Companion*, in speaking of James L. Ridgely, says: It was a wonderful event in our history that a man could serve in a routine office, with no special remunerative salary to buoy him up, for over 40 years; and still more, that the same man had held closely on to an institution for over 50 years, and to be in continual active duty all the time, always seeking to better the working of the Order, and at the same time seeking to improve the moral and social condition of its members.

"Hold on, boys," said an old worker to some brothers who were preparing resolutions of condolence, a copy of which was to be sent to the widow of the deceased. "Hold on awhile. I know the circumstances of the family, and move that $25 be donated and forwarded at once; the resolutions will sound better after that is done." The suggestion was acted upon, and both heart and hand extended to a deserving charge of the Lodge.

The January number of the *Companion* is well filled with notes of Ridgely memorial services in different States, all showing the universal desire to do him honor, and the regard in which he was held.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

Memorial, 174.

A very interesting meeting was held by this young and growing subordinate on Monday evening, January 16th. There was a large attendance, including several of the Grand officers and visitors from six different Lodges. The M. W. degree was conferred on one, after which the J. W. degree was given to three candidates. Bro. H. H. Mayhew, D. D. G. M. W. then formed a Grand Lodge by appointing Samuel Booth P. G. M. W.; J. F. Jenness G. F.; George A. Bordwell G. O.; Frank S. Poland G. Guide. The services were particularly dignified and impressive, the *immense* installation services of late by Bro. Mayhew having made him quite efficient in this branch of our ritual. Under the head, "Good of the Order," Bro. Mayhew made a short, eloquent and masterly speech. Wm. H. Barnes, G. M. W., being present on an informal visit, took occasion to pay a very high compliment to the officers and members of this energetic subordinate. As far as his observation extended he thought there was not a Lodge of any kind of any Order, whose officers had so low an average age. Bros. Booth, Bordwell, Poland, Jenness, and also Friermuth of Mission San Jose, 56, made a few happy remarks. Bro. Friermuth's remarks were very interesting and well received. Bros. Guyselaar, Nevin, Gerlach and Lükenday of Memorial made short, congratulatory speeches that closed one of the best meetings we have attended since the commencement of the new term.

Bernal's, 19, Anniversary.

The fourth anniversary of Bernal, No. 19, was celebrated at the large Lodge-room, corner Sixteenth and Valencia streets. There was a large number in attendance, including delegations from Excelsior, No. 126, and Noe Valley, No. 185, and several Grand officers, among whom were the Grand Master; E. F. Loud, D. G. M.; H. N. Mayhew, D. D. G. M. W. After the Lodge business was finished, the Committee of the Whole was organized, with Charles S. Haughton, P. M. W., acting as chairman, who made an address of welcome to the visitors, and then introduced the programme of the evening, which consisted of an address by the Grand Master and Deputy Grand Master, remarks by Bros. Gunnison and Adams, of Excelsior, No. 126, and selections by Thompson, White and A. D. Jordan, of Noe Valley, No. 185. Bro. Sam. Booth favored them with a solo, and Bro. Mayhew gave a recitation. Bros. Van Stratton, Delano and Haughton made very acceptable speeches that were well received. An efficient committee, with the veteran Financier, served refreshments of a choice character to this immense company in the Lodge-room, and a happy termination to a happy event is to be recorded as the result of Bernal's fourth anniversary.

Golden Gate, 8.

The old pioneer came to the front on Thursday evening, Jan. 26th. There was a very large attendance at the Lodge meeting in anticipation of some interesting proceedings which were to take place after closing. There were several applications for membership. After the Lodge meeting, the large hall was filled with ladies, young folks and guests. The master of ceremonies, Bro. Harry J. Lask, P. M. W., introduced the exercises by a few appropriate remarks, saying that this meeting was the first of a family gathering or monthly socials, to be given hereafter by Golden Gate Lodge, which announcement was greeted with joyful demonstrations. The programme was commenced by a cornet solo, by Prof. Coggins (one of the proprietors of Ixora hall), Prof. Geo. Williams accompanist; vocal solo, Mrs. Pier, daughter of Bro. I. Wisler, Fin. This lady has a rich voice of great compass, and her fine effort was given a recall, and she was presented with a large bouquet. Violin solo, Master Henry Foster (a little blind boy of seven years), who was heartily encored; vocal solo, Prof. Haseltine, member of Golden Gate, Miss Cora Kaemmerling, his niece, accompanist. It is needless to say there was a recall given to this artistic effort. Vocal solo, Wm. H. Voorhees, P. M. W. Bro. Voohees is well known among the profession, and his masterly and artistic effort was given a hearty encore. The chairman then requested Emanuel Lewis, the first P. M. W. of Golden Gate, to come forward, as he had something to say, who, in an eloquent and felicitous speech, recounted the services of Bro. I. Wisler as Receiver of Golden Gate for nine terms, and asked him, in the name of Golden Gate Lodge, to accept a small token of esteem, which, when opened, proved to be a magnificent present, consisting of a full set of knives, forks and large and small spoons, solid standard silver, engraved with his initial letter, "W." Bro. Wisler was amazed at the gorgeous array, and could only say, "It is too much." Bro. Lask, seeing his dilemma, kindly thanked the brethren for our seemingly injured Bro. Wisler. Vocal solo and encore, Miss Kaemmerling; recitation, Wm. B. Marshutz, of Sts. John. His amusing delineation of an unfortunate Teuton was given a recall. Instrumental duet—zeither, Adolph Fine; guitar, R. H. Whitely. This was a professional performance of the highest character, and was given a hearty recall, which was kindly answered. Recitation, Prof. Eastman, Organist of Sts. John Lodge, a finished effort that was given a recall; comic solo and encore, Bros. Gus Pohlman, who, as usual, created great amusement; piano solo, Harry J. Lask, a grand effort that was kindly received and given a hearty recall; vocal solo, Mrs. Fowler, a sweet sentimental song that was well received, and for a recall, in company with Miss Jessie McGee, rendered beautifully a fine piece of music. The whole audience then arose, and sang our closing ode, which ended a select and interesting social that reflected credit on Golden Gate, No. 8.

As an evidence of the prosperity and interest taken in our Order we make a record of the last term of Golden Gate, No. 8. The books of the Financier showed a membership of 147, and all there was due from them, including dues and assessments, was $6.70.

Harmony, 9.

This growing subordinate has started out on the new term nicely. Her meetings are always well attended, and hardly a night passes but the degrees are conferred on one or more candidates. On Saturday evening, January 21st, the M. W. degree was conferred on three candidates, and the new officers did it in admirable manner. Later in the evening Grand Master Barnes called in, and made one of those stirring speeches that he so frequently indulges in, to the great delight and gratification of his listeners. Wm. Decker, P. M. W., Bros. J. Cohen, F. Blight, M. W., Wm. Thackery and others, had some very pleasant and congratulatory words for the Grand Master, Harmony Lodge and Workmen generally, which closed an interesting meeting.

Myrtle, 42.

On Saturday evening, January 21st, Myrtle held a grand meeting. This was an off-night, and an informal re-union held, Wm. H. Barnes, G. M. W., having been invited to be present. He delivered an eloquent and practical address, which was received with much favor. After a very enjoyable recess, the Lodge was called on, and felicitious speeches made by Bros. Sanborn, Morris, Baker, Kosminsky, Gilmore and others, that whiled away a happy and well-spent evening.

Triumph 180.

Triumph has commenced the new term with renewed increase in membership and general interest in its Lodge meetings. On January 24th, there was a good attendance and several petitions received. It was reported during the evening that one of their members, who is now an inmate of the Napa asylum, was lying in a dangerous condition. The Lodge has paid his dues and assessments regularly. This young Lodge has taken her place as one of the best and brightest subordinates in this jurisdiction.

Oakland Lodge Locals.

California, 1.

Editors Watchman:—It is some time since I noticed anything in your valuable paper from the parent Lodge of the Order in this State—California, No. 1. And I have no doubt that many of the members will be pleased to hear that old No. 1 ranks close up to the head of the list, if not in numbers, we can safely say in quality and age. Although being the oldest Lodge in the State, the average age of members is but a trifle over 36 years. Since the organization of No. 1, in August, 1875, we have initiated and taken in by card 150 members; but, owing to the fact that many of our members could not get employment here, they were reluctantly compelled to take their card from us, and deposit it where it would be most convenient for themselves, but we still have on our roll 115 Master Workmen in good standing, and steadily increasing all the time. At our meeting on Jan. 10th, we had the pleasure of Bro. Pratt's company, who is looked upon as the Upchurch of the Order in this State, and welcomed alike in any Lodge he may see fit to honor by his presence. We have been very successful in the choice of officers as a general thing, but I think our present officers, especially our Master (Bro. Berdan), has had no superior. He is a thorough business man, splendid parliamentarian, and is perfectly at home in the chair he now fills with so much grace and ability. At our last meeting we had a decidedly enjoyable time, many visiting brothers being present, including Bros. Stewart, Muntz, Stevens and Past Master Schutz, of No. 6; also Bro. Frost, of No. 35, with several others, whom I have now forgotten. Under the usual head, after desposing of some refreshments for the inner man, speeches and stories were in order, and each one tried to outdo the other, with either speech or story, but it remained for Bro. Frost, of No. 35, to carry off the prize with his splendid flute story. The principal part of the evening's performance was the presentation to the Lodge of a magnificent shield and anchor, emblems of the Master Workman's degree, by Past Master E. W. Berry, who, after a few introductory remarks, concluded with the following: "Bro. Master Workmen, Officers and Members of No. 1:—It becomes my pleasant duty this evening to present this Lodge, with which I have been associated so long, these emblems of our Order, the value of which is not in its component parts, but in the feelings that prompt the act. Our Order is not one based upon a foundation of good fellowship alone; and while that feeling should enter into its councils to a great degree,

harmony being the strength and support of all societies, and particularly of ours, yet its great object is protection; not directly to ourselves, but to those who have the right to claim our best care and guardianship. Not one of us can personally claim or receive the benefits of this kind and beneficent Order; but those who are left, after we pass down through the Valley of the Shadow of Death, to that bourne from which no traveler has ever returned, they are the one's into whose hands the legacy, which our foresight and affection prepared for them, is paid by the faithful guardian, Ancient Order of United Workmen. Brother Master Workman, I now have the pleasure of presenting through you to California Lodge, No. 1, this testimonial, hoping it will always serve as a remembrance to us of those beautiful words, Charity, Hope and Protection." Our Master Workman seemed to be taken somuch by surprise, that it took him some little time time to collect his thoughts. But when he recovered from his surprise, I think he more than redeemed himself; and in accepting the beautiful present on behalf of California Lodge, No. 1, made the following reply: "Brother Past Master Berry, you will permit me to extend to you the sincere and grateful thanks on behalf of the membership of California Lodge, for the beautiful, appropriate and magnificent gift that you, with your considerate forethought have procured, and in the exercise of a generous liberality presented to them. Brethren of the Mother Lodge of our noble Order, may these emblems ever prove a constant and ever-present reminder of the teachings of our Order, and prove provocation of a unity that is strength, and incite you to those individual exertions so essential to success, and inspire within, the hope that to our present position of being the Mother Lodge of our beloved Order on this coast, we may be enabled to add the proud title of the Banner Lodge of the Alameda jurisdiction. Bro. Past Master Berry, I again thank you in the name of the Lodge for your magnificent gift, and have no doubt that from the body of the Lodge, those thanks will be more eloquently conveyed than is in my power to do." By the time Bro. Berdan had closed his remarks it was getting rather late, and as the members of No. 1 are very anxious of retiring to their virtuous couches at a reasonable hour, the Master thought it best to call for the Financier's regular speech. This ended a meeting that will long be remembered by No. 1.—W. H. W.

Presentation.

Occidental, No. 6, held a grand meeting on Jan. 13th. The brethren present expected a grand surprise for one of their honored members, and turned out in goodly numbers. The acting Master Workman, Bro. Stevens, requested J. J. Schutz, P. M. W., to occupy the chair for a short time. Having planted him in the place he had so honorably and successfully filled for the last term, J. F. Caruthers, P. M. W., took the occasion to recount his labors and the esteem in which he was held by the members of Occidental, No. 6, and Workmen in general. His earnest, happy and eloquent speech was received with much favor by the Lodge, as a tribute to a true Workman, and was fittingly brought to a close by presenting to Bro. Schutz a magnificent gold locket, within which were the pictures of his charming wife and lovely daughter, painted in water colors. This beautiful souvenir is studded with four large diamonds at the top of the anchor and shield, which is on the locket, under which are the enameled letters, A. O. U. W. Sparkling below are 22 small diamonds; on the opposite side are engraved these words: "Presented to J. J. Schutz, P. M. W., by the officers and members of Occidental Lodge, No. 6, Oakland, Jan. 13, 1882." Bro. Schutz was more than surprised, and his usual eloquence failed him on this occasion. The spontaneous ovation given him on this evening caused him to feelingly give his noble and generous brethren, in broken words, his deepest thanks and gratitude. This pioneer Lodge has had a bright record in the past, and with her membership at present we may count her as one of the model Workman Lodges of California.

Lodge Locals.

Mt. Hamilton Celebrates.

On Wednesday evening, Jan. 25th, the brethren of San Jose and vicinity turned out in full force. The regular business of the Lodge was finished with quick dispatch, which included the reception of several petitions and instructions in the secret work by the Grand Master. The Lodge was closed and the doors thrown open to the members of the D. of H., Magnolia, No. 6, who were admitted as a body, and the officers were assigned seats of honor according to their rank, followed by a large concourse of ladies and young people, completely filling the large hall. The following programme was given: Piano solo, Sister Callish; an appropriate introduction that was well received. Address of Welcome, Wm. Osterman, M. W.; an able and dignified speech that was just suited to the grand occasion. The Grand Master then delivered one of those interesting, amusing and logical speeches for which he is noted, with most hearty demonstrations of approval. Quartette, "The Forty-acre Farm," Bros. Edwards and Haight with their wives, Mrs. Edwards and Mrs. Haight; a select and artistic effort, receiving a hearty recall that was kindly answered. Speech by Bro. W. B. Harney, Overseer of Mt. Hamilton; Bro. Harney culled from the classics interesting and humorous hits that were well received and loudly applauded. Solo, Prof. Z. M. Provine, "The Wagon;" Bro. Provine was heartily applauded for his fine effort. Solo, "Annie Laurie" (by request), Miss Cora Finch, daughter of J. B. Finch, P. M. W. of Mt. Hamilton; this young lady has a sweet voice of great compass, and is a great favorite. On this evening she was encored between each verse, and at the close was recalled, which she kindly answered by singing "Lida Lee." Speech, Bro. J. C. Black; a very able, but short address, that was listened to with close attention. By request the Grand Master sang a few selections. Quartette, Messrs. Edwards, Haight, Pomeroy and Moody; a sweet sentimental song that was executed with finished excellence. Bro. Osterman, chairman, announced that the committee on refreshments would then wait upon their guests. During the preparation Sister Cora Finch and Prof. Edwards and wife, all professional musicians, delighted the audience with volunteer selections. The refreshments were then handed around, consisting of ice cream, coffee, cake, etc., in great abundance. During the feast, by request, several amateurs, of San Jose, entertained the audience with music and recitations. The feast of good things in the way of eatables, in which was sandwiched pleasing literary exercises, was prolonged until a late hour. This celebration was a recherche affair, each one, especially the members of Mt. Hamilton, vied with each other in making their guests happy. As a family gathering of Workmen in San Jose, it will long be remembered as one of the best arranged, appropriate and successful meetings of the A. O. U. W. in the history of our Order.

Riverside, 120.

EDITORS WATCHMAN:—We have a very interesting Lodge here of some 35 members, a small Lodge-room of our own, are clear of debt and a nice little fund in the treasury. Our members are alive to the interests of the Order and active workers. We have been organized about three years and have never had a death to report yet. In looking over the deaths in this State for the past two months, I am surprised to find that two brothers have died in so short a time after having joined the Order with diseases which should have been detected at the time of their joining. I am of the opinion that a more thorough examination is necessary, and that the Lodges should be very careful and accept none but the very best physicians for medical examiners, so that we may not be imposed upon by diseased candidates for membership. But I do not wish to complain, and we all feel that we have in the Order of A. O. U. W. the cheapest and best protection that can be gotten up; and, for that matter, if there was nothing more of the Order we would be amply paid. But that is not all. We are again amply paid in the social enjoyment, in the kindly interests which each has for the other, in the bonds of unity which cements together whole neighborhoods or communities, in brotherly love and better fitting us to combat the ills and cares of life. Indeed, the noble principles of our beloved Order far exceeds my ability to describe. My advice to every young married man would be to join the Order. It will help to build you up in business, it will elevate you socially, it will lift from your heart a great load of care and anxiety for the future happiness of your family, it will help you under adversity; in short, it will help to make you a better, happier and a wiser man. The man who has lived to middle age and has a family dependent upon him cannot afford to let this golden opportunity slip. In no way can you invest so little and insure the happiness and comfort of your loved ones and at the same time receive for yourself the full value of every farthing you pay out. Try it, and if I shall have induced one to join I shall feel paid by the love I owe to the Order. Yours, etc.—JOHN JAY MORTON.

Sutter, 39.

The local paper tells as follows how the brethren of No. 39 enjoyed themselves: The ceremonies were scarce over when the hall began to be filled with those desirous of participating in the pleasures of the evening, and the first strains of music from the band of four pieces, caused the floor of the Masonic banquet hall to be filled with dancers. The arrangements were excellent. The Masonic hall, with its commodious ante-rooms, furnished ample room for the accommodation of those who desired to rest between dances. From 9 P. M. the enchanting strains of music, mingled with the patter of dancing feet, keeping time to its soft cadences, awoke the echoes of night, and stole out upon the air. The floor was well managed. Messrs. H. C. Jones, G. W. Alberti, Thomas Brophy and C. J. White, seemed to have dedicated their services, and certainly bent all their energies in securing the pleasure and happiness of all present, and the testimony of 53 couples and several odd ones that were present is unanimous that they were pre-eminently successful. At the witching hour the banquet was spread; it was a banquet. Never were more appetizing viands placed before hungry revelers. Mrs. Lambert deserves all the encomiums she so freely received. The dance was then resumed, and the east began to glow ere the participants separated to renew in dreams the pleasures of the evening. The ball was a success, and the only regret we have heard is that a year must elapse before Sutter Lodge, No. 39, will install again and give another anniversary ball.

Southern California, 191.

This Lodge held its first annual anniversary social on the evening of January 10th. The hall was crowded to overflowing, there being about three hundred persons present. After the literary part of the entertainment had been gone through with, the guests repaired to the ante-chamber, where a splendid lunch was served by the members of the Order. Dancing was next in order, and was kept up until a late hour. The music was under the direction of Prof. Arevalo. I. Dimson superintended the festivities. The following programme was carried out in the most pleasing manner: Overture, band; recitation, C. W. Lockhardt; solo, Geo. Mannon; address, J. M. Guinn, piano solo, Miss Rosa Osborne; recitation, C. A. Baskerville; cantata, "Eva," Farewell and Reward, Frankie McCreary, Maudie Dunsmoor, Annie Camp, Anna Haseltine, Nettie Hamilton, Daisy Jones, Nellie Byan, Ida Baxter, Ava Wag and Minnie Hamilton; solo, Miss Boring; piano duet, Mrs. Nelson and Miss Austin; recitation, Thos. Barnes, and a Spanish solo and chorus by Prof. Arevalo and others.

Los Gatos, 76.

EDITORS WATCHMAN:—Installation of officers of Los Gatos Lodge, No. 76, A. O. U. W., took place in their new hall on Saturday evening, the 21st inst., the occasion being one of unusual interest. The new hall, which is now completed, is 26x60 ft., with two ante-rooms, one 12x12 and one 12x14, with 14 ft. ceiling. The walls and ceiling are handsomely painted and wainscotting elaborately grained. The hall is furnished with suitable stands, chairs, and nicely carpeted. Two elegant chandeliers (donated by Mr. J. W. Lyndon) furnishes the light. This hall we believe to be one of the larges and most conveniently arranged in Santa Clara county. The members are proud of it. They have leased it from Mr. Lyndon for a period of five years, to take effect Feb. 1, 1882. Los Gatos Lodge is in a very flourishing condition, having a membership of nearly 60 members. I noticed in the WATCHMAN that the Lodge meets at this place on Tuesday evening of each week. It should read on Saturday evening. The Lodge will soon give a grand entertainment and ball for the benefit of its treasury department. Fraternally.—W. S. WALKER.

Wilmington, 130.

EDITORS WATCHMAN:—Our Lodge is small, having only 33 members, but we will have 4 or 5 more this month. We are in a flourishing condition and have officers, I think, equal to any Lodge. We have only lost one by death to this date. Fraternally in C., H. and P.—J. F. C. JOHNSON, Recorder.

Magnolia, 6, D. of H., San Jose.

There seems to be a great interest among Workmen and their wives in D. of H. at San Jose. They now have 18 elected to receive the degree at their next meeting, and on the night of Mt. Hamilton's celebration there were 13 petitions handed to the W. S. of H to be presented at their next meeting.

New Lodges.

Bro. T. B. Sanders, D. D. G. M. W. pro tem., organized Lookout, 211, at Lookout, with 17 charter members, on Jan. 12th. The following officers were installed: D. C. Brownell, P. M. W.; W. D. Morris, M. W.; C. A. McCash, F.; L. G. Brownell, O.; L. C. Carpenter, Rdr; H. S. Brown, Fin; S. C. Mooers, Rvr; J. W. Barnes, G.; M. Brown, I. W.; W. E. Page, O. W.

A NEW Lodge has been formed at San Luis Obispo, with 22 charter members. It has been christened Olive, No. 212, and was instituted by Dr. Geo. B. Nichols, D. D. G. M. W., on on Jan. 16, 1882. The following officers have been elected: Kaufman Green, P. M. W.; Geo. B. Stamford, M. W.; Charles J. Russell, F.; John A. Dunbar, O.; Charles H. Wood, Rdr; Lewis M. Noah, Fin.; Henry Loobliner, Rvr; Geo. W. McCabe, G.; George Throop, I. W.; William Evans, O. W.; Dr. J. H. Seaton, Med. Ex.; R. Rackliff, B. L. Mayers and Kaufman Green, Trustees. Representative to Grand Lodge, Kaufman Green.

Silver Wreath, 2—Arizona.

EDITORS WATCHMAN:—At the regular meeting of Silver Wreath Lodge (A. O. U. W.), the following elected officers were installed by Deputy Grand Past Master C. P. Schneider, for the ensuing term: A. D. Skinner, P. M. W.; H. C. Hitchcock, M. W.; Geo. A. Allen, F.; James Mills, O.; Thos. Laughlin, Jr. (re-elected), Rdr; Chas. A. Fisk (re-elected), Rvr; V. Anderson (re-elected), Fin.; Geo. Chapel (re-elected), G.; Wm. Keerler, I. W.; C. A. McDonell, Medical Examiner; Trustee (long term), Alonzo Bailey. Our Lodge is increasing in membership very fast. We are expecting to be able to rent the Masonic hall in which to hold our meetings, and if that permission is granted us we will soon have a flourishing Lodge. A number of leading business men are active members and more are coming. I find that the WATCHMAN is well patronized, and more have promised to subscribe, as it is a *splendid paper*, and ought to be taken by every member of the Order. Wishing it success I remain yours in C. H. and P.—J. A.

Tombstone, 3.

The new Lodge recently organized at Tombstone, Arizona, starts out under the most favorable auspices. The name selected is Tombstone Lodge, No. 3, A. O. U. W., the other two Lodges in this Territory being Arizona, No. 1, at Tucson, and Silver Wreath, No. 2, at Globe City. Thirty-five charter members were present, and after conferring the degrees, the following officers were elected and installed: L. M. Prince, P. M. W.; S. Black, M. W.; C. R. Brown, F.; W. W. Baldwin, O.; P. K. Hickey, Rdr; H. Solomon, Rvr; F. W. Hatch, Fin.; Leo Jacobs, G.; W. D. Monmonier, I. W.; W. J. Leonard, O. W.; H. M. Woods, Louis Schoenfield and J. Lenoir, Trustees. After the installation ceremonies, an adjournment was taken to the Maison Doree, where all the members proved themselves able-bodied workmen in disposing of the many goods things spread upon the banquet board. The Lodge starts off with such a well-officered membership that it is safe to predict that it will soon rank among the most popular and powerful organizations in Arizona.

Resolutions of Respect.

[IN MEMORIAM.]

HALL OF HERCULES LODGE, No. 53, A. O. U. W., San Francisco, Jan. 20, 1882.

To the Officers and Members of Hercules Lodge, No. 53, A. O. U. W.—SIRS AND BROTHERS:—Your committee appointed to draft resolutions of respect to the memory of our deceased Bros. E. S. MOULTON and W. R. BENSON, respectfully submit the following:

WHEREAS, Our mystic chain has again been broken by the relentless hand of death, and bereft us of our beloved Bros.; therefore, be it

Resolved, That this Lodge extend to the bereaved families of our departed Brothers their full and heartfelt sympathy, feeling that while we mourn with them in their sad hour of affliction that our loss is our departed brothers gain.

Resolved, That as a slight outward token of our feelings the Charter of this Lodge be draped in mourning for the period of sixty days; and be it further

Resolved, That these resolutions be spread upon the records of this Lodge, that the Recorder be instructed to transmit a copy, properly attested, to the bereaved families of our deceased Brothers, and that a copy be sent to the PACIFIC STATES WATCHMAN, for publication.

Fraternally submitted in C. H. & P.

P. E. HILTON,
E. F. BARUTH,
C. E. CARROLL.

Attest: CHAS. MERSFELDER JR., Recorder.

HALL OF GOLDEN GATE LODGE, No. 8, A. O. U. W., San Francisco, Dec. 29, 1881.

To the Officers and Members of Golden Gate Lodge No. 8, A. O. U. W.—SIRS AND BROTHERS:—Your committee appointed to draft resolutions of respect to the memory of our deceased Bro. M. EAGAN, beg leave to submit the following:

WHEREAS, It has pleased Almighty God to remove from our midst by the hand of death, our late Bro. M. EAGAN, and

WHEREAS, It is but just and proper that this Lodge pay a tribute of respect to his memory; therefore, be it

Resolved, That by the death of Bro. M. EAGAN this Lodge mourns the loss of a worthy member, his family an affectionate husband and father, and the community an honorable and useful citizen.

Resolved, That this Lodge tender to his bereaved family and friends its heartfelt sympathy in their deep affliction.

Resolved, That as a mark of respect for our deceased brother, the Charter of this Lodge be draped in mourning for thirty days.

Resolved, That these resolutions be spread in full upon the records of this Lodge and that a copy of the same be transmitted to the family of our deceased brother, and a copy be furnished the PACIFIC STATES WATCHMAN for publication.

Yours, in C. H. and P.,

D. IRWIN,
AUG. SCHMITT,
MARK HEYWOOD.

Attest: THOS. J. JOHNSTON, Recorder.

Iowa.

One hundred thousand Workmen are watching and waiting to see what the Grand Lodge will do, which meets in February in Iowa. As an old and honored jurisdiction, we hope that before we shall issue another number of our WATCHMAN, the Grand jurisdiction of Iowa will be one of the great family of Workmen, assuming all responsibility and benefits of a universal and united brotherhood.

Bro. J. Meredith Davies, P. M. W., who has been a resident on our coast for the last two years, will be with his brethren in Iowa, and by his eloquence and persuasive powers, no doubt, assist in bringing about this great confraternity. He has become so closely identified with the A. O. U. W. on this coast that we regard him as one of us, and as one of us, he may be the first to telegraph the good news we expect to hear.

SISTER CORA FINCH, of Magnolia, No. 6, D. of H., San Jose, and daughter of J. B. Finch, P. M. W., is one of the popular and favorite singers of California. We frequently have the pleasure of hearing her on Sunday evenings at the Metropolitan Temple in this city as one of the very select choir and in a solo on each evening. We regard her as a coming artist.

ROLLING-TOP MATTRESS.—One of the latest and best improvements of the day is the rolling-top mattress, patented and manufactured by Fred Rohnert, 31 Second street. A child can turn it, and it can be used on a large or small bed. It has more wearing surface, more cleanly and easier than any other. Old mattresses can be made over as a rolling mattress and new ones are as cheap as the old style.

IF any of our patrons wish to enjoy a home-style restaurant, where there is good cooking, kind attention and charges moderate, go to 202 Second street, and Bro. J. Stewart will fill the bill. He also makes a specialty of home-made bread.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

Do Not Delay.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the Watchman. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Officers and members of the A. O. U. W. receiving a complimentary number of the Watchman with this notice marked are invited to examine its merits and give our enterprise the benefit of their friendship and substantial support as far as possible. Our terms of subscription are usually to be found on the eighth page of each issue. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

By Telephone.—Subscribers, advertisers and other patrons of this office can address orders, or make appointments with the proprietors or agents by telephone, as we are connected with the central system in San Francisco.

Situation and Surroundings of Portland.

We give on this page a handsome engraving showing Portland, Oregon, and some of the notable features of the country surrounding it. The growth and prospects are themes which the Oregonian never tires to talk about, and they are matters in which all who enjoy the growth and development of the Pacific coast will take an interest. Of late years, Oregon and Washington Territory have secured a large share of the immigration to this coast, and the settlement of the country and the increase of its productions has been notable. It cannot be doubted that progress in this direction has but just set in, and that the coming completion of through lines of transportation eastward will add a new impetus to all industries and swell the population of all well-placed towns, while at the same time it will plant new towns and new country homes upon the vast and rich region which is still unoccupied.

But it is rather of the city of Portland and its immediate surroundings of which we would speak at this time, to enable the reader to understand better the engraving. And in so doing, we shall be free to take paragraphs from local writers, who will present a more appreciative view of the scene than anything we could ourselves prepare.

"Portland—in latitude 45° 30′ north, longitude 122° 27′ 30″ west—is a port of entry, the county seat of Multnomah county, and the commercial metropolis of Oregon. It is pleasantly located on the west bank of the Willamette river, about 13 miles above the junction of the Columbia, and about 110 miles—by the river course—from the Pacific ocean. The city is located on a plateau, which gradually increases in hight as it recedes from the river, until it forms a range of hills at the western extremity of the city, from which may be seen the snow-capped summits of Mounts Hood, St. Helens and Jefferson, the Cascade range of mountains, and the meanderings of the Columbia and Willamette rivers."

Approaching Portland on board a steamer from San Francisco, at the present time, one's first impression of the place is usually of a decidedly unfavorable character, owing to the long line of dingy-looking docks that obstruct the view. However, on landing and passing from street to street, a city of peculiar beauty is opened to the view, and one is surprised at the massiveness of the buildings and general thrift displayed in all branches of business. However, one blot on the otherwise unsoiled picture consists in the narrowness of the streets, most of which are but 60 ft. in width. This defect, however, is soon lost sight of as we move from place to place and see on all sides unmistakable signs of wealth and comfort. From the summit of the hills above referred to, a scene of simple grandeur is unfolded. Away to the north the whole face of the country is dark with timber, through which the silvery water of the Willamette is plainly visible until it empties into the great Columbia, 12 miles distant.

From far up the Columbia, the bright water may be seen as it moves steadily onward to the sea, and it is only lost to sight in the dim distance far to the west. Slightly east of north and beyond the Columbia, the quiet little village of Vancouver is plainly visible, while, overlooking the river to the east of it may be seen the government reserve with its barracks and parade ground, while in the latter a tall mast supports the stars and stripes as they proudly wave in the free air of Heaven. To the right of this, and far off in the north, the pure white summit of St. Helens may be seen reaching above the surrounding mountains, standing 9,570 ft. above the level of the sea; behind it Rainier shows its cap of perpetual snow looming up in the heavens for 14,444 ft. Two other snow-capped mountains are seen to the right, but to grand old Hood, "the pride of Oregon," is ascribed the honor of capping the climax, as it sits in its silent glory, 11,255 ft. high, off in the mountains to the east, perfectly formed, symmetrical and beautiful.

Of Mt. Hood, as it sometimes appears from Portland, a writer in the *Telegram* says: "The day had been cloudy, but the clouds parted just before night so as to send the rays of the sun, as if concentrated for that special purpose, upon the distant Mt. Hood. The effect was to make the snow-capped king of the Cascades appear to lose the 60 miles between us and its great snow-white sides, so that the rough contour was brought out by light and shade with such distinctness, that it appeared as if drawn within a few feet of us; so while we were enjoying a warm, sunshiny evening, with rich, green hills surrounding our city, there stood an enormous pile of the purest and whitest snow at our very doors. It is indeed surprising the variations in the appearance which our beautiful mountain presents to the people of this city, and the whole State, in the different shades of light thrown upon it from different directions as the sun moves over us in his daily rounds. Never twice alike, we are always seeing new beauties in the everlasting hills, and especially the great white-capped mountains seen from this city, Mounts Hood, St. Helens, Rainier and Adams."

The city of Portland embraces a population of about 25,000 of all nationalities. It is the first city in point of wealth, proportionally to size, in the Union. Practically, all phases of life, except extreme poverty, and all occupations to be seen in any American city, are observable here. The tone is higher, as prosperity of sober, industrious labor is greater, and the success of success is more productive of wealth. The proportion of wholesale to retail houses in all lines of trade is much greater than would be expected of its inhabitants. For instance, the number of wholesale groceries actually exceeds the number of first-class retail houses in the same line. The business of several of the former reaches into millions annually. It may truthfully be said that Portland is the market-place for the north Pacific coast, the granary of Oregon and Washington, and the treasure vault of the whole northwest country.

Thirty years ago the city of Portland was little except a dense fir forest, with here and there a clearing yet full of blackened stumps. There were several business houses, where trade was brisk, and a number of temporary buildings for family dwellings, with a noticeable preponderance of boarding houses and gambling dens. Initial steps had been taken to establish the schools and churches that have since grown into prosperity and permanence. There were no regular sidewalks or public street lamps, and the visitor carried away vivid recollections of the abounding mud. Portland has since grown into a city of over 20,000 inhabitants, is the point where all the great railroads of the present and the future are to meet, and her maritime interests control the entire commerce of the Pacific Northwest. Her schools are second to none in North America.

Our engraving gives a section of the Willamette valley, which is the most famous agricultural region of Oregon. The valley is about 200 miles in length and has several important towns, besides the villages and hamlets which occur at

PORTLAND, WILLAMETTE RIVER, AND MOUNT HOOD.

short intervals. Farm houses abound, and orchards; and meadow lands stretch away into little valleys. Level prairies are encountered here, billowy hillocks there, and dark green forests yonder, diversified occasionally by dense groves of undergrowth. The timber in the valley is principally oak and fir, the latter predominating.

The Willamette valley is famous for its moist climate, its dripping skies being a by-word through the outside world. But it seems that the dwellers there rather enjoy it. In fact, some local writers would have us believe that the inhabitants get so used to rain that they cry for it. We quote as follows:

"The resident will grow to like the humid atmosphere, and, as his years advance, will learn to long for rain when lowering weather ceases. He will learn by gratified experience that the rainy seasons, of which the temporary visitor to the Willamette valley usually complains to the outside world, are not the terror he has been led to imagine. And yet the climate is excessively humid in winter along the coast, and also in the great valleys between the coast and Cascade mountain ranges. There is rain enough to make the unmade roads of a new country very muddy and disagreeable, and to keep them so till the summer sunshine comes to the rescue. But the same humidity that spoils the roads bathes the mountains in perpetual green, and so fructifies the valleys that crops never fail, and all the abundant and varied products of the soil are of the very best quality."

A Hard Struggle.—There are many men who kill themselves in their attempts to keep themselves alive. They work because they must eat. With their tasks come worry, overwork, death. In these days it is difficult to live—that is, for some men. They are handicapped in their struggle. A portion of society has become possessed of the wealth that should be in the hands of their fellows. A glance around forces home to one's mind with power the fact that the man who has knowledge of himself—who knows how to maintain health of body, mind and morals, possesses a great advantage over other men in the struggle for life.

To Design a Monogram.

Scarcely anything seems so easy as to design a monogram, yet we see very few successful ones, the most of them being a mass of mixed-up letters and ornament of which we can find neither the beginning nor the end. There is a law regulating the designing of everything, and it is this law which the true designer keeps in mind and applies to his work; the effects of obedience to this law and its violation are seen as clearly in the design for a monogram as in the design for a cathedral.

First, there should be harmony of composition—that is, the letters should so emphasize, subdue, or control each other that the composition should impress us as compact, appropriate, and, being so, beautiful.

Second, there should be no unnecessary ornamentation; there should be a quiet and peace about the design which will always please the truly artistic. Looking at some designs, we get the impression that ornament was so plentiful that the designer saw no other means of consumption than that of burying his designs in it, for we see that there is a mass of curves, angles, shades and leaves, but nothing else.

Third, simplicity of lettering is an important requisite, as there should be no possibility of mistaking an E for a G or C, and the boundaries or outlines of the letters should be well defined.

Fourth, the order of sequence of the letters should be carefully attended to.

The common idea is, that a certain number of letters are given with which to make a pleasing design, and so far, that impression is right; but there is something beyond this. There is the art of so placing the letters that one can distinguish at a glance the first, the central and the last letter. Now the rule to be observed to secure this result is as follows: The *last* letter of the monogram must be the principal feature, and must be the largest, the boldest and the heaviest letter; then the *first* letter must be the next in size, but the lightest in outline and color; then the *central* letter must be the smallest and of an intemediate tint. If the monogram is of four letters, the two intermediate must be the same size and the second letter lighter in outline and color than the third.—*Art Amateur.*

Life is Hard in Germany.—Hard alike to learned and simple, to those who labor in the fields or pent up in cities; but there are consolations. All who live among German folks must be struck by the manly dignity and resignation with which these daily problems are met. Proudest perhaps of all European nations, they bear their burdens uncomplainingly, and set an example which at least two neighboring States might do well to imitate. However much they may be apt to exaggerate the professional authority and arrogate for book learning beyond what is its due, they certainly exemplify in their lives a respect for things worthy of respect and a contempt for mere material advantage. Germans love a pedigree, and are not insensible to a noble name. But before all things they consider the man the intellectual being, and if he is merely a possessor of wealth—a gold sack as they call it—then it is little consideration he will receive at their hands.—*Pall Mall Gazette.*

At a meeting of the Los Angeles County Medical Society at the office of Dr. H. S. Orme, January 6th, the following officers were elected for the ensuing year: President, Walter Lindley, M. D.; Vice-President, H. Nadeau, M. D.; Secretary, H. B. Lathrop, M. D.; Treasurer, H. S. Orme, M. D. Doctors Kurtz, Nadeau and Lathrop, were appointed a committee to arrange for the annual meeting of the society, which takes place in February.

The only thing a lady dislikes about a postal card is that it is hardly large enough to allow her to show what she can do in the matter of postscripts.

Dr. Snowden's Letter to the Young.

"Why don't you learn a trade?" We asked a young man under 21 on Santa Clara street, a few days ago the above question. He answered, "I have a trade. I sew sacks. I can make a good living." We replied that sewing sacks is not a trade. It is only temporary, well enough in its place, but it would not afford permanent employment nor guarantee a competence in your declining years. You need something better. We met a young man in Contra Costa county who seemed to be aimless and shiftless. We said, "Why don't you learn a trade?" "A trade," said he, "don't amount to much. I have a trade, but I have not worked at it for four years, and I don't know that I ever will follow it." And we suppose if he can sponge a living, or work enough to eke out a mere support from day to day, that he will be satisfied. The young man had a fine physique, apparantly a mathematical mind, and no doubt possessed mechanical talent of more than ordinary average, yet his life promises to be a failure; and why? He lacks energy. He is hiding his talent and neglecting the golden opportunity of becoming grand and noble, dignified and happy, an honor to his parents and a blessing to the world.

To the same question a young man replied, "I have a trade. I am a violinist. I play for dancing parties. I work hard and am up late at night; I earn my money." Yes, he leads an active life of idleness and folly. His trade is a miserable subterfuge. He works hard at it; drinks whiskey, (no doubt); is up late at night fiddling with all his might when he should be at home in bed.

What is the value of such a life? And what will be the end thereof? If you think you can get along well enough without a trade or profession, depending upon a clerkship, or an office at the hands of the dear people, or being a salesman, or day laborer, or looking for fortune to smile upon you, casting a golden luster upon your pathway in your declining years, you will find yourself miserably mistaken and disappointed; and your last days will be filled with regrets and reproaches; with sorrow and repining. Make up your mind that by the grace of God you will succeed. Form the resolution now, not to-morrow, that you will have a trade, an occupation or profession. That you will be industrious, temperate, benevolent, well informed on the common topics of the day, a faithful Christian, and true man in all the departments of life.

It is said that the boy is father to the man. An idle, lazy boy will make a corresponding man. The shiftless boy will make the vagabond tramp. Idleness and the evils which flow from it are the common causes of pauperism and crime. The best business men, the noblest philanthropists and the most far-seeing statesmen were taught in their boyhood to be dutiful, sober and industrious; and, armed at every point, they grappled successfully with the great problems of life. Let us kindly say to the young lady who contemplates marriage (and what young lady does not?), beware of the young gentleman who has neither a trade nor an occupation. He may be educated and refined, and possess many social and pleasing qualities, yet in a day his wealth may take wings and leave him a bankrupt and a beggar; and what will become of you? A young woman of fine personal attraction and pleasant address married a young man of culture and fortune. They lived on the interest of their money for a season. Then their riches fled away, and as he had nothing to fall back upon for support their trials and sorrows set in. They removed to a log cabin and lived upon water, corn bread and fat bacon. He at last obtained work. The labor was great, but it prevented them from starving. Year after year he toiled, until he overworked himself and died, leaving his family in want and misery. Be careful, girls, whom you marry.

It is indeed honorable to learn a trade. In early days the young women were taught to spin, weave, and do needle work. The young men were taught to be carpenters, masons, and skillful workmen in gold, silver, brass, iron, and precious stones.

The great Apostle Paul was taught a useful mechanical trade, which he turned to a good account, as he went forth from city to city to preach the gospel of Jesus Christ. And the incarnate God, in whose person was blended a perfect divinity, and perfect humanity, according to the custom of the Rabbis, was taught the trade of a carpenter.

In referring to eminent men of our day we find that Columbus was a weaver. Howard, the philanthropist, was an apprentice to a grocer. Franklin was a printer. Burns, a plowman in Ayrshire. Burritt was a blacksmith. Grant was a tanner. Vanderbilt was a ferryman. Senator Wilson was a cobbler, and the illustrious and lamented President Garfield was a wood-chopper and plow-boy. Likewise young men, learn a useful trade. Go thou and do the same.—*San Jose Herald.*

"I wish I were you for about two hours," she said to her husband with great tenderness. "And why, my dear?" he asks. "Because," she said, toying affectionately with his watch chain—"because then I would buy my wife a new bonnet."

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.
At No. 252 Market Street, San Francisco, Cal.
☞ *Take Elevator No. 12 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - February 1, 1882.

What the Relief Committee has Done.

We have procured some facts in relation to the workings of the Relief Committee, which is herewith presented. The following is a list of officers: President, W. I. McKay, of Triumph Lodge; Vice-President, Wm. Decker, of Harmony; Secretary, C. C. Gilmore, of Myrtle; Treasurer, G. Winehill, of Unity. Finance Committee—Bro. Smith, of Spartan, No. 36, Chairman; Bro. J. D. Nield, Sts. John, and Bro. Thompson, Noe Valley. Employment Committee—E. M. Reading, of Fidelity, No. 136, Chairman; C. C. Gilmore, Unity, B. J. Triest, Washington; L. G. Schord, Burns, and Caleb Brind, Magnolia.

During the past year the committee has secured positions for 38 brothers. They have assisted brethren from the funds to the amount of $228. The calls have been from various Lodges, among which are Mt. Diablo, Vallejo, University and San Francisco. They have also given relief to members of Lodges of Oregon and Minnesota.

A number of the families of Bro. Workmen have been assisted, one touching instance being the keeping of the Sheriff from the door. The last sad rites over the remains of a deceased brother were also performed by the Relief Committee.

The funds derived for carrying on their good work has been received from the profits of the picnic and donations from Lodges Nos. 4, 9, 19, 36, 53 and 136. The committee has hired and paid for nurses for sick brothers at the German hospital, visited the sick, and performed other charitable work to needy and unfortunate brothers. According to the report of the Treasurer, the sum of $445.22 is on hand at date.

Brothers desiring to see the President will find him daily, during business hours, at No. 207 Montgomery street; The Vice-President, on Saturday evenings, at 913 Market street; the Treasurer at 515 Market street; the Secretary on Tuesday and Saturday evenings, at Pythian Castle, 913 Market street, and on other evenings, at No. 44 Third street, room 58. All communications should be addressed to the Secretary, at No. 44 Third street. It is probable that hereafter the meetings will be held in the neat and comfortable committee rooms of Pythian Castle, 913 Market street, on the second Saturday evening of each month.

From this brief resume of the doings of the committee it will be seen that a great deal of good work has been accomplished, and the brothers who have inaugurated and upheld the Relief Committee, are deserving of credit.

Our Position.

It seems that some members of sister fraternal organizations, notwithstanding our oft-repeated assertions to the contrary, ascribe motives of hostility to the Watchman because of our efforts to effect in them a change of system from the despotic to the republican form of government. They assume that because we favor separate jurisdiction, so-called, that we would have each jurisdiction independent altogether. Such an assumption is unwarranted, and we may as well say exactly what we do not mean. We most thoroughly and religiously believe in the necessity of a Supreme Lodge whose power should be over and above all Grand Lodges. We believe it should have power to make and prescribe the beneficiary laws and to make such regulations as are necessary to ensure their uniformity of execution in all jurisdictions.

We believe the Supreme Lodge should stand behind every beneficiary certificate issued by the Order, so that if the body issuing it refused or was unable to pay a legal claim the paper of the Order should in no case go to dishonor. We believe all Grand Lodges should be subject to such general laws as the Supreme Lodge might in its wisdom enact; but on the other hand we do believe that it was the part of wisdom on the part of the Supreme Lodge to delegate to such Grand Lodges as had, or may have, a sufficient amount of strength to bear their own burdens the privilege of doing it to the extent of their ability, and then when no longer able, to also provide a way by which the burden might be lifted by the combined strength of the whole Order. We are thus given the advantage of combined effort in time of distress, and of separate effort in time of prosperity. Responsibility is divided; labor is divided; each part gets the benefit of its good work, or other advantageous circumstance, while at the same time resting secure in the thought, that in the hour of calamity, a power sufficient unto the evil time stands ready to sustain. We do most thoroughly believe that the A. O. U. W. has, in its present system arrived at almost perfection, and that between it and that of any other having the same ends in view, there is absolutely no comparison. We feel anxious that a few of the best of them should come on to essentially the same ground; not because we are hostile, but for the very opposite reason. We know a large element in some, and perhaps all of them, feel as we do, and see as we see. We would strengthen their hands and plead in their behalf. It is no argument to say the A. O. U. W. has seen bitter experiences; that it has found itself more than once on the quicksands of destruction, from which it barely escaped. The A. O. U. W. has been the pioneer. It trod a path never before explored. It had no chart or compass to guide. But it has progressed with wonderful wisdom, and corrected its few errors with wonderful alacrity. Its past may be regarded as a prophesy of its future. If others will not do likewise, but persist in regarding as enemies those who seek for their reformation, we can only say to them, like a faithful watchman on the walls of fraternity, we have given the signal of danger, and ye have not heeded it. Our duty is done. Your calamity be upon your own heads!

One of the strangest things, to draw it mild, is what we see in the Wisconsin (A. O. U. W.) *Advocate*. It is a copy of some remarks from the Watchman, made by Bro. C. E. Carroll, of Hercules Lodge of this city, and which is credited to the *New England Workman*, of Boston. There are also some other of the Watchman articles credited to the *Workman*, which shows that the *Advocate* brother is more honest than his brother editor of the Hub, or else very careless in his editorial duties. Boston may be the hub of the universe, but the Watchman desires it understood that when anything appears in its columns worthy of reproduction, it wants the fact given proper credit, and not to have it travel off to Boston, and there have the imprint of its approval affixed in the proper place.

The Lower Lake *Bulletin* reprints from the Watchman the article recently published entitled "Something about the A. O. U. W." As a new Lodge is about to be organized there, this foresight on the part of the editor is very creditable, and will no doubt be much appreciated.

Compulsory Separation.

A correspondent from Eureka, Nev., writes as follows:

"The fact of Ohio being allowed to remain in the Supreme jurisdiction will work an injury to this jurisdiction—66 deaths during the term, and 28 of them from Ohio, 13 States furnishing the balance. Hope the Watchman will sound the alarm for the benefit of outside jurisdictions on this coast, and see if an amendment cannot be made to our constitution at the next session of the Supreme Lodge compelling jurisdictions of 2,500 membership to become separate."

We fully appreciate the difficulty above mentioned, but fear the remedy proposed would not cure the evil complained of. Logically, it appears to us that if for the good of the Order the Supreme Lodge may permit the erection of separate beneficiary jurisdictions, it should also have the power to compel separate jurisdictions for the same reason, but in the application of such power, no doubt much discretion would be necessary. Take the case of Ohio at present for instance. She ought not to have a high death-rate, but she has nevertheless. If we have the correct notion in regard to the matter, her membership is too largely composed of heavy beer drinkers. If she were compelled into separation, the better portion of her membership would lose heart at their increased burdens and drop out, insomuch as to reduce her membership below 2,000, when the Supreme Lodge would be compelled to take her back again into the general jurisdiction, with the prospect of a heavier death rate than ever before. The only real remedy that we can see for such cases is a radical one, it is true, but one that would do the Order good everywhere: Make intemperance, either in beer or stronger drinks, a certain forfeiture of membership in the Order. Allow no man anywhere to remain who is a regular drinker; and right here we desire to say that we believe beer has cost and is costing the A. O. U. W. and the Knights of Honor far more than all other drinks combined, not because in itself it is more hurtful, but because it is popularly believed to be comparatively innocent, and that a man may drink it in great quantities with little or no injurious effect. Our death rolls, however, tell a different tale. The argument they furnish us against the beverage is irresistible.

There may be other causes than that which afflicts the jurisdiction of Ohio that would make a law providing for a compulsory separation desirable in certain cases, and on general principles we should favor such a law, but as before stated, much discretion would be demanded in its execution.

We cannot close these remarks without paying a tribute to some of the old and reliable Workmen of Ohio. But for the love the Order bears for them and its appreciation of the labors and sacrifices they have made in its behalf, some radical measure had long since been adopted to remedy the condition of things in the Buckeye State. The guilty have been spared because of the righteous that must have suffered had the ax fallen. Let's be patient in the hope that some measure may be adopted that will reach right down to the bottom of the offense, and cut out the evil thing that is preying on our vitals.

Information is wanted of Bro. N. B. Allen, a member of Adams Lodge, No. 53, Clayton, Adams county, Ill. Was last heard from at West Oakland, in February, 1881. Bro. Allen's dues and assessments have been kept paid, and he is in good standing in the Lodge at present. He is a harness maker, aged 28, about 5 ft. 9 inches in hight, black hair and mustache, dark eyes and complexion. If he is alive the Lodge is anxious to find him, and if dead there is a benefit due his relatives that they should have. Address A. S. McDowell, Jas B. Coe and J. M. Babb as above.

J. C. Marsh, P. M. W. of El Dorado, No. 118, Placerville, was the recipient of a handsome solid silver badge by the members of his Lodge at the end of the term. It was given as a token of their appreciation of his services and zeal in the cause, he having filled most acceptably every office within their gift, and retired on that evening from the Master's chair. The presentation was made by Prentiss Carpenter, on behalf of the members, and was a complete and happy surprise to Bro. Marsh.

San Benito Lodge, No. 96, is doing well; 74 members are now on the roll.

The A. O. U. W. in Foreign Countries.

We are not in favor of the extension of the Order into foreign countries, although it would be a step which might commend itself to those of our number who are ambitious. The time, in our judgment, has not come for us to go beyond the limits of the United States and Canada. We have enough to do to perfect our organization at home, to become thoroughly unified and have sufficient experience to enable us to know that we cannot control any efforts in foreign lands. There is plenty of work to do within our own borders, and ample field for missionary effort, and it will be many years before we ought to branch out any more.—*Missouri Overseer*.

The reasons given by our esteemed contemporary for opposing the extension of the A. O. U. W. into foreign countries are not satisfactory. It is true we have enough to do at home—plenty of territory to develop, so to speak, but our system needs little or no change. No additional energy is required for foreign work—the work would take care of itself. No new obligations need be incurred, either pecuniary or otherwise—nothing but a mere permission that such as may desire can have the "work" of the Order under certain conditions and restrictions, and then proceed to work out their own salvation. What earthly objection can there be to this? Either the A. O. U. W. is a good thing, or it isn't. If the former, can there be any valid reason but sheer selfishness that would deny its benefits to other people than our own? If the latter, we should abandon it at once, and forswear it altogether. No one will have the temerity to deny that the Order has filled the land with blessings; that the homes of the people have been made more secure; that thousands of widows and orphans have been protected, poverty banished, tears wiped away, and the waste places made glad. If so much has been done in our own land, with what sort of Christian grace can we say to the millions in other lands, "behold how great and good and beautiful is the A. O. U. W., but unto us alone must its beneficence be confined. It shall be circumscribed by geographical lines. We will wall it round about. We are more holy than thou! The good things we have we will keep to ourselves, even though it would cost us nothing to share with our fellow men. We do not want anybody else to be as happy as we."

Oh, Bro. *Overseer*, do you not see that your position is the position of inhumanity? Look over the scheme submitted to the Supreme Lodge at its last session by a Representative from California. Study it carefully, and see if therein can be found anything to oppose which selfishness alone would not dictate, and then if you must oppose, in all good conscience give better reasons than those set forth in the foregoing quotation.

One of our last assessment notices read: Bro. Samuel Lipman, of Myrtle Lodge, No. 42, San Francisco, died Nov. 20, 1881, of inflammation of the bowels, aged 35 years; joined the Order Nov. 7, 1881. On Jan. 17th a delegation of Myrtle, consisting of Bros. Gilmore, Lyons, Baker and Morris, carried to the bereaved widow a certified check for $2,000. Bros. Gilmore and Baker, in making a report of their visitation, carried to the A. O. U. W. the warmest words of gratitude.

Complimentary.—Editors Watchman: I consider your valuable paper as a member of my family, and cannot well do without it, as my business is such that I cannot attend our Lodge very often. I need your paper all the more, for by that, I can find out all that is going on in the Order all over the district. Yours truly in C., H. and P., E. B. Muzzey, Plymouth, Amador Co., Cal.

Bro. Samuel T. Babbatt was made a M. W. in Harmony, No. 9, in April, 1881. In August of the same year at the Pacific Rolling Mills he met with an accident, the loss of his second finger, which has incapacitated him from following his usual occupation since. During all this time he has received from his Lodge the sum of $10 per week as sick benefits. His expressions of gratitude to Harmony Lodge and to this great Order are intense and loud, as well they should be.

In Supreme Recorder Sackett's report the total membership of the A. O. U. W. up to Dec. 1st, is placed at 107,196, and California for the first time is placed second on the list. New York is put down at 16,116.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Illness for the past two weeks is the excuse for any want in this department.

Our death rate has never been so heavy as during the months of December and January last. We now look for a radical change for the better. Two assessments for this month.

We have now on hand some very excellent ballot-boxes, the best we ever had, or ever saw, for that matter. We shall sell them at $5.50, and to anybody that desires to invest that amount of coin in such an article.

The Grand Lodge session is not far away, and representatives will all want P. M. W. badges. Those who are not already supplied can order from this office. We sell a first-class article at $1.50, and intend to handle no other.

We who live in Oakland and travel daily forth and back to San Francisco, feel to rejoice at the completion of the new ferry accommodations made by the C. P. Railroad. The new depot on the Oakland side is one of the finest in the United States, and the trip across the bay is now one of real pleasure and satisfaction.

Over and over again the law in relation to receiving members from other jurisdictions has been explained, and Lodges go astray by admitting such members without a new medical examination. Of course such admission is illegal and void. The member forfeits his rights in the jurisdiction he leaves, and does not gain any here. Brethren, read the law. It is plain as language can make it.

Requiescat in Pace.

It is with feelings of genuine sorrow we announce that the Cincinnati *Bulletin* has ceased to exist. It was the oldest journal of the Order, and one of the very best. Through evil and good report, it has stood by the Order more faithfully than the Order, we regret to say, has stood by it. Edited with rare talent and enterprise, fearless in what it thought to be right, the *Bulletin* deserved to live. An evil star seems to dominate in the jurisdiction of Ohio. Once it was one of our proudest jurisdictions, but all the efforts of the *Bulletin*, all the efforts of many of the noblest Workmen that bless the earth, have been powerless against the slow and insiduous work of the destroyer, and now the brightest hope we saw for her—the old standard bearer—has gone down in darkness. The evil star, we fear, glistens in the horrid crown of King Gambrinus. Workmen of Ohio, must this thing be? Must you be swallowed up in a seething sea of beer? Oh, for a John D. Vincil, the redeemer of Missouri, to grapple the helm in the Buckeye State! Such a man would snatch you as a brand from the burning. May kind heaven raise up his counterpart for the occasion there!

We met Bro. Harvey Friermuth, M. W. of Mission, 56, in Memorial on Monday evening, Jan. 16th. From what we heard of the zealous and notable brethren of Mission San Jose, the record for the coming six months will be a bright page in their history.

The committee appointed has definitely settled to celebrate the 4th anniversary of Valley, No. 30, some time in April; probably during the session of the Grand Lodge. It is expected that a grand ball will be given, one that will be worthy the auspicious event and occasion.

Two assessments in the Supreme Lodge jurisdiction for January. The deaths occurred in the following States: Ohio, 5; Massachusetts, 1; Texas, 3; Washington Territory, 1; total, 10.

We met Bro. Geo. W. Lovie, of Half Moon Bay Lodge, No. 155, at the Grand Recorder's office. Bro. Lovie reports substantial progress and prosperity in his vicinity in the Order.

The Lodge at Ukiah contemplates celebrating the anniversary of the establishment of the Lodge in that town by having a picnic. The 13th of May is the date.

Under the Ground.

[The following lines, written by Bro. J. F. Gladding, of Gold Hill Lodge, No. 2, Nevada, are descriptive of a visit made by members o that Lodge to Lucille, No. 8, Sutro. The distance is five miles, and was made through the Sutro tunnel:]

Assembled, there, at the Jacket shaft,
The boys and girls, and many laughed
As the motly group stood up in view,
Attired in suits of the miners' blue.
The brothers bared their shoulders broad,
And the ladies cheered with one accord;
The suits alike which might perplex,
Yet none could mistake the gentler sex.
For lighter and firmer the steps they trod—
Yet their shoes were measured by the rod—
These nailed brogans immense in size
Look gay, as they quickly fall and rise.
The right was left, the left was right,
And never a foot in such sorry plight.
The Brothers indulge in a quiet smile,
The ladies exclaim! "'Tis just the style,
Like a glove, those shoes, they fit our feet—
Joking aside, they are decidedly neat."
And thus, as the carol of voices go round,
We prepare for a trip under the ground.

Joyfully, gratefully we settled down
The deepest shaft in this country town—
Our thoughts, what they were, can never be told
As suspended we were in the dark damp cold.
Curious sights on the way our eyes did greet—
Ice at a depth of three hundred feet.
The timber sets looked solid and new,
Each one in line and plumb and true.
The cage was stopped, we heard some one say,
Sutro is hardly five miles away.

Creeping through timbers of forest pine—
Props and supports to this giant mine,
Slowly along as we wended our way—
Mid timbers and gloom we heard a mule bray.
How wonderful in these depths profound,
The bray of a mule, how welcome the sound
Under the ground near two thousand feet—
Greets the ears as quite a musical treat.
This mule to us is our guiding star
As we take our seats in the passenger car.

On! on! we go, with rattle and roar,
Under the mountain, through the mighty bore.
The bottle was passed, 'twas no offense,
The heat of the Julia was *so* intense;
The minutes flew as we sped away
And Sutro only four miles away.

At the combination we took a rest,
And there from a stream of the purest and best
Our thirst was appeased, and surprised,
Just how—I presume, is surmised.
No disappointed stomach, *perhaps*,
Ever thought of "old bourbon or Schiedam schnaps;"
If so, a toast to the ever true,
The boys and girls in the miners' blue.

Again as our car is gliding along,
We hear the notes of the Echo song,
Sang by our brothers and to our joy.
We listen—well, 'tis "Larboard watch, ahoy."
The words float away in that silvery strain,
The echoes bring back in gladsome refrain,
"Larboard watch, ahoy." Soft and sweet
The words our ears and the mountain greet.
We ne'er shall forget the magic sound
A long three miles under the ground.

After a pause there came a crash,
Our mule broke loose and made a dash;
A Master Workman, our engineer,
Proved an accomplished mulateer—
Unto a standstill the mule was brought.
Then just how the accident was wrought
Was found to be a detached car
Which unluckily had left the bar,
Oe'rturned against the timbered side,
And with the wreck we did collide.

From this our car was extricated
And injuries all were fairly stated:
A braded cuticle, a piece so small,
Just like your hand, and that was all.
As fun to have, we all were bent,
We charged to fun this accident.
Then when our wits resumed their sway
Sutro was only three miles away.

Then as we started our journey along
We saw the bulkhead iron and strong,
Pivoted and bolted through and through,
And made by a Master Workman, too.
A bar to the threats of the nabob kings—
As they saw it there their threats took wings,
The hinges and bolts to those iron doors
To the cranky crafts were great eyesores;
Yet even the dogs have their day,
And seldom, if ever, do rich men pray.
But once they prayed that that iron door
Might be removed from the Sutro bore.
For this they all did devoutly pray
With Sutro only two miles away.

On! on! we sped. Our eyes cast around,
Scanning at large this great underground,
Here arched by the rocks which Nature bestows,
There timbered with fir which in dark forest grows;
The hand of the Workman is everywhere seen
On the face of the rock with its glittering sheen,
Each timber that's there by the Workman was made,
The rock is all broken, the track is all laid,
From flume to the arch all work of his skill,
All is the mandate of intelligent will.
While wondering thus, our thoughts at play,
Sutro is less than one mile away.

A distance ahead the rock-loaded train
Is struggling onward with might and main;
Ten huge cars with their rocky freight—
We cannot pass, we have to wait.

And slowly we emerged that night—
From tunnel dark to bright starlight—
A voice; the sound, it strikes the ear,
"Brothers and friends you are welcome here.
Our homes are your own while with us you stay,
Our houses are here, not over the way."

Congratulations and words of good cheer
Were audible sounds to all far and near.
Installation, ever a measure of bliss,
Was attended by all, and if not amiss,
Will state 'twas a credit to officer grand,
For every word seemed at his command;
No lack of attention, no jar of a word,
And everyone there of one accord,
Gave praise, and by acclamation,
Voted thanks and credit to his high station.
Adjournment was had to Opera hall,
Inaugurated there a splendid ball.

In justice to this grand occasion
Our Brother forgot his shin abrasion;
We all had heard of the marriage bell,
And every Brother said, "'tis well."
When seated at the grand collation,
Each one heard the exclamation,
"How grand! Let us pledge to every Brother
Love ye all, love one another;
Three cheers, boys, give them with a will,
For Lucille Lodge; great, grand Lucille!"

But hark! Now strikes the hour of two,
Our car of state, it comes in view.
A hasty parting salutation,
With hearty thanks and approbation,
Each Brother's heart with love united,
Our treatment such, we were delighted.

Seated again in our car of state,
We speeded away at a fearful rate,
Rushing along the tunnel through,
Viewing the sights again anew.
The silvery stars we see no more;
We pass the shafts, one, two, three, four.
The car is stopped, we pass in line
Toward the shaft of the Jacket mine;
We pause to breath and rest awhile;
Just then we saw our Captain smile,
Proposed we should the header view,
To finish our trip of the tunnel through.

Our Captain he thought best to state
The heat that way was very great.
He hoped 'twould give no great offense
With all extra clothing to dispense.
Then our march was taken single file,
In the heated air for half a mile;
Two cooling-rooms on the way was found,
A haven to all under the ground.
All pushed on with a giant will,
Were almost there, for the Burleigh drill
Stands on the track close by the side,
And one by one as by it we glide,
We take a look at the giant king
Which sends its drills with a rattling ring
Into the rocks so hard and grey,
From Sutro town, six miles away.

The header is reached through toil and smoke;
The miners are there with hearts of oak.
Great beads of sweat on their shoulders bare,
Drip from the men that are gathered there.
We look and pause; at last we've found
The end of the tunnel under ground.
Retracing our steps with steady tramp,
Inhaling at large the boiling damp,
The Captain thought we had better peep
Into the drifts, three thousand deep.

We're on the cage, and settling fast—
The twenty-five we've just gone past.
We hear the engine doing its best,
Expanding the air on top compressed.
The hum of the fan in its stirring play,
Sends air to the miners far away.
How much deeper every one wondered,
As they saw the lights of the twenty eight hundred.

While we are thinking of our fears and cares,
The cage firmly settles on the three thousand chairs.
The pump, like a giant, iron and strong,
Broad and wide, two columns, and long,
Was anchored fast to the great wall sill;
There it rests, silent and still,
The plungers are moving up and down.
The boiling flood, with an angry frown
Leaps upward with a rush and roar,
Full fifteen hundred feet or more.
The roar like the wave of the mighty main,
As it rushes through the Sutro drain.

Then east we go four hundred feet,
The air is cool, and mild and sweet.
Sharply to the north we turned,
And as our thirst for knowledge burned,
We rushed away to feast our eyes
On every new and grand surprise.
The walls on either side grew hot,
Just underneath the boiling pot
Threw out a jet of silver stream
In which our lanterns dimly gleam.

Our guide turned with knowing wink;
Said, "just ahead is the skating rink;
Wrap your shawls well around your throats,
And boys, button up your overcoats."
The heat then more intensely grew,
And steam was sipped like mountain dew.

Onward we went with heat oppressed,
A sudden halt; we had reached the breast.
There we espied the little mill
That turned so fast the diamond drill.

What the drillings were we never knew,
They dropped in a box just out of view.
Whatever there was in that strong box
Was made secure by nineteen locks.

With this last view our rambles end,
And every one then thanked our friend
The guide. Then casting one last look
Upon the rock and the heated brook,
Slowly and sadly our silent throng
Retraced their steps the drifts along.
The stifling heat, it seemed an age
Ere we had reached the welcome cage.
Slowly we're lifted toward the top,
And when the cage was made to stop,
Our voices, thankful in praise arise.
Again we view the azure skies.
Let memory dwell with thoughts profound,
On our glorious trip under the ground.

The Pacific States Watchman, the official organ of the A. O. U. W., with the 1st of January, starts off with volume sixth. This expopent of the principles of the Order is well worth the cost of subscription; indeed, it is one of the best weeklies on the Pacific coast. The miscellaneous matter is of a choice character, while its articles, as teaching the principles and workings of the institution, are clear, comprehensive and truthful. We cannot but entertain the conviction that only a few years intervene between the present and the time when the A. O. U. W. will, in membership and in popular favor, lead all other beneficiary organizations, and ultimately exercise a greater influence in uniting men in a brotherhood far superior in conferring benefits to its members than has hitherto been exhibited by the most ancient, as will as modern societies, having the same objects in view. The progress of this Order, from its inception, has not a parallel in any other organization or society. It is, indeed, the wisdom of all others simplified, and to-day, is by far the most popular of the many useful and really meritorious institutions gotten up for the improvement of society and the elevation, as well as the protection of those who seek a higher and nobler position in society than can be easily obtained singly and alone.—*Lower Lake Bulletin.*

We met Bro. Albert T. Glass, member of Los Angeles Lodge, No. 55. He has just returned from an extended visit to Salt Lake, and reports a general interest in our Order in Utah. It is expected that there will be several Lodges formed soon.

A Useful By-Law.

Editors Watchman:—There is a subject which I think of vital importance to the Order of United Workmen, to which I would most respectfully wish to call your, and through your valuable columns perhaps the attention of the entire brotherhood.

It is unfortunately a fact that some of our brethren are guilty of offences against our laws and the laws of nature, which not only tend to shorten life, but bring reproach upon the brotherhood. It is also an unfortunate fact that many of us shirk our duty through influences of various kinds, and our delinquent brother is permitted to continue in his transgressions indefinitely and unrebuked.

Realizing all this, I introduced a resolution to amend the by-laws of Gold Hill Lodge, No. 2, which I am happy to say was adopted and approved by our Grand Lodge committee, and I think will serve, in a slight degree, to remedy the evil. The main points of the resolution are as follows:

It is made the duty of the Acting Past Master Workman to prefer charges against all delinquents, not otherwise provided for by our laws, yet leaving it the privilege of any brother in good standing to prefer such charges; but should the acting P. M. W. neglect or refuse to prefer the charges with a reasonable time, he himself becomes liable to charges, and on conviction, may be reprimanded, suspended or expelled.

As in all other matters, arguments for and against such a law will readily present themselves, but I am convinced that some such regulation should be adopted by the Supreme Lodge, and that great benefit would be derived thereby.

Yours in C., H. and P., B. I. T.
Gold Hill, Nevada.

An Efficient Grand Master Workman.

Editors Watchman:—In your issue of the 15th inst. a correspondent, "Variety," from this place has unjustly charged our Grand Master J. V. McCurdy with neglect of duty. While I am charitable enough to suppose that your communicant wrote in ignorance, I cannot allow the subject to so rest. Bro. McCurdy needs no defenders from such a charge. Upon the organization of our Grand Lodge he was unanimously elected to the high and honorable position which he now holds. He then and there stated that he would rather decline the honor, because of his liability consequent upon following his profession—that of millwright—to be changing his residence; but finally accepted the trust and I assert that he has, in no single instance, neglected to do all that could reasonably be expected from such an officer; nay, more, he has been most energetic and zealous in spreading a knowledge of all that pertains to our Order.

He appointed a very highly qualified brother—D. F. Fox, of Gold Hill Lodge, No. 2—as his deputy, the result of whose labors alone should silence all his detractors. He also made very judicious appointments of District Deputies. In addition he has devoted all his spare time, and been at considerable expense in his personal efforts in performing the duties devolving upon him, as Grand Master of this jurisdiction. In short, the knowledge I possess justifies me in stating that his record will be a bright one.

Fraternally yours, in C. H. & P.,
D. Thorburn, Grand Recorder.
Gold Hill, Nev., Jan. 20th.

We met Bro. C. E. Parkman, who had taken the J. W. degree in Bay City Lodge, Eureka, and at their request, Valley, No. 30, conferred the M. W. degree on Wednesday evening, the 28th.

Hanford Lodge, No. 189, is in good condition, has 42 members, and meets every Monday evening.

The Mechanic's Capital.

The mechanic is sometimes looked upon, says the *American Machinist*, as a man without capital. Sometimes he looks upon himself in this light. This is all a mistake. The man who earns $1,000 a year has not only capital, but in these times of low interest he has considerable capital.

The manufacturer and the merchant aim to increase their capital by a judicious handling of present means. The mechanic does, or should try to, increase his in the same way. Knowledge to the mechanic is capital, because it enables him to command more for his services. If he possesses simply the skill of the workman, he can make that skill earn him a certain sum per year, which sum is the exponent of the capital he has invested in his business. If to the skill of the workman he adds the knowledge of the man who thinks beyond present purposes, he earns more, or, in other words, he increases his capital. The young machinist, for instance, who learns machine drawing, is morally certain at some time to find use for it where it will stand exactly to him as the money of the capitalist stands to its possessor, although this is hardly a *fair* statement, because he will at once find use for it. When the man who earned $1,000 a year, by virtue of his skill as a workman, adds such a knowledge of his business as to earn $2,000 a year, he has as surely doubled his capital as the man who has twice as much money to invest in his business as he formerly had.

It is earnestly advised that every apprentice to the machine business shall do a little calculation for himself on this subject, always remembering that capital, which is the result of skill and knowledge, is seldom at a discount and never lost. It is just at this time in their lives when habits are formed that, to a great extent, determine the working capital with which they are to go through life.

"MADEMOISELLE," said a witty and gallant septuagenarian the other day, making his demand for the hand of a young lady still in her 'teens: "I am 70 and you are 17. Will you do me the honor of becoming my widow?"

EBONIZED WOOD.—A very simple process for ebonizing wood is given in the *Art Interchange*, as follows: "The wood is first stained with a decoction of logwood, which may be purchased from any druggist. It is dissolved in warm water until all has been taken up that the water will hold. Application to the wood is made freely with a large, soft bristle brush, and the surface is rubbed with a cloth to prevent the formation of a gummy coat thereon. After the article has been left to dry for a few hours, the second application, which consists of vinegar in which a quantity of nails or clean filings have been soaked for several days, is also freely laid on with a brush. The moment the vinegar touches the wood it combines with the logwood solution in the pores, making an ink which is a permanent jet black stain. The influence of the iron in the vinegar is all-important. If any tendency to grayness is noticed, a second treatment is necessary; but this seldoms happens. When perfectly dry, the article is varnished and rubbed down, or finished with furniture oil well rubbed in. Cherry is considered the best wood for ebonizing. Whitewood, maple and beech are used with good effect. Any close grained, dense wood will answer—ash, chestnut and oak are not suitable. This process, it is said, is used for fine ebony and gold furniture."

WHITE LEAD.—Mr. G. J. Lewis, of Philadelphia, proposes to obtain white lead by heating the fumes of lead resulting from smelting processes, and then passing it into a cooling retort. Finely powdered sulphuret of lead (galena) is introduced into a funnel, whence it is forced by a bellows into the retort. This retort is heated to a red heat, which causes the sulphuret of lead to sublime and to deposit itself on the cooler surfaces. The fumes of lead then pass into a cooling chamber, and finally into a reservoir where the product is collected. Another method of obtaining white lead is to introduce sheet lead into a chamber containing jars of acetic acid, the atmosphere being heated by steam to a temperature of from 30° to 50°, besides being strongly impregnated with carbonic acid.

INOCCULATION FOR PHYLLOXERA.—Dr. Maudon, Professor at the Medical School, at Limoges, claims to have discovered an effectual remedy for the phylloxera, his plan being to inoculate the stocks of the vines with a solution of carbolic acid, applied by means of a funnel inserted in an incision made for the purpose. This, he states, poisons the insect and destroys the eggs. This method has been put into practice at Argenton.

HERRMANN,

No Organic Matter in Meteors.

A Louisville (Ky.) paper reports an interview with Prof. J. Lawrence Smith, of that city, in the course of which Mr. Smith gave reasons for discrediting the reported discovery of organic substances in meteors, as claimed by Prof. Hahn, of Berlin. Mr. Smith said:

"Although I have probably examined more microscopic plates of fragments of meteorites than any other person, still I have never discovered anything like organic remains in any of them. Besides, the well-known chemical composition of these bodies is averse to the existence of any such remains as spoken of by Prof. Hahn. Were these remains present, we should discern carbonate of lime on their interior. The two or three that have any carbonate of lime were discovered and analyzed by myself, and in these cases the carbonate of lime was an accidental constituent of incrustation deposited on the surface after their fall. In the microscopic examination of these polished plates of meteorites the two predominating minerals, enstatite and bronzite, will, by their fissures and forms, sometimes remind one of vegetable and other organic forms, but the merest tyro of an observer will trace here nothing but a rare resemblance. And, furthermore, the very ingenious nature of these minerals precludes the possibility of organic remains, even in terrestrial minerals of similar kind. Not knowing of any eminent German geologist named Prof. Hahn, I thought it but reasonable and logical that I should inquire something about him from my friend Prof. Hawes, now in the employ of the Smithsonian Institute, and the best lithological microscopist in this country, and who recently returned to this country after 10 years' study with Prof. Rosenbaum and others into the microscopic character of rock. In answer to my inquiries, Prof. Hawes wrote me this letter:

"'I read that paper of Prof. Hahn's. He is a kind of half-insane man, whose imagination has run wild with him. These forms which he so accurately describes and figures have long been known to exist in meteorites, and have been frequently described by mineralogists and microscopists. They are mainly composed of enstatite or bronzite in radial forms, and fractured in such a peculiar manner as to give them the appearance of structure. Some of the American meteorites which I have examined show these forms in great beauty, but Prof. Hahn is the only man who has seen anything organic in them, and his paper has excited nothing but ridicule. It reminds one of the long and laborious research of a German professor who found a whole flora and fauna, which he named with double Latin names, and which he found in his microscopic examination of basalt.'

"It is very clear to my mind," continued the professor, "that these cranky observations, viewed with the spectacles of the imagination of Prof. Hahn, have obtained more publicity than they merit."

SEPARATE SOUNDS ON ONE WIRE. — M. Maiche has found by experiment that sounds of different characters produced from two separate sources can be sent simultaneously on one wire and received separately. He used at the receiving station two telephones of different resistances, and at the transmitting station caused a musical box to be set going on a microphone of small resistance, while an induction telephone transmitter was spoken into at the same time. The musical sounds were reproduced in the telephone which had the least resistance, and the vocal sounds in the other, so that with the two telephones to the ears the music could be heard by one ear and the speech by the other.

A GREEN METEOR.—The Griffin, Geo., *News*, of a late issue, says: "Some evenings since we saw one of the most wonderful meteors that ever brightened the surrounding hills. It was some time between the hours of 11 and 12 o'clock; we were quietly meandering home from the sanctum, when suddenly a bright rosy light loomed up directly from the southern horizon, and shot with a flash toward the northeast, at an angle of about 70°. When about midway of the heavens the color suddenly changed to a rich green."

THE BELGIAN GEOGRAPHICAL PRIZE FOR 1885. The King of Belgium has decreed a prize, to be offered in 1885, for the best system of popularizing the study of geography. The competition for the prize is to be international. Competitors may send their works, either printed or in manuscript, and either in the French, Flemish, English, German, Italian, or Spanish language, to the Minister of the Interior, at Brussels, before January 11, 1885. It is necessary that the prize manuscript shall be published in the course of the year following that in which the prize shall have been awarded.

Carpenter and Builder—W. J. Peters, S. F.
Varnish Works—Hueter Bros. & Co., S. F.

Taffy.

EDITORS WATCHMAN:—It is said that we are made of clay. Now, I think that impression is erroneous. It seems to me that if the whole human family is not composed principally of taffy, there is a great deal of it in use.

The lawyer tells his client that he has a good case, and for a consideration he will win it, when he very well knows it is impossible. Is he not giving the poor fellow taffy?

The doctor tells his patient he can cure him with a few doses of pills and squills, when he (the doctor) knows the case to be incurable. Is he not giving him taffy?

The preacher tells his hearers his mission is to save souls, but when the contribution box comes round, are we not impressed with the idea that his preaching is all taffy?

When your broker tells you to buy certain mining stock, and claims that he has a pointer, and only wants a small commission, he is giving you taffy.

When the young man tells his lady companion that he loves her and hopes some day to make her his wife, he don't mean anything of the kind—he is giving her taffy.

The drygoods man, in order to sell his stock, must use considerable taffy.

The butcher, baker, barber and waiter all give the public more or less taffy.

Now, Mr. Editor, don't you think that *some* of our good brothers, in writing up "Lodge Locals," give the members of the Order a little too much taffy? I hope you will not think that in writing this I am giving you taffy, for nothing could be farther from my thoughts.

I am glad to notice that you are making such a good paper of the WATCHMAN. It now seems to be the impression among the brotherhood that your paper is a true representative of the Order, and has not a parallel in the history of fraternal organizations. That you may continue to receive the support that your efforts deserve, is the wish of T. AFFY.

San Franoisco, Jan. 18, 1882.

THE Globe Tobacco Co., of Detroit, Michigan, are introducing their choice brands of fine-cut Globe, Gold Flake cigarettes, and general line of smoking tobacco. Bro. E. J. Harris, general agent.

THE Pioneer store, kept by Bro. S. R. Briggs, 200 California street, is a reliable place to get a fine domestic or imported Havana cigar.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

THE Frazer complimentary testimonial, given at Union hall on January 13th, 1882, by Bro. J. Wm. Frazer, professor of dancing, was a recherche affair. There was a large attendance of the elite of San Francisco and invited guests from the country, and the decorations were elaborate. Ballenberg's orchestra of 25 pieces discoursed good and sweet music to 200 couple, who were strictly invited guests. This was a full dress party, and the elegant suits displayed by the ladies in attendance were subject of comment and notice. The following well-known gentlemen acted as the committee of arrangements: Mr. Albert Dugan, Mr. W. M. Hatfield, Mr. G. C. Farnsworth, Mr. George Teller, Mr. A. E. Bothin, Mr. H. Howard, Mr. E. H. Martin, Mr. G. J. Campbell, Mr. E. Everett, Mr. Phillip Teller, Mr. H. S. Landon, Mr. J. K. Lynch, Mr. W. J. Weatherly, Mr. Harry Gibbs, Mr. J. Q. Adams, Mr. W. V. Watson, Mr. J. V. Lavery. A list of 20 dances and a grand supper furnished by the Maison Dore, made this a gala night and one of the great events of the season. The large increase in Bro. FRAZER's classes has induced him to take the fine hall of the Olympic club, corner of Post and Dupont streets.

BRO. A. CONNOT is the manufacturer of the best and most healthful bitters ever made in this or any other country. The compliments he receives from all persons, without exception, who have tried and used it for several years, are the best guarantee for his success. We wish our readers to ask for it, and give it a fair trial and be convinced. Remember the name, Bitter Grande Chartreuse. For sale by all first-class dealers in liquors and groceries. Read the advertisement in another column.

WE are assured by those who know, that the advertisement of Bro. P. Abrahamson, in this number, is not an overdrawn picture. The "Rival," as a stove for family use, is gaining in favor and the demand increasing. It is durable, cheap and economical. By calling at 939 Market, the excellent features of the new "Rival" will be fully explained.

A NEW Lodge will soon be instituted at Smith River, El Dorado county.

A. O. U. W.

BUSINESS MENTION.

Two line cards will be inserted in this column at 50 cents per month, payable in advance.

Engineering Progress for 1881.

It is well at the threshold of a new year to look back at the achievements of labor, discovery, invention and the like, and make note of that which will give to the year its historic character. We condense from the *Scientific American* a brief reference to the progress which has been made during the past year in the matter of engineering, from which it appears, that although it has not been the best of years, 1881 will not go down to history as an empty or a bad one.

In New York, the lighting of streets and squares by electric lamps was begun less than a year ago. The work of putting down mains for the conveyance of electric conductors for a general system of incandescent electric lighting for stores, offices and dwellings is going on rapidly. And the same may be said of mains for steam heating from central stations.

The great bridge across the East river is nearing completion. The year has seen the approaches substantially finished and work on the superstructure begun. The original plans have been materially changed during the year, making the bridge five feet wider and four feet higher, with greatly increased strength, to enable it to carry railway trains of Pullman cars.

The tunnel under the Hudson is progressing rapidly and securely by improved methods, work going on from both shores. Steady progress is also making in the excavations under Hell Gate for the removal of Flood rock.

In marine engineering the most notable progress has been seen in the building of steamships exceeding 5,000 tons and up to 8,000 tons, and in the substitution of steel for iron, as in the construction of the *Servia*. On the destructive side we have seen the successful testing of the Ericsson torpedo boat, *Destroyer*, the less successful testing of the *Alarm*, and the launching of some notable torpedo boats in England.

Besides the work of civil engineering already noticed are several more or less important ones, begun or completed, which should not be forgotten. Another line of railway communication across the great West has been completed in the Southern Pacific road, and rapid progress has been made toward the completion of the Northern Pacific.

Our southern neighbor Mexico, has manifested unwonted activity in railway extension, and unwonted wisdom in greeting cordially American enterprise therein, and in the Tehuantepec ship railway scheme of Capt. Eads. At Panama, the De Lesseps canal project has been seriously begun; surveys and some excavations have been made, and a small army of laborers employed. The St. Gothard tunnel, through the Alps, has been opened to traffic, and the projectors of the English channel tunnel have given earnest of their sincerity in steady and promising work in actual drifting under the sea.

Not the least notable characteristic feature of the year has been the increasing attention given to useful applications of electricity, due partly to rapid advances in electric lighting, but more, perhaps, to the prominence given to electrical affairs by the successful exhibition at Paris. The storage of electricity, so-called, though not new, has been greatly developed and improved during the year. From being a laboratory experiment known to few, it has risen to be a promising factor in the practical application of electricity to every-day affairs. The electric railway has been extensively tested on the continent, and ground has been broken for a commercial electric railway in Ireland. The system of telephonic stations for civic purposes begun in Chicago, has been much extended, adding materially to the efficiency of the police system.

EFFECT OF COLORED GLASS ON LIQUIDS.—A German scientific journal recently published an article on the effect of the color of glass bottles on the liquors contained therein, in which the following interesting statements were made: Liquors contained in colorless bottles, when exposed for some time to the light, acquire a disagreeable taste, notwithstanding the fact that they may have been of superior quality before being so treated; liquors contained in brown or green bottles, however, remain unchanged in quality, even if exposed to direct sunlight. This phenomenon has not received proper attention heretofore, and quality has often been sacrificed for the sake of outward appearance. Since the results of the above treatment are due to the chemical action of light, it is advisable to use red, orange, yellow, green or opaque bottles for the preservation of liquors, while colorless, blue and violet ones should be entirely discarded.

Tracing the Storms.

The matter of a Signal Service system for the Pacific coast, by which we may be enabled to fix their entrance on this coast and trace their direction, has long been talked of and desired. The prospects are now that the system will soon be inaugurated. Lieut. C. H. Kilbourne has recently returned from a trip north, where he went to select sites for the establishment of the new Service stations, which it is thought that Congress will this winter appropriate funds for. He reports as the result of his observations that the general path of storms upon the Pacific coast is from the west eastward, with a southeasterly trend. The storm center strikes about Victoria, and the southern outer circle of the storm usually strikes Cape Flattery, the most northwestern point on our territory, first. The full force of the storms is felt in British Columbia, where the winds work great ravage. Therefore, a station upon Cape Flattery would give the first indications of approaching storms. For this reason Flattery is chosen as one of the proposed posts. Another station will be established at the mouth of the Columbia or on Tillamook rock.

Another point that the lieutenant is specially instructed to investigate is at Cape Mendocino. The benefit arising from taking observations at those points can hardly be estimated, as the whole system of calculations must be based mainly upon them. There are now but two coast stations—that in this city and the San Diego station. It is thought that in addition to these stations, another will be established at Cape Disappointment. In the event of an appropriation being passed for these stations this winter, an independent coast weather service will be inaugurated here, the observations of which will eventually add much to the general knowledge of the meteorology of the Pacific coast.

INTERESTING DISCOVERY.—Some fine carvings in ivory, discovered at Nineveh, showed signs of crumbling on arriving in England. Prof. Owen concluded that the decay was caused by loss of albumen in the ivory, and therefore boiled the articles in a solution of albumen. The experiment was a success, and the ivory became as firm and solid as when first entombed.

Wind Pressures.

The wind pressures experienced in India are remarkable. On October 5th, 1864, on the Eastern Bengal railway, two trains were upset during a violent storm. One of these was a train of eight passenger vehicles, and was upset near Echapore. The other was a train of twelve passenger vehicles, and was upset near Arrunghatta. In both cases all the passenger vehicles were blown over on their sides. Besides these carriages, four wagons were blown from a siding at Buggoolalo, and capsized about half a mile north of that station on the same day, from collisions caused by wagons which were started from sidings from the force of the wind. On Sept. 21, 1878, a long train of wagons traveling at about eight miles an hour, on the Eastern Bengal railway, was brought to a standstill by a heavy storm, and was then forced back about a mile with full steam and brake against it; 18 wagons were then detached, but even with half the train it was found difficult to continue the journey. On Nov. 20, 1880, at Negapatano, on the South Indian railway, an empty covered goods wagon was upset by the wind while standing at rest in a siding. Numerous instances have occurred on the Indian railways of trains being stopped, or nearly so, by the force of the wind.

The wind pressures above alluded to are certainly very remarkable for continuous pressures; but in the exceptional cases of tornadoes, such as those which passed over portions of Kansas and other States in that vicinity during the two last seasons, the pressures were far in excess of anything related of India. If the accounts are reliable large animals, such as horses, were lifted completely from the ground and carried long distances in the air; human beings were lifted in the same way and dashed to death. Houses were utterly destroyed to their foundations and their timbers and boards scattered far and wide over the adjacent fields. Electricity doubtless has much to do with the violence of such tornadoes.

FREEZING ALCOHOL.—The question has been asked whether it is possible to freeze alcohol, or pure whiskey. Alcohol could doubtless be solidified, but it would require a temperature lower than any yet attained by artificial means.

Practical Education.

Is it the fault of our public-school system, or the conceit of parents, that there are so many young men who are incapable of actively engaging in the mercantile and mechanical pursuits of life? It seems that both are, in a great measure, to blame—the first in adopting a system which tends to fit a young man for what is called in school or college, the classical course, and the latter in encouraging their sons to pursue this branch of study, so that they can be above the necessity of laboring with their hands, and be classed with those of "birth, accomplishments and breeding." This false idea of practical life has been the ruin of many a young man. What a parody on such an education is it to see "highly accomplished" young men competing as waiters, etc., with negroes, foreign immigrants and helpless gir.'s without mental training.

The tendency seems to be to fit a young man for the professions of law, medicine, theology teaching and literature, and not to the practical pursuits of life, such as merchandising, manufacturing, transportation and farming. Let any young man go to a merchant and ask for employment. His recommendations are good, and he tells the practical busy man of the world that he just finished his high-school course, or graduated from college. He tells him in support of his claims that he is well educated—classically so—that his knowledge of Greek and Latin are perfect. He is perfectly competent, in his own estimation, of dealing with all the intricacies of trade. But the merchant knows better. He has learned by experience that no graduate of our public schools is fit to be entrusted with any important branch of business. He cannot write a business letter, with all his knowledge of Greek and Latin. Ask him to draw up a contract, and he is completely lost. Does not know where to begin or where to end. Ask him to render an account of the business of the firm with a branch of the house in some distant city, or draw up a balance sheet of a shipment of goods to a foreign firm, with the profit and loss on the account, and he is like a ship at sea without a rudder.

In other practical affairs of life the same want is discernible. The Chicago *Inter-Ocean*, in discussing this question says that the present system teaches the science of geometry, trigonometry, and algebra, which are the abstract and logical elements of surveying and engineering, but not the arts of surveying and engineering themselves; whereas, in the development of the human race, the practice of surveying and engineering come first and easiest, and the reduction of those practical arts to that abstract end, scientific principles, come afterwards. It teaches natural philosophy, or the principles of mechanics in the abstract, but not how to build or run an engine, a press or a loom; whereas, the truest mental training is to be found, not in giving learned names to the various elements of motion used in mechanism, but in building and running the machine. It pretends to teach the Latin and Greek languages in their grammatical principles and construction, though those who teach concede that there is not now living a professor who could have made himself understood to Cicero or Demosthenes. It does not teach any language now spoken, except as it may be necessary to put German or French as an optional substitute, by way of throwing a tub to the whole of illiteracy. It teaches the sylogistic hash known as logic, but not the practical art of debating or of trying a cause in court. It teaches astronomy but not how to take an observation of latitude and longitude. It teaches political economy, but not the effect of a duty on prices. It teaches chemistry, as relates to the atomic formulæ by which the corporation of the alkalies, acids and salts are expressed, and the modes of chemical union of such ultimate elements as oxygen, hydrogen, nitrogen, etc, in the various known commercial compounds, but the knowledge which, in the development of the human mind preceded these abstractions, the knowledge how to make bread, soap, ink, alcohol, how to defend them against incompetency and protect them from rascality, is not taught.

THE KING BIRDS.

What seems to be necessary is a reform in the method of education. A system is needed which will give the student an insight into the practical affairs of life. In place of running in one groove or system, what is wanted is a diversified course of instruction. The State takes upon its shoulders the education of the youth of the land, and it should fit them in a measure to grapple with the problem of life. The school of experience is hard enough at best, and anything which will aid the beginner is what the times demand,

The King-Bird.

The king-bird, or "Field Martin," as it is sometimes called in the Southern States, remains at the North during the spring and summer; and, although men destroy it, Mr. Audubon declares its occasional destruction of a honey-bee, and larceny of a few raspberries and figs, to be the only mischievous acts it commits, while, he alleges, its beneficial deeds are countless, insects chiefly caught upon the wing being its accustomed food. It appears in Louisiana about the middle of March, and continues until the middle of September. Further northward, over the entire country, it comes later and disappears earlier. For a few days after its arrival, it seems fatigued and doleful, and remains perfectly silent; but its sharp, tremulous cry is soon heard over the fields and along the skirts of the woods. It seldom enters the forests, but is fond of orchards, large fields of clover, the neighborhood of rivers, and the gardens close to the houses of planters. As soon as incubation has commenced, the male, full of ardor, evinces the most daring courage, and gallantly drives off every intruder. Perched on a twig in view of his mate, he seems to direct every thought and action to cherish and protect her; and, though he seldom meddles with small birds, yet often flies to the rescue, when he espies a crow, a vulture, an eagle, or a martin making any approach, spreading his wings to the air, and pressing toward the dangerous foe, he commences his attack with fury. Mounting above the enemy, he sounds the charge, somewhat like a watchman's rattle, repeatedly plunging upon the back of his powerful antagonist, and essaying to secure a hold. In this manner, he harasses him with continued blows, and follows him at times for a mile, when, the fugitive having sought refuge in the forest, with quivering wings and trilling notes, the little bird returns exultant to his nest. Audubon says, that the martin alone, of all ærial enemies, inspires him with fear; that, although this bird frequently aids him in protecting his nest and watching over the farm-yard, it sometimes attacks him, and, excelling him in quickness and power of flight, eludes his more powerful blows, and in some rare instances, destroys him. Few hawks venture to approach a farm-yard while the king-bird is near; and even the cat, tormented by his attempts to peck on all sides, retreats from before him to the house.

HANDY LODGE, of Michigan, instructed its representative to the Grand Lodge to put forth every effort, and use all his influence in gaining for the mothers, wives and daughters of members of subordinate Lodges the privilege of being honorary members. It would have been much better and more satisfactory if it had instructed him to use all his influence for the development of the Degree of Honor. We don't think there is a single Lodge of this degree in that State, and we can't see why it is. It would certainly add strength to the Order if there was a Degree of Honor Lodge in every town and city in the land.

THERE is no abatement in the interest manifested in our Order. The Lodges are making Workmen in the same ratio that they have always done. Verily the A. O. U. W. has a strong hold on the affections of the people. It is well. Let the members live up to their obligations, and it will always increase in power and usefulness.

Home Miscellany.

The Petrified Fern.

In a valley, centuries ago,
Grew a little fern leaf, green and slender,
Veining delicate, and fibers tender;
Waving when the wind crept down so low;
Rushes tall, and moss, and grass grew round it,
Playful sunbeams darted in and found it,
Drops of dew stole in by night, and crowned it,
But no foot of man e'er trod that way;
Earth was young, and keeping holiday.

Monster fishes swam the silent main,
Stately forests waved their giant branches,
Mountains hurled their snowy avalanches,
Mammoth creatures stalked across the plain;
Nature reveled in grand mysteries,
But the little fern was not of these,
Did not number with the hills and trees;
Only grew and waved its wild sweet way,
None came to note it day by day.

Earth, one time, put on a frolic mood,
Heaved the rocks and changed the mighty motion
Of the deep, strong currents of the ocean;
Moved the plain and shook the haughty wood,
Crushed the little fern in soft moist clay,
Covered it, and hid it safe away;
Oh, the long, long centuries since that day!
Oh the agony! oh life's bitter cost,
Since that useless little fern was lost!

Useless? Lost? There came a thoughtful man
Searching Nature's secrets, far and deep;
From a fissure in a rocky steep
He withdrew a stone, o'er which there ran
Fairy pencilings, a quaint design,
Veinings, leafage, fibers clear and fine,
And the fern's life lay in every line!
So, I think, God hides some souls away,
Sweetly to surprise us the last day.

—*Mary L. Boles.*

A Foolish Mistake.

"Lucy, which of us are you going to give up, Mark Beauclere or me? It must be one of us, dear, and the sooner you decide the better."

The speaker—a tall, lithe, brown-haired, brown-skinned young fellow of three-and-twenty, with an honest face and a pair of earnest blue eyes, placed himself very deliberately in Lucy Armstrong's way, as she was strolling under the trees in the shady old garden, with her hat pulled over her eyes and a pocket volume of some poet in her hands. It was a scorching July afternoon and Lucy had quietly slipped away from the half-dozen ladies who were sitting round her Aunt Hester's tea table, discussing all the latest news of the parish.

Mark Beauclere, an æthetic young gentleman of 30, with a very fine voice, rather weak sight, and a large income, was there too, but as he generally was to be found at Miss Hester Armstrong's tea table, he counted almost as one of the ladies; and Lucy was a little tired of them all, and wanted to be alone. She looked as if she were having some very pleasant thoughts as she sauntered under the trees, and seemed in no way prepared for the sudden interruption.

"Why, George, you quite startled me," she said, standing still, for George Leslie had placed himself in her way. "Why didn't you go in and have some tea?"

"Because I wented to talk to you, Lucy. I've been trying to get an opportunity of talking to you for the last week, and I couldn't. I want to know which of us you are going to give up, Mark or me?"

"Seeing that I never possessed either of you, it would be rather premature of me to say," and she glanced up at him from under the shelter of her hat. "Why, George, what's the matter?" she asked, laying her hand lightly upon his arm. "Are you ill—or—angry?"

"No, only heart-sick and sorry, and disappointed," and the young fellow looked quite haggard. "I suppose I ought to congratulate you and then efface myself as speedily as possible; but when a fellow has cared about somebody all his life, as I have cared about you, it's not so easy, Lucy."

"What's not easy, George? I really have not the slightest idea of what you're talking about," Lucy cried, growing very red and confused. "Do tell me exactly what you mean, like a good boy."

George winced and turned aside with rather a savage expression. To be called "a good boy" by Lucy under certain circumstances would be all very well, but in that tolerant, almost patronising tone it was too much.

"Am I not to congratulate you on your engagement to Mr. Beauclere?" he said, grimly.

"Certainly not!" was the very grave reply.

"Then you've refused him, Lucy?" with humiliating eagerness. "I guessed you would."

"Mr. Beauclere has not done me the honor of asking me."

"Oh!" and George's face fell perceptibly. "But you will refuse him, Loo, won't you?" he continued. "He told me he was going to propose this very day," in a savage whisper.

"Then, perhaps he will inform you of my reply in due course," and she looked up with a droll twinkle in her bright hazel eyes. "Now, George, if you're not coming in to have some tea, let me pass, please."

"But you don't care about him, Loo, do you?" he whispered, with a very penitent glance.

"Pardon me, I like Mr. Beauclere very much indeed! Why shouldn't I? And I thought, George, you and he were friends."

George turned away with an exclamation that sounded like "Confound him!" and Lucy returned to the house, serenely smiling under her broad-brimmed hat.

The drawing-room was empty, but in a little snuggery beyond, which her aunt called her own boudoir, there was a muffled hum of voices, and Lucy smiled more comically than ever as she went upstairs to change her dress for dinner. Both George Leslie and Mr. Mark Beauclere were to dine at "The Nest," and Lucy, brimful of mischief, resolved to tease George thoroughly before she put him out of his misery.

So she donned a fresh muslin gown, and fastened a crimson rose in her hair, and then went down and took a seat near the drawing-room window, which commanded the entrance to the front garden, and, with a very demure smile, awaited the course of events.

Presently she was joined by her aunt, looking gravely important and bristling all over with a secret. Miss Hester was a tall, slender, keen-eyed, thin-lipped lady of as near 40 as possible, with smooth, dark hair, regular features, and a stately, not to say commanding presence; she had very beautiful white hands, and she used them a good deal in a majestic way. When dinner was announced, it was by a wave of them she signified to her niece that she meant to proceed at once to the dining-room. Lucy followed her with suppressed amusement beaming from every feature of her face. She guessed pretty accurately what her aunt's secret was, though, till Miss Hester opened the subject, she would not breathe even a hint of it. As the dinner progressed in impressive silence, she found herself wondering why George did not come. Later on, as she sat at the piano, in the twilight, and played over her favorite songs, singing snatches of them, wandering aimlessly from "Auld Lang Syne" to the "Lass of Richmond Hill," and then to "Home, Sweet Home," she little thought who was listening to her on the other side of the lilac tree that shaded the drawing-room window. There, in safe obscurity, George Leslie listened, till he heard the piano closed with just the suspicion of a bang, and saw Lucy's slight, white-robed figure cross the room and approach the open window; then he stole away noiselessly with something between a sob and a sigh. There was even a suspicious and a humiliating moisture in the poor fellow's eyes as he hurried across the fields in the direction of the railway station.

"She's treated me very badly—but for all that I hope she may be happy. Heaven bless her!" he said, as he caught a glimpse of "The Nest" as the train shrieked past. Then he shrank back into his corner and gave himself up to the bitterest reflection. He found it difficult to realise that he was rejected, yet Beauclere had told him distinctly that he had proposed to Miss Armstrong that afternoon and had been accepted. There was no further reason for his staying at Westwater, and he was going to ask his uncle, of the firm of Leslie & Longhampton, to send him on a confidential mission to the extreme end of the earth, where they were supposed to do business. George could not be philosophical enough to look at happiness "through another man's eyes," so he determined to get completely out of the way of Mr. Mark Beauclere; and he could not even summon up courage to congratulate Lucy, or say good-bye, but he wrote her a nice little letter, in which a good deal of real feeling was hidden under some stiff formal phrases, and through it all peeped a very sore, bruised, affronted, but still faithful love.

Lucy laughed at it at first and then cried over it, then wiped her eyes and wrote an explanatory and affectionate reply; but, alas! George was gone on the confidential mission. His letter said that he was on the eve of starting for China and bore the Southampton post-mark. He said he might be absent for years, or forever. To poor Lucy, in the first dismay of her discovery that George was really gone, it seemed the same thing.

CHAPTER II.

"My dear Leslie, this is a surprise and a pleasure! How are you? When did you get back?" and George Leslie found his hand grasped by a portly, comfortable-looking gentleman in gold-rimmed glasses and wideawake hat.

"I—I beg your pardon, I don't—I can't quite recall you, though I seem to remember your voice," George stammered.

The portly gentleman laughed. "Well, you're more changed than I am, I dare say, and yet I knew you in a moment. Is it possible that you've forgotten——"

"Beauclere? Why, of course! how stupid of me!" and George's brown face grew a very curious brick-color as he wrung his old friend's hand. "I've been away five years, Mark, and it tells on all of us."

"I wish it told such a flattering tale on me as it does on you," Mark said, with a smile. "Come and dine with me, old fellow—no excuses—it won't put us out in the least. Mrs. Beauclere is at Brighton with Miss Armstrong, so I'm *en garcon*. We live at Putney—jump in," as a "bus" came up, "and tell me all about your adventures, and when you returned."

"I only landed three days ago, and I haven't had any adventures, except of the most commonplace, practical kind. The business I went out to manage turned out very well. I made some money, and I've come to England to settle down—that's all. How is Mrs. Beauclere?"

"Quite well, thanks. Have you put on the halter yet, George?"

"No. The Celestial Empire is certainly not the place of all others to tempt a man to matrimony."

"Lucky fellow! I wish I had gone there with you."

George was silent—it seemed like treason to echo the wish. It was just like that monster Mark ever to express it. Of course, he made poor Lucy miserable; that was only to be expected. How he ever could have become so supremely dull and commonplace George couldn't imagine. When he entered the drawing-room he couldn't help noticing little evidences of Lucy about—her old-fashioned work-table; a black cat, which he seemed dimly to remember; books, and a drawing or two. His heart beat a little quickly; and on the whole he was glad that he had not to meet her on that first evening. "Does Miss Armstrong always live with you?" he asked presently.

"Yes, of course; where else could she live? Indeed, I don't know in the least how the house would get on without her. You see, my wife and I go in for politics and literature, and that sort of thing; and if we hadn't some one to keep us in order and see to our creature comforts, I'm afraid we'd starve. If ever you do marry, George, don't select a clever woman with a taste for logic and metaphysics," Mark whispered, looking round cautiously. "It's simply awful!"

"I never fancied Mrs. Beauclere would develop a taste for those subjects," George replied; and then he smiled a little sadly as he thought of Lucy as a bluestocking, and Aunt Hester, who had always been his special horror, whisking about the house, upsetting the domestic comfort of everyone, and waving her hands in command or disapproval, unceasingly.

"I never could stand it, I know," he said to himself, as Mark went on giving him some details of the establishment, with a sort of rueful good humor. "A clever wife and an energetic aunt-in-law would be to much for me."

And it had evidently proved too much for poor Mark Beauclere. He was no longer slender, sentimental, and æsthetic; indeed, his chief idea in life seemed to be thorough enjoyment of such pleasures as remained to him. He enjoyed his dinner, for instance, thoroughly, and grew quite confidential over his coffee after.

"It was very sudden, your going away, George," he remarked, after a long chat over the old times at Westwater, and the pleasant evenings they used to have at "The Nest." "Do you know, I thought once that you had rather a fancy for Lucy."

George grew brick-red again, and bent his eyes resolutely on the table.

"It would have been a capital thing for you; and I believe she liked you, for she seemed altogether out of sorts when she got your letter. In fact, George, you might have done much worse than have married Lucy Armstrong."

Still silence and steady contemplation of his glass, on the part of George.

"And for that matter, you might do worse than marry her still."

George looked up with a sudden angry dash, then he grew quite white. Mark was not chaffing in the least, he felt that; still he could not take it all in at once.

"I believe it's entirely on your account she has remained single, Mark continued, with good-natured garrulity "in spite of all her aunt's efforts to get her well married."

"Did you say Mrs. Beauclere was staying at Brighton?" George presently asked, in a very meek voice; "because I thought of running down there for a few days. Will you come, Mark?"

"No, thank you," with a droll shrug. "My wife and Lucy are staying at the Royal; give them my love, and tell them they need not hurry back, as I'm all right."

* * * * * * * *

"Lucy, dearest, can you forgive me? It was all a dreadful mistake from first to last! I thought it was you Mark wanted to marry; and when he told me that evening that he had proposed and been accepted, I was frantic. Aunt Hester never once entered my head."

Lucy's reply was a little unintelligible, but after a time they managed to understand each other. Miss Armstrong could not long resist a lover who had been faithful to her for five years, even when he believed her lost to him forever; and George resolved to marry her out of hand, so that there should be no more misunderstandings. Sometimes Mark Beauclere chaffs them both a little about George's mistake; but he always boldly asserts that the great mistake was Mark's after all.

How to Treat a New Sister.—The young girl who enters a large family as the betrothed of one of the brothers has a very difficult role to fill. Unless she is frank and sincere, unless she is very engaging, she is apt to be disliked by some of them. Perhaps the brother has been a great favorite, and some loving sister is jealous of her. Some brothers, even, may feel offended at having the affections of his most intimate friend stolen from him; or the charms which have won the lover may not be apparent to the rest of the family. Now is the time for good breeding. Now is the moment for the amenities. Let the young people remember to treat that young lady with peculiar courtesy, for she will never forget their conduct at this period. She is to be their sister for all time. If they treat her with respect and cordiality ten to one she will be a good sister. But if they treat her with hatred, suspicion and dislike, she will be their enemy all her days—and very little blame to her if she is. It is the cruelty of the red Indian to treat a new comer, introduced under such tender circumstances, with anything but kindness.

Give the Children a Chance.

We are too apt to think that a child has no natural gifts in a certain direction because there is no strong manifestation of natural power. But a child should have a chance, under the training of a teacher, to show what it can do, before it is condemned as dull and unqualified for a higher position.

As land does not bear good fruit without culture, so the mind will not produce rich fruit if it be neglected. It is strange that some people will spend thousands of dollars in cleaning brush and stumps from land, while they let their boys and girls grow up in ignorance. There is nothing that will yield a better return than the cultivation of young brains. The subsoil plow, sub-irrigation and sunshine applied to the intellect, will reveal greater riches than can be found where all the energy is spent upon the land. Artists, inventors, musicians, orators and writers, will come forth if kindly hands will but crack the shells that now confine them in their dungeons. In most cases children are uneducated or half educated because their parents are poor. In States where the soil is barren and the climate is bad, there is some excuse for this. The hardest labor there gains but a bare subsistence, perhaps, and the young must work for bread; but in this State where a double reward is offered to industry, and the educational advantages are so good, there will soon be but little excuse for letting children grow up in ignorance. When I say that a double reward is offered to industry, I mean that any one in fair health who will take up a piece of vacant land, can make it support them and give their children a good education and, in addition, they will secure a competence for old age. Industry is the finger-board that always points to success.

When I urge the importance of giving children a chance, I do not refer entirely to studies taught in schools. Quite often lessons out of the regular course are the ones that do the most good. Take art, for example. Almost any one who has had experience in teaching can cite instances where they have unexpectedly discovered pupils of quite remarkable talents. There is, on this coast, to-day, an artist whose pictures command a high price; his income is probably over $500 a month, though he struggled against the advice of friends when they first tried to get him to devote himself to art. He was then earning $100 a month in another occupation and did not believe that he could ever make his brush pay as much as that. He can sell one picture now for more than he used to earn in an entire year.

There are scores of cases where young ladies have become quite proficient as artists, though they began with little or no expectation of achieving any good results. In not a few cases married women have discovered that they possessed artistic talents of a high order.

No doubt a great many people who now write a poor hand, could, by earnest and continued application, learn to write well; and it would not be far from the truth to add, that the same amount of application would enable the same number of people to reproduce in colors a fair representation of fruits, flowers, birds, animals and other objects.

What is true of art and penmanship is also true of many other things—the ability to put thoughts on paper, for instance. There are hundreds of business men, farmers and mechanics, whose minds are richly stored with experience, and they would gladly contribute their knowledge to the press if they understood the art of writing half as well as those who have little of their experience, and far less mental capacity, but who are able, nevertheless, to do much good with their pens. A man who cannot put his thoughts on paper in this age of printing is half dumb, and a man who cannot or will not read, is more than half blind.

If people wrote as well as they talked, the problem would be solved. Why can't they do so? Men will reel off page after page of good literature, wit and wisdom, capitalized and punctuated to a dot, but if you give them pen and paper they would stumble, blunder and botch up their ideas in a way that would throw Josh Billings entirely into the shade. This need not be so. Their tongues and hands should be better acquainted with each other. The awkward thumb and fingers should be labored with until they are able to transfer to paper the displays of elastic energy; the richness and vast resources of the tongue to which they belong.

—*Kate Dashwood, Napa.*

The True Wife.—Oftentimes I have seen a tall ship glide by against the tide as if drawn by some invisible bowline, with a hundred strong arms pulling it. Her sails were unfilled, her streamers were drooping, she had neither side wheel nor stern wheel; still she moved on stately, in serene triumph as with her own life. But I knew that on the other side of the ship, hidden beneath the great bulk that swam so majestically, there was a little toilsome steam-tug, with a heart of fire and arms of iron, that was tugging it bravely on; and I knew that if the little steam-tug untwined her arm and left the ship, it would wallow and roll about and drift hither and thither, and go off with the refluent tide, no man knows whither. And so I have known more than one genius, high-decked, ful-freighted, idle-sailed, gay-pennoned, but that for the bare, toiling arms, and warm beating heart of the faithful little wife that nestles close to him, so that no wind or wave could part them, would have gone down with the stream, and have been heard of no more.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of eighteen letters.
My 4, 8, 17, is a fowl.
My 6, 15, 13 is a negation.
My 10, 2, 3, is a covering for the head.
My 1, 7, 17, 8, is a number.
My 12, 18, 13, is not dry.
My 18, 5, 16, is a part of the head.
My 9, 15, 12, is not high.
My 14, 5, is an exclamation.
My 11, 3, is a preposition.
My whole is the name of a widely-known author.

ANTONIO.

Decapitations.

1. Behead a kind of barrel and leave to question.
2. Behead money and leave a tree.
3. Behead a bandage and leave a conjunction.
4. Behead an animal and leave a part of the head.
5. Behead a curse and leave an article.
6. Behead a large fish and leave strong and healthy.

EDITH.

Hidden Towns.

1. Where shall we camp to night?
2. We are to leave next week.
3. Is that story exciting, John?
4. You do very well for a beginner.
5. Warn Ernest before it is too late.
6. Was Susan down at the hall last evening?
7. He will compel Hamlin to leave soon.

LEO P.

Curtailments.

1. Curtail a prophet and leave to perceive.
2. Curtail a place for sitting and leave a large body of water.
3. Curtail a liquor and leave an insect.
4. Curtail a market and leave to injure.
5. Curtail front and leave a preposition.
6. Curtail a calendar month and leave a parent.

MARS.

Metagram.

First I am part of a ship; change my head and I am immense, change again, and I am final; change once more, and I am gone forever. MELANCTHON.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—A white glove often covers a dirty hand.

CURTAILMENTS.—1—Heath, heat. 2—Lace, lac. 3—Badger, badge. 4—Bales, bale. 5—Heron, hero.

How Tommy Tended the Baby.

Tommy Teale was just six years old. It was his birthday, but instead of having a good time to celebrate such a grand event, he had to take care of the baby. His mother went to do some errands, and left him alone with his little sister. Tommy felt very bad about it. Little Nellie cried a good deal. Tommy did not know what to do with her. He loved her very much, but he did not like to take care of her when she was cross.

As he stood at the window, Ned Brown came out to play on the sidewalk.

"Come out, Tommy!" he shouted.

"I can't," Tommy shouted back; "I've got to tend the baby."

"Shut the door tight and she can't get out," Ned said.

Tommy thought it over; he knew more about babies than Ned Brown did. Nellie might burn herself on the stove, or pull the cover off the table or break the lamp. An idea came into Tommy's head; he ran to the closet for the tacks and hammer. He drove four tacks through her dress and fastened her down to the floor. When this was done, he ran out of doors as fast as his legs would carry him.

In about an hour Tommy's mother came home. He had not shut the door tight because he was in such a hurry. Right on the top step she found the baby; but her little neck and arms were bare; she had no dress on. Her mother carried her into the sitting-room. There was the dress nailed to the floor. The baby had torn it all off trying to get away, and it had to go into the rag-bag.

Tommy came in a few minutes after. He was very much surprised to hear what his mother told him.

"I never did see such a baby!" he said. "I thought you only wanted me to keep her out of mischief, and I guessed the nails would do it sure."

What is Whisky Bringing?

"What is whisky bringing?" asked a dealer in that article, one day. He meant to ask, how much is it selling for?

A gentleman who heard the remark took it in an entirely different sense from that.

"What is whisky bringing?" do you ask. I'll tell you: "It is bringing men to prison and to the gallows, and it is bringing women and children to poverty and want."

There never was a truer answer than this.

It is estimated that it sends to prison every year one hundred thousand men and women.

Twenty thousand children are sent to the workhouse annually by drink.

Three hundred murders are caused by intemperance every year.

Two hundred thousand children are made orphans every year, by this dreadful evil; and sixty-five thousand are killed by intemperance every year in this country.

Humorous.

Chips.

A MAN cannot smoke his cigar too short unless he smokes it too long.

COLORED belles refuse to wear bangs. They say you can't pull the wool over their eyes.

FOOD for reflection: Eating a large supper and going to bed to lie awake and think about it.

A RECENT African explorer, in giving an account of his travels, speaks of ants one inch long. The insects must be gi-ants.

IF a two-wheeled vehicle is a bicycle, and a three-wheeled a tricycle, it does not follow that the one-wheeled is an icicle. It is a wheelbarrow.

A LITTLE child was addressed by a gentleman the other day. "How old are you?" he asked. "Old!" said the child, indignantly; "I'm not old at all. I'm quite new."

"I SAY, mister," asked a dirty-looking chap, "will that dog bite?" "Guess not," replied Fogg. "He won't bite you; or at least I wouldn't if I were a dog. You'd have to wash yourself first."

A FRENCHMAN on the point of being guillotined was asked if he had any last wish to make. The dying man's wish is held sacred. "Yes," he replied, "I wish to learn the English language."

"I WISH to ask the court," said a facetious barrister, who had been called to testify as an expert, "if I am compelled to come into this case, in which I have no personal interest, and give a legal opinion for nothing?" "Yes, yes, certainly," replied the mild-mannered judge; "give it for what it is worth."

A GERMANTOWN man, who owned the house next to him, refused to rent it to a young couple, because they had children. He has since rented it to four old maids, who, for the sake of companionship, have bought a peacock, a pair of guinea fowls, two howling dogs and a parrot.

FRIEND of the family to the boy twins: "I'm afraid you little fellows don't always agree. You fight each other sometimes, don't you?" Twins: "Yeth, thir, thumtimth." F. of the F.: "Ah, I thought so. Well, who whips?" Twins: "Mamma whips!"

A LITTLE boy of seven had been in the habit of sitting with his three-year-old sister in church. Last Sabbath he refused to sit in his usual place with his little sister. "For," said he "folks might think we were married."

Household Hints.

VARIETY CAKE.—One cup of butter, three cups of sugar, five eggs, one cup of sweet milk, four cups of flour, one teaspoonful of soda, two of cream of tartar, flavored with lemon. This makes the white part, and the following mixture for the dark part gives the name to the cake—(to be put into one-half of the mixture above given): One cup of raisins, two tablespoonfuls of molasses and spice to taste. This will make three good-sized cakes. Butter the cake pans, put in first the dark, and the light on top, and bake in a quick oven. It is better for children than the richer spiced cake, and pleases them just as well.

ALMOND CAKE.—Take half a pound of butter, one pound of sugar, one pound of flour, one cup of sweet milk, six eggs, two teaspoonfuls of baking powder (when so many eggs are used do not heap the baking powder in the spoons), one cup of blanched and chopped almonds, one cup of seedless raisins (also chopped), one cup of citron cut in small pieces; stir the almonds, raisins and citron in with the flour. This is a very rich cake, but it has the merit of keeping well.

CHESS PIE.—Beat one-half cup butter to a cream; then add the yelks, well beaten, of three eggs, two-thirds cup of sugar and a little flavoring. Bake in a rich open crust. Beat the whites, add three tablespoonfuls of sugar, flavor to taste, spread on the top and slightly brown. Serve hot.

POP-CORN BALLS.—Moisten a cup of sugar with three tablespoons of water, and one of vinegar, add a tablespoon of butter and boil until it hardens in cold water. Make the pop-corn into balls with it, using only enough candy to stick the corn together.

HASTY PUDDING.—Let sweet milk boil, then stir in flour until the same thickness as mush. Boil until the flour is cooked; add a little salt. Serve very hot with sweetened cream with nutmeg flavoring, or with syrup. A cheap pudding and a favorite with the children.

INDIAN PUDDING.—Boil one quart sweet milk and stir into it one teacup corn meal, and when cool add one ounce butter, four beaten eggs, one-quarter pound sugar, one-half pound raisins. Bake one and one-half hours and serve with sauce. The raisins may be omitted.

CRUMB PIE.—Soak in a little warm water one teacupful bread crumbs, then add three tablespoonfuls sugar, one-half tablespoonful butter, one-half cup cold water, a little vinegar and nutmeg to taste. Bake between crusts.

Health Column.

THE SALICYLIC TREATMENT OF RHEUMATISM. Dr. Maclagan, of England, who introduced the salicylic treatment of rheumatism, has recently published a work defending the treatment and insisting on its advantages over every other method. Of the 30 salicylic compounds, but two besides salicine itself are employed—salicylic acid and salicylate of soda. After an ample trial carried through several years of practice, he concludes, that in rheumatism, 30 grains of salicine should be given every hour, until pain abates, and then every two hours during the day for a few days, and afterwards gradually withdrawn. He insists on the large doses as necessary to develop the full benefits of the medicine. Much complaint has been made in various quarters of the failure of the salicylic treatment, and it is quite probable that this has resulted from insufficient doses. We ourselves have generally been content with 15 or 20-grain doses every two hours in the form of salylate of soda, from which good results follow in the large proportion of cases.—*Pacific Med. and Surg. Journal.*

PROPOSED PREVENTION OF RABIES.—Dr. L. L. Dorr, of this city, in a paper published in the N. Y. *Medical Journal*, dwells on the fact that no case of hydrophobia, in dog or man, has ever been known on the Pacific coast of America, North or South, although dogs are abundant. This extraordinary fact appears to be well established; at least it is impossible to find any record or history of the disease. He attributes the immunity to some peculiarity of climate, probably its electrical condition. He proposes to test the influence of the climate by sending some dogs from the East immediately after their being bitten by a rabid animal, and keeping them properly secured until the result is ascertained. A more practicable plan would be, he suggests, to have a number of the many persons who are annually bitten by rabid dogs in the Eastern States and in Europe come to this coast, where the influence of the climate would be enhanced by the inspiration of hope. Even if the disease should come on under these circumstances, he thinks it might possibly be so modified as to render it susceptible of cure.

MANAGEABLE ANÆSTHETICS.—Paul Bert has been experimenting upon the anæsthesia of animals with mixtures of variable proportions. He calls the interval between the anæsthetic dose and the mortal dose the manageable zone, and his experiments seem to indicate that in all cases the mortal dose is just double the anæsthetic dose. If the mixture represents about the middle of the manageable zone, an animal is quieted very rapidly, and remains tranquil during the whole time of the experiment, even if it lasts for two hours. A few drops of the liquid, if they are breathed without a proper mixture of air, may suffice to carry the patient from the manageable to the mortal zone. Most anæsthetics seem to act, not by the quantity, but by the proportion which they hold to the air that is breathed. It seems probable that these proportions may be so exactly ascertained that all anæsthetics may be used with perfect impunity.—*Comtes Rendus.*

WARM MILK AS A BEVERAGE.—Milk that is heated to much above 100° F., loses for a time a degree of its sweetness and density. No one who, fatigued by over-exertion of body and mind, has ever experienced the reviving influence of a tumbler of this beverage, heated as hot as it can be sipped, will willingly forego a resort to it because of its having thus been rendered somewhat less acceptable to the palate. The promptness with which its tonic influence is felt is indeed surprising. Some portion of it seems to be digested and appropriated almost immediately; and many who fancy they need alcoholic stimulants when exhausted by fatigue, will find in this simple draft an equivalent that will be abundantly satisfying and more enduring in its effects.

COLD DRAUGHTS VS. COLD BATHS.—Dr. Dio Lewis says cold baths of the skin are good, but it is doubtful if flooding the stomach on going to bed and on rising is not, on the whole, the most profitable form of cold bathing. Costiveness, piles and indigestion are uniformly relieved by this morning and evening cold douche. The quantity must be determined by each one for himself. Two or three swallows will do to begin with, but the quantity will soon grow to a tumblerfull; and I have known persons to use much more with marked benefit. If advisably managed every dyspeptic will be greatly improved by this cold stomach bath.

ARTIFICIAL BONE.—A young lady in Erie, Penn., has been troubled for some time past with a malignant cancer on the right side of her lower jaw. The physicians have decided to remove the jaw and insert a celluloid jawbone to replace the one taken out. This has been done but two or three times before, it is claimed, and the result of the combined operations is being watched with the greatest interest by the medical profession.

CURE FOR RINGWORM.—It is said that a sure cure for ringworms is found in the use of a wash, prepared by soaking a bit of chewing tobacco the size of a raisin, with the same quantity of saleratus, in a spoonful of vinegar. Apply the wash faithfully for several days, until the skin is restored to its natural state. This remedy never fails, even in cases of open sores of enormous proportions.

Worth Knowing.

"Pebble" and "Glass" Spectacles.

The question is often asked, "What is the difference between 'pebble' and 'glass' in spectacles, and how may I distinguish the one from the other?" "Pebble" is much preferable, from the fact that it is harder and less liable to be scratched. A careful examination of the two, after a few months' use, will show this. "Pebble," which is made from the finest of large quartz crystals, by sawing into slabs, grinding and polishing, is much more transparent than glass. This is shown by placing a pebble lens between two plates of tourmaline, to polarize the light, when the light will readily pass through. But if the very best of flint or crown glass is subjected to such a test, the light will not pass, showing the greater transparency of the former.

A glass may be quite readily distinguished from a pebble lens by applying first the one and then the other to the tip of the tongue. The pebble will be found very sensibly colder than the glass.

Sometimes pebbles are cut, either through ignorance or a desire to cut them to the best advantage, at right angles to the axis of refraction; in all such cases the rays of light are split up in passing through the lens, and are therefore injurious to the eye. The crystal is sometimes defective in formation, not homogeneous or of stratified growth. Lenses made from such pebbles are little, if any, better than glass. In purchasing, buy only of an established dealer, who thoroughly knows the quality of his goods, and who will not endanger the eyes of his customers for the sake of a little iniquitous gain.

BLUE SUGAR.—Granulated sugar is frequently found to have a peculiar blue tinge, the cause of which has been a mystery to many, and we frequently receive inquires respecting the matter. The explanation of the mystery is found in the fact that the sugar dealers have stolen one of the arts of the laundry, and undertaken to hide the yellow color of low-grade sugars by means of bluing, just as the laundry woman makes yellow clothes look whiter by the use of indigo. The coloring matter used by refiners is that known as ultra-marine blue. This chemical compound cannot be recommended as an article of food. Hence, we would suggest that all sugars possessing a bluish tinge should be discarded.

GILDING STEEL.—Polished steel may be beautifully gilded by means of the ethereal solution of gold. Dissolve pure gold in *aqua regia;* evaporate gently to dryness, so as to drive off the superfluous acid; redissolve in water, and add three times its bulk of sulphuric ether. Allow to stand for 24 hours in a stopped bottle, and the ethereal solution of gold will float on the top. Polished steel dipped in this is at once beautifully gilded, and by tracing patterns on the surface of the metal with any kind of varnish, beautiful devices in plain metal and gilt will be produced. For other metals, the electric process is best.

PRESENCE OF MIND.—A fire started a short time ago under the counter of a prominent drug-store on Chestnut street, Philadelphia. A cool-headed clerk, remembering the sodawater fountain, sent promptly to the cellar for a piece of India-rubber gas tubing, and slipping one end of this over the nozzle of the sodawater fountain faucet, turned on the tap, and immediately he had a powerful head of water highly charged with carbonic acid gas, the first dash of which on the fire put it out entirely.

TO WASH DELICATE MUSLINS.—Put three pints of wheat bran and a handful of salt into a loose bag, and boil half an hour in six quarts of soft water. Use this water for washing muslins or lawns with delicate colors, keeping at hand the bag of bran to use instead of soap on any soiled spot that will not yield to slight hand-rubbing. Rinse the muslin in clear water and dry quickly in the shade. Many colors in calico goods, which are injured by using the most delicate soap, can be safely washed if wheat bran (or, if more convenient, wheat flour) is boiled and used instead.

TO TAKE THE GOLD PLATE OFF A SILVER WATCH.—If the plate is thin dip it momentarily in a little mercury and rub with a piece of soft chamois leather. Repeat the dipping (in fresh mercury) several times, or until the gold color has been removed. Then heat the case until the film of mercury adhering to the silver has been dissipated. The mercury should not be allowed to remain too long in contact with the silver. The case should, of course, be separated from the works before being operated upon.

TO SOLDER BRASS AND IRON WITH SOFT SOLDER.—Dissolve zinc in muriatic acid until action ceases. Reduce with water, and apply to the surfaces to be soldered. If the brass and iron are clean there will be no difficulty in soldering them together with a soldering iron or blowpipe.

OIL ON A CARPET.—You can get a bottle or barrel of oil off any carpet or woolen stuff by applying dry buckwheat plentifully and faithfully. Never put water to such a grease spot, or liquid of any kind.

MASONIC.

Officers Grand Lodge. — CLAY W. TAYLOR, Shasta, G. M.; JOHN QUINCY ADAMS, Vallejo, D. G. M.; MOSES HELLER, G. Treas., S. F.; A. G. ABELL, G. Sec'y, S. F.

THE Masonic Temple at Petaluma, which has been in the course of erection for some time, will be dedicated Feb. 22d. A grand ball will take place in the evening, and the event promises to be an important one in the history of that town.

KNIGHTS TEMPLAR. — Monday, Feb. 20th, has been selected by Marysville Commandery of Knights Templar as the date for a reception to their lady friends. It is expected that Grand Commander Hedges, Gov. Geo. C. Perkins, Dr. E. T. Wilkins, and other distinguished members of the Order, will be present. As this will probably be the last entertainment that the Knights Templar, of Marysville, will give previous to the great Triennial Conclave in San Francisco during August, 1883, no effort will be spared to make a complete success of this coming reception.

Garfield as a Mason.

The memorial resolutions on the death of the late President Garfield have been printed by Pentalpha Lodge, No. 23, F. and A. M., Washington, D. C. The following extract from it will show the Masonic history of the deceased President: "Bro. James Abram Garfield was entered in Magnolia Lodge, No. 20, Columbus, O., Nov. 19, 1861. Passed in Magnolia Lodge, No. 20, Dec. 3, 1861, and raised in Columbus Lodge, No. 30, Columbus, O. (at the request of Magnolia Lodge), Nov. 22, 1864; officiated with Garrettsville Lodge, No. 246, Oct. 10, 1866, serving as its Chaplain during the years 1868 and 1869; Charter member of Pentalpha Lodge, No. 23, Washington, D. C., May 4, 1869. He was exalted to the most sublime degree of Royal Arch Mason in Columbia Royal Arch Chapter, No. 1, Washington, D. C., April 18, 1866. He was constituted a Knight of the Temple in Columbia Commandery, No. 2, K. T., Washington, D. C., May 18, 1866. He received the degree of Select and Most Excellent Architect in King Solomon's Lodge, No. 2, F. and A. A., Washington, D. C., Feb. 2, 1871; he received the fourth and fifth degrees A. A. Scottish Rite, May 2, 1871, and the fourteenth degree Jan. 2, 1872, in Mithras Lodge of Perfection, No. 1, Washington, D. C."

Says the memorial of him:

"His career among us, as a Mason, was every way worthy of his exalted character, reflecting additional credit on our ancient and honorable Order—an Order that has for many successive years enrolled among its active officers and members such Presidents as Washington, Jefferson, Madison, Monroe, Jackson, Harrison, Buchanan, Johnson and Garfield.

"It was through the labors of Masons now members of Pentalpha Lodge, that Bro. Garfield rose, by progressive degrees of merit, to membership as a Royal Arch Mason, a Knight Templar, and in the Scottish Rite.

"It was here, before the sacred altars of his Lodge, he was reimpressed, as a Mason, with the sublime truths he had been taught by the lips and seen illustrated by the life of his noble mother, of the being of a God, the immortality of the soul, the resurrection of the body, the practical duties of personal morality, the fraternal duties of genuine benevolence, patriotic love of country, the brotherhood of man, and the hope of eternal life."

And those who know him best, inscribe this as an epitaph upon his tomb:

"A sweeter and a lovelier gentleman,
Framed in the prodigality of nature,
The spacious world cannot again afford."

MEDIÆVAL Masonic Lodges were opened with impressive ceremonies, and observed a certain degree of careful formality. When the craftsmen were called to labor, a signal sounded. It was enacted by the Torgau law (Ordinances of the Stonemasons, A. D. 1462) that "the Master should give three knocks, a Pallirer (Warden) two, consecutively, and in case the craft at large were imperatively demanded, one blow must be struck, morning, mid-day or at eventide." This was claimed to be in accordance with the ancient usages of the country. Exactly similar signals were appropriately given when the Lodge closed. From this it is evident that as early as the year 1462 the Operative Masons followed an old custom in opening and closing their labors with distinctive knocks. —*Bro. Geo. F. Fort.*

NAVAL COMMANDERY U. D. K. T., of Vallejo, at a recent meeting conferred on seven newly elected candidates the Red Cross degree. The attendance of resident and visiting Sir Knights was large, members of the Order from San Francisco and Suisun being present. At the conclusion of the ceremonies in the hall, the members all repaired to the Bernard house restaurant, where a fine banquet was spread, and to which ample justice was accorded. The party remained at the table until nearly two o'clock in the morning.

THE Masonic fraternity had a grand time at Shasta exalting Grand Master Taylor and S. Hull to the Sublime Royal Arch degree. Quite a number of the fraternity from different places in the county took part in the proceedings.

Indp't Order of Odd Fellows.

Grand Officers.—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

AN interesting reminiscence of "Auld Lang Syne" is the fact that A. Teague, Esq., and Thomas W. Lathrop, through the death of Joseph S. Keith, a few months ago, are left the only remaining charter members of Bay View Lodge, No. 109, I. O. O. F., Redwood city, established Nov. 23d, A. D. 1862.

THE Odd Fellows of Sacramento have held a meeting at the hall of the Order, for the purpose of organizing a literary and social club.

WE have received a neat pamphlet containing the memorial services by the Odd Fellows of Columbus, Ohio, in honor of James Lot Ridgely. A very interesting historical sketch was delivered by Rev. I. F. Stidham. From it we learn that the late Grand Secretary was initiated into Columbia Lodge, No. 3, of Baltimore, Md., May 27, 1829. He was elected October 14, 1829, to be Vice Grand, and on February 17, 1830, became Noble Grand of his Lodge. He met with the Grand Lodge of Maryland at a special session, May 27 or June 22, 1830, authorities differing as to the date. On July 20, 1830, he was elected Grand Secretary of the Grand Lodge of Maryland.

His first appearance in the Grand Lodge was on September 5, 1831. In 1836 he was elected Grand Sire, but declined the office with thanks. In 1840 he was again elected to the same office, and declined in a letter which shows the true man. The following is an extract:

"Office once assumed should be faithfully administered, and its honors, however brilliant, should rather, by the efficient discharge of its duties, be reflected by the officer, than be shed from the place itself upon an easy and inactive incumbent. * * * * * * *

Regarding the office of Grand Sire as thus responsible, and believing the weal or woe of Odd Fellowship in all its details throughout your jurisdiction so inseparably blended with such a faithful and efficient discharge of its duties as in my conscience I know I cannot, in view of my situation in life, devote to its functions, I am compelled with profound respect, to decline the honor of the office."

He asked to be excused from serving as Grand Corresponding Secretary, but the offices of Corresponding and Recording Secretary were united, and he was unanimously elected to the combined office, in which he continued until his death, thus serving continuously for 41 years.

The following is the concluding portion of the address:

"Mourn, ye inhabitants of America's grand cities, for a Prince is fallen, and the high places are desolate. Call up the stately form, picture to yourself the placid face of James L. Ridgely. Say to him, farewell! Cast the sprig of evergreen into his open grave—it is your act of faith in immortality. Ridgely, we honor thee! Our parting words, in this memorial service, are thine own words: 'Away, then, away! Time is passing—away! Death is coming—away! God is calling, and but a little while, and humanity shall rise from ten thousand seats to praise thy work and do thee reverence! Patriarch, you are behind and in front of all the civilizations! Empires are but human families; but one blood cements the race; and on the throne of earth, supreme and eternal, forever reigns the fatherhood of God!'"

An original recitation by A. B. Robinson, P. G., and an address by Rev. J. C. Jackson closed the services.

Knights of Pythias.

Grand Officers.—S. L. TERRY, P. G. C., Stockton. JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas, S. F.; A. G. BOOTH, Grand K. of R. & S., San Francisco.

Another New Lodge.

On the 11th instant, we are informed that another new Lodge was added to this flourishing Order. We have not got the full particulars yet, but will give same in our next issue. Grand Chancellor Harney left here Saturday to institute the Lodge, which will be located at Chico, Butte county. The name of the Lodge will be "Pride of Butte Lodge, No. 68." To that efficient and indefatigable District Deputy, A. O. Bradley, is due the formation of this "baby." This will make 10 new Lodges added to this Order during this term, which, adding the reorganization of Templar Lodge, No. 21, makes a showing that has never been equalled in the history of the Order on this coast.

LIVE OAK LODGE, No. 17, of Oakland, has also felt the "revival" movement. P. C. Henry A. Holland, writes that there are several applications, and that "work" is being done at each convention.

THE members of Section No. 147, of the Endowment Rank, San Luis Obispo, gave a banquet at the French hotel on the occasion of the installation of the officers of the Section. The company consisted solely of the members of the Section, none others being invited. All speech-making, toasting, etc., was interdicted by mutual consent. The supper was one of the finest ever spread in that city, and reflected great credit upon the cuisine of the French hotel. The guests sat down to the table at 9 o'clock and arose at about 11:30, after which a number participated in a social dance. The affair was greatly enjoyed by all in attendance.

PYTHIAN DIVISION, No. 2, Uniform Rank, elected officers for the year ending Feb. 19, 1883, on Saturday, Jan. 28th: Frank B. May, (re-elected) S. K. C.; W. J. Rogers, S. K. L. C.; W. C. Lyon (re-elected), S. K. H.; J. W. Pool (re-elected), S. K. R.; G. W. Peckham (re-elected), S. K. T.; N. L. Chace, S. K. G.; Chas. Dohring, S. K. S.

LAUREL LODGE, No. 4, had 15 applications for membership at its convention last Monday. The officers and members of this famous old Lodge have at length woke up to the fact that unless they exercise a little diligence and energy, they will be outstripped in the race as to which shall be the "banner Lodge."

THE Grand Chancellor, accompanied by the G. M. at A., will visit Brooklyn Lodge, No. 32, on Monday evening, Feb. 13th. A pleasant time is anticipated.

I. N. TEMPLETON, D. D. G. C. of District No. 24, writes from Amador City for some blank petitions for charter, showing that they are wide awake and filled with the Pythian spirit.

METROPOLITAN LODGE, No. 24, is still on the up grade. The little internecine unpleasantness which caused some uneasiness, a short time ago, has died out and peace and harmony reigns supreme.

WE ARE happy to state that the Grand Chancellor has received a communication from a valued friend, now in Placerville, El Dorado county, in which he states that he has a petition numerously signed, which will be forwarded soon.

A NEW Lodge is also being rapidly formed at Grass Valley, by Bro. Quirk, and it is anticipated that it will be ready for institution during the present month.

GREAT PRAISE is due to that sterling old Knight, P. C. James Patterson, for the able manner in which he performs the duties of Librarian. Everything in and about the library room is all that could be wished or desired by the most fastidious. It is really a pleasure to visit that cosy little room of an evening and note the expeditious manner in which the patrons of the library are served by this veteran Pythian. It is a common saying around the Castle hall that he is the right man in the right place. May he be long with us.

FROM recent reports we learn that Rio Grand, No. 3, of Sorocco, N. M., is doing good work.

FOR the purpose of furnishing a new hall and starting a Pythian library in Salt Lake City, a grand concert and ball was given on the 8th of February, under the auspicies of Myrtle, No. 1, and Rock Mountain, No. 3, of that city.

CALIFORNIA No. 1, conferred the third rank on three candidates on Thursday evening, Feb. 2d, in its usually correct and impressive manner.

SOUTH SAN FRANCISCO Lodge, No. 45, K. of P., will give a grand promenade ball at South San Francisco pavilion on Saturday evening, March 4th, 1882. Music will be furnished by the Second Regiment band; and to accommodate parties from the city, cars will run all night. Tickets of admission for gentleman and lady, or ladies, are put at the low price of 50 cents, and the proceeds will be donated to the Relief Fund. Prominent brothers of the Order have taken hold in good earnest, and it is expected it will be a choice and pleasant entertainment.

REPRESENTATIVES of Alameda Lodge, No. 49, to Grand Lodge: Geo. E. Butts and J. Wise.

THE Endowment Rank of K. of P., since its institution in August, 1877, has paid out to the widows and heirs of deceased brothers as beneficiaries over $1,000,000.

A STRONG effort is being made to organize a Lodge of Knights of Pythias in Kingsburg, Fresno county. About thirty names have been secured to a petition for a charter, and it is hoped soon to have a flourishing Lodge.

TUCSON LODGE, No. 3, K of P., gave a ball in the city from which it takes its name. The affair reflected great credit on the members of the Lodge, and much praise was received from the friends who participated. They cleared $150, and a local paper says they had $10,000 worth of fun.

IVY LODGE, No. 65, situated at the Western Addition, has been adding to its membership every meeting night since its institution. There is a fine field and excellent material in that vicinity and every effort is being made by its zealous officers and members to upbuild the Lodge, and the chances are that they will succeed. It is a matter of sincere regret that its present Chancellor Commander is compelled to resign his position for the reason that he leaves for Central America on business, per next steamer. Bro. Hourcade, the V. C., will of course attain to the vacant position and his administration of the affairs as C. C., will be no doubt successful.

Knights of Honor.

Grand Officers.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D., San Francisco; S. H. WAKEFIELD, G. Treas., San Francisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

THE second anniversary of the institution of the Lodge at Modesto was one of the most enjoyable parties ever given in that town. The programme consisted of vocal and instrumental music, exposition of the Fraser degree, supper and dancing. The ceremony was supposed to include all the forms and ceremonies of initiation in Orders of this character. The candidate was first hung in the most realistic manner—cut down and resuscitated; and then branded with a red-hot iron, in what seemed the most cruel fashion. Notwithstanding his trials and the serious warnings he received at every step, he came up smiling and eager for each ordeal, whether he is trundled in a wheelbarrow or marched under the pitchforks of the guards. The whole affair was so adroitly interspersed with the serious and ludicrous as to keep the audience convulsed with laughter for an hour and a half.

ALTA LODGE celebrated its second anniversary at Vallejo in fine style. The programme consisted of a musical and literary entertainment, followed by dancing. Mr. G. J. Campbell presided. During his remarks he said that this Lodge had been organized with forty members, and has now on its roll seventy-five. Death has visited the Lodge but once. Mr. Campbell referred to the orphan of Daniel Crouch, who was on the stage, and said that the child was now cared for by the Lodge; the sum of $2,000 was placed in the hands of a guardian for the use of the child. After the musical and literary programme had been gone through with, the floor was cleared for dancing, which was kept up until about twelve o'clock.

Royal Arcanum.

THERE is one Council of this Order in this State, and is located in this city. It is named Argonaut, and meets twice a month, in Shiel's building, 32 O'Farrell street. It has a membership of about 30. At present there is some work going on in the Council, and it is expected that a considerable increase in membership will take place. The members of the Council feel much elated over the fact that the heirs of their deceased brother, John G. Werlin, have received their money. He was a member of two other Orders whose headquarters are in the East, and the Royal Arcanum was the first to pay the death benefit. His sad death is another warning of the uncertainty of life. He was admitted into the Order November 14th, and died November 27th, the cause of death being the result of falling from a windmill tower. He had paid only $4 to the benefit fund, and his family received $3,000, he being a full-rate member.

THE Order will be introduced into Oregon, arrangements to that end having been made.

AT the close of last year there were 632 Councils, and 33,178 members.

THE medical examinations are very strict, slow but sure being the policy of the officers.

THERE were ten assessments last year, an increase of 3 over the previous year. This represents a total cost for the year of $10 for a $3,000 benefit to a member entering at the age of 21 years, and $20.60 to one entering at 40.

THERE are Grand Councils established in Massachusetts, Ohio, Michigan, Pennsylvania, New York, Wisconsin, Maryland, Tennessee, Georgia, Illinois, Virginia and Indiana.

MASSACHUSETTS is the strongest jurisdiction, having about 6,000 members. New York, Pennsylvania, and Ohio have over 4,000 each, Michigan, 2,300; Maryland and Illinois about 2,000 each. Virginia and Wisconsin have each about 1,200. Tennessee and Indiana each number about 800 members, and the Canadian provinces combined will number about 1,000. The remainder of the membership is distributed through various States.

EXPLOSION OF AQUA AMMONIÆ.—The *Pharmaceutical Journal* records a recent case of an explosion of ordinary liquor ammoniæ, followed by serious results. A Belfast woman, subject to headache, sent her daughter to the druggist to purchase a small quantity of "head salts," for which he gave her liquor ammoniæ, or "spirit of hartshorn," instead of the salt, carbonate of ammonia. The vial was put on a shelf and not used for a few days. Having a headache, the woman lifted the remedy to apply it, and had it in her hand for a few minutes only when the vial suddenly exploded, scattering the contents over her face. Her eye was destroyed, and her mouth and throat burned, the skin of both having been torn off. The vial had been put on the mantlepiece previous to the time it was used, and when about to apply the contents, the woman was sitting near the fire.

Fraternity—The Strength and the Hope of Our Order.

An address delivered at the reunion of the Southern California Lodge, No. 191, A. O. U. W., on the first anniversary of its organization, Jan. 11, 1882, by Bro. J. M. Guinn, A. M.:

Mutual dependence of parts is that which initiates and guides organizations of every kind. In the primitive stages of the race there was no mutual dependence, consequently no settled organization.

Individualism was the governing principle. Men carried on the same activities with little or no dependence on one another; and it was only in times of war that there was a spontaneous and temporary subordination to those who showed themselves to be the best leaders.

In a barbaric state every man is a miniature social system complete within himself. He is the sole producer and consumer of his products. He is at once the law-giver and the executioner of his laws. So long as all the parts of a living mass are alike, and so long as all live and grow without aid from one another, there is no organization, but such conditions, whether physical or social, belong only to the lowest grades of living things. With every advance in civilization was developed the necessity of a mutual dependence of the parts that go to form the social structure.

As mankind increased in numbers, and the spontaneous products of the soil grew scarce, the skilled hunter could no longer spare time from the chase to make his own weapons. So his neighbor, less skillful in pursuit of game, but more deft in handicraft, became the manufacturer of the needed weapon in exchange for a share in the spoils of chase. This exchange of services created a mutual dependence between them.

The cultivator of the soil must pursue his vocation in peace, and to insure immunity from danger, he must share the products of his soil with the defender of his soil.

This exchange of services, this division of labor, this mutual dependence of one upon another, originated and carried with it in its development a recognition of mutual rights and privileges; and from this recognition was germinated the great triune ideas of liberty, equality and fraternity. Of liberty—because there can be no mutuality between might and servitude; between master and slave. Of equality—because mutual dependence implies a mutual trust. Of fraternity—because brotherhood infers a mutual interest in the patrimony of the Universal Father.

Fraternal organizations whose ostensible purpose is mutual assistance are the outgrowths of an advanced civilization. It is a self-evident truth that men can attain to the highest civilization, to the loftiest planes of thought and action, to the truest manhood, only through intercommunication, through association and through mutual dependence of one upon another. Recognizing this fundamental principle, as men have advanced in refinement and culture they have

Banded Themselves Together in Fraternal Organizations

For mutual benefit, for mutual assistance, and for mutual improvement. As the representatives of one of these organizations we meet here to-night. In the sisterhood of fraternal societies none holds a more exalted rank than the Ancient Order of United Workmen. Young in years yet it is old in good deeds.

Strong, vigorous, active, it stands to-day the proudest exponent, the fittest type of fraternization for mutual assistance. It is the child of the 19th century. No wierd tradition shrouds its birth. No mysticism envelops its workings. Disdaining the paraphernalia of legendary ceremonials, and discarding the insignia of regal authority, it takes for its symbol the simplest devices, and for its emblems the implements of peaceful industry. Practical, utilitarian, methodical, systematic in the dispensing of its benificence, it makes no ostentatious display of its good deeds—it boasts not of its charitable works.

Its character is two-fold, business and fraternal. It protects and it provides. It has systematized the distribution of its bounties. No indiscriminate giving, no eleemosynary distribution of alms to idleness and improvidence characterizes our beneficiary system. We teach men to prepare for the exigencies of life and to provide for those who are dependent on them while they have health and strength. Indiscriminate giving is the bane, the blight of charity. The story of want, the tale of woe, excites our sympathies and arouses our compassion, and we bestow our charities little thinking that perhaps the very improvidence that has brought the recipient of our gifts to want will waste the alms bestowed. The improvident man who is sure of being shielded from the results of his improvidence by the hand of charity, will make no effort to support himself. Relieved of the responsibility of self-support he sinks into servile dependence and becomes a cringing pensioner on the beneficence of the provident.

The charity we inculcate is of a practical kind.

We Aim to Make Men Provident

By teaching them to provide for the welfare of those dependent by nature on them for self-support. Subordination of the claims of self to the claims of those whom the ties of nature has made dependent upon us, is one of the noblest attributes of human nature.

To encourage and strengthen this noble attribute is one of the purposes and aims of our Order. The head of a family who joins our Order, by the mutual assistance of his brothers in the fraternity, provides a beneficiary for his wife and children when death has removed their protector and provider. Nor does the charity and protection of our Order cease with the death of a brother. Our solemn obligations taken on the altar require us to foster and protect the widow and the orphans of a deceased brother. It is our duty to counsel and aid them, if necessary, in making the best use of and in investing most securely and most profitably the donation provided for them by the beneficiary system of our Order.

The highest and noblest mission of our Order is fraternization—

Fraternity in the Best Sense of the Word—

A brotherhood bound together by solemn obligations to protect, cherish and assist one another. There are those in our Order, I am sorry to say, who regard lightly their fraternal obligations. Having joined it merely for the beneficiary consideration, they would gladly do away with its fraternal obligations and turn the Order into a kind of mutual life insurance association. If any such there be within the sound of my voice, let them pause and consider what results would certainly follow, were our fraternal bonds dissolved and our Order held together alone by business ties; were there no bonds to bind us in fraternal union, no obligations to bid us cherish and protect, who would be willing to do the work of the Order without renumeration? Who then would watch our finances? Who guard the inner and outer door? Paid officials, salaried officers.

The Ancient Order of United Workmen

Furnishes a cheap method of insurance. The yearly assessments on $2,000, the limit of our beneficiary, are on an average not more than one-fifth of the amount required to keep up the annual premiums on a $2,000 policy in any reliable life insurance company.

Why is ours so much the cheaper? Because we do the work ourselves. We pay no high salaried officials to do our business. We build no palatial marble fronts in the great cities for our managers. We hire no army of drummers to canvass for members. We do not flood the country with printed circulars, lauding ourselves and disparaging others. We do not boast of millions of capital held in reserve. We have no capital but the pledged word of our brethren. No security but mutual interest. No bonds but fraternal ties. Take away the fraternal obligations that bind us together, and you double, aye treble, the cost of our beneficiary system. Take away fraternal obligations, and you destroy the safeguards that render inviolable our beneficiary. Take away fraternal obligations and our Order dies. In every Lodge throughout the land there are two classes of members,

The Workers and the Shirkers.

The men who do the work of the Lodge, who fill the offices, who attend its meetings, who keep it alive—these are the workers. The shirkers are the men who joined the Order for the prospect of leaving $2,000 to their heirs. They took all the obligations and promised faithfully to obey them; then went home and stayed there until they have forgotten the grips and the passwords, forgotten their duties and obligations as Workmen, forgotten everything except that one thing that still makes them members of the Order—the payment of their dues and assessments.

Now, I take it, the brethren who are here to-night are the workers. The shirkers were at home when the plans for this re-union were discussed in the Lodge. "They haven't heard of it!" Or if they have, they are afraid to appear among us lest they be regarded as intruders. I very much dislike to talk about these brethren behind their backs; I had rather say a disagreeable thing to a man's face, provided, always, that he is not very much larger than I am, and not very much inclined to strike out from the shoulder. Now, these brethren are very good men, good citizens, good husbands, good fathers. Their worst failing is, they will shirk duty. The idea that every man who joins a Lodge should have just as much interest in it and just as much responsibility for it as any other man, they do not apprehend at all. The fact that the success and the continued existence of the Lodge rests upon all alike, and that the man who is willing to enjoy the privileges and benefits of the Lodge without bearing his proportion of its burdens is a shirk, has never come within the range of their conception.

Of all the adverse influences that endanger the prosperity of our Order and similar Orders, none is so potent for evil as this

Disposition of Members to Shirk the Duties

Made incumbent upon them by their membership. It is the duty of every member of the Order, unless detained by sickness or prevented by distance, to attend the regular weekly meetings of his Lodge. Yet I will venture the assertion, without fear of contradiction, that not 50% of the members of our Order in this jurisdiction are in the habit of attending regularly. It has, perhaps, never entered the comprehension of these absentees, that in habitually absenting themselves, they are doing an injustice to their brethren who regularly attend and do the Lodge work. They shirk the burdens of the society, yet are quite willing to share in the results of the labor and sacrifices of their more faithful brethren. They receive value without giving value in return.

These shirking brethren seem to have an implicit faith that what must be done will be done by somebody, and are quite ready to be pensioners upon the bounty of their more faithful brethren; always, however, reserving to themselves the privilege of abusing these when anything goes wrong. Ah, brethren, faith is a good thing; it works wonders, it may remove mountains; but faith without works will not keep up a Lodge.

The organic principles of our Order are, in the truest sense of the word, republican. In it

Neither Wealth, Rank nor Position

Can buy preferment. In it merit is the measure of the man. When a member dies, rich and poor contribute alike. In the distribution of our beneficiary the orphan of the mechanic shares equally with the child of the millionaire. In the growth and prosperity of our Order the humblest member has an equal interest with the wealthiest and most talented. If you are not fluent of speech or quick of apprehension, it is no excuse for you for absenting yourself from your Lodge. If nothing more, you can encourage your brethren by your presence, by your interest and attention. Appreciation has a wonderful influence in stimulating to effort. Nothing so encourages a man as to know that his efforts are appreciated, and nothing is so discouraging as indifference.

One of the strongest propensities of the human mind is the desire for something new.

"Still sighs the world
For something new;
Imploring me, imploring you
Some will-o-wisp to help pursue."

In one sense, this desire for something new is praiseworthy, is commendable. It is an incentive to investigation, to invention, to discovery. It actuates and urges on to progress; it prevents stagnation, dispels monotony, and relieves life of dreary sameness. The most thoroughly despicable phase of the human mind is that stupid conservatism that rejects a truth because it is new, yet will cling to an error because it is old. The man who believes that all virtue, truth, honesty and manhood died out of the world years ago, and was buried in the graves of his ancestors, can confer no greater benefit on the world than by placarding the little space he occupies in it "To let," and then joining his virtuous ancestors in their sepulchral abodes. I believe in the new, provided, always, that it is the true. I believe in the present.

I Believe That There is More Truth,

More honesty, more intelligence, more manhood n the world to-day than in any age—than in all ages of the past. Believing this, I have no patience with the whiners, the croakers, the groaners who wail over the wickedness of the world; who whine over the weakness of humanity; who groan over the degeneracy of the times. Despondent souls, do not fear! The nation is not doomed because rogues sometimes get into office. Virtue has not departed because some professor of religion has lapsed from rectitude. Benevolence is not disguised selfishness, nor is charity a cloak. No wailing and whimpering over the uncharitableness of the world, but a steady determination to abate misery and provide against penury; charity, protection, hope—a disposition to believe that good can be done; an indisposition to believe that all good has been done; these are the watchwords of a new age; the shibboleth of new men.

There is a sense in which this desire for something new is not so commendable, not so praiseworthy. It is a desire for something new simply because it is new, regardless of its merit or utility. It is that propensity to follow unthinkingly some self-constituted evangel of a new and strange doctrine without stopping to examine whether that doctrine rests on a foundation of truth. It is that propensity in men to follow one another like a flock of sheep, even if in so doing they plunge over a precipice. A new movement is initiated—political, social or fraternal. For a time it gains strength slowly. It is written about, it is talked about. It becomes popular. The men who do their own thinking join it if it accords with their views and principles. The unthinking join it because it is popular, and it is safest to be on the popular side.

A few years since the Grange movement swept over the country. It became immensely popular. Its membership ran up into hundreds of thousands. Everybody wanted to be a Granger. In this county alone we had 15 Grange organizations, with a membership of nearly 2,000. Yet in less than a decade every Grange in the county had disbanded and the Order has lost the bulk of its membership in other parts of the State.

The fundamental principle of the Grange is similar to ours—

"Mutual Assistance through Fraternal Organization."

The reforms it aimed at were needed, and the ends it sought to accomplish attainable. Yet with the prospect of usefulness and the promise of success almost within its grasp, it failed, and its work is yet undone. The decadence of the Grange movement was due to several causes, but the chief of these was its abnormal growth. Its sudden prosperity ruined it. In the heyday of its popularity men joined it who had no faith in its principles, no sympathy with its objects and no interest in its success but a selfish one. They joined it hoping to receive benefits without outlay, returns without investments and income without capital. Actuated by self-interest, men joined it and took upon themselves fraternal obligations only to conceal their sinister motives, and under the guise of fraternity to prey upon their brethren.

Disappointed and baffled in their expectations such members, from lax adherents, became open enemies to the movement. Forgetting their fraternal obligations, they, by their detraction and opposition weakened the enthusiasm and nullified the efforts of the faithful and earnest workers in the Order.

The decadence of a popular Order like the Grange is fraught with lessons that we may profit by. The rapidity of the growth of the Grange movement finds a parallel in the growth of our own Order. In this State, in four years, the Ancient Order of United Workmen has increased its membership from 350 to 15,000.

Can We Retain Our Popularity?

Can we go on increasing our membership and multiplying our Lodges? Can we extend the sphere of our usefulness and assure permanency to our organization? These queries would admit of but one answer, and that a most emphatic affirmative, could we be assured that every member in the Order would live up to his obligations as a Workman; that every member would do his duty faithfully, fearlessly and honestly. That such is the case; that such will be the case in the future, is as little likely as that the millennium will begin to-morrow.

There is one axiom I would impress on the mind of every faithful Workman, and that is

Quantity is not Always the Measure of Strength.

A long roll of membership may show apparent strength, yet in reality it may be a source of weakness. Look to the quality of your membership rather than to the quantity. Build up your Lodge of good material, and all the adverse influences that can be brought to bear against it will assail it in vain.

Be watchful. Admit none who are not in full sympathy with the objects and aims of our Order. Admit none who will create discord and disunion in your Lodges. Admit none whose habits will bring disgrace and disrepute upon us. Remember this, that in a fraternity the character of its collective membership and not its individual stamps the character of the Order. The law of averages is not a very safe rule to follow in estimating the character of an applicant. If the good and the bad in a man's nature are so nearly in equipoise that you can balance the one against the other, you had better have nothing to do with him. One member of doubtful character may keep out of your Lodge

Dozens of Good Men.

You are judged by the company you keep. Try every applicant in a balance and if found wanting in virtuous and manly qualities reject him. It may be said that this does not accord well with our professions of charity. I answer, charity begins at home. Self-protection is a duty you owe to yourself. If disrepute is brought upon your Lodge; if the efforts of the many good members are neutralized by a few bad; if dissensions, discords, and disunion are engendered and sown among you by bad members, will the empty profession of charity by such, cover the multitude of their sins? Will the exercise of charity towards such atone for the evil they do?

It sometimes takes a great deal of moral courage to cast a black ball. Pity pleads with conscience, and friendship stands in the way of duty. It takes sterling manhood to stand up for principle. It is easier to yield than to stand firm. It is easier to shirk duty than to do it. And when you have done your duty it is hard to have your motives misconstrued and your good intentions maligned.

Take heart, oh! faithful brother. Though calumny and detraction assail you; though false brethren betray you; though evil encompass you, be faithful to your trust. Truth is eternal, and the right will prevail. Justice is written on the tablets of eternity, and God is good.

Canon Liddon on the Position of Woman.

In the course of his Christmas day sermon at St. Paul's Cathedral, Canon Liddon glanced at the position of woman in the ancient world and pointed out the change in her position throughout Christendom. The feeling with which women had come to be regarded was one which, without the aid of legislation, without reducing itself to a theory or a philosophy, had insensibly corrected the wrongs of centuries and had secured for women that tender respect and deference which was the true safeguard of her commanding influence and which alone secured it. We had lived on into a time when this feature of our Christian civilization seemed—it could only be for a moment—to be imperilled. We were told again that the condition of women in Christendom was one of subjection, and efforts were being made in a new sense to place her on an equality with man by giving her a man's education, a man's occupations, a man's tastes, a man's ambitions, if it were possible, a man's character. The difference between these modern efforts, professing to improve the condition of woman, and that of our Divine Redeemer, entering this world as the son of a virgin mother, was that he respected the characteristic virtues and graces of the sex, while these moderns imperilled or would sacrifice them. It was easier to produce a Catherine de Medici of France or a Catherine of Russia than to find a St. Agnes, a Saint Monica, or a Hannah More. It was easier to unsex woman by making her man's rival in the struggle of life—a pallid caricature, at best, of man's self-assertion—than to make the most of those qualities of purity, modesty and self-devotion, in which her true power and excellence consisted.

American Railroad Progress.

Herapath's London *Railway Journal* of a late day, in speaking of the wonderful progress which this country has made in railroad building, says: The figures are startling, but when it is considered what railways are in that country, the alarm will cease. A railroad there is made instead of a common road, and is very little better than—in some cases not so good—as a tramway. The outside estimate of cost for the 16,000 miles of new railroad is only £5,000 per mile. This would require a capital of £80,000,000. A country that could spend hundreds of millions of pounds per annum in war, and afterwards not only pay the full interests on the accumulated mass of debt, but pay off the principal at what everyone admits to be a wonderful rate, which has already broken the back of that truly ponderous debt, which now enjoys the highest credit, ought not to bend beneath the weight of an undertaking for railways, such as that to which we have referred—£80,000,000 to be expended in 15 months.

Millions spent in war are absolutely lost. They buy nothing. It may be said indeed that they buy less than nothing. They purchase destruction. There is not only the enormous expense alluded to, but there is also the loss of hundreds of thousands of able bodied men, and the waste of material. But when 16,000 miles of additional railway are constructed they immediately do useful work and earn a profit.

America without her railways would be a barren land. Canals can never be there more than partially useful. The frosts are so severe that for a large part of the year a canal is a solid instead of a liquid, and even during the hot months that mode of conveyance is open to the objection that it is not only slow but vapory. Just when the means of conveyance is wanted frost sets in, and destroys the utility of the canal, while the railway is open all the year round.

Already the railway has beaten the canal in America, as elsewhere, and yet it is the canal that is to set aside the railway! No, not exactly the canal, but certain rivers in conjunction with various lakes. But these are all water ways, and open to much of the objection found to apply to that mode of communication; and the connections to be formed are canals. In our belief water, in a country both bitterly cold and intensely hot, can never successfully compete against railways as an all-year-round working machine. Poor's last work points out how the canals in America have shrunk in their business before the operation of the railways, and concludes: "We must have railroads. The 100,000 of to-day will in 10 years by 200,000." There is no doubt that railroad making must proceed apace in America if the country is to progress, and as in the course of the last 100 years the population of the United States has enlarged from 4,000,000 to 50,000,000, and yet the country is sparsely populated, having regard to its enormous dimensions, it is evident that the vast length of line may be doubled without the work being overdone.

The more railways that are made in America the better for the existing lines, except perhaps in those cases where there is direct competition. The large railway systems, however, can only sustain partial competition, and that for through traffic, which is the least remunerative portion of the whole traffic, and which under a war of rates may be absolutely unremunerative (as was the case this year). The local traffic of America is assuming large proportions.

New lines feed old lines, and the more complete a railway system becomes the greater is the growth of traffic.

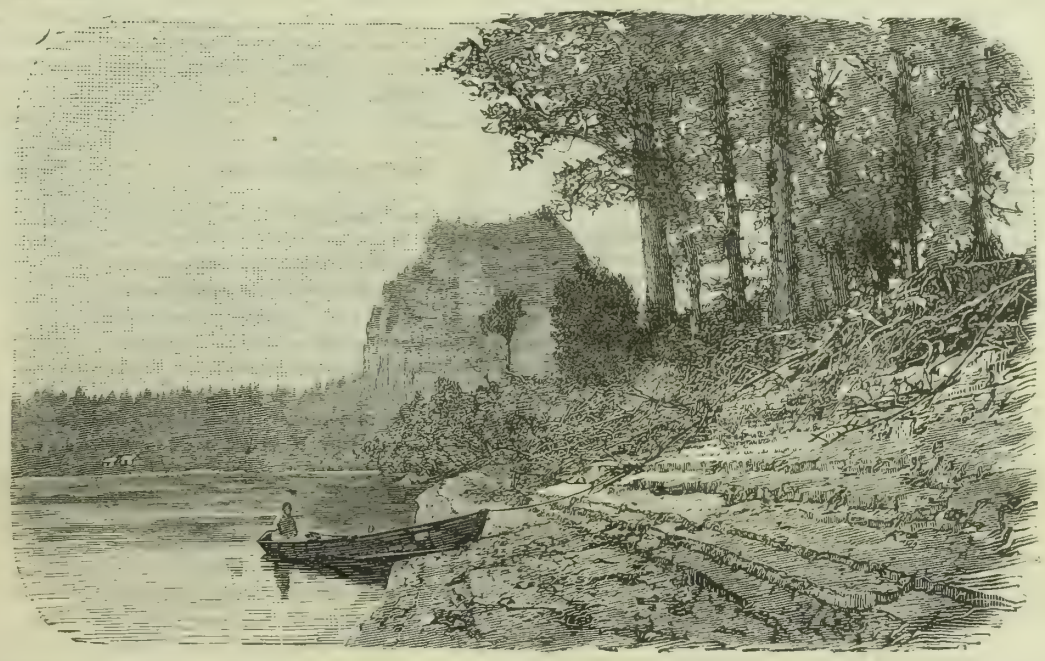
It may be added that the more rapidly railways are made in America the quicker will be its development in material prosperity, and the better it will be for English manufacturers, for the greater the demand the more certain it is that English goods will be bought. It is simply impossible that the Americans can make all the iron, steel, etc., that they will require, that is to say, should 16,000 miles of line be constructed in the next 15 months.

A Good Laugh.—What a capital, kindly, honest, jolly, glorious thing a good laugh is! What a tonic! What a digester! What a febrifuge! Better than a walk before breakfast or a nap after dinner. How it shuts the mouth of malice and opens the brow of kindness! How, like a thing of beauty, it is a joy forever; there is no remorse in it. It leaves no sting except in the sides, and that goes off. Even a single unparticipated laugh is a great affair to witness. But we are glad it is seldom single. It is more infectious than scarlet fever; you cannot gravely contemplate a laugh. If there is one laugher and one witness, there is forthwith two laughers. The convulsion is propagated by sound. What a soul-inspiring thing it is when it becomes epidemic.

A man in Council Bluffs ordered a suit of clothes of a local tailor. They were to be done on a Friday. When he called for them they were finished and done up in a neat package. The man's hair turned suddenly white.

The Ideal Editor.

[From the address of Rev. H. W. Foote, Rector of King's Chapel, Boston, at the funeral of the late editor Goddard.]



"Think for a moment what it is which is demanded of him who stands in such a post of duty! Like the pilot, his hand always on the helm, he watches the atmospheric current of opinion and feeling, and the tides of events as they affect the public good. An unresting fidelity holds him constant to the most exacting form of professional duty, with little respite for health and none for pleasure. It is for him to guard against the schemers who seek to gain the public ear, to protect the ignorant and innocent, to lift journalism from the function of a mere gatherer of news, which tends to make the world a vast whispering-gallery in which the monstrous and distorted echoes of countless matters which had best sleep in oblivion reverberate, to that of a wise and just organ of public opinion giving clearness and balance to the general mind, on the one hand, and on the other, speaking the general mind of the weightiest part of the community with a force and character that make it heard and heeded in the councils of the nation. To do such a work at all demands rare gifts of intellect and culture, of courage and tact. To do it worthily, demands how much of truth and of wisdom, bravery to fight a wrong, insight to see the path of practicable duty, gentleness in dealing with opponents, magnanimity in judging motives, the absolute elimination of personal and selfish considerations; above all, a self-abnegation—a merging of self in the truth and duty which is the very spirit of the disciple of Him who is truth itself, who hath said: "He that loseth his life for my sake, shall find it." It is his to see men of less gifts, less training, less experience, less capacity for public service, rise to eminence by his help, while he remains unseen, a power rather than a person, pouring his life into the channels of public service and losing it utterly, to find it again, doubtless, as the Master promised, in the knowledge which must surely come some day, somewhere, that the world is the better thereby.

"No man can stand in such a place without trials of which the outside public know nothing, and which search out every joint in his armor to try if it may be penetrable. Solicitations to aid with influence, where to refuse makes an enemy, political considerations, the temptations of comfort and ease, the wounds given by those who strike without remembering that behind the impersonal form of a great newspaper is a sensitive human heart."

Hitches at the Altar.—Fickleness, on the part of both grooms and brides has been a fruitful source of hitches at the altar. There is a story told of a rustic swain, who, when asked whether he would take his partner to be his wedded wife, replied, with shameful indecision: "Yes, I'm willin'; but I'd a much sight rather have her sister." An equally remarkable instance, which must be authentic, is narrated by a Bathgate minister. In this case, a hitch had occurred at the outset, through the absence of witnesses, and the bride herself had surmounted the difficulty by going for two friends, one of them being her cousin, a blooming lass, somewhat younger than herself. When, at length, the parties had been properly arranged, and the minister was about to proceed with the ceremony, the bridegroom suddenly said: "Wad ye bide a wee, sir?" "Oh, what is it now?" asked the exasperated clergyman. "Weel," replied the vacillating groom, "I was just gaun to say that if it wad be the same to you, I wad rather hae that ane," pointing to the bridesmaid. "A most extraordinary statement to make at this stage; I'm afraid it's too late to talk of such a thing now." "Is it?" returned the bridegroom, in a tone of calm resignation to the inevitable. "Weel, then, sir, ye maun just gang on."

A Scene on the Columbia.

We give our readers this week another glimpse of the enchanting scenery of the Columbia, the majestic river of our northwestern region. Along the northern line on the Columbia river, says a writer in the *Resources of Oregon and Washington*, may be found some of the grandest scenery in the known world. It is here that we find solemn old Castle Rock, nestled among the willows and dogwood of Washington Territory, covering 13 acres of land and towering above the water's edge for over 800 ft. It is the property of Jay Cooke, of New York city, and doubtless excites a feeling of pride within him as he looks back through the veil of the past, and as memory joins hands with imagination, he sees coming generations pass up and down the Columbia—this great thoroughfare of the west—and Castle Rock is accorded the pride and admiration of a great nation. Not only is it grand of itself, but it is in the midst of scenery most sublime. Above it are the lower rapids of the Columbia, seething, whirling and boiling as the water comes rushing over the rocks. Below it stands the symmetrical Rooster Rock, standing alone and reaching above the water's edge for three hundred ft. Below this, Lower Cape Horn stands boldly out in the river, and presents an unbroken front of basalt three hundred ft. high, worn by the ever dripping streams of water until the grooves and hollows present a scene both picturesque and sublime. This is

CASTLE ROCK, NEAR THE COLUMBIA RIVER.

but a slight glimpse of the grandeur of the Columbia, as the scene is nestled among the great mountains and rugged surroundings in the Cascades. By way of variety, and attractions added to a scene already unsurpassed, Nature has kindly placed along the shore numerous waterfalls of remarkable beauty, principal among which may be mentioned Multnomah, falling a distance of 800 ft.

The time was, and in the memory of our fathers, when no land was so distant, so forsaken as this. Bryant, in casting about for an example of utter desolation, exclaimed:

> "Take the wings
> Of morning, pierce the Barcan wilderness,
> Or lose thyself in the continuous woods
> Where rolls the Oregon, and knows no sound
> Save his own dashing.

Now, however, the deathly stillness that once reigned supreme, is broken by the noise and clangor of busy craft hurrying from point to point in the interest of commerce, while along the shores hundreds of men are blasting and drilling, preparing a course for the iron horse, that in so few months will be speeding away for the Eastern States from Portland, Oregon to Portland, Maine.

Cellars as Centers of Malaria.—Dr. C. R. Agnew, writing from Florida, says: In this State a somewhat new problem presents itself, in the fact that all houses should be constructed without cellars, and so raised on underpinning as to allow a clean sweep of light and air beneath them. Indeed it is a question whether such a mode of construction should not be adopted everywhere for dwellings. I have for more than 20 years believed that cellar atmosphere is a most prolific cause of disease and death. I believe that it increases 75 per centum the risk from malarial disease all over our country. Through this State the native population, as by an instinct, raise their simple cabins three or four feet above the ground, and allow air and light to pervade the space so made beneath the ground floor. I advise all travelers to avoid those hotels and other domiciles in the South which are not so constructed.

The girl pressed the leaves, and the boy pressed the girl; the press is mighty and must prevail.

Paint Removing.

A preparation, of which potash and soda are the principal ingredients, has just been introduced into England, and is said to be a perfect paint remover. Some experiments made with the preparation upon various specimens of painted wood and metal, all old samples, well painted with several coats of good oil color, were very successful. The compound, which is of a cream-like consistence, quite white, is spread over the painted surface, and after being left on a few minutes, is wiped off. Its action upon the body of the paint is thorough and complete; a saponification is set up which continues; the soda is liberated, and fresh soap formed, and this process goes on, the alkali being liberated as it is wanted, till the whole of the paint is removed. Painted surfaces, in about a quarter of an hour, show every trace of paint cleanly removed, and the wood exposed as if it had been planed.

The action of this preparation seems to be twofold. There is first the destructive action of the applied alkali, always caustic, and next, a continued sponge-like action going on—in other words, a constant and perfect causticity is maintained. The result of the preparation on metal is equally convincing. A gas meter, if exposed to the compound for about 20 minutes, has the Japan removed and the bright metal exposed. Other forms of the preparation are of a weaker character, and nearer to soap in their composition. They are intended to remove dirt, and their action is just the reverse of the compound already described. The preparations are liquid, and are soluble in water, and their cleansing power upon cloth of an unmistakably greasy and dirty character is said to be almost magical. For delicate carvings and fabrics of all kinds, these solutions are adapted, and their use by restorers, decorators and others, will be highly esteemed. The modification of the solution for cleaning cloth is well adapted for restoring the linings of railway carriages, and stuff seats of all descriptions. No scraping or erasing is necessary.

There is nothing injurious, it is said, in the preparation which can attack or injure metals or cloths. They all produce a minimum action on brushes, which is a consideration; and, what is very important, color is not taken out by the use of the solutions. The price is less than that of other preparations. The "paint remover" can be easily applied by being spread over the painted surface to be removed. It is sold in 5-lb. tins, at 2s. 6d. each.

Shortening the Voyage Across the Atlantic.—There appears to be no cessation in the efforts to shorten the time between America and Europe. The Atlantic is now traversed by the largest and fastest steamers in the world, and yet shipbuilders are not satisfied. The latest effort in the direction is by a Swedish engineer, Capt. Lundborg. He proposes to build a steamer about equal in size and power to the *City of Rome*. The peculiar feature of construction is to so build his ship that the main body shall divide the water horizontally instead of vertically. The hull, therefore, projects forward below the water line, and this peculiarity of his design enables him to have large engine room, to get great capacity with shallow draught, and to give his vessel favorable lines. The purpose is to reduce her resistance to a minimum. The power used, 22,800 horse-power, would give the ship, according to the ordinary formula used for calculating speed, something over twenty knots. It is supposed, however, that she would be faster, since little power would be lost in wave-making, the water having a clean run astern, being divided horizontally by the projecting lower part of her hull.

Naval architects are not apt to look with favor on any marked departure from the ordinary principles of ship construction, and therefore Capt. Lundborg's proposed vessel is likely to find adverse critics among them. The London *Engineer*, however, speaks with respect of his ideas, and urges that they be put to a practical test in a steamer of moderate size. Even if his ship is not feasible, however, steam vessels constructed after the received plans are likely before long to make the voyage across the Atlantic in the time set by him.

Boys Smoking.—Mothers have a duty to perform toward their boys in teaching them to avoid tobacco. Some investigations by Decaisne, of Paris, may help them in the discharge of this duty. Ducaisne examined a large number of young smokers, and found the following symptoms evidently due to this habit: Palpitation, intermittent pulse, chloroanæmia—besides this, the children showed impaired intelligence, became lazy, and were disposed to take alcoholic stimulants. The latter effects are worse than the first, and no doubt grow out of them.

Timoleon comes home with a hat that sinks down to his nose. His wife is horified. "But that thing don't fit you at all, my dear!" "I know it don't, and I told the hatter so; but he showed me his gold medal, and what could I do?"

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.

At No. 252 Market Street, San Francisco, Cal.

☞ *Take Elevator No. 12 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - February 15, 1882.

District Meetings.

There will be a series of meetings at the place and on the dates below given, in which Grand Master Wm. H. Barnes, the Deputy Grand Master, E. F. Loud, and all the D. D. G. M. will participate. These meetings will be held for consultation, reviewing the progress of the year and general congratulations. All brothers of the Order are cordially invited to be present, and assist in making the meetings interesting and instructive.

The Lodges of District No. 1, Caleb Brind, Deputy, will meet on Wednesday evening, March 8th, at B. B. hall, in the Lodge-room of San Francisco, No. 4.

The Lodges of District No. 2, W. B. Smith, Deputy, will meet on Friday evening, March 10th, at Hamilton hall, corner Steiner and Geary, in the Lodge-room of Hercules Lodge No. 53.

The Lodges of District No. 3, H. H. Mayhew, Deputy, will meet on Thursday evening, March 9th, at Pythian Castle, in the Lodge-room of Burns Lodge, No. 68.

The Lodges of District No. 4, A. A. Egleston, Deputy, will meet in the hall of Bernal Lodge, No. 19, corner 16th and Valencia, on Monday evening, March 6th.

The Lodges of District No. 5, will meet on the 4th Saturday of February, at Pythian Castle in the Lodge-room of Myrtle, No. 42.

It is expected that these meetings will be well attended and a fitting close to a most successful term be worthily celebrated.

We met Bro. P. M. Daly, P. M. W. of Lakeport Lodge, Lake county, in Valley No. 30, on Wednesday evening, Feb. 8th. He gives glowing accounts of our Order in his vicinity, his Lodge having doubled in membership in the last year. There are now 70 members on the roll and it is expected to reach 100 soon.

The Order in Michigan has done very well. The Grand Lodge was organized Feb. 27, 1877, which gives it an existence of five years. At first there were five Lodges, with a membership of about 100. At present there are 115 Lodges, with a membership of over 6,000. The sixth annual session convened in Detroit on Tuesday, Feb. 7th.

Fidelity, No. 136, will give an entertainment to their members and families on Wednesday evening, Feb. 15th, at Saratoga Hall, to conclude with a short programme of dances.

Just Cause for Alarm.

A decision has been rendered by the Supreme Court of Michigan which may well excite alarm in the breasts of every good Workman. In the enforcement of the Relief Law of the Order a member of one of the Michigan Lodges was suspended in accordance with the provisions thereof, and thereupon he appealed from such action to the Courts. On hearing the case the Supreme Court rendered its decision, the full text of which we print below:

Decision of the Supreme Court of Michigan.

Lamphere *vs.* Grand Lodge of the Ancient Order of Workmen.

By the Court: This is an application for a mandamus to compel the recognition of relator as a member of one of the subordinate Lodges of the Order of which the respondent is the supreme governing authority in this State. As such a member he stands insured by the respondent in the sum of $2,000, payable on his death, or on his surviving for a specified term of years. He stands suspended by the respondent, and thereby loses his insurance, for refusing to recognize the orders of the Supreme Lodge of the Order, which is a corporation existing under the laws of Kentucky, and not subject to this jurisdiction. The assessment was made to pay losses on risks taken by the Order in other States and by other State Grand Lodges. The respondent is a Michigan corporation existing under chapter 94 of the compiled laws of 1871.

The relator is not liable to pay the assessment. *It is not competent for the respondent to subject itself or its members to a foreign authority in this way. There is no law of the State which would subject a corporation created and existing under the laws of this State to the jurisdiction and control of a body existing in another State, and in no manner under the control of our laws.* The attempt of the respondent to do this is an attempt to set aside and ignore the very law of its being. A mandamus will therefore issue as prayed.

The point was made on the argument as to the propriety of affording to the relator this particular remedy, and as the case is one which the general law of the State under which respondent is organized is being ignored and perverted, we are not disposed to go beyond the examination of the equities.

But as individuals may now incorporate themselves for almost any lawful purpose, it must not be understood that because parties see fit to adopt that course instead of carrying on their joint operations as partners or as unincorporated associates, this court is to take to itself the settlement of their quarrels and controversies by means of the writ of mandamus. McBride vs. Grand Rapids, 32 Mich., 370; Water Commissioners vs. East Saginaw, 33 Mich., 154; Meister vs. Anshei and congregation, 37 Mich., 542. This is a discretionary writ, and in general we shall decline to interfere by means of it in the controversies of private corporations when the facts are not such as to be important on public grounds, or such as would justify our interference if corporate powers did not exist. The better way is for parties wronged by the action of such bodies to seek the proper remedy in common law suits.

The words we have put in italics enunciate the principle on which the decision is based, which, if correct, and good law, not only practically destroys the national character of the A. O. U. W., but of every other fraternal Order where Grand Lodges are incorporated in the various States, for in all such cases, not only the supreme body cannot enforce its edicts upon such grand bodies, but it is incompetent for such bodies *to subject themselves* or their members to such authority. It follows, therefore, as a corollary, that the moment a grand body incorporates under State laws, it thereby becomes totally independent of the superior body which projected it into existence, and not only so, but it becomes illegal to recognize any longer the superior body. It does not appear that the plan of separate jurisdictions, like that of the A. O. U. W., cuts any figure in the case, for a Grand Lodge though not separate in the sense recognized by our Order would stand on precisely the same basis as any other. The Odd Fellows, Knights of Pythias, Red Men, Druids, Foresters, Knights of Honor, Royal Arcanum—in fact, every society in the land that has a Supreme organization and subordinate, State or District organizations, all stand on the same footing. Wherever a Grand Lodge is incorporated, there it is independent of any and every other incorporation outside the State wherein it may be located, and it cannot lawfully subject itself or its members to the foreign authority. If this decision be not reversed we see a deal of peril in the future for all fraternal societies, save perhaps the Masons, who have no Supreme Lodge or its equivalent, we believe.

We see only one road out of the difficulty. Let Grand Lodges disincorporate, and then forever prohibit, so far as possible, the incorporation of any more.

The Grand Lodge of Michigan met on the 7th of this month. At the present time of writing, we have not learned of the action taken by that body to meet the emergency created by this remarkable decision, but whatever is done we have faith to believe will be found in the best interests of loyalty to the Order and in consonance with the obligations of a good Master Workman.

We can see little necessity at any rate for the incorporation of a Grand Lodge. True, it individualizes the body so that it can sue and be sued, plead and be impleaded, but Grand Lodges very rarely want to sue anybody or plead in court, and we fail to see any particular luxury in being such, or in being impleaded. Any other business such organizations may have, can be well enough conducted without corporate powers. In the matter of even-handed justice, it is fair to presume that fraternal organizations will mete it out with more real equity than any court of law. Again, where one's rights as a member rest solely on his compliance with the laws he has obligated himself to support and defend with no recourse beyond, he is less apt to get on his high horse and ride rough-shod over the interests of the society of which he is a member to gratify his own selfish desires. There may be benefits accruing from a corporate existence to a Grand Lodge which we have not observed, but with the light we have it is our firm conviction that incorporations for fraternal societies have done more harm than good.

Carry a Light Load.

No man should attempt to do more than he can do well. While we regard it as a religious duty that every man owes to his family that he belong to some beneficiary organization if he can, still, no one should join so many as make his life a burden, or deprive his family of their present needs of life. Common sense should be exercised in these matters as well as in others. If a poor man can protect his family to the extent of $2,000, that, as a rule, is as much as he should do, if he has any regard for his own comfort, or that of those dependent upon him. Poverty is always inconvenient, and it is scarcely worth while to always wrestle with it while living in order to die wealthy. First meet the real necessities of the present, and then make, if possible, a reasonable preparation for the protection of those who will be left behind when you are taken away; but don't commit the folly of making yourself worth a good deal more dead than alive. It is too much like so overdoing a pleasure as to make a pain of it.

Captain L. H. Nye.—The extraordinary and melancholy circumstances connected with the death and burial of our late brother should be noticed. Brother Nye, in his life-time, was a pilot on the inland rivers of this State, and was well and favorably known. As is supposed, the ladder that ascends the pilot-house unexpectedly gave way, and he was precipitated into the San Joaquin river. As soon as his disappearance was known, his brothers, of Stockton Lodge, No. 23, instituted search for the body, and continuously hired men to look for the body which was found after 20 days effort. His funeral was attended by 90 of his brother Workmen who performed the last rites of burial, according to our ritual. This sad death carries with it a lesson that all in like circumstances should heed. He was in moderate circumstances, 34 years of age and leaves a wife and one child. The amount of his beneficiary has been paid to the widow and another monument erected to the vigilance and humanitarian duties performed by the Ancient Order of United Workmen in this State, and especially to the energetic and worthy subordinate, Stockton, No. 23.

The Grand Lodge of New York met in annual session Feb. 7th. New York has the largest membership, but it has not made as high an average gain per month as California during the past year.

The Grand Lodge of Illinois met at Quincy, Feb. 7th. This jurisdiction has done very well during the year, showing an increase of 28 Lodges and 1,633 members.

In our issue of March 1st we will give a good portrait of Charles H. Haile, Grand Receiver, together with a sketch of his life.

Heavy Death Rate.

The year 1882 signalizes itself by giving us an unusual amount of death losses to pay. Two assessments for January, two for February, and probably two for March, is something so unusual to our members that many begin to weaken and complain. Suspensions will no doubt be more than usual in consequence. This condition of things, however, will not continue. Already there is noticeable an improvement in the mortuary reports, and with the advent of spring no doubt we shall settle back to the death rate of former times. We don't know that the A. O. U. W. has any special reason for complaint. All societies seem to be suffering alike. It is an unhealthy season, and we may just as well make up our minds for such things, for in the nature of things they must sometimes occur. We have no right to presume that we can carry $2,000 on our lives for mere nothing. The A. O. U. W. gives assurance to that amount for net cost, and no organization of any character can do better than that. Those who feel themselves unequal to the burden have an honorable way to relieve themselves thereof. It is only required that they pay for the protection they have had and withdraw from the Order. But to anyone contemplating such a course, we would propound these questions: Do you not spend for some useless habit or luxury more than $2 a month? If expenses must be curtailed, would it not be better to cut off something that is of no real benefit, and still keep the shield of the Workmen over your household, lest in an evil day they be left destitute?

We know not what a day may bring forth. The strong arm of to-day may be palsied to-morrow. Let us never forget that no great good can be expected without a certain amount of sacrifice, and that sunshine always succeeds a storm.

Bro. W. R. Condit, of Silver Star Lodge, No. 84, in renewing his subscription to the Watchman also sends six new names, which volunteer aid to our cause is sincerely appreciated. It is evident that there are good Workmen in this section of the jurisdiction. Bro. Condit writes: "I am well pleased with your paper. Am taking several papers, but always read the Watchman first. Silver Star is steadily increasing in numbers. We have at present 37 M. W. in good standing." It is evident from the tone of Bro. Condit's letter that our subscription list will receive a further addition from the Workmen of Downy City.

We met Bro. C. Sharp, P. M. W., of Mt. Diablo, 91, at the Grand Recorder's office. He reports an unusual interest in the Order in his vicinity. An unfortunate incident happened of late, the loss of Bro. Fred Capp, who died in San Francisco, on Sunday, Feb. 6th. There were only a small delegation present at the funeral owing to unforseen circumstances.

The *Fraternal Censor*, organ of the A. O. U. W. of New York, has been purchased by E. W. Beach. Its former editor and publisher, W. M. Bennett, has gone into business in Florida. The paper is now issued weekly in place of semi-monthly, the size reduced from eight to four pages, and all the literary miscellany taken out.

During a visit to the Grand Recorder's office, we met Bro. A. Cheminant of Ashler Lodge, No. 165, Alameda. Bro. Cheminant reports his Lodge as composed of "hale fellows well met," and is enthusiastic over its *personnel*. We found our brother well informed as to the needs of the Order, and earnest in his advocacy of many things which will inure to its benefit.

The A. O. U. W. Lodge of Mendocino city has appointed Bros. Nelson, Blair and Gregory as a special committee to select and report the price of a suitable plat of ground to be used for burial purposes by the Lodge.

Some interesting articles are crowded out of this issue for want of space. The present activity of the Order is also showing itself in an increased amount of correspondence. It is good.

The Grand Lodge of Ontario (Canada) has about 4,600 members. There has been a continual increase since the time this jusisdiction was set apart as separate.

It is proposed to hold a union meeting at Alameda and Oakland sometime in the month of March.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

WM. C. FLINT, ESQ., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

VERY nearly 16,100 beneficiary certificates have been issued from this office, and the number is being swollen at the rate of nearly 300 a month.

RECENTLY so many orders for badges have been received that we have not been able to get them made fast enough to supply them promptly, but we do the best we can.

SCARCE a week passes that $2,000 is not paid to some poor widow who has that alone to keep her from pecuniary distress and want. Who grudges the little it costs to each to do so much good?

TWO assessments again for next month. The mortality is excessive, not only in the Order, but everywhere. It is encouraging, however, to notice a very perceptible diminution in the stream of death reports coming into the office.

THE Grand Trustees and Finance Committee are preparing their several reports for the last fiscal year. They will contain much interesting and important matter, and no doubt several important recommendations for the good of the Order.

THE next session of our Grand Lodge will be held in San Francisco, commencing on Tuesday, April 4th. The hall in which to meet has not yet been determined upon. An earnest effort will be made to finish the business in three days, out of consideration for the treasury, which will not be in condition to meet the expenses of a longer session.

THE reception and disposition of reports, semi-annual and otherwise, with the added work incident to double assessments has kept matters decidedly lively in the office of the Grand Recorder for a month past, and the end is not yet. However, we will try to see that the interests of the Order do not suffer in any regard. There is no abatement in our usual increase of membership. Ten for each working day over and above all losses is the rule.

Real Sympathy.

Dr. J. B. Williams, Medical Examiner of Keystone Lodge, No. 64, in Oakland, whose ingenious and powerful electrical apparatus was illustrated in the WATCHMAN some 10 months ago, was stricken down by a violent gathering in one of his knees, but is now slowly recovering after some seven months of painful and agonizing affliction.

While lying in a precarious condition, his young wife, the amiable and accomplished daughter of Dr. J. H. Wythe, of Oakland, died a few days after the birth of their first child, which also died. Her self-denying devotion to her sick husband thus proved fatal. It is seldom, thank fortune, the lot of mortals to be severely afflicted. Keystone Lodge, to the credit of the good-hearted brethren, have shown their generous and kind sympathy to their worthy and afflicted brother from time to time. A tribute of respect was recently paid to the memory of Mrs. Williams, by the Lodge adopting resolutions of condolence and sympathy for Bro. Williams and her other relatives. The deceased was a well-loved and much-esteemed teacher in the public schools before her recent marriage to Bro. Williams; an ardent laborer in the intellectual field in which she was widely known. It is a noteworthy fact, that one of the visiting committee of Keystone Lodge, Foreman Menges, has not failed in his duty of visiting Bro. Williams in 27 weeks.

WE met Bro. G. W. T. Carter, P. M. W of Point of Timber Lodge, at the Grand Recorder's office. Bro. Carter had cheering news from his section, and our Order is in much favor. At their last meeting the M. W. degree was given to two young men, aged respectively 21 years and three weeks and 21 years and two days at the time they made their application. They have now 92 members, and expect soon to pass the 100 mark. A very good feature in this Lodge is that the officers take a pride in the work of the Lodge, and conferred the degree in a correct manner immediately after installation.

Navarro, 200—A Question.

EDITORS WATCHMAN:—Our Lodge was instituted on July 23, 1881, by George M. Bowman, D. D. G. M. W., with 18 charter members. We now number 30, with 2 members elected, who will take the J. W. degree next Saturday evening, and 5 more applications to come in. We have a neat Lodge-room, 24x40 ft., 12-ft. ceiling, handsomely paneled with paper and wainscoted with alternate strips of pine and redwood, varnished; nice furniture; and we think we can compare favorably with our older sister Lodges on the coast. We had the misfortune to lose one of our brothers last month, Charles Peterson by name, who died very suddenly of double pneumonia. The Lodge cared for him faithfully during the few days of his illness, two members being constantly with him to administer to his wants, and the brothers spared neither pains nor expense for the performance of their duty. He was buried by the Lodge, and every member attended his funeral, as well as several brothers from Mendocino, No. 70, ten miles up the coast. The sincere brotherly feeling displayed toward our deceased member, and the care taken of him, has been the means of calling more general attention to the Order in this locality, and will no doubt be the cause of increasing our membership.

Before closing this rambling epistle, I want to ask you one question, and should be glad to have the matter fully explained in some coming issue of your paper:

Why is it, that with the plain, systematic and careful provisions of the Order for the payment of the death benefit, so long a time elapses between receipt by Grand Recorder of the proofs of death and the payment of the money?

I notice a case in point in your last issue. "Bro. S. Lipman, of Myrtle Lodge, No. 42, S. F., died Nov. 20, 1881," and on Jan. 17, 1882, almost 60 days after his death, his widow received her check.

To my mind this is not right. We are falling to the level of the ordinary life insurance company, which requires 60 days in which to pay up. If the blank "Proof of Death" is properly filled—and any man of ordinary intelligence is competent to do that—the whole matter resolves itself into a simple business transaction, which, after it is in the hands of the Grand Recorder, should not require over one day for its completion.

Bro. WATCHMAN, let us hear from you on this point. Our Order is eminently entitled to a place in the front rank of benevolent societies. Our principles are founded on a rock; our aim is a noble one. Why should we not make the workings of the Order as nearly perfect as possible? It is immediately after a death in a family that the money is most needed. There are always bills to pay, and often a family to move, a new household to be put in running order, and generally an entire new order of things has to go into effect. I had the idea that our Order was to be the means of supplying the oftentimes deficiency of ready cash which exists in nearly every small family after the, sometimes, long illness and death of its mainstay and support. If it takes 60 days though to settle a death loss in the city, almost next door to the office of our Grand Recorder, how will the country Lodges fare when it may require a week or 10 days for a notice of death to reach headquarters?

We on the coast would be glad to have this matter ventilated a little for our instruction, if for no other reason. If this delay is necessary, we want to know why. If not, then it is high time the matter was brought to the attention of those in charge of the workings of our beneficiary system. Don't let us deteriorate or stagnate; keep the ball rolling, push the good work, and urge prompt action in every matter for the benefit of our beloved Order. Yours, in C. H. and P., FRED. A. WALTON.

Remarks.

Our correspondent being new in the Order is excusable for his lack of understanding in relation to the payment of death losses. The Grand Recorder cannot settle a loss till the money has first been collected with which to pay it. Often there is from ten days to a month from the time a member dies till official notice in due form is received of the fact by the Grand Recorder. Once a month about the 23d, such as are received are put into a list and sent out to the Lodges, and such assessments levied as may be necessary to raise sufficient money to pay the losses. Except in cases where a surplus has been left over from a former assessment no loss can be paid till money is transmitted by the Lodges with which to do it. Where a death report comes in immediately after the assessment list has been sent out, it must needs lie over a month, as a rule, before an assessment can bring money with which to pay the loss. Again, where the death losses are so many as to require two or more assessments in one month, those for which the last assessment or assessments became necessary cannot usually be paid till at least a month has expired from the date of levy, for Lodges have a month in which to remit on those. So it comes to pass that losses are settled on an average in about 40 days from date of death—some being paid sooner and some not so soon. If our correspondent will look over the monthly statements sent out from the office of the Grand Recorder, he will see that in no case is enough money left over in the Beneficiary Fund to pay a death loss, if there be any to pay that can be paid. The fund is never allowed to accumulate or lie idle, but losses are always paid as quickly as possible after sufficient funds have been collected to pay with. The average time of payment could be reduced, however, a week or ten days if all Lodges were as prompt in their remittances as they should be.—EDS. WATCHMAN.

"Encourage Useful Industry and Help a Brother to Help Himself."

[Written for the WATCHMAN by J. C. H.]

It is one of our corner stones to encourage useful industry. There are various ways of doing this, but the most practical we know of is to patronize our brethren in their business. Unlike most fraternal and beneficiary societies, in every Lodge meeting the question is asked "are there any brothers out of employment?" By practice and mutuality of interest we do not deem it amiss to urge upon brethren our claim for substantial and practical patronage. It being a part of our ritual, and every Workman solemnly pledged to this principle, we hold it to be the duty of the PACIFIC STATES WATCHMAN to call attention to the various industries, professions and commercial pursuits of our Workmen with a view to help them in their business and "encourage useful industry." We have a relief committee who are doing a great deal of good to those who are in dire distress, but if our Workmen would put in practice their pledges one to another, the benefits each to the other would equal the amount of our beneficiary assessments. There is hardly a Lodge meeting but that we meet visitors and members of their own Lodge and make social acquaintances, when through delicacy and false modesty, we know nothing of them in a business sense. Were it otherwise we might be of service to them or use our influence to assist them or patronize them with mutual benefit to each other. There are a few Workmen who pretend to scorn this "fraternity business," who claim that we are nothing more than a life insurance company. To such we are prepared to show that it is the strong arm of a great brotherhood, that has made their gilt-edged security, given protection to their families and that without it their beneficiary certificate is not worth the paper it is written upon.

I. A. DUNSMOOR, D. D. G. M. W., has completed his duties of installing the officers of the nine Lodges in his district. He finds the Order in a flourishing condition in Los Angeles county, there having been an increase of 172 members during the year. There were three deaths in this district last year, being the first that have occurred in the county since the Order was organized; and the prompt manner in which the beneficiary certificates were paid, shows that the A. O. U. W. mean what they say. The best men in the county are joining the different Lodges, in order to avail themselves of the benefits and privileges that this Order presents. It is to be hoped that the same success, usefulness, and prosperity will attend this noble Order for ages to come that have marked its career during the last six years.

BERTHA ABRAHAMSON.—Died on Feb. 1st, Sister Bertha Abrahamson, wife of Peter Abrahamson, P. M. W., of Unity, No. 27. She was a devoted, amiable and exemplary wife, the mother of a large family, member of Concord Council, No. 2, Independent Order Chosen Friends, and was held in high esteem and love by all who knew her. The last sad rights of sepulcher were performed by Dr. Vandever, assisted by Dr. Luxemburg, at the Jewish cemetery, in this city, which were very solemn and impressive. Concord Council, No. 2, Independent Order Chosen Friends, to the number of 40, dressed in their regalia, were in attendance, a delegation of Workmen from Unity Lodge, No. 27, A. O. U. W., and an immense concourse of citizens, representing all classes, there being over 60 carriages in the funeral procession. There were many touching scenes of love and devotion exhibited on this mournful occasion and it might be aptly termed a house of mourning. We only express a universal feeling when we extend to Bro. Abrahamson our sympathy in this his sad bereavement.

Grand Recorder's Statement for January.

We condense from Grand Recorder Pratt's Financial Statement for January the following leading figures:

WARRANTS ISSUED.

Resolutions of Respect.

[IN MEMORIAM.]

At a regular meeting of Unity Lodge, No. 27, A. O. U. W., held Jan. 10th, the following resolutions were unanimously adopted:

HALL OF UNITY LODGE, No. 27, A. O. U. W., San Francisco, Jan. 10, 1882.

To the Master Workman, Officers and Members of Unity Lodge, No. 27, A. O. U. W.—DEAR SIRS AND BROTHERS:—Your committee to whom was referred the matter of drafting resolutions in regard to the death of our late Bro. JOHN T. HOLLINGS, respectfully submit the following:

WHEREAS, It has pleased the Almighty to call from among us our esteemed Brother, officer and friend, JOHN T. HOLLINGS, in the prime of life and fullness of noble manhood, therefore

Resolved, That we, the members of Unity Lodge, No. 27, A. O. U. W., while reverently submitting to the Divine decree, cannot but deplore and mourn the death of one whom we could so ill afford to lose—a man whose genial disposition, urbane manners, and exalted character won the affectionate regard of all his associates. Truly may it be said:

"None knew him but to love him,
None named him but to praise."

He had a happy smile and kindly word for every one; and a willing heart and an open hand for a distressed Brother or friend. To whatever station he was called he did it honor. In our ranks he gave his time and talents freely to the elevation of our Lodge and the welfare of our beloved Order. In the various offices to which we called him he fulfilled his duties faithfully, ably and well. Long, long must we look for one to fill his place.

"He was a man, take him for all in all,
We ne'er shall look upon his like again."

Resolved, That though condolence may seem but mockery, at such a time, we extend to his bereaved widow and family our tenderest sympathy; and may their poor hearts, so heavy laden, find comfort in the thought that the dear lamented died as he had lived—in the love and fear of God, in whose august presence he waits us all; and where, if we follow his precepts, we all again shall meet him.

Resolved, That these resolutions be spread in full upon the minutes, and a copy of the same be handed to his family.

JAMES M. BAIRD,
I. D. MARTIN,
THOS P. WILLIAMS. } Committee.

REV. E. R. DILLE called on the *Argus* Saturday last. His lecture of the previous evening was a masterly effort. He will soon be in the front rank of lecturers and pulpit orators at San Francisco.—Petaluma *Argus*. [We concur, but will add that Bro. Dille stands at the head now in this city. The Central M. E. church, on Mission, near Sixth, has been fortunate in securing him as its pastor. He always has a crowded house.]

PALMER'S,

726, 728 and 730 Market Street, S. F.

Kid Gloves a Specialty.

FURNITURE.

H. Schellhaas' auction and commission house, Eleventh street, Odd Fellows' building, Oakland, Cal.

How Cheaply One Can Live.

Bread, after all, is the cheapest diet one can live on, and also the best. A story is told that shows just how cheap a man can live, when he gets "down to mush," figuratively and literally speaking. Colonel Fitzgibbon was many years colonial agent at London for the Canadian government, and was wholly dependent upon remittances from Canada for his support. On one occasion these remittances failed to arrive, and as there was no cable in those days, he was compelled to write to his Canadian friends to know the reason of the delay. Meanwhile he had just one sovereign to live upon. He found that he could live upon sixpence per day, or about 12½ cents of our money—four pennyworths of bread, one pennyworth of milk, and one pennyworth of sugar. He made pudding of some of the bread and sugar, which served for breakfast, dinner and supper, the milk being reserved for the last meal. When his remittances arrived, about a month afterward, he had five shillings remaining of his sovereign, and he liked his frugal diet so well that he kept it up for over two years, possibly longer. Twelve cents a day is certainly a small amount to expend for food; but a man in Minnesota, about three years ago, worried through a whole year on $10. He lived on "Johnny cake."

We know of a theological student in an Ohio college who, sustained by grace, rice and corn bread, lived 13 weeks on $7; but there were several good apple orchards near the college, and the farmers kept no dogs. It is not the necessities of life that cost much, but the luxuries; and it is with the major part of mankind as it was with the Frenchman who said that if he had the luxuries of life, he could dispense with the necessities. Mere living is cheap, but as the hymnologist says, "It is not all of life to live."—*American Miller.*

When little Belle was two years old, she used to admire the full moon very much; but when her aunt pointed out the new moon, she exclaimed, in the most distressed tone, "Oh, 'tis broken! 'tis broken!" Johnny, who was just learning to talk, being asked if he saw the new moon, said, "Yes, I see the rind of it."

DEWEY & CO.'S

Scientific Press  Patent Agency.

[ESTABLISHED 1860.]

Inventors on the Pacific Coast will find it greatly to their advantage to consult this old experienced, first-class Agency. We have able and trustworthy associates and Agents in Washington and the capital cities of the principal nations of the world. In connection with our editorial, scientific and Patent Law Library, and record of original cases in our office, we have other advantages far beyond those which can be offered home inventors by other Agencies. The information accumulated through long and careful practice before the Office, and the frequent examination of Patents already granted, for the purpose of determining the patentability of inventions brought before us, enables us often to give advice which will save inventors the expense of applying for Patents upon inventions which are not new. Circulars of advice sent free on receipt of postage. Address DEWEY & CO., Patent Agents, 252 Market St., S. F.

COMPOUND OXYGEN NOT A DRUG

A NEW TREATMENT for Consumption, Asthma, Bronchitis, Catarrh, Dyspepsia, Headache, Debility, Neuralgia, Rheumatism, and all Chronic and Nervous Disorders.

ACTS DIRECTLY upon the great nervous and organic centres, and cures by a natural process of revitalization.

HAS EFFECTED REMARKABLE CURES, which are attracting wide attention.

HAS BEEN USED BY Rt. Rev. John J. Keane, Bishop of Richmond, Va., Hon. Wm. D. Kelley, T. S. Arthur, and others, who have been largely benefited, and to whom we refer by permission.

IS STRONGLY ENDORSED: "We have the most unequivocal testimony to its curative power from many persons of high character and intelligence."—*Lutheran Observer.* "The cures which have been obtained by this new treatment seem more like miracles than cases of natural healing."—*Arthur's Home Magazine.* "There is no doubt as to the genuineness and positive results of this treatment."—*Boston Journal of Commerce.*

THE OXYGEN HOME TREATMENT contains two months' supply, with inhaling apparatus and full directions for use.

SENT FREE: a Treatise on Compound Oxygen, giving the history of this new discovery and a large record of most remarkable cures. Write for it. Address

ADMINISTERED BY INHALATION. Drs. STARKEY & PALEN, 1109 and 1111 Girard St., Philadelphia, Pa.

Depository on Pacific Coast.

WE HAVE ESTABLISHED A DEPOSITORY OF OUR COMPOUND OXYGEN HOME TREATMENT at San Francisco, Cal. This will enable patients on the Pacific Coast to obtain it without the heavy express charges which accrue on packages sent from Eastern States.

All orders directed to H. E. MATHEWS, 606 Montgomery street, San Francisco. Cal., will be filled on the same terms on which we fill orders sent directly to our office in Philadelphia.

Patients ordering from our depository in San Francisco, should, at the same time, write to us, and give a statement of their case, in order than we may send such advice and direction in the use of the Treatment as their special disease may seem to require.

DRS. STARKEY & PALEN, Nos 1109 and 1111 Girard Street, Philadelphia, Pa.

Book Notices.

"On Board the *Rocket*," by Robt. C. Adams, 12 mo., illustrated. This book is a narrative of facts concerning sea life and the management of sailors. It is mainly the story of an East India voyage made in the bark *Rocket*. The book abounds with descriptions of the various incidents of sea life, storms, trade winds, "doldrums," sailors yarns, character sketches, life in the East Indies, and gives the words and music of a number of the songs used by sailors at work. It recounts the methods that were used to keep the crew in order and promote their welfare, and during the voyage the captain and mate narrate true experiences on board other vessels, where the sailors have been abused by the officers, or, where on the other hand, bad crews have taken the advantage of lax discipline. Several illustrations from original sketches portray different phases of life on ship-board.—Published by D. Lothrop & Co. Boston; price $1.50.

"Our American Artists," by S. G. W. Benjamin. This is a handsome book and elegantly bound. The engravings are very beautiful, consisting of portraits of some of our leading American artists with short sketches of their art life. The frontispiece is an elegant reproduction of David Neal's meeting of Mary Stuart and Rizzio, and throughout its pages are many other choice engraving.—Boston: D. Lothrop & Co.

"Autograph Birthday Book." This is a choice little book for young folks. The poets Longfellow and Whittier have each a poem appropriate to a different month. Mrs. Whitney, Will Carleton, Thomas Bailey Aldrich and other American poets have told in rhyme that which is sweetest to be said about every month in the year, accompanied by illustrations emblematical of the month. There are 366 conduct mottoes—one for every day in the year: Gleanings from the richest thoughts of our best thinkers. Besides these Miss Harris has made the finest selection of poems, each bearing the name of its author. These poems ought certainly to be a great aid in filling out the blanks for each day in the year.—Boston: D. Lothrop & Co; price $1 00.

"John, did you take that note to Mr. Jones?" "Yes, but I don't think he will read it." "Why so, John?" "Because he is blind, sir. While I was in the room he axed me where my hat was, and it was on my head all the time."

Nitrate Deposits.

The Chili nitrates, the real cause of the late "unpleasantness" between Chili and Peru—nitrate of soda—is found in great abundance on the desert of Atacama, a short stretch of country lying just north of Chili and on the extreme southern coast of Peru. These nitrates, are generally covered, first, by a bed of soil, varying in thickness from 4 to 19 inches, next by a compact layer of gypsum, immediately under which the nitrate occurs in irregular beds, from 2 or 3 to sometimes 8 or 10 ft. in thickness, and is found over an area of some 40 square leagues. It is often mixed with sulphate of soda. There is also another large deposit found at the Pampa del Tamaruagol, where it does not occur nearer to the coast than 18 miles. It appears to have been gradually transposed to salt as it approaches the ocean. It seeme to have come from the decomposition of the felspathic rocks which form the central portion of the desert to the eastward of the niter beds.

Nitrate of soda is artificially prepared by neutralizing nitric acid with soda and crystallizing the solution. It consists when dry of 36.6 soda, 63.4 of nitric acid. The contained water of chrystallization amounts to 9.47 of the combined substance.

The natural nitrates are refined by being broken into small pieces and dissolved in boiling water, when the earthy and insoluble matters fall to the bottom. The clear liquor is run into shallow troughs; where, being exposed to a tropical sun, it soon crystallizes. There are about 100 of these refineries scattered about over the nitrate territory.

The existence of this deposit was first practically brought to the attention of the world in 1820, when a small lot was shipped to England; but the duties on it were so high that the then known uses to which it could be put would not allow of its being landed, and it was thrown overboard. Several other unsuccessful efforts were made within the next eight years to introduce it into England, France and the United States; and it was not until 1830-31 that it began to have a merchantable value. The latter year, it was sold in both England and France for from $150 to $200 per ton. It is used with other mixtures as a fertilizer of land, and for the manufacture of nitric acid. It is susceptible of all the applications for which niter is used, except for the manufacture of gunpowder, for which it is not adapted, in consequence of its deliquescent property. In its refined state, it often contains a small quantity of iron, and always a trace of iodine; also, common salt, sulphate and carbonate of soda, muriate of lime, and occasionally borate of lime. There are some four or five, mostly slightly different varieties, one of which—the most variable—composed of boracic acid, 49.5; soda, 8.8; water, 26.0; lime, 15.7—100, it is thought might be profitably utilized in the manufacture of glass.

THERE is every indication of an enormous travel to Europe next summer, and nearly all the steamship lines are increasing their fleets.

Polishing Wood.

Turned articles must be brought to a fine, smooth surface with the finest sand-paper, and the direction of the motion should be occasionally reversed, so that the fibers that are laid down by being rubbed one way may be raised up and cut off. To apply the polish, which is merely a solution of shellac in alcohol, take three or four thicknesses of linen rag, and place a few drops of polish in the center; lay over this a single thickness of linen rag and a drop or two of raw linseed oil over the polish. The rubber is then applied with light friction over the entire surface of the work, while revolving in the lathe, never allowing the hand or mandrel to remain still for an instant, so as to spread the varnish as evenly as possible, especially at the commencement, and paying particular attention to the internal angles, so as to prevent either deficiency or excess of varnish at those parts. The oil in some degree retards the evaporation of the spirit from the varnish, and allows time for the process; it also presents a smooth surface and lessens the friction against the tender gum. When the varnish appears dry, a second, third, and even further quantities are applied in the same manner, working, of course, more particularly upon those parts at all slighted in the earlier steps.

Flat surfaces are polished in a similar manner. The wood must be filled, as it is called, and for this nothing is better than whiting, colored so as to resemble the wood and kept dry. Rub the latter with linseed oil, and then sprinkle it with whiting. Rub the latter well in, wipe it off carefully and give time to dry. This is far superior to size.

The polisher, however, generally consists of a wad of list, rolled spirally, tied with twine and covered with a few thicknesses of linen rag. Apply a little varnish to the middle of the rubber, and then inclose the latter in a soft linen rag, folded twice. Moisten the face of the linen with a little raw linseed oil, applied to the middle of it by means of the finger. Pass the rubber quickly and lightly over the surface of the work in small circular strokes, until the varnish becomes nearly dry; charge the rubber with varnish again, and repeat the rubbing till three coats are laid on, when a little oil may be applied to the rubber and two more coats given it. Proceed in this way until the varnish has acquired some thickness; then wet the inside of the linen cloth, before applying the varnish, with alcohol and rub quickly, lightly and uniformly the whole surface. Lastly, wet the linen cloth with a little oil and alcohol, without varnish, and rub as before until dry. Each coat is to be rubbed until the rag appears dry, and too much varnish must not be put on the rag at one time. Be also very particular to have the rags clean, as the polish depends in a great degree upon keeping everything free from dust and dirt.—*Exchange.*

Harmony, 9.

On Saturday evening, Jan. 28th, Harmony, No. 9, showed in a marked degree the inner workings of our Order. Among the number who were assisted in a pecuniary and business point of view, was one brother of this Lodge, now a resident of New York city, who was sick and in distress. This being the last meeting night of the month, the monthly social was held and the following programme given: Introductory remarks, F. Blight, M. W.; piano solo, Bro. Schwartz; comic reading, Z. Whitten, P. M. W.; solo, J. R. Locke; select reading, Prof. Eastman; song, Wm. Thackery, P. M. W.; song, Thos. H. Wilton; recitation, L. Johnson; song and encore, Z. Whitten; solo, John Webster. This volunteer programme was a family affair, alike creditable, instructive and profitable to the audience and participators.

Hercules, 53.

The following are some remarks made by Bro. L. M. Manzer, M. W., of Hercules Lodge, No. 53, upon assuming the duties of his station:

Officers of the Grand Lodge, visiting brothers, Officers and Members of Hercules Lodge:—I know it is usual, and it may be expected that at this time and on this occasion, I should return thanks for the honor conferred in electing me to the highest position within the gift of the Lodge. But after many years experience in societies of this kind the conclusion was long since reached that positions of this character can only be an honor conferred, when after the election the several members of the Lodge shall give to the officers elect their hearty co-operation in making the term a success, because no individual officer or combination of officers possess the qualification, necessary to make any term of six months a success, unaided by the earnest and enthusiastic support of the members. Should you give us that support which, on behalf of my brother officers and especially for myself I now ask, I shall consider that you will have conferred an honor upon us and for which I shall return sincere and heartfelt thanks. Otherwise that which is usually considered an honor is a questionable one, amounting to but little less than an insult. When we contemplate the unexampled success of our Order, springing into power and usefulness as if by the beckoning of the magician's wand, we attempt to seek for the cause and find it, first in the fact that it filled a want natural in the human heart, not supplied by the general organization of society, nor by any other civic order existing at that time. Second in the enthusiastic devotion of the members of the Order to its principles. I say principles because who that examines, even casually, the lectures and obligations of our Order, can doubt for a moment but that its fraternal character was designed to be as prominent as its insurance and protective character. We also find our funds divided to correspond with the theory of its lectures and obligations. One, a sacred fund, pledged to the widow, orphan and relatives after our brother shall have listened to the "tattoo" which calls him beyond the reach or needs of the general fund. That general fund was designed to meet the current expenses of the Lodge, care of the sick and all other demands incident to a practical application of its fraternal teachings. I maintain that this is an Order and "not a mere practicable insurance organization." If it is not an Order (and we do not maintain it as such), with the duty of caring for the sick, relieving the distressed, as much so as Odd Fellows, Knights of Pythias and all other noble Orders, then our altars, forms, obligations and regalia are frauds upon intelligence, and should be wrested from us and burned in one common pile. I know that there is a disposition manifested to ignore its fraternal teachings, obligations and designs, and spurning all enthusiasm under the plea of practicability, start the Order on a mission of certain decay and final death. It is well, perhaps, that the two ideas should be represented. That one should to some extent hold the other in check. But I warn you that it will be a dark and evil hour for our Order should the cold and calculating gain the ascendency and wholly direct the legislation and policy of the Order. Organized, well-directed enthusiasm will storm the battlements, leap the barriers and accomplish in a night that which requires months and years to accomplish by calculating practicability. This is true of armies, orders and individuals. I know that we, as a Lodge, have drawn from our general fund to relieve our brothers from the tax for the beneficiary fund. In this I think we may have acted wisely, but it does not afford us a valid excuse because the general fund has thereby become depleted for ignoring our other obligations to our brothers and the Order. I pity the man who can pass through all the forms necessary to become a full member of our Order, and feel that no benefits accrue until he shall have been placed in the narrow house. In all such cases I shall feel that my assessment has been well expended, and the sooner I am called to pay it the better for the Order and humanity. All things must have an end. This term will close; these rambling remarks must cease. Let us then, officers and members, strive to do our duty in accordance with our highest estimate of it, exercising charity and forbearance toward each other, always remembering that but for the infirmities and weakness of human nature we should require no orders, organizations or governments. That the sum total of humanity, when properly directed, is calculated to make any and all a success. I expect to make mistakes; they are but the natural incidents to an earnest and active Master Workman, but shall endeavor to respect the rights and feelings of all, asking in return your forbearance, co-operation and support. Thanking you for your kind attention, I am now ready to enter on the active duties of this term.

Magnolia, 41.

There was a large attendance in Magnolia on Monday evening, Feb. 6th. Quite a spirited discussion was had on the question of paying one assessment from the general fund. It is understood that this is yet an open question to be settled hereafter. Six candidates were given the J. W. degree, and two applications were received. Magnolia will soon pass 200, and its membership is composed largely of young men, and their discussions are numerous, but following the rule that all Workmen Lodges should do, any disagreements that may happen in the Lodge meetings are not carried beyond the threshold of the hall. Under head "Good of the Order," Bros. F. Blight, M. W.; Wm. Decker, P. M. W., and John R. Fishbeck, P. M. W. of Harmony Lodge, No. 9, made acceptable and well-timed speeches, after which several of the members of Magnolia and Bro. Coon, Recorder of Yerba Buena, addressed the Lodge. During Bro. Coon's remarks, the impression was gained that the fees for initiation in several of the Lodges would be raised to $20 or more.

Memorial, 174.

This young subordinate is moving steadily ahead. There were two applications made and two candidates initiated on Monday evening, Feb. 6th. Under head good of the Order, from the remarks made it was understood that there would be several applications at the next meeting and that this term would be ahead of the last term in increase of membership.

Olympic, 127.

Olympic is progressing slowly but surely. On Tuesday evening, Feb. 7th, two petitions were read. The meeting was one of unusual interest. There was a spirited but good-natured discussion among the brethren, in which Geo. W. Dixon, P. M. W., E. H. Morgan, P. M. W., and Bros. Adley H. Cummins, Stout and Adams participated, to the evident pleasure of their brother listeners. Bro. Morgan made some extended remarks, one point in which is worthy of special notice. He said that some time ago a gentleman in the prime of life, strong and healthy, was told by him to come into the Order. However, the gentleman, like a great many others, was so impressed with his own physical soundness that he delayed the matter, thinking to save a few dollars at that time. There was no need of him coming in then, was he not young and was it not fair to be expected that he would live a great many years yet. No, he would think about it, and come in in after years. But while he was thinking, a small boil made its appearance, grew larger, the blood was poisoned, and in less than one year from the time the Order was first brought to his attention, the gentleman, who was proud in his health and vain in his strength, was laid in his last resting place. Bro. Morgan deduced the moral from this case that a man is almost criminal in neglecting to protect his family when such an Order as the Workmen affords so sure, cheap and safe a means. Every Workman in the land should constitute himself an angel of mercy and bring the tidings of this great beneficent Order to the attention of his friends. Show him that life is uncertain, and that the seemingly strong of to-day may, by some means not thought of, be the weak of to-morrow. The Financier's usual remarks were then called for, and a profitable meeting was closed.

San Francisco, 4.

An interesting meeting was held by the brethren of San Francisco, 4, on Wednesday evening, Feb. 2, 1882. This old pioneer, the first Lodge organized in this city, has made a record that is largely ahead of any Workman Lodge in this State in many respects. They now have over 100 members of carefully selected representative Workmen, and of the numbers who have had a membership in this, the "mother of Lodges," none have died. On this evening four candidates received the M. W. degree, which was conferred with such precision and merit by the M. W., H. C. Breede, and his aids, Geo. W. Crawford, F.; Lewis Ordenstein, O.; and A. De Elom, Guide, as officers, that called forth a high compliment from the Grand Master. Under head, "Good of the Order," Wm. H. Barnes, G. M. W., delivered an extended and statistical address that was received with much favor. Several brethren present had pleasant and complimentary words for the "model Workmen Lodge." A question was asked by one of the members of San Francisco relative to the mortality in our Order by consumption and heart disease. The Grand Master fully explained the safeguards and precautions used under the searching and elaborate questions taken by our medical examiners, after which each application was closely scrutinized by the Grand Recorder and Grand Master, and one that from any cause was deficient according to the highest medical standard, or from evidences of immorality or habitual and excessive use of ardent spirits, or habits that tended to shorten life, was rejected.

Sts. John, 73.

No. 73 is moving along in increase of membership in a substantial manner. On Thursday evening, Feb. 9th, the M. W. degree was conferred on one candidate, aged 36 years. There are now several applications before the Lodge, and it seems as though this term under the able corps of officers and the interest taken by the members of this Lodge will make this a very successful one. Under head "Good of the Order," Bro. Chas. E. Ewing, of Sts. John, made some very acceptable and valuable remarks, after which Prince E. Hilton, P. M. W., and L. Manzer, M. W. of Hercules, were entertaining and instructive in short speeches, which were well received. Bro. Edwrad De Courcey, of Sts. John, advanced some new ideas in some remarks that will be published, after which J. O. Jephson, P. M. W., in some congratulating words, closed a very interesting meeting.

Triumph, 180.

We are pleased to note the usual progress of this prosperous subordinate. The officers for this term, J. G. Boobar, M. W., H. H. Russell, F., G. White, O., J. G. Jackson, as Guide, are particularly efficient in their respective duties, and on this evening conferred the J. W. degree on four candidates in a very precise, dignified and pleasing manner. The work was given without the ritual, letter perfect; one application; seven elected to receive the M. W. degree, and one petition by card. Bro. Jas. Waterman, P. M. W., and a number of the leading members of Triumph, are quite active in securing candidates, and it is expected that they will pass the 150 mark this term.

Valley, 30.

Valley, No. 30, has commenced the new term with her usual prosperity. On Wednesday evening, Feb. 2d, there were six applications received, and the J. W. degree given to six candidates. The coming anniversary promises to be one of the events of the season. The following brethren have been appointed the Executive Committee: W. G. Buchanan, P. M. W.; Wm. Broderick, P. M. W.; Wm. H. Patterson, P. M. W.; Joseph Giusti; J. G. Dearborn, M. W.; C. Waller, Rvr; Geo. A. Case, P. M. W.; D. McLeod, P. M. W. This committee are experienced and capable men, and we are warranted in assuming that event will be worthy of Valley Lodge, and the grand and historic occasion.

Lodge Locals.

Hayward, 18.

EDITORS WATCHMAN:—Our Lodge is gradually improving. We now number 57 members, in good standing, notwithstanding that 19 members withdrew a few months ago to form a new Lodge, known as Eden, No. 204. We also claim to have good material, which we must give credit to our worthy Financier and Medical Examiner for his experience and trustworthy office. We also recommend to other Lodges that too much care cannot be taken to have our Order prosper. Yours, in C. H. and P., W. P.

Stockton, 23.

Stockton, No. 23, held a grand meeting on Friday evening, Feb. 3, 1882. The large attendance was in part caused by a proposition made on a previous meeting to purchase furniture, and remove to a new hall. Stockton, No. 23, has always had the reputation of having excellent officers and the present staff if not altogether as precise as her former officers are very good, and the work performed on this evening, that of conferring the J. W. degree on one candidate, was creditable and the Lodge meeting was an interesting and very pleasant one. There was one application for the degrees and one application by card. An exhaustive and detailed report made by the trustees, they being the committee appointed to look into the matter of procuring a new hall, was conclusive as to the propriety of remaining in their present quarters, which is a large hall, well furnished, and one of the best in the State. It was understood that there was some local and social attractions in the city this evening consequently an early closing was had, and the expected oratorical display was reserved for some future occasion. Stockton, No. 23, is in a very flourishing condition and sojourning brethren would do well to attend their Lodge meetings and become acquainted with the select and leading business men of Stockton. They will soon have 200 members, a body of hale and healthy men as is seldom seen. Being one of the pioneers they have lost but one member from disease, the balance who have died being the result of accident.

North Star, 213.

At Smith's River, Del Norte county, Cal., a new Lodge was instituted by Wm. H. Woodbury, D. D. G. M., on Jan. 27th, with 15 charter members. The following officers were elected: Jas. L. Becksted, P. M. W.; W. S. Stevens, M. W.; James S. Hursh, F.; Jas. A. Grow, O.; Daniel W. Finch, Rdr; J. F. Thorworth, Fin.; Peter Mass, Rvr; Chas. F. Dee, G.; Antoni Daneri, I. W.; Fred. Shank, O. W.; J. L. Thorworth, Med. Ex. The average age of this new Lodge is 34 years.

YOLO LODGE is doing well. The membership is 78, with two applications, who, if elected, will make an even 100. The names of officers were given in the Jan. 15th number.

Mt. Diablo, 91.

EDITORS WATCHMAN:—I notice in your paper of Feb. 1st the report of the Relief Committee, and among the Lodges that received assistance, I notice Mt. Diablo Lodge, No. 91, mentioned. We are not aware that our Lodge received any assistance from the fund of the Relief Committee that they have not been duly compensated for. The amount of some $61 or $62 was sent them a short time ago, and I believe, as they stated, was in full of what had been expended for Mt. Diablo, No. 91. The members of this Lodge tender their thanks to the Relief Committee for the attention shown Bro. W. J. Jarvis while at the German hospital. It is with regret that I inform you of the death of Bro. Fred. Kapp, of our Lodge. The brother had just received the M. W. degree on Jan. 20, 1882, and died Feb. 5, 1882. Bro. Chas. Ninner, of our Lodge, was accidentally shot in the leg and thigh, on Jan. 27th, but not dangerously. We hope he will recover soon. Mt. Diablo still looms up. Conferred the M. W. degree on two brothers last meeting, and had four new applications. All the Lodges in this district are in a prosperous condition. I must say that I find Point of Timber, No. 92, at the top of the ladder in the ritualistic work. They do their work all through without the aid of the ritual. Myself and Bro. Kirsch, P. M. W. of Mt. Diablo, No. 91, visited Martinez, No. 90, last Thursday evening, and found quite a large attendance. They conferred the J. W. degree on one, and had two or three new applicants. The Order seems to be growing more rapidly in this district this year than heretofore.—J. M. WILSON, D. D. G. M.

[Our Brother looks at the relief question in a wrong light. All members of the Order in good standing are relieved by the committee, and a minute made of it so as to bring it in the reports at the end of the term. When a brother is in distress, in this city, notably if he is from the country, the Relief Committee inquires into the case and render prompt assistance. It does not wait to hear from his Lodge, but renders him aid immediately, looking for reimbursement afterward. Such was the case with No. 91, and we suppose it is so with the others.—EDS. WATCHMAN.]

"Sound It Along the Line."

Ever onward and upward is the motto of the A. O. U. W., and with the success of the Order is the WATCHMAN'S progress. There are, however, some Workmen who are not subscribers, and we wish to draw *their* attention to the merits of our journal. Those of our readers who have been with us from the start, and also those who have come later, can do much to not only aid our enterprise, but also that of our organization. They have been with us, seen our work, and can best tell whether the WATCHMAN has not been an earnest advocate of the Order's interests.

Members of the A. O. U. W. have a pecuniary interest, which renders an able exponent of their rights and privileges of paramount importance. Therefore, every member of the Order should take the paper, read it, and if he has some friend who is morally and physically qualified, lend him the paper for the purpose of hastening action.

Members of the WATCHMAN family who have felt strength and received encouragement from a perusal of the Order's doings in its columns would do well, also, to pass it occasionally around to the lukewarm, that they may be partakers in the faith which moves them.

The privileges we now enjoy by reason of our membership will last while life is in us, and when we are gone others will be ready to fill our places. If the Order should ever perish, lukewarmness will be the rock upon which we will split, and one of the greatest preventives of this will be the enthusiasm that is kept alive by a careful reading of the WATCHMAN.

We will send copies free for samples to those who are willing to assist in the circulation of our paper.

PURCHASING AGENT.—Sister M. E. Hoag, of Silver Spray, is meeting with great success as an agent for the purchase of household articles, silverware, wearing apparel, etc. Having a good knowledge of the market price of goods, because making it a study, she is in a position to purchase anything a lady residing at a distance from the city cannot procure, unless at considerable expense. Ladies desiring Sister Hoag to chaperone them on their shopping excursions can avail themselves of her services by calling at 204 McAllister street. It will save money.

THE pure red clover blossoms and extracts of the same, for curing cancers and tumors and lost vitality, is a new remedy, and is recommended and prescribed by our leading physicians as a blood purifier and regulator of the system. It seems to be nature's remedy, as it is harmless and pleasant to the taste. To make a tea, and drink freely. The directions come with each package. F. C. Brownlee, agent, 1059 Mission street, San Fraocisco.

BRO. GEO. E. GERLACH, one of the charter members of Memorial, has had added to his already interesting family a fine boy.

Election of Officers, A. O. U. W.

PROTECTION, No. 16, Santa Clara.—Harrison Barto, M. W.; Fred. E. Farmer, F.; Jules N. Laederich, O.; Jno. A. Nace, Rdr; C. T. Brackett, Fin.; E. C. Bradbury, Rvr; C. H. Worthington, G.; H. S. Woods, I. W.; Jacob Meyers, O. W.; C. H. Worthington, Trustee; Dr. H. H. Warburton, Med. Ex. Reported by Jno A. Nace, Rdr.

HAYWARD, No. 18.—S. S. Cunningham, M. W.; A. Harrington, P. M. W., and representative to the Grand Lodge; Geo. Rue, F.; A. M. Bullock, O.; F. M. Dallam, Rdr; J. G. Cooper, Fin.; J. D. Austin, Rvr; A. Bradford, G.; A. Woodman, I. W.; C. Herman, O. W.; E. R. Jensen, Trustee; Dr. J. G. Cooper, Med. Ex. Reported by Wm. Pearce.

OAK LEAF, No. 35, Oakland.—W. J. Wilkenson, M. W.; J. R. Sturrock, F.; E. M. Gibson, O.; M. S. Baker, Rdr; D. S. Hirshberg, Fin.; Jos. Harris, Rvr.; J. W. Preston, G.; Alex. Donaldson, I. W.; D. Markell, O. W.; C. H. Dunton, Trustee; S. G. Tucker, Med. Ex. Reported by M. S. Baker.

OROVILLE, No. 40.—L. H. Simons, M. W.; L. S. Welch, F.; Joseph Willetts, O.; Geo. B. Springer, Rdr; T. A. Atchinson, Fin.; E. Marks, Rvr; E. Higgins, G.; R. Fisher, I. W.; J. H. Martin, O. W.; Wm. Schneider, Trustee; P. B. M. Miller and T. J. Jenkins, Med. Exs. Reported by Geo. B. Springer.

LOS GATOS, No. 76.—H. U. Ball, M. W.; Jas. H. Lyndon, F.; W. E. Rggers, O.; Thos. Wm. Cox, Rdr; Jas. Eddy, Fin.; J. E. Chase, Rvr; S. Dahl, G.; E. Ditto, I. W.; L. Berry, O. W.; Saml. Templeton, Trustee; L. J. Berry, Med. Ex. Reported by W. S. Walker.

BENICIA, No, 94 —A. L. Roberts, M. W.; E. F. Soule, F.; R. T. Marshall, O.; J. Binnington, Rdr; G. A. Hastings, Fin.; J. G. Johnson, Rvr; C. W. Trumbull, G.; P. D. Stewart, I. W.; F. Silva, O. W.; V. Newmark, Med. Ex. Reported by J. Binnington.

COVENANT, No. 97, Auburn.—Willson Hunt, M. W.; J. H. Ritinger, F.; A. C. Keeler, O.; F. M. Hoffman, Rdr; J. C. Hawver, Fin.; F. D. Adams, Rvr; A. Hinkle, G.; Julius Weber, I. W.; Jacob Roll, O. W.; J. H. Wills, Trustee. Reported by F. M. Hoffman.

KERN, No. 106, Kernville.—Alvin Fay, M. W.; N. P. Peterson, F.; J. S. Rawlings, O; J. B. Batz, Rdr; R. A. Martin, Fin.; A. Brown, Rvr; R. Phillips, G.; E. G. Martinez, I. W.; Frank Bole, O. W.; J. H. Johnson, Med. Ex. Reported by J. B. Batz.

EMPIRE, No. 112, Modesto.—E. P. Grant, M. W.; A. C. Guptill, F.; Wm. T. McGinnes, O.; A. E. Wagstaff, Rdr; J. N. Moad, Fin.; T. Wallace, Rvr; Chas. F. McCarthy, G.; Pascoe Grenfell, I. W.; A. S. Fulkerth, O. W.; H. Lewis, Trustee; W. J. Wilhite, Med. Ex. Reported by A. E. Wagstaff.

BALL MOUNTAIN, No. 140, La Porte.—S. S. Russell, M. W.; J. M. Mussey, F.; E. T. Perry, O.; Henry Maurer, Rdr; M. Rinehart, Fin.; Jas. Jones, Rvr.; J. W. Corderoy, G.; Jesus Bustillos, I. W.; M. Rinehart and J. M. Mussey, Med. Exrs.; S. S. Russell, Representative to Grand Lodge. Reported by Henry Maurer.

PASADENA, No. 151.—O. S. Barber, M. W.; L. C. Winston, F.; H. A. Wallis, O.; F. H. Heydenzeick, Rdr; S. Washburn, Fin.; J. S. Mills, Rvr; E. Millard. G.; H. Ridgway, I. W.; A. V. Dunsmore, O. W.; S. Washburn, Trustee; Dr. Kellogg, Med. Ex.

SAN DIEGO, No 160.—N. H. Conklin, M. W.; John Clark, F.; J. B. Hooker, O.; J. W. Wescott, Rdr; Gilbert Rennii, Fin.; E. W. Bushyhead, Rvr; M. G. Kellogg, G.; Henry Cook, I. W.; A. H. M. Seul, O. W.; L Winter, Trustee; C. M. Fenn, Med. Ex. Reported by J. W. Wescott.

CRESCENT, No. 166, Cacheville.—W. Millsap, M. W.; G. W. Wilson, F.; D. Nutting, O.; J. W. Cannell, Rdr; A. M. Ayers, Fin.; Geo. Wherry, Rvr; J. Westlake, G.; R. B. Johnston, I. W.; R. Aucker, O. W.; H. Kast, Trustee; J. Clark and Y. Ross, Med. Exs. Reported by J. W. Cannell.

SANTA BARBARA, No. 172.—W. D. Carter, M. W.; Guy White, F.; John T. Janssens, O.; L. D. Lilley, Rdr.; Frank Smith, Fin.; A. L. Lincoln, Rvr.; Walter Show, G.; Richard Dowell, I. W.; Wm. Smith, O. W.; Thos. R. Dawe, Trustee; E W. Crooks and R. F. Winchester, Med. Exs. Reported by L. D. Lilley.

SAN MATEO, No. 192.—G. H. Fisher, P. M. W.; Michael Brown, M. W.; Geo. Winter, F.; Chas. E. Proctor, O.; John J. Brown, Rdr; Wm. T. Young, Fin.; Wm. C. Alt, Rvr; Geo. Plouff, G.; Wm. Sandes, I. W.; Fred. Demara, O. W. Reported by John J. Brown.

OAK GROVE, No. 198, Oakdale.—H. W. Creason, M. W.; O. H. Wyard, F.; H. H. Aaker, O.; E. J. Perez, Rdr; Wm. Kemp, Fin.; A. J. Mann, Rvr; West Duley, G.; M. V. Mann, I. W.; H. L. Howe, O. W.; E. C. Crawford, Trustee; C. H. Osler, Med. Ex. Reported by E. J. Perez.

NAVARRO, No. 200.—Fred. A. Walton, M. W.; Eugene Peeples, F.; John H. Ekroth, O.; Wm. T. Wallace, Rdr; Charles A. Linscott, Fin.; John Humphries Rvr; Francis M. Burnshaw, G.; James S. Stewart, I. W.; Jurgen Lundt, O. W.; E. G. Lenfest, Trustee; Dr. W. A. McCornack, Med. Ex. Reported by Wm. T. Wallace. Representative to Grand Lodge, Fred. A. Walton.

HONCUT, No. 205.—C. Spillman, M. W.; J. E. Marston, F.; M. S. Bennette, O.; W. W. Burgan, Rdr; B. F. Darby, Fin.; J. Kitle, Rvr; V. E. Burdick, G.; J. C. Garsisler, I. W.; J. Haselbush, O. W.; C. Spillman, Trustee; O. C. Hokins, Med. Ex. Reported by W. W. Burgan.

The Wail of a Dying Soldier.

[The following wail of a dying soldier was found and preserved by Abram Loane, Jr., P. M. W. of Myrtle Lodge, No. 42, and one of the brave "California Hundred," in Andersonville prison in the month of February, 1865. It was written by a Union soldier a few hours preceding death by starvation. The tune as marked on the original manuscript is "Bingen on the Rhine."]

When our country calls for men, we come
From forge and store and mill—
From workshops, farms, and factories,
The broken ranks to fill;
We left our quiet and happy homes,
And those we love so well,
To vanish all the Union foes,
Or fall where others fell;
And in prison drear we lanquish,
And it is our constant cry:
O, ye who yet can save us,
Will you leave us here to die?

The voice of thousands tell you
That our hearts are weak with fear—
That all, or nearly all, of us
Were captured in the rear.
The scars upon our bodies,
From musket ball and shell,
The missing legs and shattered arms,
A truer tale do tell.
We have tried to do our duty
In sight of God on high;
O, ye who yet can save us,
Will you leave us here to die?

There are hearts with hope still beating
In our pleasant Northern homes,
Waiting, watching for the footsteps
That may never, never come.
In Southern prisons pining,
Meagre, tattered, pale and gaunt—
Growing weaker, weaker, weaker,
From hunger, cold and want—
Here your brothers, sons, and husbands,
Poor and hopeless, captured lie;
O, ye who yet can save us,
Will you leave us here to die?

From out our prison gate there is
A graveyard near at hand,
Where fifteen thousand Union men
Lie beneath the Georgia sand.
Scores and scores do lie beside them,
As day succeeds each day,
And thus it will be ever,
Till they all do pass away;
And the last can say when dying,
With upturned and bleaching eye,
Both Love and Faith are dead at home—
They have left us here to die.

A STREET CAR WHICH CARRIES ITS TRACK. The Accommodation Car Co. has begun operations here with a capital stock of $1,000,000, divided between the patentee, T. T. Prosser, and F. F. Cole, a real estate man. The object of the company is to build and equip a thousand cars and put them upon the streets of Chicago. The car is the patent of Mr. Prosser, and as regards present appearances is a queer, oglesome-looking craft, which carries its track along with it, and to all intents and purposes is designed to traverse any and all lines of streets. The car, which is of the ordinary kind, is mounted in the middle upon a truck which sits on four wheels, each about one foot in diameter, and which rest upon the ground, and are only held to the car by a set of wheel clamps. The car is designed to hold 50 people, and the owners claim that the more it carries the easier it runs. It will be stopped in the usual manner, and two horses will be required to pull it. The owners say they intend putting the cars upon the principal streets of the city and placing the cash fare at four cents and selling 30 tickets for $1.—*Chicago Times.*

TO TRANSFER a photograpic print to glass for painting or for other purposes, separate the paper print from the background by steaming it; dry thoroughly, and having given the warmed glass an even coating of clean balsam or negative varnish, place the face of the print on the surface thus prepared, smooth it out, and let stand in a cool place until the varnish has hardened. Then apply water, and with a soft piece of gum-rubber rub off the paper so as to leave the photographic image on the varnished glass.

CREAM OF ROSES.—Bro. John R. Williams, chemist and druggist at Stockton, is proprietor and manufacturer of what is known as balsamic cream of roses, for beautifying the complexion, softening the skin and producing that natural freshness that belongs to the rosy tint of good health. It is not used as an artificial means to change the natural complexion, but as a remedial agent to impart a healthy action to the skin of the body. It will produce a glow and freshness of complexion that make the old look young and the young fair and rosy.

BRO. WM. J. PETERS, a reliable and skilled mechanic, has opened a general job carpentering shop at 28 Geary street. Anyone wishing carpentering, jobbing or repairing in stores or houses, would do well to give him a call.

THE Mansion House, in Stockton, kept by Bro. J. D. Cross, is one of the leading hotels of that thriving city, and a place where families and travelers can have the best accommodations at reasonable rates.

BRO. J. DAVIS, P. M. W., of Magnolia, has fitted up fine tonsorial parlors at the corner of O'Farrell and Dupont streets, and is now ready with his corps of assistants to make the old look young and the young appear handsome.

WORKMEN GUARANTEE FUND ASSOCIATION,

Paying $1,000 as Directed in the Policy.

Only for Members of the A. O. U. W.

Average cost to each member about $8 a year. Endorsed by Grand Masters Barnes, also by Past Grand Masters Jordan, Brewer and Taylor, who are members of the Association. Send for application. Address or apply

List of U. S. Patents for Pacific Coast Inventors.

From the official list of U. S. Patents in DEWEY & Co.'s SCIENTIFIC PRESS PATENT AGENCY, No. 252 Market St., S. F.

FOR THE WEEK ENDING JANUARY 31, 1882.

252,985.—OVERALLS—C. Adler, Alameda, Cal.
253,035.—FRUIT CAN—F. B. Ginn, Oakland, Cal.
253,036.—SEALING CANS—F. B. Ginn, Oakland, Cal.
253,166.—BALANCED VALVE—W. D. Hooker, Oakland.
252,884.—STEAM COOKING APPARATUS—J. H. Linney, San Francisco, Cal.
252,889.—CABLE RAILROAD.—Wm. McCall, S. F.
252,966.—HYDRAULIC ELEVATOR—Geo. L. Pierce, Oakland, Cal.
253,121.—QUARTZ CRUSHER—Chas. P. Stanford, S. F.
253,106.—WATER CLOSET—Wm. M. Sack, Oakland, Cal.
253,107.—FILTERING FAUCET—Wm. M. Sack, Oakland.
253,131.—MOP AND SCRAPER—John E. Tiffin, Redding.
253,141—FORCE PUMP—M. L. G. Wheeler, Oregon City, Oregon.
253,145.—DREDGING MACHINE—Z. Williams, Oakland.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

Notices of Recent Patents.

Among the patents recently obtained through Dewey & Co.'s SCIENTIFIC PRESS American and Foreign Patent Agency, the following are worthy of special mention:

WATER CLOSET.—Wm. M. Sack, Oakland. No. 253,106. Dated Jan. 31, 1882. This improvement in water closets consists in a novel arrangement of a gate or valve which closes the bottom of the bowl, and is operated by appropriate mechanism to prevent at all times the upward escape of odors or foul air. In combination with this valve the inventor employs a chamber having within it a flexible diaphragm and pipes to admit water to each side of it alternately, so that while one side is being emptied the other will be filled. This diaphragm is connected by a rod and levers with a valve, and a cock is operated by a lever connected with the seat so that the admission of water upon one side of the diaphragm causes it to move and withdraw the rod and levers so that the valve may be opened at the proper time; but the valve is prevented from opening, while the seat is occupied, by a catch actuated at the same time with the opening of the cock. As the diaphragm moves back it forces a supply of water into the bowl. When the seat is released the cock is turned so as to reverse the flow of water and move the diaphragm back to its first position. At the same time the cock releases the valve and allows it to swing open and discharge the contents of the bowl into the soil pipe, and the return of the diaphragm closes the valve while supplying water to wash the bowl.

CABLE RAILWAY.—Wm. McCall, S. F. No. 252,889. Dated Jan. 31, 1882. This improvement in cable railways consists in a novel combination of rollers or sheaves, which are set upon a curve, so as to carry the cable around it and support it in the proper position, and at the same time allow the grip from the car to be moved around the curve in a regular line corresponding with the line of the slot, and be supported upon two or more of the sheaves at once during its passage around the curve. The grip is so constructed that it may be opened at any point in the curve so as to allow the cable to move through it while the car is stopped. The invention further relates to a means for guiding the cable while changing its grade, and for preventing its striking the upper part of the tube at such points, by means of a sheave or pulley supported upon a swinging arm, which is adapted to be moved out of the way by the passing grip, and is returned to its position after the grip has passed.

FILTERING FAUCET.—Wm. M. Sack, Oakland: No. 253,107. Dated Jan. 31, 1882. This invention relates to certain improvements in that class of faucets which also serve to filter the liquid passing through them, and is an improvement upon a patent issued to the same inventor May 10, 1881. It consists mainly in certain improvements in the construction, the principle being the same.

PARIS has a market for cigar stumps. In the wine saloons in the Place Maubert are a half dozen wholesale dealers who buy the stumps from gamins and poor old people. The length of the stumps counts something in the price. Much of this tobacco is sold to workmen, and much is also exported.

New Business Mention.

Williams' Balsamic Cream of Roses, J. R. Williams, Prop'r
Winthrop Portable Range, Chas. A. Brown & Son.
Blood Purifier, F. C. Brownlee, Sole Agent, S. F.
Goodwin's New England Club Sausage and Bacon.
Geo. A. Basler, House and Sign Painter, S. F.
L. B. Hoag, M. D., San Francisco.
Montgomery Market, Hoffman & Woenne, Prop's.
Bay View Market, Luke Stark, Prop'r, S. F.
Howard Black, Custom Shirt Maker, S. F.
Mrs. J. Bearby, M. D., San Francisco.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
B. W. CROWELL—Humboldt and Trinity counties.
D. W. KELLEHER—Merced, Stanislaus and Tulare. counties.
A. C. KNOX—Nevada and Placer counties.
E. A. WEED—California.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. The American Locomotive.

John Roach, the eminent American ship builder, in a recent address before the late New York Tariff Convention, said: "Now, I want to call your attention briefly to what we have done in building the locomotive. That will show the development of another American industry. Fifty years ago, we imported a locomotive engine from England, as a sample. I made an examination some time since as to the number of locomotives now in the United States, the cost of their construction, and how it compares with the cost of construction in other countries. The number of locomotives in use in this country Jan. 1, 1879, was estimated at 16,445, valued at $164,450,000. The number of cars in use, not including palace cars, was estimated low at 498,000, which would cost at least $600,000,000, making the value of locomotives and cars together $764,450,000. Besides, as much as one-tenth of the total now running must have been rebuilt, say five times, since 1830, at a cost of $382,225,000, making a grand total of $1,146,675,000, which is more than England has invested in ships. But besides this, we have built locomotives for export to all parts of the world, owing to the recognized superiority of the American locomotive.

"The Baldwin Locomotive Works alone sent out of the country from 1870 to 1880 over 520 locomotives, 152 of them to English colonies; and of all the locomotives used in the English colonies from 95% to 98% were built in the United States.

"The United States have exported since 1870 $20,000,000 worth of locomotives and double that amount of cars.

"We have then succeeded in building locomotives of such quality and at such prices that we have taken England's locomotive business away from her in her own colonies. Is there any reason why, when our ship building shall be equally encouraged and developed by extending our trade and making a demand for it, we should not build ships for those countries which have not the resources to build them for themselves?

"But then we are told that while we can build the locomotive and car we cannot build the ship, though that is built out of the same material and from the same forest and mine, and though the labor required to convert 100 tons of pig iron into locomotives is much greater than it is in the finished ship and just as high priced. But we had a policy for building the locomotive, by finding a use for it, and you see the result."

THE Joint Committee on the Death and Memorial Services of the late President Garfield, decided upon a programme substantially the same as that adopted for President Lincoln.

Making Hollow Rubber Balls.

The process of making hollow rubber balls, used by children as playthings, is quite curious and may be interesting to those not familiar with it. These balls have a solid surface and are made by a different process from the soft rubber balls (which are perforated by an opening) and are much more firm, durable and elastic. The sheets of rubber prepared for balls are cut into strips of double convex shape. The edges of the strips are moistened with a preparation of rubber and naphtha, by which they are joined firmly together, three of the strips being used for one ball.

This part of the work is done by girls, and a skillful girl can earn about $1.50 per day. When the strips are joined together, the ball is very near the shape of a Brazil nut. Before the last opening is closed, a quantity of carbonate of ammonia is put inside, which, when subjected to strong heat, will make the rubber expand and fill out the ball mold. The opening is then closed with the adhesive mixture, and it is placed in an iron mold of the size and shape of the ball desired. The molds are packed into frames in which they are subjected to the heat of a vulcanizer.

They are kept in place in the frame by iron rods along the side, and when the frame is full, iron plates at the end are screwed down tightly upon the molds to keep them in place. These iron plates are about three-fourths of an inch thick, and so strong is the expansive force of the rubber in the molds that they bend this thick iron rod into a curve. If one of the molds should work out of place while vulcanizing is in progress, the molds would fly out with a noise like the report of a dozen pistols, and the work is spoiled. The action of the heat does the rest. When the molds are opened they contain the perfect round balls with no mark of the places where the pieces were placed. The slight ridge made by the mold is ground off by a stone, and the ball is done.

TURNER has introduced in the House a joint resolution providing that Congress shall have no power to pass any act or resolution for the appropriation of any money or creation of any debt exceeding $10,000 at any one time, unless the same, on its final passage, shall be voted for by a majority of all members then elected to each branch, and the ayes and noes entered on the journal.

A PROFESSOR of French in an Albany school recently asked a pupil what was the gender of academy. The unusually bright pupil responded that it depended on whether it was a male or female academy.

Compound Oxygen Treatment.

We take pleasure in commending to the carefulattention of our readers the "Compound Oxygen Treatment." This treatment is becoming very popular as a curative agent, for all diseases of the lungs, and other respiratory organs, consisting principally in oxygen inhalation. Dyspepsia, diseases of the liver, and nervous derangements are also cured by this wonderful agent. A New England physician discovered this great remedy for disease after an almost fatal attack of pneumonia, the results of which did not leave him for months. The dispensers of this Treatment have some of the very best testimonials as to its efficacy from those who have used it. Among those who testified to its curative properties are such men as T. S. Arthur, the distinguished author and proprietor of the *Home Magazine*, and Hon. William D. Kelley, member of Congress from Philadelphia. The testimony that comes from persons all over the land who have been cured of diseases that were pronounced hopeless, in many instances, can be characterized as nothing less than marvelous. It is a source of gratification to be able to recommend a really valuable remedial agent, especially in that terrible disease, pulmonary Consumption. The writer can speak personally as to the beneficial effects of the Compound Oxygen Treatment, hence this notice of it. Drs. Starkey & Palen are regularly educated physicians, and had much experience and successful practice before adopting this Treatment as a specialty.—*Shore Line, Conn., Times, New Haven, Sept. 24th, 1880.*

A CANADIAN ACADEMY PROPOSED.—At the instance of his excellency, the Marquis of Lorne, the initiatory steps have been taken for the establishment of a Canadian Academy after the plan of the Academie Francaise, which consists of 40 men selected by the body itself from among the most notable men of letters in France. Lord Lorne has already set on foot the Royal Canadian Academy of Art, which will, we hope, yet grow to be a credit to the country, although had the number of academicians been somewhat smaller, the immediate honor of connection with it would have been more highly appreciated. The proposed academy is to be composed of six sections, representing English letters, French letters, history and archæology, mathematical and physical sciences, geological sciences and biological sciences. It is probable that the membership will be limited to 10 or 12 in each section. Dr. Dawson will likely be its first president.

Digestability of Bread.

The readiness of assimilation in digesting bread depends on its greater or lesser porosity, which is also dependent on the nature of the bread stuffs employed and the treatment of the dough. The less gluten the flour contains, the more compact will be the baked loaf, and the more gluten it has the more porous it will become. The cereal flour containing the most gluten is wheat flour; rye flour has less. The starchy component of the kernels of cereals are principally all nutritious matter, being no chemical combination with nitrogen. The starchy matter is changed during the process of baking into starch-paste, and is thereby made more easily digestible. The crust is still easier to digest, as it is the starch-paste converted into dextrine and sugar. It is, perhaps, advisable to have a little bran in the dough, or to have the kernels ground coarsely, producing Graham flour, for the branny particles, intermixed with the nutritious matter, mechanically irritates the inside lining of the stomach, inciting the peptine glands to discharge more of their digestive fluid.

As the nerves of the stomach lining of older persons are rather weakened, this mechanical irritation is decidedly to be preferred to the imitation induced by stimulant drinks or aromatic, spicy substances, which only produce a momentary increase of the discharge of the peptine fluid, while the branny particles of Graham bread act continuously and energetically. Bread must always be well salted, as it contains considerable quantities of alkali salts which would withdraw a great portion of salt from the system by making chemical combinations therewith.

Next to porosity of bread, its contents of water influence its digestability. Dry, old bread is easier to digest, as it must be chewed more than fresh bread; hence it will be better masticated, and the stomach will have less work. It is supposed to be known that mastication is part of digestion, saliva being as well an assimilator as the fluid of the peptine glands of the stomach.

For men of sedentary habits, corn bread would be hard to digest; wheat bread is better adapted to their requirements. The human body needs the daily supply of fatty substance which can be easily assimilated; thus, the mixing of the dough with milk is very good, the digestion of such bread being rapid and easy.—*United States Miller.*

WILLIAMS'

BALSAMIC

CREAM OF ROSES.

For Beautifying the Complexion, Softening the Skin and Producing that Natural Freshness to the Complexion not obtained by any other Preparation.

DIRECTIONS:

Apply to the face and hands at night, just before retiring, and apply a little in the morning, rubbing it well into the skin. After being in the sun any length of time, or riding when the wind has been blowing, a small quantity of the Balsamic Cream of Roses will prevent tanning or roughness, and is sure to bring to the complexion that ruddy and healthy glow so much sought for, and seldom obtained. Its action on the skin is to restore natural circulation to the blood.

Chas. H. Haile, Grand Receiver.

With this issue we present an engraving of one of the faithful servants of the A. O. U. W. As a pioneer and representative Workman in our Order, Chas. H. Haile, Grand Receiver of the Ancient Order of United Workmen of California for nearly five years, has made a record that will be held in remembrance as an example of honesty and continued faithful service. Bro. Haile has a commanding figure of medium hight, an expressive countenance, and is one of our solid men. He was born on the 5th day of Jan., 1832, in the town of Addison, Vermont. His father was an eminent physician, and his mother a noted woman who, at the age of 70 years, was comely and youthful in appearance, and who reached the age of 75 years.

At an early age, the subject of our sketch won the affections of a beautiful young lady of his native town, among the granite hills of New England. This union has been blessed with a fine family of six children—three boys and three girls. By occupation he is a horticulturist, and this business seems to be congenial and adapted to the refined taste of himself and accomplished wife. From an early age he has always taken a leading part in literary and social societies, especially those tending to the alleviation of the ills and miseries of mankind. In 1859 he joined the F. & A. M. in New York, and affiliated with Eden Lodge, San Leandro, in 1864. He has filled the several offices in that Lodge, and was its Worshipful Master four years, and is now Grand Marshal of the Masonic Veterans' Association of California. He is a member of the Good Templars; was a trustee of the Orphans' Home at Vallejo for four years; has held responsible positions in that organization, and is now D. D. G. W. C. T. for Alameda County. As a Workman, he has taken a prominent and active part in building and solidifying this Order. In his subordinate Lodge, Alameda, No. 5, he has been Recorder ten terms. On the 13th day of November, 1877, he was elected Grand Receiver, and has continuously held that office up to the present time, during which period there has been paid by him to the widows and representatives of our deceased brothers and for current expenses, the magnificent sum of $483,500.04, to Jan 1, 1882, and at the time of writing, the sum exceeds $500,000. This immense amount of money, which has been received in large and small sums weekly for a period of five years, and in turn paid out in a corresponding manner by our Grand Receiver, without a deficit of even so much as ten cents, makes a record that Workmen may well point to with pride and satisfaction. Bro. Haile is a man of warm and ardent friendships, generous impulses and decided opinions. Having been trained in a rigid school of rectitude, he admits of no compromise with wrong, and is always ready to champion the right and assist the weak whenever he can, regardless of aspersions or personal discomfort.

We have here given a hasty sketch of one who has been prominent in building up, cementing and crystallizing the Ancient Order of United Workmen on the Pacific coast—one whose diligence and faithful official conduct as the financial agent of our Order has aided its stability, success and confidence.

IT WOULD have been well for Iowa if it had a Grand Master of the same caliber as Michigan. At the time the Relief Law was passed three States voted in the negative—Michigan, New York and Iowa. Grand Master Sessions, in his report to the Grand Lodge of Michigan, Feb. 7th, gives utterance to the following noble

CHAS. H. HAILE, GRAND RECEIVER A. O. U. W. OF CAL.

sentiments: "As your G. M. W., I took a solemn obligation to obey all the laws, rules and requirements of the Supreme Lodge and this Grand Lodge, and hence when the Supreme Lodge sent the Relief circulars in the latter part of April, I forwarded them, as directed, to each subordinate Lodge in the jurisdiction." So did the Grand Master of Iowa take a solemn obligation to obey all the laws, rules and requirements of the Supreme Lodge (we suppose, however, with a mental reservation). But he thought lightly, and utterly ignored his solemn obligation, and sought to evade its fulfillment by taking refuge under a strained interpretation of a section of the Code of Iowa. If it is of such stuff that Iowa's officers are composed, heaven spare us their companionship! A jurisdiction under the system of the A. O. U. W. that will not give the trifle necessary to help a sister jurisdiction when in distress, has no right to a place in the Workman's fold.

THE District meetings will be of great interest, involving questions that may have a deal to do with the action of the next Grand Lodge.

IF THE Grand Lodges working for a separate jurisdiction keep on as they have lately been doing, the Supreme Lodge will soon be left without a clientage. Maryland has the requisite 2,000 membership, and has applied for a separate jurisdiction, New Jersey and Delaware being included in this Grand jurisdiction. The Grand Lodge of Massachusetts (which includes the New England States) has also over 2,000 members, and the necessary papers have been forwarded, asking for a separate jurisdiction. We suppose Texas will be next, as the membership there is rapidly approaching the 2,000 mark. Our brethren of the Nevada jurisdiction should realize their wishes within the next year. They have quite a large territory to work up, and it only requires a strong pull and a pull together to reach the desired end.

LOS GATOS, No. 76, will dedicate its new hal on Thursday evening, March 2nd. The exercises will consist of a musical and literary entertainment, to conclude with a ball. Distinguished talent is engaged, among whom is Miss Lois Singletary, the favorite soprano of San Jose. The Grand Master will deliver an address and dedicate the hall, and it is expected it will be the event of the season.

ON a recent visit to San Jose we met Bro. Eugene Lehe, Recorder of Stockton Lodge, 23. He reports this term as an unusually prosperous one, and the present applications will bring Stockton, 23, past the 200 mark.

IN the Supreme Recorder's summary for the month of December, New York shows 16,285 members, California 13,668, and Pennsylvania 12,589. Total membership of the Order, 108,503.

Public Health.

This is a subject in which the members of fraternal societies are greatly interested. If there is a heavy mortality, or an unusual amount of sickness, they are called upon to respond in a financial sense. The great majority of them belong to more than one Order, and consequently the heavy death losses which occur in beneficiary societies, together with the payment of amounts which a large sick list calls from the treasury, is a grievous burden upon the membership. The present great mortality is larger than at any time for the last five years. In January, in this city, there were 518 deaths reported. Now this heavy loss is out of all proportion to the size of the city, and there must needs be some prime cause for it. San Francisco has the name of being one of the healthiest cities in the world, and so it is; but there seems to be a total disregard for the proper enforcement of sanitary laws, and the consequence is that death stalks forth from its polluted sewers, bringing woe to many a happy family.

Who is to blame? Upon whose shoulders rest the responsibility? We have a city government, and one of its first duties, paramount to all others, should be the preservation of the public health. But it will cost money, a great deal of money, to put the city in a healthful condition. Of course it will, and if the proper remedies are delayed, it will cost a great deal more, besides the loss of many lives. It is also costing the members of our fraternal societies a great deal of money at the present time, and it will cost them much more if means are not adopted for the purification of the city.

The north wind is blamed for a great deal of the sickness at present prevailing. Yes, the north wind is very bad, but when this wind and the foul emanations from sewers sweep over the city, then those of low vitality are sure to suffer. Let anyone take a trip toward North Beach when the north wind is whistling down Montgomery avenue and they will have a taste, and smell also, of what the two agents are capable of accomplishing. The residents of this part of the city have complained loud and deep of the abominations existing in their vicinity, but it does not seem to have much effect.

It would seem that the public health would be a legitimate subject for discussion in the subordinate bodies of our fraternal societies under the proper head. It certainly is for the good of the Order that the city should be in a clean and healthful condition. Let the eloquence given to other subjects be bottled up for a while, and this real, live, earnest subject be thoroughly ventilated.

A CASE has occurred in Michigan in which the candidate made his own examination and recommended himself, and he refused to allow himself to be examined by any other physician. The Grand Master Workman approved of the course of the candidate but the Grand Recorder did not. The result was that the case was submitted to the Grand Lodge at its recent session, but what action was taken has not yet come to hand. However, it seems to us, on general principles, that the Grand Recorder was right. Because a candidate is a physician it is no reason why he should be allowed to examine himself. It is certainly to be expected that he would look upon his own physical condition in a favorable light.

Home Miscellany.

Kissed His Mother.

She sat on the porch in the sunshine,
As I went down the street—
A woman whose hair was silver,
But whose face was blossom-sweet,
Making me think of a garden
Where, in spite of the frost and snow
Of bleak November weather,
Late, fragrant lilies blow.

I heard a footstep behind me,
And the sound of merry laugh,
And I knew the heart it came from
Would be like a comforting staff
In the time and the hour of trouble,
Hopeful and brave and strong,
One of the hearts to lean on
When we think that things go wrong.

I turned at the click of the gate-latch,
And met his manly look;
A face like his gives me pleasure,
Like the pages of a pleasant book.
It told of a steadfast purpose,
Of a brave and daring will—
A face with a promise in it
That God grant the years fulfill.

He went up the pathway singing;
I saw the woman's eyes
Grow bright with a wordless welcome,
As sunshine warms the skies.
"Back again, sweet mother,"
He cried, and bent to kiss
The loving face that was lifted
For what some mothers miss.

That boy will do to depend on,
I hold that this is true—
From lads in love with their mothers
Our bravest heroes grew.
Earth's grandest hearts have been loving hearts
Since time and earth began!
And the boy who kissed his mother
Is every inch a man!

Eben E. Rexford.

Aunt Marston's Legacy.

Aunt Marston was dead, and I sat looking at the legacy she had left me in her will. "To my beloved niece, Nellie Stanhope, the faithful nurse, the loving comforter of my declining years, I bequeath my gold ball ear-rings, with the brooch to match, marked with my initials in black enamel." Thus ran the passage referring to me.

When my cousin, Lucinda Marston, handed me the little morocco case she could hardly repress a smile of triumph as she thought of the difference a few short weeks had made in our relative positions.

I had been brought up by Aunt Marston, had lived in ease and luxury all my life, while my cousin had been obliged for years to earn her own living by sewing.

I had always looked upon Greylands as my home, while she had never been invited to spend even a week at the delightful old country house on the Hudson since she was a child.

And now she had come into possession of the old homestead, and I, the favorite, whom she had hated and envied for so many years, was put off with this insignificant bequest!

"After all your toadying," she said, with a sneer, "it is too bad to be cut off with a shilling; but if Mr. Lewis,"—the other executor—"knows anything about it, they are worth a great many shillings, for he says they are 18-karat gold, and that Ormolu, who made them, would give you $50 for them to-day. However, you are welcome to them. And now I suppose you will see the necessity of looking about for another home."

The bitter, insulting words, the desolate, deserted feeling at being thus cruelly turned out of the only home I knew, overcame the unnatural calmness with which I had hitherto borne my irreparable loss, and I threw myself on my bed and wept, as I never in my short, happy life thought it possible I could weep.

I don't know how long it lasted, but when I became calm my heart still ached, but my brain seemed clearer, and I could look my situation in the face.

I was no sycophant; I knew that well, for I loved my aunt dearly, and had always given her a daughter's willing devotion, without one thought beyond the present; I even told Charley Burnett, to whom I was engaged with her consent, and whom I loved with all my heart, that "we'd better bide a wee"—for I could not leave my second mother to spend her last days alone, or cared for by hirelings.

Aunt Eunice had often said to me, "You and Charlie will not have to wait long, dear child, and I will see that your future is provided for." I did not care for myself, but I felt so disappointed for his sake when I found that I was left absolutely penniless.

I think now, as I look back, that after she became paralyzed, she wanted to say something to me about it; for, as she lay there so white and still, almost like a piece of statuary, the muscles about her lips would twitch as if trying to form words, and the ever-restless eye would turn on me with an earnest, appealing look like the yearning, pitiful expression of a dumb animal trying to make its sufferings understood.

But she died and made no sign, and now Charlie must plod in the old way, and I must try to earn my own living, for I had made up my mind that I would never be an additional burden on the poor fellow.

I threw the jewel-case from me with a sigh of disappointment as I thought it all over, and then, ashamed of myself, took it up again and kissed the well-known trinkets, in fact the only ones my aunt ever wore, and put them tenderly away among my other treasures—her gifts and Charlie's—in the trunk I was packing.

Alas, for the frailty of human resolutions. Charlie would not hear of my earning my own living, and, though he did not exactly threaten to commit suicide if I refused, he looked so utterly miserable and forlorn that I was forced to reconsider my decision.

Charlie and I are quite old married folks now, and four little, curly-pated, restless bodies tumbled about in the small, poor room that serves me as a bed-room, sitting-room and nursery, coming to mamma with their small hurts and pains to be kissed well again and petted, while often my heart and head both are aching.

So many little mouths to feed, so many little limbs to clothe and sew for; eight little feet that are never still to cover with shoes that wear out so fast.

It is no wonder that Charlie has to wear his coat till it is threadbare, and my only best dress is my old black silk made over and over again, which, with lace ruffles at the wrists and throat, and Aunt Marston's legacy, forms my gala-day toilet.

I would not complain for myself, but Charlie looks so pale and tired, and his cough gets worse and worse every day. If he could only go in the country for a month, the doctor says, rest himself, keep in the open air, drink plenty of milk and take some gentle exercise, such as a little rowing or riding, he would get well.

My head aches with thinking how to get the money that will save Charlie's life. My darling husband, so devoted, so unselfish, depriving himself of even the smallest indulgence for me and our little ones!

I think bitterly on the unequal distribution of the good things of this world; so few have all, and so many have nothing; but when I say so, Charlie laughs and says I'm a little communist, a dangerous character, and should be suppressed.

As usual, while I sit sewing, I am devising a thousand impracticable schemes, when my reverie is interrupted by my elder boy, Robert.

"Oh, mamma! see those beautiful ponies!"

I look out and see a phaeton drawn by a span of black ponies, and seated at her ease, her lap-dog beside her, I recognize my cousin, Lucinda Marston.

How circumstances have changed! She and her dog in my place. I and my children living a life of privation! My husband dying for the need of the money she lavishes on her horses and dogs in a week!

I cannot help a reproachful feeling toward my aunt as I reflect on her capricious treatment of me. At sight of that cruel face I live over again that last dreadful interview when my cousin gave me the jewels. Her words rang in my ears once more, but with a new meaning.

"Ormolu would give you $50 for them," she had said.

"Fifty dollars!" I exclaim aloud. Fifty dollars means rest, country air, rowing, riding, life and health for Charlie.

I opened the satin-lined box, and looked at the yellow baubles, that smiled and twinkled in their soft bed, as if they were glad they were going to be of some use at last.

"Oh, you treasures!" I said, and with a thankful heart.

While I put on my hat and shawl, I had mentally made away with half my legacy, for I had bought Charlie an entire new suit, nice, warm flannels, and all, and barely left him enough to pay his board with in the country.

Carried away by the excitement of the moment, I scarcely knew what I was doing till I found myself in the palatial store at Blank street, and heard a gentlemanly voice say, in answer to my question: "Will you please wait a moment, miss?" while he spoke to an elderly man, who in a while came to me and said:

"Would you mind telling me, madam, how this set of jewelry came into your possession?"

My heart sank. There seemed to be something of a doubt as to whether they had been honestly come by.

"Certainly not," I said. "They were left to me by my aunt, Miss Eunice Marston. You may perhaps remember that she bought them here."

"Will you give me your name and address, please?"

I did so, and found that the young man knew my husband well; had also remembered having seen me in the store with my aunt.

"Do you know madam, what these jewels are worth?" questioned the elder gentleman.

"About $50, I suppose," I said.

He took one of the earrings out of the case, and giving a little twist and a light pressure of the small gilt knob at the lower side of the ball, it opened in two parts; taking off the golden envelope, he held up to my astonished eyes an immense solitaire diamond that sparkled and blazed like a star as it trembled in his hand.

"The earrings alone are worth $10,000, and with the brooch, which opens, too, you see, the set is worth about $25,000.

The words had no meaning to me; everything faded before my eyes—all was darkness.

When I came to my senses I was lying on a lounge, and a sweet-looking lady sat by me bathing my head. When I was sufficiently recovered to think of what had happened, and was assured that it was not a dream, I had another interview with the gentleman, who, like the genii in an Arabian story, had evoked such wonders from a simple golden ball.

Upon my signifying my desire to sell the jewels an agreement was made, and I went out of the store a rich woman, with Ormulo & Co.'s check for $20,000 in my pocket.

When I reached home, Charley stood at the front door waiting for me, looking anxious, poor fellow, for no one could tell him where I had gone, and it was very unusual for me to be out when he came home.

He must have thought I had gone crazy, when, putting the check in his hand, I threw my arms around his neck right there in the vestibule, and, crying as if my heart would break, said:

"Oh, Charlie! Oh, Charlie!" Then when he had taken me into the house I drew all my little ones together in my arms crying, "Oh, my darlings! my darlings!"

When my excitement had abated somewhat, I thought of the precious paper.

"Where is the check?" I said.

"Check!" said Charlie, blankly; "what check?"

"I gave you a check for thousands of dollars!" I excitedly answered.

"Poor child!" said Charlie, "poor darling, trouble has turned your brain."

But upon my insisting, very much as one humors a sick child, he consented to humor me, and pretended to look for it.

"Here is something, papa," exclaimed Amy, as she put in his hands a crumbled bit of paper she had picked up in the hall.

I can see the expression on his face now. I do really believe my dear husband, for one minute, thought I had, in my insanity, been guilty of forgery, burglary, highway robbery, or some dreadful thing. It seems but yesterday, and yet five happy years have gone since then, and we have a house of our own, with a cozy library full of books for Charlie, and a large, sunny, lovely room for the children's nursery.

You wouldn't know Charlie, he is so rugged and brown. He is now cashier of the bank in which he began as an errand-boy.

We are not rich, by any means, but have everything we need and many luxuries.

No matter, Charlie any my darling children are happy, and I wish aunt Eunice could look into my grateful heart to-night—a heart so filled with a sense of all my blessings that I can scarcely see through the happy tears that fill my eyes, to write these few last words.

HOME.—Rev. W. J. Smith recently lectured at the Central Presbyterian Tabernacle upon 'Some Family Secrets Told." The theme of the discourse was the home circle and the necessity of preserving all its tender influences. "Go with me," said the speaker, "to the home of the man who spends his time away from his family, and I will show you where all is strife and contention, or ignorance, or discomfort, or worse. We have got to be home bodies to enjoy to the fullest extent the charm of home." The lecturer then described the different homes to be met with; homes where the wife scolded the husband and the husband rated the wife; homes where, while the parents were Christians, no Christian influence ever entered. "Out of every thousand men but few experience that real, holy, ennobling sense of what home should be. Home must be something more than a place to eat and sleep in. Home grows upon those who seek to extract the greatest good from its influences. The prattle of the children, the interest of instructing them, the comforts to be derived from mutual fellowship, all increase, if we but humor the better impulses of our nature." The speaker concluded his address by pathetically alluding to the homes of our childhood days, drawing tears from many an eye as he painted in vivid colors mother's old arm-chair, and the place at the table so long unoccupied by the wayward son. The sermon closed with an exhortation to make home more of a heaven, a place of rest, where kindliness, love, Godliness and all the gentler attributes ruled.

QUIET GIRLS.—The quiet girl is generally worth studying, and will frequently astonish those who pretend to understand her by rising to hights, when she is summoned thither, which are unapproachable to her complacent and courted critics. Yet it may happen that quiet girls of the best type may lack the wit, the adaptability to that with which they have no sympathy, the glibness, and that unlimited faith in themselves which must be possessed by those who desire to attract the notice of the more shallow portion of society, who believe in noisy girls. All quiet girls are not endowed with genius and the virtues, for some are simply fools that would be noisy enough if they could find anything to say. But we protest against the habit which prevails of slighting quiet girls and speaking ill of them before they have been fairly tried, and of paying sickening homage to the conceited chatterboxes of little moral sense and principle. While noisy damsels will often turn out to be gaudy impostors, many quiet ones will amply repay the time, trouble or love which any one may bestow upon them.

A VERY important aid to warmth is a proper diet. Many women who suffer continually from a sense of chill below the tide of healthy life, have yet constantly at hand an abundance of nourishing food. But they eat one day at one hour, the next at another; they don't care what they eat, and take anything a flippant-minded cook chooses to send them; they wait for some one, when themselves hungry, out of domestic courtesy; and when their husbands are from home they take tea and biscuits because it is not worth while giving servants the trouble of cooking for them alone.

Do Our Women Dress Warm Enough?

In a late article on fashion, etc., in a popular journal, the writer touched upon dress reform encouragingly, a most important one to the women of to-day. by far the worst feature of bad dressing is the *insufficient underclothing* of women and girls. No wonder we find the mothers and daughters of to-day delicate, if not actual invalids. A thin covering of cotton cloth, leaving the arms and neck bare, usually constitutes the entire underwear of our women! A few, more delicate, wear knit, "half-wool vests," they are called, and though an improvement and better than nothing of the kind, are not warm enough nor of the proper shape for health and comfort.

A continuous garment covering body and limbs is greatly superior, and the heaviest flannel is none too warm for any woman, no matter what her occupation may be. Why ladies should object to dressing warm and healthfully is beyond comprehension; that they do not is obvious to all. Why they will insist upon distorting their fair proportions with steel-clad garments, looking as if run in a mold, is another remarkable conundrum, unanswerable of course. Just imagine the statue of the Greek Slave in stays and trail, paddings and shirrings! Quite as out of place is the rosy, busy farmer's wife or daughter in the same costume, or the tripping shop girl. Even the city lady of family, whose duties take her amid busy throngs in the streets, looks sadly uncomfortable if obliged to lift and carry heavy and trailing skirts. Let the infants wear the long, swadling clothes, or those women only who have nothing else to do or think of but their garments.

In like manner all corsets, and steel and bone ligaturing, belongs of right to the *deformed*, who need bracing and lacing into proper proportions.

In a conversation last summer with a rosy young daughter of a farmer upon the needless use of corsets, and their injury to growing girls, etc., she exclaimed warmly after admitting the soundness of my arguments, "I'd rather die than give up stays!" I sighed as I thought of her weak and congested lungs, and half-clothed limbs and feet. A few years, maybe, would change her opinion. What poor material such a girl must be made of! Give up her life rather than give up lacing! Ah, my dear girl, many a grave is filled by such as you, and more little graves are filled by just such mothers as you make!

What we want is to educate our girls to an independence in, and a knowledge of the importance of the subject of dress. And I have long thought that only in one way can this be done, and that is through making it popular by *fashion*. So the article I spoke of gave me hope that such a day was dawning, when we women would be free to wear a sensible, comfortable and healthful dress. In the city or in the woods, at the wash-tub, or out shopping there is need of an appropriate fashion, sensible and artistic, so that we can be clad comfortably and for the work to be done; warmly, as health demands, and artistically, as in the Grecian times when drapery was made a study, and the clothing of women a divine art.—*Jewell.*

Louie's Birthday.

"Oh, papa!" exclaimed Mrs. W. to her husband, the other evening after tea, "Do you know that to-morrow will be our little Louie's birthday!" "Yes," replied the father, "but you know we are poor, and during the past year we have not been very successful, and I fear the little fellow's fourth birthday will not be celebrated by the giving of any presents." "Well, papa," replied the wife, "we cannot let the day pass without some recognition of it." Harry, Willie and Fannie had told their mamma what they wished to give their little brother on his birthday. Willie was to give him a book with nice pictures in it; Harry would give him a false face, Fanny a little wagon. Now, in addition to this, Mrs. W. suggested that papa and mamma should prepare the table with some candy and cakes and four little candles; so, it was decided that this programme should be carried out. Accordingly, the next morning when Louie awoke he was dressed and marched into the parlor to behold the little table with the presents upon it and the candles all lighted. There was more pleasure depicted on his countenance than it is possible to describe. Little Louie fairly jumped for joy. Now, what had it cost the parents to furnish so much pleasure for their little boy? About 25 cents, and perhaps made an impression on his mind that he will remember with pleasure to the end of his life. We should not forget the birthdays of our little ones, but endeavor to present them with some token of remembrance, be it ever so small. Little children look to their parents to provide them with pleasure as well as necessaries, and if their desires are not complied with and their homes not made happy, they will seek pleasure elsewhere, and though, I regret to say it, may drift out into the sea of hoodlumism. In answer to the question "What shall we do with our children?" I answer, make home pleasant and attractive.

WHEN a man brags that he can tell a person's character by the color of his hair, it is rough to swindle him by steering him up against a man who wears a wig.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

I am composed of sixteen letters.
My 8, 9, 7, 5 12, is a masculine name.
My 1, 16. 2, 13, 9, 14. 12, is an animal.
My 15, 6, 11, 4, is a color.
My 10, 5, 3, is to occur unexpectedly.
My whole was a bold pioneer in the exploration of America.

JERRY.

Decapitations.

1. Behead a sort of spear and leave a bird.
2. Behead a small piece of meat and leave a plant.
3. Behead a bird and leave an agricultural implement.
4. Behead a mixture and leave a tree.
5. Behead a bird and leave a weed.
6. Behead to imagine and leave a rank.

MELANCTHON.

Charade.

All things are hastening my first to decay,
The flowers in the wildwood, the children at play;
The ferns in the meadow soon wither and die;
The leaves of the forest fall mournfully by.

The infant that's torn from its fond mother's breast;
The aged ones gone to their long looked-for rest;
The sun every day as it fades with the night,
Are reckoned my next when they're gone from our sight.

It is thus, ever thus, with our best earthly toys,
Our hopes and our pleasures, our sorrows and joys;
Our friends and our kindred, as they strive for the gaol,
Are making a rapid advance in my whole.

CROSSCUT.

Blanks.

[Fill the blanks with the same words transposed.]

1. The —— has some —— upon its back.
2. Persons at the sea —— are said to be having very much ——.
3. —— of the fox's tail remains in the ——.

UNCLE CLAUDE.

Transpositions.

1. Transpose a kind of cart and form a measure of length.
2. Transpose a nickname and form a conjunction.
3. Transpose a vessel used for boiling purposes and form a well-known toy.
4. Transpose a trifle and form to vomit; again, and form extent of duration.

MELANCTHON.

An Electrical Experiment.

A Cheap Toy, and Plenty of Fun for the Little Folks.

We sometime since published the following paragraph as something both curious and interesting.

"A curious electrical experiment is described in one of the French journals, as follows: A small pasteboard box is provided with a glass lid, which is coated on the upper surface with one or more thin layers of collodion, but not enough to render it opaque. A number of figures representing insects and the like, and made of cotton or sponge, are placed within the box. When now the collodion surface is rubbed with dry fingers in dry weather, the insects are made to move about in an interesting manner as they become electrified."

The Territorial *Enterprise* of February 7th, gives the following in the same direction, which will be found especially interesting to our young readers:

Over a year ago we published an account of this experiment. John S. Orndorf, of the firm of Orndorf & Adkison, book sellers and stationers, in wiping off boxes that had glass lids, discovered that particles of lint, bits of thread, paper and the like, flew up from the bottom of the box and attached themselves to the glass, moving about as though they were alive. Further experiment showed him that the same thing took place in the show-cases, when the glass of the tops was rubbed with a handkerchief, but on a larger scale. He made butterflies and other insects, some three inches long and two inches wide, of colored paper, also little balloons and a great many other things which, being placed in a show-case, performed in a really comical manner when the glass was briskly rubbed. The air here being dry and light, no collodion coating is required. The show-cases used in the experiment are eight or ten inches in depth, yet the artificial insects would readily hop from the bottom up against the glass and dart about from place to place. Often an insect would be seen to leave its place, swoop down almost to the bottom of the case, then rise and attach itself to the glass at another point, from one to two ft. away from where it had its first hold. Sometimes two or more of the insects would be seen to suddenly dart at one another, cling together and fall to the bottom of the case, as though fighting, and on touching the bottom of the case they would separate, and darting back take new places on the glass. When a lot of small insects made of the bright, artificially-colored mosses imported from Europe are used, the effect is very fine, and those who see the experiment for the first time can hardly be made to believe that the bugs, worms, butterflies and moths are not alive. The effect may be produced (in this climate) by laying a light of glass upon the lid of any ordinary paper box. The changes are almost as many and curious as those seen in a kaleidoscope.

Household Hints.

Our Eating.

The subject is not new. It has been scientifically, and therefore, to the masses, feebly set forth since Adam and Eve made apple-sauce in the first garden; but until some mighty power invades the sanctity of every kitchen with warning words of fire, the evil will go on. How often Miss Smith and I have talked it all over, but she says that until men's appetites change no reform can be effected.

Talk about woman's rights, dress reforms, temperance, meetin' revivals, and all the other good things, why, they are all necessary to the well-being of mankind. But who shall say that the necessity of all these does not originate in a foul stomach?

Mothers, do you realize that you are destroying your children, both body and soul, by stuffing them three times a day with pies, cakes and sweetmeats? See that trembling hand and nervous condition of your little one; that's tea or coffee! See the pimples on the face; that's grease or acid! Note the shrunken body and emaciated limbs; that's starvation, or hot bread and condiments! Hear the moans and mark the restlessness in sleep; that's stuffing with trash which stimulates the appetite to excessive indulgence and does not nourish!

Do you know that you have been deliberately destroying your dear ones for ages, just because your own tastes have become perverted to the worst form of dissipation? And why? Simply because it's the fashion!

Housekeepers are ashamed to be caught eating a plain meal, and will invariably apologize for a "picked up" dinner. Better apologize for the injury you do your family.

Men grumble at house-cleaning because there is no time to prepare the usual variety of body-destroying trash. Children early learn to cry for pie and cake when they should eat meat, bread and milk.

I really believe that such dissipation results in more evil than "hard drinking," because it is more universal. I know of many men who will not sit down to dinner unless there is pie or cake, or both, upon the table. What slaves it makes of the women! forever baking, brewing, cooking, stewing. One poor, feeble, over-worked woman said to me: "I am obliged to bake every day. My husband and the boys must have something nice to eat." And to look at them one would suppose mouthfuls of decayed teeth another necessity!

It is expensive as well as sinfully injurious. Thousands of Americans deprive themselves of every mental advantage, are without homes, forever moving here and there because the rents cannot be paid, until some unusually good dinner carries them to a cheap burial; just because their daily earnings find insecure investments in the contents of the market basket.

Women of California, let's get up a revival! A revival which shall shake the very foundations of our homes, and do our own preaching as well as practicing; let's make no more pies; let's burn up our rich cake recipes and give fruit—our abundant luscious fruit—instead. Let's eat something which will nourish these tired and growing bodies; let's no longer manipulate (that's a pretty big word, but some of you will know by experience what it means) our vegetables, so that the little ones will not know what they are eating; but let's give our households plenty of good, plain, wholesome food, carefully prepared; cooked "to a turn," served neatly, not too near together, and we shall soon see an improvement in the health and, therefore, in spirits, in household management, in business, and in all social and domestic relations; remembering we are responsible to God for the talents he has entrusted to our keeping and use, and that surely He will call for a day of reckoning.—AUNT JERUSHA.

Health Column.

Precautions Against Small-Pox.

It would be useless to deny that this disease has become epidemic in many parts of the United States, and is gradually spreading. Thus far Illinois has been the greatest sufferer by the disease. It is said that it has made its appearance in most of the counties of the State. Perhaps our physicians will find a hint in the following article, which we copy from the Philadelphia *Record:*

Many deaths from small-pox may be prevented by knowing how to treat the disease. A gentleman in this city found that a child of his, one with two good vaccination marks, had small-pox. The child was immediately placed in an upper room, which had been stripped of everything but the bed and bedstead, a chair and small table. The father took charge of the child, attended to everything; no one else was allowed to come on that floor; food was left in the second story hall, which the attendant, after washing his hands in carbolic soap, transferred to other dishes, which were washed and disinfected in the sick room. Nothing touched by the patient was allowed to go down stairs; all the slop was thoroughly disinfected with chloride of lime, carbolic acid and sulphate of iron; soiled clothing was covered with chloride of lime and immediately burned in the furnace. When the patient was well the bedding was sent to the small-pox hospital, the room thoroughly scrubbed, and the walls and floor wiped over with a solution of carbolic acid in water, just so weak as not to change the color of the wall paper. Then a good strong earthen vessel was placed in the room and about half a pound of chloride of lime put into it. On this was poured a half a pound of muriatic acid, and the door immediately closed. The chlorine gas thus generated permeated every crevice in the room. This was done three times a day for several days, the adjoining rooms being also filled with the gas. The result was, that with a large family, small-pox all around and many fatal cases in the neighborhood, no other member of the family had it, and that room is just as free from small-pox taint as if the disease had never been there.

A NEW DENTAL DISEASE.—A child, aged 10, whose teeth six months ago appeared to be all perfectly sound, came to me with toothache in the right lower canine. I found that a large portion of the enamel had disappeared from the front surface of the tooth, as if it had been chipped violently off; the dentine was all exposed, but there was no softening or appearance of decay. The disease, which has commenced in several of the other incisor teeth, appears first as a small white spot in about the thickest part of the front surface of the enamel, which it seems to penetrate; and then, suddenly disintegrating, this comes away, and exposes the remaining sensitive enamel and the dentine. This disease is altogether a different thing from the gradual decay, or wear at the neck of the teeth, frequently met with in adults, for in this case the patient is only 10; and, as far as I have been able to ascertain, the incisors and canines never have been known to decay in the manner above described. We are often at our wit's end to cope with the increasing prevalence of caries in the teeth of the very young; and if this be (as I fear it is) a new form of destructive energy, the sooner it is recognized the better.—

SUBSTITUTE FOR COD-LIVER OIL.—It is claimed by a writer in *Nature* that the oil of the "oolachen" or "ulikon," the candle-fish of Alaska, possesses all the medicinal qualities of cod-liver oil. This fish has long been an ichthyological curiosity, and has been noticed by almost every traveler who has visited the coasts of British Columbia and Southern Alaska. It is a small silvery fish, averaging about 14 inches long, and in general appearance much resembling a smelt. It is the fattest of all known fish, and affords a very superior oil when tried out. Dried, the fish serve as torches. When a light is needed, the tail is touched to the fire, and they will burn with a bright light for some time. No description can give an adequate idea of their numbers when ascending the rivers from the sea. The water is literally alive with them and appears to be boiling. These fisheries appear not to have been hitherto utilized except by the natives, who esteem the ulikon as a great delicacy. The oil at present is said to be gaining a high reputation in this country, and has recently been introduced into England, where it will probably take "a prominent place as a medicine."

A HORSE WITH THE SMALL-POX.—A horse in St. Louis is recovering from small-pox. The horse was taken sick a month ago, and in a short time large boils made their appearance all over his body, and the hair fell out, until the animal looked as bare of hirsute adornment as Barnum's famous hairless horse. The formation of the sores and their development were identical with the development of small-pox cases. The animal suffered a great deal, and is now only convalescent, the postules passing out of the flesh and the hair beginning to sprout.

A PREVENTIVE OF NEURALGIA.—A new invention as a preventive of neuralgia or rheumatism is a pine-wool vest which fits the body closely. In addition to their being made of this fabric, whose healing properties are well known, they are lined with chamois leather, which is perforated, so as not to check or retard the natural action of the skin.

Worth Knowing.

ARTIFICIAL ONYX.—Mr. A. Dreher has invented the following process for converting ordinary agate into onyx: The dressed stones are first placed into nitric acid, to extract the compounds of iron and other metals, then dried and calcined to remove the remnants of nitric acid. They are then soaked in a solution of 220 grains of caustic potash or soda in one litre of water until saturated, and washed in water. By placing them again in nitric acid and washing, the alkali is removed from the outer surface of the stones, after which they are dried and thoroughly calcined. The stones thus treated are completely bleached and white, while their outsides are rendered porous, so that they can absorb coloring solutions, which gradually shade off into white, as in natural onyx. They are finally engraved, giving colored reliefs on white grounds.

BRONZING ZINC.—Good results are said to be obtained from this method of coppering and bronzing zinc: Prepare a solution of 15 parts of blue vitriol, and one of 19 parts of cyanide potassium, and mix them both together. Incorporate this liquid well with 160 parts of pipe-clay, and rub the resulting semi-fluid, by means of a linen rag, on the previously cleaned object. For bronzing, take 15 parts of verdigris, 19 parts of cream of tartar and 30 of crystallized soda; reduced them to powder, and dissolve them in the necessary amount of water. Mix this liquid with 160 parts of pipe-clay, and then proceed as above directed. This is another process: Take 15 grammes of blue vitriol, 20 of calcined soda and 32 cubic centimeters of glycerine, and when these substances are thoroughly incorporated mix the paste thus obtained with 80 grammes of pipe-clay. The mixture is to be applied as above described.

TO MAKE GLYCERINE LEATHER POLISH, mix intimately together three or four lbs. lamp-black and one-half lb. of burned bones with five lbs. glycerine and five lbs. syrup. Then gently warm two and three-fourth ounces of guttapercha in an iron or copper kettle until it flows easily, then add ten ounces of olive oil, and, when completely dissolved, one ounce stearine. This solution while still warm is poured into the former and well mixed. Then add five ounces gum senegal dissolved in one and one-half lbs. water, and one-half ounce of lavender or other oil to flavor it. For use it is diluted with three or four parts of water. It is said to give a fine polish, is free from acid, and the glycerine keeps the leather soft and pliable.

A NEW use for photography, in connection with the higher arts, has been found in the discovery that it may be relied upon to detect any restoration or tampering with old paintings. On recently examining the first proof of a well-known Madonna, in the British National Gallery, the photographer observed a disfiguring blur over the forehead. No such blur was discernible in the original, except upon close inspection with the aid of a magnifying glass. The microscope examination showed that the restorer had repaired some casual damage with a skill that reproduced the color and the texture of the painter; but he had not used the same pigments, and this was instantly detected by the subtle chemistry of light.

TO GILD STEEL.—This metal may be gilded by means of a solution of gold in ether. To do this a quantity of gold is dissolved in nitro-muriatic acid, and then boiled until the liquid evaporates, when the residue is dissolved afresh in water, to which is added three times as much sulphuric ether. The liquid is then left for 24 hours in a bottle, tightly corked, after which time it will be seen to float on the surface of the water. If the steel is then dipped into it, it will become gilded immediately, and if designs have been painted on the surface of the metal with any varnish, a beautiful specimen of a steel and gilded surface is obtained. For other metals the galvanic process is employed.

IMPROVED TIN CANS FOR PRESERVED FOODS. It is stated that a very simple and neat improvement has been effecten in the preparation of the tin cans now so extensively used for preserved foods. The body of the can has a beveled rim, upon the slope of which the cover is soldered. When the cover is smartly tapped round the edge, it is expanded, and the solder joint broken by the wedge action of the bevel. The can is thus opened without injury to the lid, while the present inconvenient and even dangerous process for cutting open these air-tight cases is entirely avoided. The improvement involves no additional cost, and the soldering is applied externally.

STAINS OF OIL PAINT may be removed with bi-sulphide of carbon; many by means of spirits of turpentine; if dry and old, with chloroform. For these last, as well as for tar spots, the best way is to cover them with olive oil or butter. When the paint is softened the whole may be removed by treatment, first, with spirits of turpentine and then with benzine.

LAMP black has been found by M. E. Mercadier to act like selenium in radiophony. Instead of selenizing one of the surfaces of the double-coil receivers, he blackens it with the smoke of an oil lamp, taking due care, however, not to carbonize the parchment paper which isolates the metallic coils from each other.

MASONIC.

Officers Grand Lodge. — CLAY W. TAYLOR, Shasta, G. M.; JOHN QUINCY ADAMS, Vallejo, D. G. M.; MOSES HELLER, G. Treas., S. F.; A. G. ABELL, G. Sec'y, S. F.

SAN FRANCISCO, Jan. 20th, 1882.

To the Masons of California: DEAR BROTHERS:—The Masonic Fraternity of Ireland have, for many years, supported two schools, one for boys and one for girls, where the destitute orphan children of members of the Craft are provided with a home and education, and are in due time given a start in a life. A practical and substantial charity of this kind needs no words of commendation. The accommodations for the girls school proving inadequate for the large number of scholars to be cared for, it was decided to erect more commodious buildings. This has been done at a cost of over £12 000, or $60,000, contributed mainly by the Freemasons of Ireland during the past three years. A further sum of £2,000 is required to defray the cost of furnishing the school, providing a library and appliances for teaching and recreation, etc., and enabling the Governors to open the school, free from debt, in May next. To raise this amount, a grand Masonic fair will be held in the exhibition palace, Dublin, in Easter week, under the patronage of Her Excellency, the Countess Cowper, the Duke of Abercorn, Grand Master, and a large number of the nobility and gentry, members of the Craft, together with their ladies. The Grand Secretary of the Grand Lodge of Ireland has asked the undersigned if he could aid the good work by sending some articles, purely *American or Californian*, which would on that account prove a feature of the fair, and aid materially, from a financial point of view. Articles of American or Californian manufacture, curiosities, mineral specimens, petrifactions, photographs or Chinese curiosities would be gratefully received from any brother having such, and willing to donate them to aid so worthy a cause. Articles sent previous to March 1st, addressed to the undersigned will be thankfully acknowledged and duly forwarded.

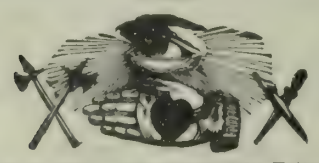
Trusting, Brethren, that this appeal may meet with a response which will prove a substantial aid to the undertaking, and be another evidence of that generous charity which has ever actuated the Masons of California, I remain, Yours truly and fraternally, JOHN H. GRAY, Representative of the Grand Lodge of Ireland, near the Grand Lodge of New York, 311 California St., San Francisco.

I, Clay Webster Taylor, Grand Master of Masons in California, do hereby certify that Brother John H. Gray, who has signed the foregoing, is the Representative of the Grand Lodge, F. & A. M., of Ireland, near the Grand Lodge, F. & A. M., of New York.

Given under my hand at San Francisco, Cal., this 20th day of January, A. L. 5882.

CLAY W. TAYLOR, Grand Master of Cal.

Donations will be received to March 15th, 1882. It is stated that the object of this call is meeting with great success among the Masons of this State.



Knights Templar's Conclave.

One of the greatest events that will have occurred in the history of California is fixed to take place on August 21st of next year. It is that of the Triennial Conclave of Knights Templar, which, at the invitation of the Grand Commandery of California, and by the consent and acceptance of the other Commanderies throughout the Union, was arranged to be held in San Francisco. The last Triennial Conclave was held, as will be remembered, at Chicago in 1880. The amount expended at Chicago was enormous, amounting in all to some $95,000, not including expenses.

AFTER the stated communication of Welcome Lodge, F. and A. M., Saturday night, Jan. 28th, the brethren were surprised by a peremptory command from the ladies of the Eastern Star Chapter to repair forthwith to the residence of Dr. L. M. Lovelace, where a tempting feast had been prepared by these same ladies, who for once had exemplified their ability to keep a secret, for not even the husbands and brothers involved knew anything of the plot until the invitation was sprung on them when about leaving the Lodge-room. It is unnecessary to add that it was a most enjoyable occasion.

Indp't Order of Odd Fellows.

Grand Officers—DAVIS LOUDERBACK, G. M., San Francisco; LEON D. FREER, D. G. M., Oroville; D. M. BURNS, G. W., Sacramento; W. B. LYON, G. Sec'y, San Francisco; H. B. BROOKS, G. Treasurer, San Francisco.

Letter from a Prominent Odd Fellow.

Through the kindness of a friend we are permitted to print the following letter from W. F. Slater, P. G. M. of Illinois:

Looking over my traveling card of last year preparatory to returning it to my Lodge, I am led to the reflection of how much its possession added to the pleasure of my visit to California one year ago. How many new and pleasant acquaintances it added to my list, and how many happy, and, I trust, profitable evenings I spent through its privilege.

It is a matter of surprise to find how many Odd Fellows there are that place so little reliance and confidence in a card, that they will start from home on long journeys without the possession of one. They little realize what a faithful companion it might prove to be. It is certainly one of the grandest privileges in our Order, a letter of introduction socially and financially when properly used and appreciated. Not long ago a German and his family fresh from the Fatherland, arrived in this city, strangers in a strange land, sick and in want. When all other resources failed he produced his traveling card and soon found faithful friends that took charge of him and his family, at death gave him respected sepulchre and raised sufficient means to send his family home to Fatherland. This card was a treasure of untold wealth to him and family, even money could not have brought the respect and attention this card produced.

It is a sad thought to me that after so many years that I have had the privilege of carrying with me on my card the respected and honored name of James L. Ridgley, hereafter it will be no more.

On Monday, Jan. 16th, in the afternoon we had a visit and address from P. G. S., James B. Nicholson, of Philadelphia. It was one of his happiest efforts, and held the undivided attention of his audience for over one hour. It was a grand address, and it is to be regretted that so few could find time to leave their business to listen to such a faithful and true exposition of the principles of Odd Fellowship. In the evening the Wildey Association had a grand banquet in commemoration of the birth of Thomas Wildey. After a bountiful feast of good things to eat, we had "a feast of reason and flow of soul." Many P. G. R.'s and P. G. M.'s were present from different parts of the State and added interest to the occasion in flowing wit and humor. Indiana was represented by the presence of P. G. R.'s Underwood and McQuiddy. The occasion brought to my mind the many scenes of enjoyment participated in last winter in California. Although on not so extensive a scale, yet not the less enjoyable. The Veteran visits; the literary and social club meetings; the Lodge meetings; all I hold in agreeable remembrance. The club is an institution fraught in wisdom and carried out in pursuance of its birth. It has evidently done more good to cement together a united brotherhood and advance the interest in the work of the ritual than any organization connected with the Order.

In my extended observation I feel free to say there is no jurisdiction where the work of the Order, or where its principles are more strictly adhered to than in the jurisdiction of California.

A few evenings since I met in one of the Lodges a visiting P. G., from California. After the initiation ceremonies were through with, he was called on for some remarks. In his talk he seemed to imply that the ceremonies lacked that interest and perfection he had been used to in his own jurisdiction, yet his Lodge is far remote from San Francisco where we would suppose the instruction and training in the work would not be so perfect as under more immediate supervision.

The Odd Fellows of Oakland, and especially Porter and Harbor Lodges, I hold in pleasant remembrance.

California has just reason to be proud of its Lodges, its work; the influence it throws around society, and the great good it is doing to fellow man.

I regularly receive the *Weekly Call* and eagerly scan its columns for the news of the Order. In the last number of December I perused an interesting article under the head of reliability of death as to age. In the present age of mutual benefit associations, great effort has been made to figure up rates, but the article alluded to seems to upset the theory that a regular death rate can be correctly established. I have always held that a well preserved man at the age of 50 has just as good chance of life for 15 or 20 years, as the young man of 21 has for the same length of time. Yet in most of the associations the man of 50 is charged a rate nearly double as large as the young man of 21. I hold membership in one of these institutions where there is no discrimination as to age, and it has flourished far beyond the expectation of its organizers. At death they refund the full amount of assessments paid, in addition to the benefit. The last annual report showed a surplus of about $80,000 in the treasury. About 30 years ago we had in the Grand Lodge of Ohio a very respected and intelligent member who was constantly figuring up and urging a system of grades for dues and benefits, so much so that he acquired the cognomen of "Vital Statistics." He prophesied that we would soon break down under the then system, but after so many years we find that Odd Fellowship is in as good financial condition as ever it was. I hold that so long as a member is in good standing, there should be no discrimination, and it has always been my regret that the discrimination in regard to degrees was ever adopted and allowed by the Sovereign Grand Lodge.

Chicago, Ill., Feb. 10, 1882.

Knights of Pythias.

Grand Officers—S. L. TERRY, P. G. C., Stockton. JOHN H. HARNEY, G. C., S. F.; GEORGE CANTUS, G. Treas., S. F.; A. G. BOOTH, Grand K. of R. & S., San Francisco.

Visit to Brooklyn, No 3.

On Monday evening, Feb. 13th, Grand Chancellor Harney, accompanied by D. D. G. C. Frank Mitchell and the G. M. at A., Frank A. Merguire visited Brooklyn Lodge, No. 32, at their comfortable hall in East Oakland. The brethren of Brooklyn having been notified of the visit, a committee was appointed by them to meet and escort the Grand Officers, but through some oversight, they missed each other at the Point, but subsequently exchanged merry greetings in the Lodge room. There were present delegations from Alameda Lodge No. 49, Live Oak No. 17, and Liberty No. 35. The large hall was packed, and every one seemed determined to not only enjoy themselves, but to also make it pleasant for their visitors. The reception of the Grand Chancellor amounted almost to an ovation, and his remarks under "Good of the Order," were listened to with marked attention, and at their conclusion were loudly applauded. Remarks of an encouraging character were also made by D. D. G. C. Frank Mitchell; G. M. at A. Frank Merguire, after which a recess was declared and a committee, who were indeed well up in their business, served the visiting brethren with coffee, etc., *ad libitum*. We were much pleased to notice among those present, P. G. M. W. Fish, of the A. O. U. W., who is Vice Chancellor of this Lodge. "Good of the Order" being resumed, Vice Chancellor Fish was called upon to make a few remarks. Bro. Fish rose to respond, when the incorrigable Mitchell, raised the point of order "that it was not proper to have Fish after coffee." This sally caused shouts of laughter, which were repeated again and again, when the genial Fish announced the point of order well taken, and resumed his seat; but was prevailed upon to assume the perpendicular once more, and as usual delivered one of his telling short addresses, which was well received by the brethren. The following named being called upon, viz: P. C.'s Downey, McCarty, Wilkinson and Larkins of Live Oak, No. 17; and also C. C. Samuels and V. C. Dimmick of that Lodge; P. C.'s Colby, Roundey and West, of Brooklyn No. 32, P. C.'s Breahoff and Gunn of Alameda No. 49, and last, but not least, Bro. Anderson, of Liberty No. 35, who made the humorous speech of the evening, and his many happy hits elicted shouts of laughter and applause. The C. C., Bro. Olanie, and P. C. Luth, of Brooklyn, made some interesting remarks, after which the Lodge closed, and it was time, for the whistle of the last train for the city was heard, and the Grand officers and visiting brethren, escorted by the entire membership of No. 32, reached the depot in time. This visit revived in the breasts of all who were present a renewed interest in the Order and a determination to increase the membership.

TRIUMPH LODGE, No. 47, K. of P. at San Jose, is getting on finely. At their last meeting six candidates were initiated and eight applications were made for the degrees. Capt. Gordon, Chancellor Commander, anticipates a very large increase of membership during this term. No. 47 is taking steps to form an endowment section of the best men. They feel very proud of their new material, as they are enlisting the best men of San Jose and vicinity.

Native Sons Golden West.

Grand Officers—FRANK J. HIGGINS, P. G. Pres. San Francisco; H. CLAY CHIPMAN, G. P., Sacramento. GEORGE B. BALDWIN, D. G. P., Marysville; HENRY LUNSTEDT, G. Sec'y, San Francisco.

Sacramento Parlor. No. 3.

The members of Parlor No. 3 are proud of the success of their 5th annual party, which was held in the Assembly chamber of the State Capitol, Friday evening, Feb. 9th. It is such events that serve to bring the young Order into prominent notice and attract new converts to its Lodge rooms. Lest it would appear exaggerating the affair by writing an extended description ourselves, we clip the following notice from the Sacramento *Daily Bee*, which is as near correct as a report can be, concerning the party:

A most brilliant scene was presented in the Assembly chamber at the State Capitol Feb. 9th, on the occasion of the giving of the fifth annual party of Sacramento Parlor, No. 3, Native Sons of the Golden West. That it would be a success no one doubted, but that it would be such an overwhelming success not even the most sanguine anticipated. It was one of the most numerously attended parties ever given in Sacramento by a local organization, those present numbering nearly 700, and the capacity of the spacious floor, the lobbies, adjoining rooms and hallway, as far as the center of the building, were constantly thronged with the merry-makers. The main floor was in consequence overcrowded, and the dancers were forced to trip the light fantastic in the hallways and in the lobbies, both of which places were canvassed, as was also the Assembly Chamber. The decorations of the hall were most tasteful and beautiful. In the window recesses were large plate mirrors, and on these appeared the names of the several Parlors of the Order in the State. These were draped with lace curtains on the sides, caught up with gilt ornaments and surmounted with cornices. On the walls between the mirrors were various designs, such as the asthetically-inclined so much admire, and the light from gas lights on the sides was mellowed by the placing of various colored shades over the globes, the effect being very fine. Potted plants were also ranged on the sides between the mirrors. The music stand and its surroundings was a marvel of beauty. In rear of it, at the top of the wall, the large plaster representation of California, and the full length oil painting of General John A. Sutter—both the property of the State and both fixtures in the room—aided most appropriately in the finish. Beneath the picture, on a long strip of canvass was painted in large figures and letters, "1846—Native Sons—1882"—the former being the date of raising the bear flag in California. Below this was the handsome banner presented to the Parlor by its lady friends, with shields, plaques and bannerets filling in such openings as were on the sides. The front of the stand was ornamented with growing palms, pampas grass, and natural flowers, and on the floor in front, concealed in a tastefully arranged floral bower, was a cologne fountain. From the central one of the three large chandeliers evergreen festoons depended to the corners and sides of the gallery; from these hung cages in which were sweet-voiced canaries, and around the sides and front of the gallery there were decorations in evergreens, hanging flower baskets, and more bird cages, and the pillars were trimmed with ivy. Richly upholstered sofas and chairs afforded resting places for the dancers, and it was the unanimous verdict that never before had the Assemby Chamber presented such a brilliant appearance. In an ante-room light drinks were served to all and an excellent supper was spread in the lower hall by Henry Fisher. The music for the dancing was furnished by Jones, Beebe & Grant's full orchestra, the programme (of fine Bristol board, fringed with satin), consisted of 16 regular and two extra dances, there were nearly 200 couples in the grand march, and the members of the Parlor were most attentive to their guests. Among the many present were members of the Parlors at Oroville, Placerville, Modesto, and Oakland. In all respects the party, though "informal," was a grand success, the hall remained full till the last notes of "Home, Sweet Home," had died away, and the merry-makers dispersed to their homes. The Parlor is to be congratulated on its efforts to give a most enjoyable reunion to its friends, and to the following is credit especially due for the success of the affair: Committee of Arrangements. C. E. Parker, F. D. Ryan, R. H. Hawley, W. Hart, H. C. Chipman, F. B. Houston, Joseph Wallis and H. McCann, Jr. Reception Committee, C. N. Post, C. Weinreich, J. Riley, E. Kraus, J. Sepulveda, H. W. Klays, G. Barton and A. B. Nixon. Floor Director, President J. T. Stafford. Floor Committee, C. E. Sellinger, T. P. Littlefield, J. Barrett, J. L. Hughes, H. A. Heilbron, Clove Lagrave, W. Zoller and L. G. Dickman.

Ben'lent Pro'tive Order of Elks.

THE following extracts from a recent address on the objects and work of the Elks are true and comprehensive: "The Order of Elks is an institution founded upon morality, and having for its object the design of practically applying the sublime teaching of the golden rule, and in the midst of innocent social pleasures every brother is taught to practice charity, justice and benevolence. To soothe the unhappy, to sympathize with their misfortunes, to compassionate their sorrows, and to render material aid to those in pecuniary distress, is the great aim of the Order. Some are of the opinion that the Elks is a purely social organization. It is true their social sessions are a prominent feature of such of their proceedings as come before the public eye, but these are merely auxiliary to the main object. New York Lodge, No. 1, is the mother Lodge of the Order. There are branch Lodges in Massachusetts, Connecticut, Pennsylvania, Ohio, Illinois, Maryland, Kentucky, Indiana, Missouri, California and Rhode Island, all flourishing as vigorously as the mother Lodge. Washington Lodge, No. 14, was instituted Feb. 12, in the city of Washington, D. C. It has been asked if any other than professionals could join the Order of Elks. Any person of good moral character is eligible to membership, as in any other Order. The B. P. O. Elks is composed of almost every grade of business men, and its charity donations exceed those of any other society in the world in proportion to membership.

Knights of Honor.

Grand Officers.—DAVID MCCLURE, P. G. D., San Francisco; CHAS. E. TRAVERS, G. D, San Francisco; R. H. WARFIELD, G. Treas., San Francisco; W. H. MAHONEY, G. Reporter, office St. Ann's building, cor. Powell and Eddy.

THE following is a decision made by the Supreme Court of Indiana in the case of Johnson *vs.* Supreme Lodge, K. of H. It is quite important that members should be posted on all court decisions. The facts of the case are taken from the K. of H. *Reporter*, and the case was decided against the Order: Johnson was a member of Victoria Lodge, No. 22, of Indianapolis, who was suspended Aug. 13, 1877, for non-payment of an assessment. He died in March, 1878, and his heirs brought suit for the benefit, claiming that he never was legally suspended. The Lodge voted upon his suspension, instead of his being declared suspended according to law by the Dictator, and certain members of the Lodge disputed the vote. The proceedings incident to his suspension in the Lodge were confusing even to a man familiar with the work of the Order, and not in accordance with the provision of our law. Then Johnson applied for re-instatement, and another dispute arose in the Lodge over the ballot upon the same. These points were made the most of before the jury, but that its verdict should be sustained by the Supreme Court of the State is to say the least surprising. It brings home one lesson, viz:—that every subordinate Lodge should observe strictly the provisions of the constitution, when suspending members. To do this, be sure that they have been notified of the assessment in the prescribed form, and in accordance with law—then that they are declared suspended by the Dictator, and not by vote of the Lodge as is frequently the case. Make sure that the transaction is recorded correctly upon the minutes, for future reference if necessary. In this case the minutes of the Lodge were so badly kept as to be nearly worthless at the trial.

ANCHOR LODGE, No. 2,366, celebrated its first anniversary, on Friday evening, February 17th. The Lodge has been very successful since its institution. It has a membership of 140, and is the youngest subordinate in the city. Grand Dictator Travers was present and entertained his brethren with a logical speech. There was a large delegation present from Ivy, No. 1,716, and addresses and congratulations filled a very pleasant evening. At the close a collation was partaken of, and all departed pleased with the well spent evening.

What is an Apple?

Is an apple a fruit? It is generally regarded so; but, botanically speaking, a *fruit* is that part of a plant which contains the seed, and it is nothing else. The *core* of an apple, then, according to this, is the true fruit, for that is the part that contains the pips, and the pips are the seeds. It is a cartilaginous five-lobed capsule, splitting along the edges. "What oddities," says Dr. M. T. Masters, "these botanists are; they leave on their plates the fruit, and they eat something which they say is not the fruit! What is that something which is not the fruit? To answer this question to his own satisfaction, the reader should see before him a flower of an apple or pear in the earliest stage of its growth, and he should trace in other stages, from this earliest condition to the ripe state, the growth of the apple or the pear."

"A careful examination of this kind," says our author, will "enable him to discover that the flesh of the apple or pear is nothing whatever but the end of the flower stalk, which gradually swells out into a succulent mass, and which holds embedded within it the true fruit—the core. What in ordinary language is called the fruit is, then, only the swollen flower-stalk. Alechemillas and spiræas, peaches and cherries, are not to be had in flower just now, else a cut down through the center of the flower of either of these would reveal the cup-like stalk encircling the young fruit in the center, just as a pill is inclosed within a pill box. Now, suppose the cup to be fleshy, and so thick as to come in contact with the fruit, and we have exactly the condition of an apple. So, then, to say that the core of an apple is the true fruit, and the flesh thereof the dilated flower stalk, is no dogma to be accepted as an article of faith, but it is a statement which anyone with a pair of eyes, ordinarily nimble fingers, and a little patience, can, at the proper season, verify for himself. To be able to recognize the core of an apple as the fruit proper, and to see in the flesh of the apple a swollen flower stalk, is not to indulge in a mere botanical technicality, as some might at first be inclined to suppose, but it affords a means of ascertaining a truth, and, as such, of opening up possibilities of future utility and development; for truth is never barren of result—the sterility lies with the man who does not avail himself of the truth so far as he can. Deep thoughts to be evolved from the castaway core of an apple!"

Electricity the King of the World.

It is claimed by many scientists and profound thinkers of the day that electricity is life; that it enters into our existence, is above us, beneath us and that it is a part of us all agree. Like Franklin and Humboldt, the philosophers and scientific men of the last century only dealt with this question in what might be termed philosophic pride, or as medical electricity. It has been the triumph and glory of the 19th century, and principally of the last ten years, to utilize by mechanical devices and inventions electricity to a degree that is marvelous; and it seems to be only a brief question of time when it will assume the prerogative of king. The recent exhibition in Paris of the power and uses to which electricity can be applied, were convincing proofs that before another decade has passed, the whole economy and motive power of civilized and enlightened nations will be revolutionized by the forces of nature.

In the fall of 1881, Exhibition hall, at Paris, presented a scene that almost baffled description. Exhibits from all the principal nations of Europe, including those from the United States, showed the interest taken in this great motive power. In this great competition, our American exhibits received their share of credit. Brush, Maxim and Edison (five to Edison) were awarded gold medals. Practical applications of electricity were fully demonstrated. A 1,000-horse power for generating electricity, a model of a French lighthouse with an electric light and a flying machine worked by electricity. Industries in everyday life were represented, and the practical uses to which electricity can be applied were shown. Having been in connection with the chief opera house in Paris by telephonic appliances, visitors could hear the opera or the play by electricity. There is now a line of street cars run by electricity in Berlin, as there was in Paris during this exhibition. Pleasure boats are propelled by electricity, lamps lighted and extinguished by electricity; and in town, city and country may be seen the soft, radiant electric light suspended in mid air, 200 to 500 ft. high. While the practical mechanical appliances for the domestic uses of life in their growth and extent may have been unprecedented, the science of medical electricity has been studied and used for over two centuries. The enlightened minds of the last one-half of the 19th century have the honor of touching the human system with this vital spark with an intelligent understanding and life-giving effect.

Without entering into a disquisition of the benefits of electric corsets, electric hairbrushes, electric spectacles, etc., the science of electro-therapeutics is engaging the attention of our best minds with gracious results, prolonging life, eradicating disease, and proving it, in the hands of skillful men, a panacea for most of the ills and diseases of which the human family is heir to. The favor in which "medical and surgical uses of electricity," and "clinical electro-therapeutics" is held by the people in educated and enlightened countries, has induced charlatans and mountebanks to sell this "heavenly flame" without any scientific knowledge of its use or effect on the human system. From the days of Pliny and Wesley, appliances, mechanical devices and experiments, have been made to generate and charge the human body with electricity for the purpose of eliminating disease and restoring lost vitality. Of all that have been used it has been the triumph of an American inventor to make an appliance known as Horne's electro-magnetic galvanic belt, of 702 Market St., San Francisco, that can be applied at the seat of nervous centers, and regulated and controlled at the will of the patient. As compared with others, it is the acme of perfection, and justly entitles the inventor to be placed in the galaxy of eminent men who have been promoters of medical electricity.

THE *North American Review* for March presents a striking array of articles, everyone of which possesses the characteristic of contemporaneous interest. First we have a contribution from Senator George F. Edmunds, on "The Conduct of the Guiteau Trial." Ex-Minister Edward F. Noyes communicates the results of his observations of political affairs in France under the title, "The Progress of the French Republic." In "Trial by Jury," Judge Edward A. Thomas describes the social conditions under which our jury system had its origin, and notes its defects in view of the altered relations of modern life. Mr. John Fiske makes an able and ingenious analysis of that great intellectual movement, the reformation, educing therefrom the "True Lesson of Protestantism." In "Law for the Indians," the Rev. Wm. Justin Harsha endeavors to demonstrate that the one rational and effectual cure for our Indian troubles is to extend the jurisdiction of the civil and criminal courts over all the social relations of the red man. Prof. A. B. Palmer writes on the "Fallacies of Homeopathy." Finally, the Hon. Neal Dow contributes an article on the "Results of Prohibitory Legislation," demonstrating the success of the efforts to suppress the liquor traffic in Maine.

ONE of the leading frame manufacturers and picture dealers of San Francisco, Louis Dampf & Co., corner of Montgomery and Market, under the Hibernia bank, has lately received an extensive and fine assortment of goods in his line. Bro. Dampf is a practical workman, and makes a specialty of regilding and framing pictures for the best photograph galleries and artists. A reliable place to get the best work at low prices.

Patent Business.

Patents Are Virtually Contracts

Between inventors and the public. The consideration flowing from both parties to the contract is expressly fixed by statute. The Government requires the following consideration in every case: First, that an applicant for a patent shall disclose a new and useful improvement, of which he is the first and original inventor. Second, that the invention has not been patented, or published in a printed publication, prior to the date of his *invention*. Third, that the invention has not been in public use, or on sale, more than two years prior to his application for a patent. Fourth, that the invention shall be properly described and claimed in the specification forming a part of the patent. Provided an inventor complies strictly with these conditions, the Government guarantees that the inventor shall have the exclusive right to make, use and sell the thing invented for the term of 17 years.

The Patent Law provides that in case a patent, which is the evidence of the contract, is not executed in compliance with the requirements of the law, it may be annulled and rendered void. Hence, it is of the greatest importance to every inventor that his patent or contract be skillfully and accurately drafted, that it may afford him complete protection for his invention during the life of his patent.

Secure a Good Patent.

An inventor should first ascertain whether or not his improvement has been patented to another. This requires an exhaustive search among all the patents in the class to which the invention relates. This question can often be answered gratuitously by us immediately on receiving full information of the invention, by reason of our long and extensive practice as patent solicitors and editors and publishers of first-class scientific and industrial journals during the past 20 years and over. When the question of priority of invention is not so readily to be determined, it is generally best to make what is termed a "preliminary examination," by searching through the patent office reports among the patents in the class to which the invention relates, and referring to our extensive patent library, containing compilations of special classes of American and foreign inventions, mechanical dictionaries, scientific encyclopedias, files of scientific and mechanical newspapers, and an immense number of patent applications by inventors of the Pacific coast, carefully filed by this office since 1860.

If, by this "preliminary examination," the improvement is found to have been previously invented, our client will receive for the small fee of $5 for the examination a verbal or written report showing definitely whereby his invention has been anticipated, thereby saving him further expense, and perhaps much time, useless delay, anxiety, etc. When the invention is found to be patentable, the fee for preliminary examination is applied toward the payment of the remaining fees, so that a preliminary examination by us really costs the inventor nothing extra if an application for a patent is finally made.

To avoid all unnecessary delay, however, in securing patents at the earliest moment practicable, inventors will do well to forward a model, drawing, or sketch, with a plain, full and comprehensive description of their invention (stating distinctly what the particular points of improvement are), with $15 as a first installment of fees. A preliminary examination will then be immediately made, and if the invention is found in an earlier patent, we will return $10 to the inventor, and retain $5 for services. If, on the other hand, the improvement is deemed to be novel and patentable, the necessary papers for an application for a patent will be prepared immediately, and forwarded to the inventor for his signature. When the inventor receives the application and finds it duly prepaid, he will carefully sign and return the same plainly addressed to us, with postal money order or express receipt for the balance ($25 or upwards) of our own and the first fee of the Government. The case will then be promptly filed by us in the Patent Office, and vigorously prosecuted to secure the best patent possible. [This course is the most expeditious and satisfactory, as no time is lost in transmitting correspondence relative to the preliminary steps to be taken.] When the patent is allowed, the inventor will be duly notified, and on sending the final Government fee of $20 to us, we will order the issue of the patent, and forward the same as soon as it is secured from the Patent Office.

When the invention consists of a new article of manufacture, or a new composition, samples of the separate ingredients sufficient to make the experiment, and also of the manufactured article itself must be furnished.

Models and Drawings.

Models are now seldom required by the Commissioner of Patents, and generally only in intricate cases. Perfect drawings of practical working machines are considered more satisfactory to the Patent Office than the old and more cumbersome system of storing up an immense bulk of almost numberless models.

Drawings or sketches sufficient to illustrate clearly the invention, with a sufficient description to enable us to make a full set of perfect drawings for the Patent Office is all that we require. A model will answer our purpose as well, however, in cases where the inventor can more easily furnish it for our use.

The value and even the validity of a patent often depends on the character, clearness and sufficiency of its drawings. There are thousands of existing patents in which the improvements are but partially or very poorly illustrated in the drawings. When an attempt is made to dispose of such patents, the vagueness and defects of the drawings often prejudice capitalists and manufacturers against the invention, while in reality it may be of great value, and would meet with ready sales had the invention been fully portrayed by artistic and skillfully executed drawings. Again, when patents of this character are brought into court, the uncertainty and ambiguity of the drawings enable the opposing experts to mystify the judges as to the construction or combination of parts intended to be covered by the patentee. In all cases prepared by us, the drawings are made under our personal supervision, by skilled draftsmen in our constant employ, and every precaution is taken that the invention is fully and clearly shown by different views, so that the improvement will be readily understood by the Examiners in the Patent Office, and comprehended by the public when the patent is granted.

In the Patent Office

The application is assigned to the Examiner having charge of the class to which the invention relates. The case must then take its turn with others in the order of filing, and in due time is carefully examined to test the novelty of the invention. If the Examiner fails to find anything that anticipates the invention, a patent is immediately allowed, provided the specification and claims are drafted in proper form. Should the Examiner find a prior patent which, in his opinion, anticipates one or more of the claims of the application, a letter of rejection is sent to the attorney in charge of the case; and if the attorney coincides with the views of the Examiner, the claims rejected are erased. In preparing applications for patents, an attorney should be careful to familiarize himself with the class of inventions to which the application pertains, so that the specification and claims may be drafted as nearly perfect in the first instance as is possible. This course saves much time in prosecuting the application to a patent.

When claims are improperly rejected on patents which do not anticipate the spirit or wording of the claims, proper steps are immediately taken to convince the Examiner of his error. This is done, in most part, by personal arguments, as the differences in construction, operation, function and results are more readily discovered and appreciated by an oral presentation of the facts than can possibly be done by relying solely on written arguments. In order that the Patent Office record of the patent shall be complete, an oral argument is generally supplemented by a manuscript brief, that others, in examining the files at any future time, may clearly comprehend the position taken by the Examiner and attorney in prosecuting the case to patent.

In addition to our own personal attention to the interests of our clients here, we have, for over 12 years past, had constantly in association with us in Washington, one of the soundest legal counselors and ablest of practitioners in patent business in this country, who carefully attends in person to our business at the Patent Office and has attained success in a most marked degree.

Perfect Claims.

The value and force of a patent are dependent on its claims. A patent may disclose to the public the most important and valuable invention, and yet the claim be of such meager scope that the patent is actually worthless. When the claims of a patent are so loosely drafted that infringers can flood the market with improvements, differing from the improvement disclosed by the patent only in slight changes in construction and arrangements of parts, such a patent is valueless to the owner, as it fails to afford him that exclusive and complete protection guaranteed by the Patent Law. Hence it is that the greatest care, skill and perseverance are required, first in properly drafting the claims in the first instance, and, second, in prosecuting the application before the Patent Office, and maintaining the rights of the inventor to claims as broad and sweeping as the invention will warrant. This latter is no easy task. The Examiners of the Patent Office serve in the capacity of attorneys guarding the interests of the public. It is their sworn duty to exercise the greatest care and watchfulness, that patentees do not secure claims of greater scope than they are justly entitled to. It is but natural that Examiners are sometimes in error as to just what scope should be accredited an invention. Although the Examiners act under honest convictions in cases where they refuse an inventor his just rights, yet it is the duty of the attorney to maintain the claims of his client, if he is convinced that they are just and proper. To succeed in this requires the display of tact, firmness and ability; and when the Examiner is made to see that the inventor is honestly and fairly entitled to the claims which have been rejected, he will almost invariably recede from his former action, and allow the case.

Advantages to Inventors on the Pacific Coast.

The firm of DEWEY & Co., (continuously editors and publishers of the MINING AND SCIETIFIC PRESS, nearly from its early commencement in 1860), offer comparatively far better facilities to the local inventors of the Pacific States and Territories, than are possessed by any other agents in America. Members of the firm give personal attention to the applications entrusted to their care. They have been longer in practice in patent soliciting than most agents who are still personally engaged in the business. They have secured more U. S. and foreign patents in the past 20 years (with very few exceptions) than any other firm still existing. Their practice has been so successful and long continued that the great majority of inventions on this side of the American continent have been patented through their agency, thus affording them great and valuable experience, by thorough information of the true principles and points of novelty in the inventions, whether general in character or peculiarly local to this coast.

The extensive business combination and experience of this firm is undoubtedly one of the most fortunate in existence for affording inventors prompt and reliable advice and the best possible facilities for securing their full patent rights with safety and dispatch at uniformly reasonable rates.

Every patentee of a worthy invention is guaranteed the gratuitous publication of a clearly-stated and correct description of his invention in one or more of our influential and reliable newspapers, affording just the circulation that is best calculated to widely inform the class of readers most specially interested in the subject of his invention.

Saving of Time, Etc.

Inventors on this coast will find that owing to our familiarity with inventions and local affairs of this coast, we can more readily and fully comprehend their wants, and thus save much of the time ordinarily consumed in preliminary writing back and forth when distant agencies are employed.

Caveats.

A Caveat is a confidential communication made to the Patent Office, and is therefore filed within its secret archives. The privilege secured under a caveat is, that it entitles the caveator to receive notice, for a period of one year, of any application for a patent subsequently filed, and which is adjudged to be novel, and is likely to interfere with the invention described in the caveat, and the caveator is then required to complete his application for a patent within three months from the date of said notice. Caveat papers should be very carefully prepared. Our fee for the service varies from $10 to $20. The Government fee is $10 additional.

To enable us to prepare caveat papers, we only require a sketch and description of the invention.

Rejected Applications.

Inventors who have rejected cases (prepared either by themselves, or for them by other agents), who desire to ascertain their prospects of success by further efforts, are invited to avail themselves of our unrivaled facilities for securing favorable results. We have been successful in securing Letters Patent in many previously abandoned cases. Our terms are always reasonable.

Inventors who do business with us will be notified of the state of their application in the Patent Office, when it is possible for us to do so.

Jonathan Niles and his Fife.

In his youth, Jonathan Niles was a musician of the Revolutionary Army. In 1778, while the American army was encamped at Tappan, on the Hudson, General Lafayette had command of the advance, his particular duty being to guard the water-front; and in order that any attempt on the part of the enemy at surprise might be guarded against, Lafayette issued orders that there should be no noise of any kind by the troops, between the hours of tattoo and reveille.

Our Jonathan was one of Lafayette's musicians, and his instrument the fife. He was a son of Connecticut, and he had a maimed and disabled brother who was a cunning artificer, and who, among other quaint things, had made the fife upon which Jonathan played. It was so constructed that it could be blown to shrill and ear-piercing notes that belong with the drum, or could be softly and sweetly breathed upon as to give forth notes like the gentle dulcimer.

One evening Jonathan wandered down to the water's edge, and seated upon a rock, gazed off upon the darkly flowing, star-gemmed flood. His thoughts were of his home and of the loved ones, and anon came memories of the old songs that had been wont to gladden the fire-side.

Unconsciously he drew his flute from his bosom and placed it to his lips. In his mind, at the moment, was a sweet song, adapted from Mozart, which had been his mother's favorite. He knew not what he did. To him all things of the present were shut out, and he was again at home, sitting at his mother's feet—and the charm was not broken until a rough blow upon the back recalled him to his senses.

"Man! what are you doing? The General may be awake. If he should hear you—ah!"

It was a sentinel; and even this guardian of the night afterward confessed that he had listened, entranced, to the ravishing music for a long time before he had thought of his duty to stop it.

On the following morning an orderly came to the spot where Jonathan had been eating his breakfast, and informed him that the General wanted to see him at headquarters.

Poor Jonathan turned pale and trembled. He knew that Lafayette was very strict, and that in those perilous times even slight infractions of military orders were punished severely. As he rose to his feet the sentinel of the previous evening came up and whispered into his ear:

"If it should be about the music, Jonathan, don't you be alarmed. Not a soul save you and me knows anything about it. I can swear to that! So, do you just say it wasn't you. Stick to it, and you'll come out all right."

Jonathan looked at the man pityingly. "What! my mother's son tell a lie like that? It would be the heaviest load I ever carried—heavier than I ever mean to carry, if I have my senses."

He then went to the General's quarters—a tent pitched in a commanding sight, overlooking the whole line he had to guard. Lafayette was pacing to and fro, sad and moody, as though his thoughts were unhappy.

"Comrade, who are you?"

"Jonathan Niles, General,"

"Last evening I heard music down by the river's bank. Were you the musician?"

"It was I, General, but I knew not what I did. I meant not to disobey your order. I sat and thought of home and my mother, and—"

The General started at the sound of that word, and the shadow upon his face grew soft and ethereal.

"Of your—mother! And I thought of mine. It was a theme of Mozart's, and was my mother's favorite. If you will be so kind, go bring your instrument and play for me that strain here in my tent. It will do me good."

In the after years—even to his dying hour—the man loved to tell that story. Though he would never urge the truth upon any in consideration of so mean a thing as the benefit that might result, yet he could not put away the thought that the sweetest and most blessed memory of all his soldier's experience might have been lost to him had he grasped the opportunity to tell a lie, which might, to some, have seemed most opportune and profitable.

CHILDREN'S GAMES.—Now that our long winter evenings are here, with their bright fires, close drawn curtains, and freedom from farm work, our boys and girls will naturally need something to amuse and entertain them. Here is a game called "Cities" that will assist one in the study of geography: Let all be seated in a half-circle. The one at the head starts the name of a city beginning with A, as Atlanta, Augusta, etc., the next person calls another beginning with the same letter, and so on around the circle for three times. The head begins again with B, and so on until each latter of the alphabet is taken. One of the party should have a watch, and keep time, as only two seconds are allowed each one to think of a name. If any one repeats a city that has been named, he or she must pay a forfeit; also, if they take longer than the time agreed upon before naming a city. We imagine we can see the knitting of brows, and searching of pockets for forfeits when the letters Q and X are reached, as there are few cities beginning with those letters. If there is a large party each letter need go round but twice, but it should be decided before you begin.

Beauty in Our Homes.

No American can travel through the French parishes in Canada, says an American journal, without being struck by the contrast between the picturesque cottages of the French *habitants* that are frequently seen and the houses occupied by the same class of persons in the United States.

All are alike built of wood, all are alike cheap; but the Canadian house, with its variety of steep roofs and gothic windows, its fine coloring, its quaint shaded garden, is a delight and a surprise to the eye of the artist, while we all know how plain and unattractive is the ordinary farmhouse in America.

Many a well-to-do farmer owns a rich farm, to the culture of which he gives unremitting labor and large sums of money. But the house he lives in gives no evidence of the care or thought that he expends on his farm. It is a square dwelling set down in a bare space and surrounded by a staring rampart of chicken coops, barns, corn cribs and pig sties.

The whole place is orderly and clean, but none the less is it unattractive and unhomelike. Thrift and plenty and cleanliness are seen everywhere. These are good and necessary things in their way, but they are not all the good or the necessity of life. The coarsest boy or man has within him a sense of beauty, a love of harmony in nature. This may be awakened to elevate and refine his whole nature, or it may be allowed by neglect to die out, while he degenerates into a coarse, money-making plodder.

Every farmer's wife or daughter has it in her power, if not to make the house itself picturesque, to surround it with beauty that costs nothing. Let there be roses in the garden, vines clambering over the roof, a few copies of good pictures on the walls, and the gentle words and loving looks everywhere which crown the whole.

The men and boys, going in and out to their plowing or work in the barns, may never seem to notice these efforts, or even know themselves that they notice them. But when they go out into the world or grow old, these are the things they will remember as "home," and which will be a dear and tender memory to them forever; not the pigeons, or crops, or the amount of money earned which seem so important to them now.

There is no more energetic, intelligent or thrifty class than that of the American farmer. But he is apt to forget that "man does not live by bread alone," and to slight in his daily surroundings the beauty and refinement which is necessary food for his better self.

God makes the crops grow, and fills the hills with useful coal and iron; but it is not without meaning that He covers them over with the glory of forest, wild vine, and blushing flower. He has surely "made everything beautiful in its time" for a real purpose, which we should interpret in our own lives and for our own improvement.

LONDON RAILROADS.—London contains 14 strictly terminal railway stations, from which no fewer than 2,202 trains depart daily, and nearly 1,600 of these leave between the hours of 10 A. M. and 10 P. M. The largest number of departures from a single terminus is 320, after which come two stations with 312 and 295 respectively. These figures are exclusive of the immense system supplying the city with local transit.

Extraordinary Disappearance.

The German Admiralty decided last year to erect a new lighthouse near the mouth of the Weser, in the open sea. From the exposed position, the depth of water (26 ft. at low water), and the nature of the soil, it appeared expedient to sink the foundations by means of compressed air and concrete caissons. The lighthouse was to be erected on a single caisson, 44 ft. by 33 ft. in area, with a working chamber of the usual hight, covered with brick arches, and made tight by a layer of concrete 4 ft. 6 inches thick. The bottom part and casing, to the hight of 40 ft., were erected on land, and floated to their position, fitted with the boiler, engine, air compressor, and other working appliances. The sinking then began, and was continued till the 11th of October, when the bottom of the caisson was 70 ft. below low water level, or 44 ft. in the soil, the casing being then altogether about 82 ft. high, and the concrete inside having reached a thickness of 32 ft.

The work had to be interrupted at that date, the stormy weather making the conveyance of materials to the works impossible. The unfilled part of the casing was thoroughly stayed, and it was expected to withstand the winter's storms. The works had scarcely been left when a terrific storm broke loose. On the 13th the whole block disappeared at noon, in the space of about two minutes, a column of water shooting up after its disappearance. Approach was impossible till the 19th, when the report was found to be correct. The tower had completely vanished, without leaving a vestige of its existence in the shape of wreck behind it. By soundings' the bottom of the sea at the spot where the tower had been was found to be the same as before it was put down.

The cause of this remarkable occurence has not yet been satisfactorily ascertained. The soil last worked upon was firm sand, so hard that it had to be worked with picks. It is supposed that the sand did not extend much farther down, and had a substratum of bog, and that the tower, loosened by the shocks of the storm waves, had broken through the layer of sand and gravel, and been engulfed in the bog underneath. The weather has not yet permitted borings to be undertaken to ascertain the truth of this hypothesis. The loss caused is about $50,000, but fortunately no lives have been sacrificed.

CROCODILE HUNTING IN INDIA.

HOW TO KILL THE BLUES.—Generally speaking, if you are troubled with "the blues," and cannot tell why, you may be certain that it springs from physical weakness. Instead of lying on a sofa and courting painful ideas if you are a despondent lover, a hypochondriac or a valetudinarian, you should be up and stirring yourself. The blood of a melancholy man is thick and slow, creeping sluggishly through his veins, like muddy water in a canal; the blood of your merry, chirping philosopher is clear and quick, brisk as a newly-broached champagne. Try, therefore, to set your blood in motion. To affect this don't go to guzzling down brandy-smashes, gin-cocktails, or any of the other guzzling compounds in which alcohol is disguised, for every artificial stimulant will drag you down two degrees for every one it lifts you up. The devil always beats you at a barter. Try, rather, what a smart walk will do for you; set your legs in motion on rough, rocky ground, or hurry them up a steep, cragged hill; build stone walls, swing an ax over a pile of hickory, or spade up a square rod of your garden.

Crocodile Shooting in India.

Although the Hindoos, similar in that respect to the Egyptians we read of in the Bible, revere those wild animals which they have to fear, and will often subject themselves to loss of property, yea, loss of their own or their kindred's lives, sooner than to entrap and kill them, they have of late years, often appealed for deliverance to the Englishman, whom chance or rumor of a man-eating tiger or crocodile has brought in the neighborhood. The Mussulman has no such qualms of conscience, for not believing in metempsychosis, he has no fear to kill some relative whose soul has passed into the body of the animal he wants to slay.

Shooting crocodiles is at the best but tame sport; but when you know that the old fellow, shown in the engraving, sticking his head through the reeds, has entombed within his capacious belly, and that in the space of only two weeks, several human beings, you rather feel your blood boil, and you determine that you shall destroy his man-relishing appetite for ever.

DIET FOR NIGHT WORKERS.—For night workers the best dietic plan includes a hearty breakfast when they rise, which is generally from 12 to 3 o'clock; some out-door exercise and relaxation should precede a good dinner, partaken between 6 and 9 o'clock at night, before beginning work. If the work is to continue until 4 or 5 o'clock in the morning, a light but nutritious repast should be eaten shortly after midnight, in order to fortify the system for labor during the hours immediately following, when the vital powers are most enfeebled. When the work is done, and before retiring, a very simple lunch should be taken in the form of good hot broth or beef tea, or a glass of light wine and a couple of crackers. This will generally insure sleep by withdrawing the blood from the brain, where it has been concentrated by mental effort. In ordinary cases of sleeplessness, not confirmed by long-continued habit, a light meal of this kind will generally prove a remedy. The substitution of phosphatic or so-called brain and nerve foods for a well-chosen regular diet is much to be reprobated; however excellent these preparations may be as adjuncts, a man might as well expect to work indefinitely upon the stimulation of alcohol as to live upon them without the necessary supplement of ordinary nutritious diet. By attention to these details, and by securing sufficient sleep, night workers can preserve their health under ordinary circumstances.—*Juliet Corson, in New York Times.*

THE burro, a kind of ass, becomes very much attached to the miners who use them on their prospecting tours, when they are kindly treated. A young man who had been in the habit of crossing the Rocky mountains with his beasts every spring, after wintering near Del Norte, had been very kind to the burros. He died this summer, and, after waiting four weeks for his reappearance, they escaped from their pasture and set out to search for him at winter quarters, 130 miles distant. They apparently traveled only in by-ways and by night, or they would have been captured by teamsters. Four weeks after escaping they waited one morning at the threshold of the ranch of their departed owner, 10 miles from Del Norte, where they alternately peered into the window to see if their master was there. After they had waited a long time at the door a Mexican living in the vicinity, who recognized them, penned them up in his pasture land. They broke away on the first night; their master was not there. Another neighbor put them into his enclosure, but they did not stay there either, and the second morning found them on the other side of the Rio Grande, where they had their old accustomed pasturing.

A NEW MOTOR GAS.—It is stated that a French chemist has devised a way of producing gas from carbonate of lime to be used as a motor, which it is said will furnish the cheapest motive power known. Chalk or lime is one of the most abundant materials of which the crust of the earth is composed, and a cheap motive power furnished by its disintegration would revolutionize transportation. Several tramways are being run in France by this motor. The gas can be extracted from the stone and stored, and after being used condensed again.

DAVID GILL, the astronomer royal at Cape of Good Hope, has published his calculations of the solar parallax made for observations of the planet Mars, in the Island of Ascension, in 1877. He makes the parallax 8.78, which will give as the mean distance of the earth from the sun, 93,080,000 miles.

A FIRE-EXTINGUISHING POWDER.—A London inventor claims to have devised a fire-extinguishing preparation which can be kept in powder or in solution, and asserts that it is not only more speedy and effectual in action than water, but that nothing, once sprinkled with it, will ignite.

LIGHTING FIRES.—To avoid the disagreeable smoke and gas when a fire is lighted on a damp day, light a handful of paper or dry shavings on top of the coal before the fire is kindled. This produces a rapid draught, carrying off everything offensive.

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.
At No. 252 Market Street, San Francisco, Cal.
☞ *Take Elevator No. 12 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*]

Whereas, the Pacific States Watchman, the pioneer A. O. U. W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (¼ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - March 1, 1882

What could have possessed the Grand Lodge of Iowa to refuse obedience to a law of the Supreme Lodge which is founded upon justice to all the jurisdictions? What right had it to take away from the brotherhood of that State the pledged faith of 100,000 Workmen? This is what they have done. Behind every beneficiary certificate issued by every Grand Lodge stands the Supreme Lodge under the beneficent provisions of the Relief Law. Ah! brethren of Iowa, your leaders are marching you, like Pharoah's host, into a Dead sea whose waters will close over you and bury you in oblivion. Great organizations can no more depart from the straight rule of rectitude than can an individual. It may seem pleasant at first; the sky clear and the clouds white and fleecy. But the storm will come, and when it does, by your own actions will you have severed the bonds which united you to the whole Order. Truth and justice are mighty and must prevail.

The following States have separate jurisdictions: Pennsylvania, Indiana, Iowa, New York, Illinois, Missouri, Minnesota, Wisconsin, Tennessee, Michigan, California, Kansas, Oregon, and Washington, also the Province of Ontario. The following have Grand Lodges, but work under the Supreme Lodge: Ohio, Kentucky, Georgia, Massachusetts (which includes New England), Maryland, (including New Jersey and Delaware), Texas, and Nevada (including Idaho, Utah and Montana). The following States and Territories have subordinate Lodges working under the Supreme Lodge: Arkansas, Colorado, Louisiana, Mississippi, Nebraska, West Virginia, Virginia, Dakota, Arizona and New Mexico. The total membership in these Lodges is a little over 1,000.

Two assessments in the Supreme Lodge jurisdiction for February. The deaths were in the following States: Massachusetts, 3; Mississippi, 2; Maryland, 1; Ohio, 7; Georgia, 1; Texas, 1; and Alabama, 1. This makes a total of 16 deaths to be paid for.

There are four deaths resulting from accident in the list of death notices of the Supreme Lodge jurisdiction for February, one suicide, the rest being the usual bodily diseases.

Los Angeles Lodge, No. 55, has made a good record. It has been organized three years and six months, and the first death was Bro. G. W. Swart, and was the result of an accident.

J. A. M.—Your article will appear in our next issue.

Iowa in Disgrace.

We long since ceased to be surprised at any unfraternal action taken by the jurisdiction of Iowa. Now and then, for a year or two past, we have indulged in a faint glimmer of hope that time would correct her selfish and rebellious tendencies, but such hope has always been hanging on the verge of despair. The fact is, the jurisdiction of Iowa appears to have been illy begotten. Fraternally speaking, she is a fearful example of total depravity. She abuses, maligns and traduces the good old mother that brought her into the world. She forswears the solemn obligations taken before God on the Holy Bible. Every impulse of fraternity and benevolence she subordinates to a mean spirit of selfishness. She sneaks behind the local laws of the State to avoid a compliance with the laws of the Order whose name she disgraces, and which she has obligated herself to obey. She sends her representatives to the Supreme Lodge to help make laws for the Order, and then refuses to obey such as do not suit her selfish ends and desires. These are bitter words, but read the following preamble and resolutions, and see if we have overstrained the matter:

Whereas, The opinion of the Attorney-General of the State of Iowa, as set forth in the Grand Master's report, is to the effect that the Grand Master could not comply with the requirements of the Grand Supreme Lodge Relief Law in issuing an assessment upon the separate beneficiary of the jurisdiction of the Grand Lodge of Iowa, without contravening section 1,160 of the code of Iowa; therefore,

Resolved, That the action of Grand Master J. D. Nichols and the Executive Committee of the Grand Lodge of Iowa, in refusing to imperil the security of the beneficiary certificates of the membership of this State by issuing Supreme Lodge Relief Assessment No. 1, meets the hearty approval of this Grand Lodge.

Resolved, That this Grand Lodge reiterates and reaffirms the position it has heretofore taken against the right of the Supreme Lodge to assess the membership of this separate jurisdiction for death losses occurring elsewhere.

Resolved, That, in the judgment of this Grand Lodge, the Supreme Lodge has no legal authority to assess the members of this separate beneficiary jurisdiction for death losses occurring in the membership of a Grand Lodge incorporated under the laws of other States, or otherwise.

Resolved, That, while we earnestly desire to maintain and perpetuate the fraternal relations heretofore existing between the Supreme Lodge and this Grand Lodge, and have no desire or intention to treat the Supreme Lodge in any but the kindest and most respectful manner, we cannot surrender our legal rights, as herein indicated, without imperiling and destroying the legal existence of this Grand Lodge.

Resolved, That, in the attempted suspension of the Grand officers of this jurisdiction, we respectfully submit that the Supreme Master has exercised authority of a very doubtful character.

Resolved, That he is respectfully requested to withdraw such order of suspension and to relegate the entire question to the Supreme Lodge at its next session, at which time, after careful deliberation, it may be permanently settled what is to be the relation of the separate beneficiary jurisdiction to the Supreme jurisdiction with reference to the payment of assessments for death losses occurring outside of such separate jurisdiction. In case the Supreme Master refuses to accede to this request, the Grand Lodge officers are hereby directed to conduct the business of this Grand jurisdiction without reference to the Supreme Lodge, and to do and to perform all acts necessary to that end until otherwise ordered by the Grand Lodge.

It is reported that this brazen piece of infamy passed the Grand Lodge by a vote of 237 to 15. As if this were not insult enough to the Supreme Lodge, which represents 100,000 good and true Workmen, she proceeds to elect as one of her representatives to the Supreme Lodge the late Grand Master, J. D. Nichols, whom the Supreme Master but recently suspended from the Order for refusing to comply with the Relief Law of the Order. The tail would wag the dog and injure and insult the creature at the same time. We have no means of knowing what course the Supreme Master will pursue under existing circumstances, but it is not likely that he will back down from the position he has taken. More likely he will go a step farther and arrest the charter of the Grand Lodge of the ungodly jurisdiction, and proceed to reorganize the Order there on a loyal basis. We hope so.

It was a gratuitous piece of business for Iowa to claim that the Supreme Lodge could not *legally* coerce obedience to the laws of the Order. Nobody presumes its decrees can be enforced through the courts of the land, but it has one recourse which is its acknowledged prerogative, and one with which courts cannot interfere. It can cut off the offending member from the rest of the Order. It can wall it in and guard it round about and make its very name a hissing and a by-word in the mouths of all fraternal people everywhere. Let this be done, and all loyal Workmen will shout, "Amen and Amen!"

About the legality of the Relief Law of the Order, fraternally speaking, there is not, nor can be, any question. Every separate beneficiary jurisdiction was made such under the laws of the Order, and subject thereto. One law is as binding as another. One of the conditions prescribed is obedience to the general laws, rules and regulations of the Order, and among these laws is one to the effect that the separate beneficiary jurisdictions shall be governed by the beneficiary regulations prescribed for the government of subordinate Lodges under the direct supervision of the Supreme Lodge, and that these laws shall not be changed, except by the Supreme Lodge. A separate jurisdiction, therefore, cannot change these laws, but the Supreme Lodge can. The Relief Law was no illy-conceived or hasty enactment. It was first submitted to the whole Order and laid over a year, to the end that representatives might be instructed if so desired. Then it was passed with almost entire unanimity, the vote standing 90 to 21. Every jurisdiction except Iowa readily acquiesced. The first and only call under the law was responded to by every jurisdiction except Iowa. In this she is delinquent, as she is on the call for relief of the sufferers from the yellow fever scourge, and she always will be. She is a source of weakness, and not of strength. She is a disgrace, and not an honor to the Order, and always will be, as now constituted. Hew her down before the Lord!

It is a noticeable feature of our Order that, for the last six months, a large number of applications have been received for membership from young and unmarried men, it being apparent that the mainspring of their action was fraternal association. A case that very forcibly illustrates this feature is the membership lately attained by Bro. Theodore G. Linton in Golden Gate, No. 8. Bro. Linton is employed in U S. Surveyor's, and is the son of Wm. Linton, Esq., of Washington, D. C., who has been one of the chief men of the Treasury Department for the last 25 years.

The following exhibit will give an idea o the work accomplished in New York during the past year: New Lodges organized, 11; disbanded, 5; suspensions, 3,263; certificates annulled, 1,151; final cards granted, 34; deaths, 111; rejections, 171; transfers by card, 131; reinstatements, 2,488; new beneficiary certificates written, 2,380; certificates changed as to payment, 314; Grand Lodge cards granted, 23. The Grand Lodge met Feb. 7th, and Grand Recorder Armstrong places the total membership at 16,290. The sum collected on 14 assessments was $216,501.50; paid out, $216,000.

Fred. D. Connor, G. M. W., of Indiana, writes to the *Fraternal Censor*, of New York, upon the subject of Lodge attendance. He thinks the reason of slack attendance is the fault of a poor ritual, which is not sufficiently interesting to cause members to attend. He says Indiana has pressed the matter upon the Supreme Lodge for three years, but the "Committee on Ritualistic Work" decline to act. Have any of our readers something to say on this subject?

Michigan's Progress.—The increase in this jurisdiction has been quite satisfactory during the last year. Thirty new Lodges have been organized, and 1,400 new members added during the term. There have been 38 deaths and 400 beneficiary certificates annulled. The net gain for the year was 963. Total number of beneficiary certificates in force Dec. 31, 1881, 6,131. The sum of $82,000 was paid to the beneficiaries of deceased members.

Board of Relief.—The Board of Relief are holding regular and interesting meetings monthly, and transacting a good deal of business for the good of our Order. The increased demand upon them for relief and information for procuring employment has induced them to call several special meetings for more efficiently carrying into effect their onerous but humane mission.

Valley, No. 30, will celebrate its anniversary at Union hall on April 21st. It is expected that it will be the event of the season.

Recorders, Financiers and Receivers.

Our Grand Recorder calls attention in a foot note to the assessment notices sent out to the Lodges for next month that Recorders, Financiers and Receivers who have served as such respectively for three years, are eligible to receive the P. M. W. degree, and requests that such of them as may be desirous of availing themselves of the privilege, have certificates of service made in duplicate, one copy to be forwarded at once to his office, for use of the Committee on Credentials. This is of course on the presumption that the Grand Lodge will not refuse the degree to such officers, which no doubt is a safe presumption to make, for we believe if ever the Supreme Lodge did one act which more than any other will cause it to be gratefully remembered, it was in providing for the advancement of these faithful officers without the necessity of their quitting their posts to go "through the chairs." We venture the prediction that the future of the Order will show the great wisdom of this act, and that other fraternal societies will very soon follow in the footsteps of the A. O. U. W. in this regard.

Prohibit Further Incorporation.

We trust the Supreme Lodge will never set apart another separate jurisdiction except on the express condition that in addition to the usual requirements, it shall contract with that body never to incorporate. The recent decision of the Supreme Court of Michigan shows the danger to the Order which threatens us, and all other fraternal bodies from such a course of action on the part of subordinates. And right here we desire to suggest to our Grand Lodge that it take action to prevent any of our subordinate Lodges from incorporating. Put up the safeguards all around. In fraternal organizations there should be no conflict of authority. Every person who joins the A. O. U. W. should be made to feel that he relies for justice and fair dealing solely on the brethren of the Order, and that beyond there is little or no hope for settlement of any difficulty. If his faith in the fraternity is not sufficient for this, we don't want him. Like the jurisdiction of Iowa in relation to the rest of the Order, he will only be a source of weakness instead of strength.

Jas. Armstrong.—Died on the 20th of February, Bro. Jas. Armstrong, P. M. W., of Bay View Lodge. His untimely death was caused by being gored by a wild cow. He was one of our prominent Workmen and was held in high esteem. Funeral services were held at Memorial Presbyterian church, South San Francisco, on Feb. 22d. There was a large attendance and the brethren of his own Lodge in regalia, as also an equal amount from his brethren of the Odd Fellows' Lodge. The services were conducted by M. M. Gibson and were solemn and impressive. What added a mournful feature to this solemn occasion his wife, owing to her delicate state of health, could not attend the funeral.

If the jurisdiction of Iowa had been leavened with the leaven of fraternity, as has the jurisdiction of California, we would have been spared the disgrace of her action. Brethren, remember that the moment we forget our obligations as brethren, one to another, the cement that binds us together will crumble out of our structure, and we shall go to pieces like a ship driven by the tempest upon the rocks.

At a recent meeting of Anaheim Lodge, No. 85, a resolution was adopted requesting Rev. J. A. Emery, one of its members, to preach an anniversary sermon, and he has kindly consented to do so. The Lodge was instituted on March 5th, 1879. The sermon will be preached at St. Michael's Episcopal church, on Sunday morning, March 12th.

Mountain View Lodge, No. 59, was instituted Oct. 16, 1878; since that time, three years and four months, G. T. Wagstaff, the present Recorder, has been absent but one meeting night. Can any member of the Order in this jurisdiction show a better record than this?

We met Bros. Geo. E. Lovie, P. M. W., and J. Bendetti, Receiver of Half Moon Bay, in the Lodge-room of Unity, No. 27. Our brethren speak encouragingly of their membership, and expect a material growth this term.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

The numbers on our beneficiary certificates have reached up to almost 16,200 at the time of writing, and still the work goes on at the usual rate.

A large number of our Lodge officers pay but half the legal postage on matter sent to this office. It's becoming burdensome, and calls for a remedy.

Our reinstatements for last month exceeded the suspensions. The increase above all losses was 175, and our total number of M. W. in good standing, Feb. 1st ult., was 13,943, about 1,000 ahead of Pennsylvania and 2,000 behind New York. The Empire State may as well begin to look for her laurels now. Slowly but surely we are gaining on her.

Our exceptionally high death-rate for this year does not seem to work any more than the usual number of suspensions, nor to retard the admission of new members. Many of the deaths have had the effect to add largely to the membership in the Lodges wherein they have occurred, and in Lodges where there have been no deaths the members seem content to do the paying so long as they can be spared to do it. Besides Californians are not made of stuff to be easily discouraged at small things. Nothing short of something terrific seems to move them from the even tenor of their way,

District Meetings.

The Lodges of District No. 1, Caleb Brind, Deputy, will meet on Wednesday evening, March 8th, at B. B. hall, in the Lodge-room of San Francisco, No. 4.

The Lodges of District No. 2, W. B. Smith, Deputy, will meet on Friday evening, March 10th, at Hamilton hall, corner Steiner and Geary, in the Lodge-room of Hercules Lodge, No. 53.

The Lodges of District No. 3, H. H. Mayhew, Deputy, will meet on Thursday evening, March 9th, at Pythian Castle, in the Lodge-room of Burns Lodge, No. 68.

The Lodges of District No. 4, A. A. Egleston, Deputy, will meet in the hall of Bernal Lodge, No. 19, corner 16th and Valencia, on Monday evening, March 6th.

The Lodges of Oakland will have a District meeting in the latter part of March.

Alameda, No. 5, will hold a district meeting at Odd Fellows' hall, Alameda, on Wednesday, March 15th. This is Bro. Wm. Sanderson's district.

The astute J. D. Nichols, late Grand Master of Iowa, professed to believe the Order in the State was prohibited from yielding obedience to the Supreme Lodge by the provisions of the State code in relation to insurance companies. It would be comforting if he would only explain how it is that the Knights of Honor and similar organizations manage to maintain a healthy existence there in the face of this awful bugbear, and, furthermore, how the A. O. U. W. ever got a foothold in Iowa, despite her codes. The true inwardness of the Iowa rebellion is transparent. She worships the golden calf, and ought to adopt the beast as her emblem.

A petition has been received by the Grand Master for a new Lodge, to be located at the north end of the city, at the hall corner Leavenworth and Pacific streets. This petition doubtless will meet with unanimous approval, as a Lodge in this locality has been desired a long time.

Ancient Schemes for Isthmus Canals.—A Spaniard named Zaragoza has been writing for the Geographical Society of Madrid a series of articles on ancient schemes for building canals across Central America, connecting the Atlantic with the Pacific. It appears that so early as the 16th century, the Spaniards had selected three places in that country for canals. They were by way of the Isthmus of Tehauntepec, in New Spain, now Mexico, the river San Juan, or the lake of Nicaragua, the Chagres river, and other parts of Panama. The first scheme, he says, was abandoned, to be mooted again in the present century; those of Nicaragua were actively pursued in the 17th century, and were on the point of being executed.

Practical Temperance.

There is no doubt that the opposition to drunkenness, says the Santa Cruz *Sentinel*, is now more completely crystalized into tangible form than ever before in the history of California. This State is given over very largely to secret, or what are designated as secret, Orders. Three of these Orders, Workmen, Knights of Honor and American Legion of Honor, are fraternal insurance societies. At every death they pay to the heirs of the deceased a regulated amount of benefits, but before these benefits are paid the cause of death is ascertained and sent to all the subordinate Lodges, not with a view of depriving the heirs of their rights on a technicality, or to force them into a ruinous compromise, but to let the members assessed know the cause of death. From this knowledge it is learned that one-fifth of all deaths is caused by diseases of the lungs, and the Grand Dictator, in his annual address last year, announced that liquor was killing more Knights of Honor than consumption. This announcement goes direct to the pocket. It brings home to temperance members the liquor question. It puts it on a business basis. It is making them pay, and pay handsomely, for their brother's intoxication. The Odd Fellows, a beneficial association, paying from $3 to $8 per week benefits to each of its members while sick, is made to suffer from the drunkenness of its members, for the same causes that lead to death produce disease. We expect to see the time in the history of California when even a man who occasionally gets drunk cannot get within these guilds. And they will not be be rejected by total abstinence members solely, but by members who take a business view of the situation and who do not wish to assume extreme risks and unnecessary and unequal burdens. Charity and business never go hand in hand. What would a charity bank amount to as a financial proposition? It would be grand, for the purposes of spread-eagle speeches, to say to all the prospective widows and orphans of drunkards—to say to the wards of men who are daily committing suicide by the excessive use of strong drink, we will take into full membership the heads of houses for pure charity's sake, but it would be death, speedy and irretrievable, for the organization that undertook such an airy scheme. We will go farther, and prophesy that those members within these societies who do not observe the laws of temperance will find themselves suspended and hopelessly knocking at bolted doors. This spirit within the Lodge-room will permeate the public mind till the great commonwealth of the Pacific seaboard is flooded with a temperance boom that is founded on facts.

Guarantee Fund Association.

At the annual meeting of the Guarantee Fund Association, on Jan. 10th, 1882, the old Board of Directors were re-elected. On the 14th of February, following, the Board of Directors elected the following officers for this term: President, Wm. H. Jordan; Vice-President, P. Veasey; Secretary, E. M. Reading; Treasurer, H. G. Prince.

The report of the secretary for the current year shows 703 applications that have been honored with membership, aggregating 1,503 since the organization. The net gain for the year is 608, making the total members in good standing, on 1st day of January, 1,241.

There have been six assessments for the current year, and death losses paid in all amounting to $5,066. Balance on hand $1,500.49. The Finance Committee, consisting of John H. Harney, Wm. Broderick, L. L. Dunbar, in their annual report find the books and vouchers in accord with the secretary's report. From this very favorable showing it appears that the cost of insurance for $1,000 has cost, including annual dues, $8 in the Workmen's Guarantee Fund.

Since the annual meeting the applications for membership have been quite large, and it is expected by the directors that the 2,000 mark will be reached this year.

Deaths from Singular Causes.—Two distinguished men have just died in Paris from a singular cause. Col. Adan, Director of the Institute Cartographique, thought he had a chair behind him, and in sitting down fell with all his weight on the floor. He died within a short time from the effects of the accident. About 10 days before M. Pirson, Governor of the Banque Nationale, went to a dinner party at the Spanish Legation, and sat beside the hostess. She rose from the table, and then, continuing a conversation, resumed her seat. M. Pirson followed her example, but a footman had meanwhile removed his chair, and in his fall he injured his spine and survived only a few days.

Degree of Honor.

Editors Watchman:—We glean many items, instructive and interesting, from your valuable paper, but there is one branch of the Order of Workmen upon which we hear very little, if anything, and that is the "Degree of Honor." We have in Redding a prosperous little Lodge of 32 members; two nights out of each month there is scarcely any business to transact, in fact, but for the demoralizing effect it would have upon us, I would be in favor of meeting but twice a month, as do some of our neighboring Lodges. Such being the condition of affairs with us, several of our members have thought that it would be a benefit to us to have the Degree of Honor, and to that end our Recorder has been instructed to correspond with the Grand Recorder relative to the proper mode of procedure and cost for this degree; but he has not yet received anything satisfactory upon the subject further than that the degree is very incomplete, and that the Supreme Lodge is expected to take some action in the matter. We hope that the Grand Lodge, soon to assemble, will have something to say upon this subject. We believe that a degree of this kind established in our country Lodges would have a good effect and would tend to bind the brethren closer together and make them forget the cold-blooded business part to which they are apt to attach too much importance.

As before stated, our Lodge is prospering, two members having joined since the beginning of the term, with prospects of more soon to follow. Bro. Lawry, who will represent us in the coming session of the Grand Body, is one of our "solid" members, who will not only reflect honor upon his Lodge, but be a valuable member of the Grand Lodge, and when he returns to us we trust he will bring with him the necessary information and instruction for the establishment of a Degree of Honor Lodge. Yours in C. H. & P., P. M. W.

"Sound It Along the Line."

Ever onward and upward is the motto of the A. O. U. W., and with the success of the Order is the Watchman's progress. There are, however, some Workmen who are not subscribers, and we wish to draw *their* attention to the merits of our journal. Those of our readers who have been with us from the start, and also those who have come later, can do much to not only aid our enterprise, but also that of our organization. They have been with us, seen our work, and can best tell whether the Watchman has not been an earnest advocate of the Order's interests.

Members of the A. O. U. W. have a pecuniary interest, which renders an able exponent of their rights and privileges of paramount importance. Therefore, every member of the Order should take the paper, read it, and if he has some friend who is morally and physically qualified, lend him the paper for the purpose of hastening action.

Members of the Watchman family who have felt strength and received encouragement from a perusal of the Order's doings in its columns would do well, also, to pass it occasionally around to the lukewarm, that they may be partakers in the faith which moves them.

The privileges we now enjoy by reason of our membership will last while life is in us, and when we are gone others will be ready to fill our places. If the Order should ever perish, lukewarmness will be the rock upon which we will split, and one of the greatest preventives of this will be the enthusiasm that is kept alive by a careful reading of the Watchman.

We will send copies free for samples to those who are willing to assist in the circulation of our paper.

A Skin Tinged with Yellow, that is, abnormally so, is the outward and visible sign of a lack of regularity in the performance of the bile-secreting function, and that the biliary fluid has strayed from its proper channels, impeding digestion, disordering the bowels, and producing aggravating internal disorder. No time should be lost, under such circumstances, in resorting to the standard anti-bilious remedy, Hostetter's Stomach Bitters, the good effects of which are in nothing more conspicuously shown than in its reformatory action upon the great bile-secreting organ. Renewed activity, when the liver is sluggish, a regular action of the bowels, the disappearance of sick headaches, heartburn, flatulence, and pain in the region of the organ principally disturbed, may be anticipated with just confidence by any bilious subject who begins with a course of this peerless regulator, and debilitated or nervous sufferers experience the greatest benefit from its tonic influence, while its efficacy in rheumatism and kidney weaknesses is equally well authenticated.

Nature of the Diphtheritic Contagium.

In the spring of 1880, Drs. H. C. Wood and H. F. Formad, under the auspices of the National Board of Health, began a series of experiments upon rabbits with a view of determining the nature of the contagium of diphtheria. The animals were inoculated with diphtheritic membrane taken from the throats of human patients.

In the course of these researches, it was determined that there is nothing specific in the production of false membrane in the trachea, and that traumatic pseudo-membrane accurately resembles the diphtheritic, except that micrococci are not quite so abundant in it. The experimenters conclude that the disease produced by the diphtheritic inoculation was really rabbit diphtheria, because the poison giving rise to it, the symptoms during life, and the *post-mortem* lesions were identical. In addition to this, the contagiousness of the disease was retained. They accept the experiments of Curtis and Satterthwaite, showing that the infectious character of diphtheria depends upon the solid particles of the membrane; furthermore, their researches lead them to conclude that the micrococci are in close relation with the essential poison of diphtheria, being either the virus itself or the producers of it. The results of culture of these bacteria lead them also to assert that there is no difference between the micrococci of simple sore throat and those of diphtheria, except in activity of reproduction; the two are the same organism, existing under different conditions.

Drs. Wood and Formad believe that the vitality under artificial culture is in direct proportion to the malignancy of the case from which the plant is taken. They have succeeded in producing diphtheria by the inoculation of cultured micrococci, but never with those of a generation later than the second.

M. Pasteur has indicated that an inert organism may become virulent, and *vice versa*, and in the same way they believe themselves able to prove that the micrococci of the mouth are really identical in species with those of diphtheria. That oxygen may be potent in converting a virulent into a non-virulent organism, they regard as probable, from the effects of exposure of dry membrane. The micrococci of a catarrhal angina or trachitis may, under favorable circumstances, be transformed into micrococci of diphtheria, and a self-generated diphtheria (*i. e.*, endemic) ensue; or external conditions may favor the transformation of inactive into active organisms, and these may lodge in the trachea and also cause diphtheria (*i. e.*, epidemic). In the first instance, the disease may spread by organisms exhaled by the breath. Diphtheria will vary in contagiousness according to the development of the virus—malignant diphtheria will be more contagious than the mild endemic form. The conditions outside of the body which favor the transformation of inactive into active micrococci, and agents destroying these organisms, remain yet to be studied.—*Phila. Med. Times.*

How to Make Peppermint Drops.

Take a convenient quantity of dry granulated sugar; place it in a pan having a lip from which the contents may be poured or dropped; add a very little water, just enough to make the sugar a stiff paste, two ounces of water to a pound of sugar being about the right proportion; set it over the fire and allow it to nearly boil, keeping it continually stirred; it must not actually come to a full boil, but must be removed from the fire just as the bubbles denoting the boiling point is reached begin to rise. Allow the sirup to cool a little, stirring all the time; add strong essence of peppermint to suit the taste, and drop on tins, or sheets of smooth white paper. The dropping is performed by tilting the vessel slightly, so that the contents will slowly run out, and with a small piece of stiff wire the drops may be stroked off on the tins or paper. They should then be kept in a warm place for a few hours to dry. If desired, a little red coloring may be added just previous to dropping, or a portion may be dropped in a plain white form, and the remainder colored.

There is no reason why peppermint should alone be used with this form of candy, but confectioners usually confine themselves to this flavor. Any flavor may be added, and a great variety of palatable sweets made in the same manner. If desired, these drops may be acidulated by the use of a little tartaric acid and flavored with lemon, pineapple, or banana. In the season of fruits, delicious drops may be made by substituting the juice of fresh fruits, as strawberry, raspberry, etc., for the water, and otherwise proceeding as directed.—*Confectioner and Baker.*

Phosphorescent Coral.

C. F. Holder, in the *Scientific American*, says: "The appearance of phosphorescent light among corals is of extremely rare occurrence, and during a long residence in the coral country, and of continued observation, the phenomenon was only observed once, and that in the genus *Caryophilla*. The specimen was first seen from the boat in about 30 ft. of water, and brought up by diving, immediately placed in a jar of water, and finally transferred to an aquarium that had been built so that the tide rose and fell in it. Here the beautiful specimen was lodged, so that every movement of the animal could be observed. It had five branches, each one forming a cell showing beautiful radiating plates, striated externally, and collected into a solid conical polyparium fixed at the base. In this specimen the green was only faintly observed; and when the animal was within its cell the color of the mass was more inclined to yellowish brown.

The situation of the coral was about a foot under the surface, and a platform had been arranged so that the observer could watch it from the water's edge, and while so doing the light was first seen. At first we thought it might have been the phosphorescent flash of some minute acaleph, myriads of which were floating about, but to remove all doubt a glass funnel, slightly tinted, was gently lowered down over it, and a second later a slight flash illuminated it, and then another, showing a faint light that made small objects visible in the immediate vicinity of the polyp; and at one time a pteropod was suddenly thrown into a brilliant light when within a few inches of it. The flashes seemed to be intermittent, and to pervade the entire face of the cell in much the same fashion as does the light of the firefly the surface of that insect. By lowering a black glass near it an idea was obtained of the size of the reflection which was on the glass, an oval illuminated spot seemingly about the size of a silver quarter, and the color of the spark yellow, with perhaps a bluish tint.

ELECTRIC LIGHTING is in successful operation on more than 60 steamers of the Mississippi river and its tributaries, and is believed to add much to the safety of traffic and travel.

How Comets Affect the Earth.

Prof. Lewis Boss, in his recent prize essay on comets, says: "The influence of comets upon the earth, is in all probability quite insignificant. They may, like the sun, affect the earth's magnetic condition, and thus to some extent, possibly, its meteorology. No such effect has ever been perceived. In spite of some chance coincidences between the apparitions of great comets and remarkable public events, no well-informed person now believes that there is any real connection between them. By a liberal and credulous interpretation of any frequently occurring celestial phenomenon, similar coincidences could be shown. When a comet is converted into meteoric bodies, which impinge upon the earth's atmosphere, there is some direct though probably minute effect. Some have thought that a sensible portion of the heat which the earth receives is generated in this way; but the weight of scientific opinion seems to be against that hypothesis. The impact of meteors upon our atmosphere must add some matter to it, and this is probably in the form of dust. This may be the origin of the so-called cosmic dust, which has been collected at sea in recent times. The finer particles of it may have some influence on cloud formations and other meteorological phenomena; but all this is merely conjecture. A more remote effect may be sought in the possible fall of meteors and comets upon the surface of the sun.

Owing to his vast bulk, the sun would attract an immense number of these bodies; but it is quite certain that their effect upon the sun's heat is insignificant. It is now generally admitted that we must look for the origin of the sun's heat in a constant, though to us imperceptible, shrinkage of his vast bulk. Some connection between the frequency of sun-spots and comets has been rather vaguely suspected. Were the search for comets systematically pursued with equal persistence for a long period, we might have some data for the formation of a sound opinion. Yet it would still be an open question, whether the comets cause the spots, or whether greater activity of the sun tends in some way to render comets brighter, so that more will be visible—with probability in favor of the latter supposition. Finally, it may be said, with all due respect to scientific decorum, that the appearance of a great comet does exert one most happy influence on the earth, in that it stimulates the curiosity of mankind, and directs their thoughts to the more particular contemplation of the glorious universe which surrounds them.

A STEEL BAR held in the direction of a magnetic needle, and struck several blows with a hammer, will become magnetized.

J. H. WYTHE, M. D.

Residence: 35 West Street, Oakland. Office hours 10 A. M., after 5 P. M.

Office: 759 Market St., San Francisco From 11 A. M. to 3 P. M.

Electric Light on Railway Trains.

A correspondent of a Sheffield (Eng.) paper, writing from London of the recent trial of electric lights on the Pullman train of the London, Brighton & South coast railway, says:

There is no doubt whatever on the point that this, apart from the question of cost, is a decided success. It is easily manageable, and diffuses through the train a pleasant, equable light, scarcely less agreeable than daylight. It is turned on and off with instantaneous effect as the train enters and leaves a tunnel, and of course is kept burning the whole of the time during the night journeys. The electricity is stored in a number of lead plates, which are kept in water in iron boxes in the guard's van. There are two lots, one at either end of the train, and two mechanics in charge of them. This discovery of ability to store electricity for application to lighting purposes seems to carry the discovery further than anything since it was introduced. It gets over many difficulties which seemed insuperable—especially the important one of the great waste of power which is illustrated every night at the Savoy theater—and would be applicable to the introduction of electricity for household use. At the Savoy, when the exigencies of the play require that the lights should be turned down in the auditorium, there is no cessation of the enormous power required to produce the full effect. What happens is that, by a mechanical contrivance, the electricity is carried off from the light and goes to waste. With this system of storing, electricity can be used just like gas, as much or as little as people chance to want. Another great advantage is the freedom from jumping inseparable from the action of the driving power of the steam engine, or of the motion power of water. The lights on the Brighton train burn just as steadily as gas, an effect not in any way obtained where the light is maintained directly by the driving power of steam. But, after all, the question of gas vs. electricity will resolve itself into one of cost, and it is here where gas will inevitably hold its own. The fundamental principle of the electric light is, that for a given exertion of power you obtain a given proportion of light; neither more nor less. For every hour it is burning, there will require a certain exactly-ascertained proportion of revolutions of the steam engine, and therefore, if the whole town is lighted, it can be done only at a strictly proportionate expense to the lighting of a single house. As to what that expense will be as compared with gas, the Brighton train would, if we had an idea of the actual figures, afford a precise means of information. I met on the train a well-known gas engineer, attracted, like myself, by the novelty of the experiment. What the electric lighting cost, he was not able to say; but when we take into account the capital sunk in plant, involving a steam engine with the necessary buildings, consumption of coal and necessary employment of skilled labor, it must be something considerable. Against this is the bare fact that the Brighton train could be lighted with gas for the double journey at the cost of 10d. It is a physical impossibility that electricity should ever come anywhere near this, and that probably explains the singular phenomenon, that at the time when electricity is making many conspicuous advances in public favor, the value of gas shares is not only steadily maintained, but is actually rising in the market.

MECHANICAL EDUCATION.—There is nothing particularly suggestive of art in the appearance of an ordinary crowbar, says the *American Machinist*, but as they are produced they represent the work of an educated man. Such a tool—a tapering bar of steel—is, besides the point, made up of three distinct forms, beginning with a square, continuing with an octagon, and concluding with a round section. Looking at a pile of a hundred or more as they come from the hammer, it is a difficult matter to detect difference enough to detect one from another. This would all be simple enough if they were forged by the aid of dies, but the fact is that their correctness of shape depends entirely on the skill of the individual who presides at the hammer. There are a thousand ways to make them unlike, and only one to make them alike; yet each of the three forms is merged into the succeeding one, with a correctness that would do credit to a draftsman, and the sizes are kept so nearly perfect as to require close measuring to find where one differs from another. Of course it is easy enough to see how such things may be done if plenty of time is allowed; but perhaps the most wonderful thing about the forging of this simple tool is the fact that it is all done in from two and a half to four minutes. Any man with no guide but his eye, who can do such work as this, and in such time as this, does it by virtue of a high education of a practical and valuable kind.

PHOTOGRAPHY OF GAS FLAMES.—Gas-fitters have recently made a most useful application of photography. They photograph gas flames given by different burners or jets, so that a customer can see if the shape and form of a light will suit him before he gives his order. As the flames are, moreover, depicted "life-size," the purchaser can always tell whether his jet is up to the standard.

Provisions.

Filmore St. Cash Market,

A. ROADES, - - - PROPRIETOR,

—ALL KINDS OF—

CHOICE MEATS, FISH and POULTRY.

Goods Delivered Free.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

Excelsior, 126.

This Lodge, which has always devoted part of the time of each meeting to exercises of a literary or instructive character, has lately adopted a new feature, which, so far as we know, is in some respects new, and certainly, if properly carried out, cannot fail to be both entertaining and instructive. The last Lodge night in each month, has been formally set apart, until otherwise ordered by the Lodge, for the discussion of questions of actual current interest—the questions upon which men are now actually thinking, and upon which they must sooner or later act. Strictly political questions are, of course, excluded, but social and political questions are constantly arising in society, which men must consider in their capacity as citizens, but upon which men do not divide according to their party likes, and which are proper and profitable subjects for discussion in friendly societies. Among these are such questions as "How Shall We Conduct our Civil Service?" "How Should the State Deal with the Great Corporations?" and other questions of this class. It is such questions as these that Excelsior Lodge proposes to discuss on the last Lodge night of each month. A novel feature of the discussion is the abandonment of the old plan of a formal resolution couched in the most general terms, with two set champions to defend the two sides, and no liberty of speech for others, and this is what takes its place: A resolution is proposed by any brother who favors it, and it must be seconded like any other resolution, and may be debated and amended at the pleasure of the Lodge, precisely as if it were passing through a regular legislative body. When discussed or amended to the satisfaction of those present, it is adopted or rejected, as the case may be. All brothers of the Order are invited to be present at these meetings, to take part in the discussion, and to vote upon all questions.

Excelsior enjoyed a most interesting session on Thursday evening, February 9th. As it was an off night for initiation, and there was but little routine business to transact, most of the evening was improved by the entertainment committee. Before the regular bill of fare was presented, however, H. H. Mayhew, P. M. W., was presented on behalf of the Lodge, with an elegant Past Master Workman's jewel, appropriately engraved, the presentation speech being happily delivered by Bro. L. A. White and gracefully responded to by the recipient. After an amusing selection had been read by Bro. Jenness, Bro. Harvey read an original essay on the Pilgrim Fathers and their influence in shaping the destiny of the country, which elicited remarks by Bros. White and Adams. Bro. Hahn favored with a piano solo, the entertainment concluding with the recitation of the "Pilot's Story," by Bro. Mayhew. Bro. Blight, the presiding Master of Harmony Lodge, being present was called upon for a speech, and responded briefly. Bro. Williams, of Unity, also delivered a stirring eulogy on the merits of the Order. Before closing, Bro. Gunnison reminded the brethren that Golden Dawn, D. of H., met in the same hall on Saturday evening, and invited all who had not already done so, to join this most pleasant and social sister society of the A. O. U. W., with their sisters, wives and daughters; entrance fee, $1, and 25 cents per month for dues.

Fidelity, 136.

One of the events of the season was the family gathering of Fidelity, 136, A. O. U. W., which was held in a fitting manner at Saratoga Hall on Wednesday evening, Feb. 14, 1882. It was principally a gathering of the members of Fidelity with a limited number of invited guests and leading Grand officers. The large hall was artistically decorated and dressed with fine trimmings in an elaborate manner, under the direction of the proprietor, Mr. Jacob Schleicher. The following literary and musical programme was given: Overture, Ballenberg's band of five pieces; address, Wm. H. Jordan, P. G. M. W. This address was feelingly delivered in an earnest and eloquent manner, riveting the attention of the large audience, and reminding us of the days when Bro. Jordan, as the first G. M. W., with voice and pen was marshalling the forces that laid the foundation for this grand organization. Recitation, Wm. B. Smith, P. M. W. of Fidelity, a highly interesting performance that was well received; piano solo, Prof. H. C. Siebe, Organist of Fidelity, an artistic effort that was listened to with great pleasure; recitation, E. B. Read, well received and heartily encored. It was then announced that as there was some misunderstanding about the secrets and workings of our Order an exemplification of ritualistic work and conferring the degrees in the A. O. U. W. would now be made. Sixteen specimens of humanity dressed in a grotesque manner in white and black gowns with white and red caps, having a shield of pasteboard with skull and cross bones painted thereon, worn on the breast entered. The guards, who were called the watch dogs, were armed with four-tined pitchforks, except the chief, who was armed with a scimetar. The ceremony was given with great precision and dignity, and all new features and questions were signalized by a loud sound on the gong, and read from a book about two ft. square, on the cover of which was the skull and cross bones and different letters of the alphabet. The ceremonies were quite novel, some of the admonitions being poetical, while the chief humanitarian was very severe in his denunciations and threats to the candidate whose needy and seedy appearance and dilapidated condition showed him to be a fit victim for the hangman's noose, to which he was subjected in the second degree, after which he was properly branded and admitted to full membership amid great rejoicing and a hearty welcome. The music was good and the closest attention was given by the audience to the mysteries, caricatures and this original burlesque intended to create merriment and sport for the highly pleased and interested audience. A list of 11 dances with a few extras were then carried out with great spirit and apparent delight to a company that just filled the large hall. To those who desired, refreshments were at hand in an adjoining room, which were freely indulged in. This was not in a sense a public celebration, but intended as a Lodge meeting for making a closer acquaintance among families and have a Lodge entertainment and hop. The following constituted the brethren in charge: Committee of Arrangements, E. M. Reading, P. M. W., O. H. Cole, E. B. Young, P. M. W. Floor Manager, L. L. Dunbar, P. M. W. Assistants, H. P. Sonntag, Bert McNulty, Walter H. Holmes, P. M. W., E. F. Selleck, J. F. Curtis, Chas. W. Grant.

Noe Valley, 185.

Our baby Lodge, on the outskirts of the city, is getting on well and gradually, but steadly, increasing its membership. C. V. Thompson, M. W., conferred the M. W. degree, Feb. 14th, on one candidate, in a manner that reflected credit and as a veteran remarked "it was letter perfect." Immediately, thereafter, a J. W. degree member put in an appearance and the M. W. degree was conferred a second time on the same evening.

Valley, 30.

At the meeting of Valley, on Wednesday evening, Feb. 22d, three petitions were received for the degrees, two elected by card, and ten received the M. W. degree. Their *personnel*, morally and physically, was the subject of several complimentary remarks during the evening. On the question of annual sessions for the Grand Lodge, it seemed to be the sense of the Lodge to leave the subject with the representatives to act as they saw fit. With this addition, the membership is now beyond the 850 mark, and it is expected that this term will reach 900. Under head "Good of the Order," the Grand Master made some remarks that were well received, and listened to with close attention. In the course of his speech, he said: "In one year we have had 4,200 applications, 520 rejections, 3,550 admitted to membership, and a net gain of 3,102 to Feb. 1, 1882. We have paid out $26,000 the last month, $26,000 this month, and will pay $26,000 next month." Several members of Valley had a few words of a humorous and congratulatory character, who were followed by S. D. Dodson, D. D. of Santa Cruz county, in one of his fraternal and stirring speeches. In the course of his remarks, he gave the most cheering words from his section.

Silver Spray, No. 3, D of H.

A very large meeting was held by Silver Spray, No. 3, on Monday evening, February 13th. Two were given the degree in a manner that reflected credit on the officers. A number of visitors were present from Golden Dawn, D. of H. The question of granting beneficiary certificates to all members of the Lodge was fully discussed. A number of sisters and brothers joined in this earnest debate, which was settled by a vote of 24 to 16 in favor of adopting the beneficiary system.

Aurora, 8, D. of H.

Aurora held another of its interesting meetings on Tuesday, Feb. 14th. Two sisters and three brothers were initiated. This was the first work of the new officers, but the charges were delivered letter perfect, and with grace and dignity. Aurora has for its W. S. of H. a lady who is eminently qualified for the position, Sister Holland having passed through all the chairs of the Eastern Star, and is withal a good elocutionist. Indeed, this Lodge has been singularly fortunate in its choice of presiding officers since its institution, and not a little of its success is owing to their intelligent management of affairs. Sister Rossbach, S. of H., delivered the charge of her station very creditably, and gave evidence that if called to a higher position, she would perform the duties in an able and efficient manner. After the candidates had been initiated, a short time was spent in social congratulations, when the Lodge was called to order, and the circular from the G. M. W. read and acted upon. It was first voted as the sense of the Lodge, that the Degree of Honor should be made beneficiary; and secondly, that a committee should be appointed for the purpose of gathering facts and suggestions in relation to the Degree, to be submitted to the Grand Master. Remarks were then made by several of those present. Suddenly a loud knock was heard at the outer door, a weird, sepulchral knock, and expectation was on tiptoe to know who had made bold to demand admittance in such an unearthly manner. It was a mere formality on the part of the knocker to signalize that he wished to be admitted, for this was St. Valentine's day, and while there is no record that the Saint was ever admitted into a Degree of Honor Lodge, it was evident from the huge package that was laid on the pedestal in front of the W. S. of H., that he was here in spirit, and that all the signs and passwords and barred doors could not keep him out. Soon the tidings of his presence were distributed among the sisters and brothers, and the room resounded with shouts of laughter as each one received a token of St. Valentine's tender regard. After the merriment had in a measure subsided, it was announced that a collation had been prepared, and that all should march to the banquet hall. This lunch had been furnished by several sisters of the Lodge, each contributing something, notably among which was some splendid cake, with words, "Degree of Honor," in the center. The company then sat down, and a real sociable time was had; in fact, a kind of family reunion, and was a fitting finale to a most agreeable evening. Aurora's light is shining brilliantly.

Golden Dawn, 10, D. of H.

Our young sister at the Mission is moving along nicely. On Saturday evening, Feb. 11th, there was a large and pleasant meeting held at Mayberry's Hall. This being the off night the regularly organized quartette with the assistance of others, gave a choice literary and musical programme, consisting of instrumental duet, Miss Effie Gunnison and Walter S. Pierce; solo, Mrs. L. S. Clark; beautifully rendered and called for an encore; reading, Mrs. Silas A. White, which was highly entertaining; vocal quartette, by Golden Dawn club, Miss Ella Booth, Mrs. L. S. Clark, Mr. Sam. Booth, Mr. L. S. Clark. A recess was had, and spirited dancing indulged in a while. There were several members of Silver Spray present, and a real enjoyable time had.

Nevada Lodge Locals.

☞ We would refer Recorders to their Lodge Locals for suitable reading for "Good of the Order." Please correspond.

St James, 9.

EDITORS WATCHMAN:—St. James, No. 9, flourishes. The following officers have been elected for the current term: W. T. Burns, P. M. W.; M. S. Bonnifield, M. W.; A. F. Trousdale, F.; G. A. Knenkel, O.; Charles J. Currier, Rdr; R. W. Wood, Fin.; J. H. Macmillan, Rvr; J. Nicholas, G.; Ferd Ried, I. W.; L. L. Rickard, O. W.; J. C. Hanson, Med Ex. We celebrated our first anniversary on the 22d ult.; by a grand masquerade ball. May the second find us as prosperous. Our Lodge accompanied D. D. G. M. W., C. A. Lagrave, to Paradise, Feb. 16th inst., where thirty charter members were formed into "Unity, No. 14." Nevada seems to be doing finely, and our energetic Grand Recorder, who is heart and soul in the cause, assures us of rapid increase in membership in our Grand Lodge jurisdiction, and hopes for the necessary 2,000 members in another twelvemonth. So do all of us.

Fraternally, C. J. CURRIER, Recorder.

Election of Officers, A. O. U. W.

NELSON, No. 202.—R. N. Whitney, M. W.; W. A. More, F.; S. J. Nikirk, O.; S. J. Bruton, Rdr.; G. H. Longnecker, Fin.; H. J. Van Ness, Rvr.; T. H. Chivell, G.; T. Delevan, I. W.; A. T. Jones, O. W.; A. F. Jones, Trustee; Dr. O. C. Hawkins and Dr. Stansberg, Med. Exs. Reported by S. J. Bruton.

NICOLAUS, No. 146.—D. H. Howlett, M. W.; F. G. Comstock, F.; W. H. Madden, O.; Jas. W. Lee, Rdr.; D. Redfield, Fin.; C. E. Bevan, Rvr.; A. J. Wagner, G.; L. W. Lee, I. W.; J. T. Leary, O. W.; D. H. Howlett, Trustee; A. L. Crossman, Med. Ex. Reported by Jas. W. Lee.

BRO. DAVID B. BELL, long and favorably known in the Grand Central market, has taken charge of the fish stall Nos. 27 and 29, Bay City Market, owned by A. Silvestri & Co., wholesale and retail dealers in fish, 517 Merchant St. The best fish in the market will be kept in stock.

THE furniture house of Terry & Co., 747 Market street, opposite Dupont, is a mammoth concern. The firm is composed of three brothers, all Workmen, and by enterprise and fair dealing they have become one of the leading houses of this city. If you wish to buy or sell in their line, go to 747 Market St.

GRAND CHARTREUSE BITTERS.—Bro. A. Connot, proprietor and manufacturer of the above celebrated bitters, is receiving many flattering testimonials from those who have used them. The principal ingredients are gathered from the Alps mountains, consisting of roots and herbs. As an appetizing tonic, regulator for the stomach and purifier of the blood, it is claimed to be the best yet introduced on this coast.

THE Montgomery market, No. 606 Market, kept by Messrs. Hoffman & Woenne, is supplied with the best meats, poultry and eggs. Bro. Woenne attends personally to his customers, and has the reputation of selling goods very low. Goods are delivered to any part of the city.

SAYS the London *Truth:* "The Americans certainly are an ingenious people. Finding that the boxes in which American apples were sent in such large quantities to this country were afterwards of little use, they now pack the apples in coffins, which a correspondent assures me command a ready sale."

Notices of Recent Patents.

Among the patents recently obtained through Dewey & Co.'s SCIENTIFIC PRESS American and Foreign Patent Agency, the following are worthy of special mention:

CLASP FOR CORSET STIFFENERS.—Christina V. Turner, Nicola Valley, B. C., assignor of one-half to D. K. McMullen, S. F. No. 253,642. Dated Feb. 14, 1882. This invention relates to a device for fastening the whalebones or stiffeners in corsets, and for protecting the corsets from the wear of the ends of the stiffeners. It consists of a small metal clip having points, which pass through the cloth on each side of the stiffeners and are clasped behind, the top being provided with an extension for the insertion of an eyelet, and the whole device being pressed down upon and on both sides of the stiffeners. This device has for its object the holding of the stiffeners in place and the prevention of wear by means of the ends of the stiffeners being forced through the cloth.

TREADLE POWER FOR GRINDSTONES.—Joshua M. Nelson, Oakdale, Stanislaus county. Dated February 14, 1882. No. 253,620. This treadle power for grindstones consists in the combination and arrangement of parts whereby a regular and continuous motion may be imparted to the stone, securing at the same time the comfort of the operator. More particularly, it consists of a suitable frame or stand carrying a grindstone and water trough, motion being transmitted to said stone from suitable treadle levers through the intermediate mechanism of sprocket wheels or other similar devices attached to the stand.

FRICTION BRAKES FOR STEERING WHEELS.—Walker C. Tyler, Stockton. No. 253,644. Dated Feb. 14, 1882. This invention relates to steering where applied brakes are necessary or convenient, and the details of construction are such that the inventor can apply the brake to steering wheels already constructed. A strap encircles the wheel, and when pressure is brought to bear on a lever, the ends of the band are brought together upon the rim. The force of this friction brake is exerted equally on the wheel. These wheels are not usually strongly journaled, so that any great side pressure would tend to injure them.

DREDGING MACHINE.—Zephaniah Williams, Oakland. No. 253,145. Dated Jan. 31, 1882. This patent covers improvements on a dredger which was patented by the same inventor in March, 1880. He adds to the dredger two vertical towers so that he can run a double set of buckets either from or to the scow, in the same direction, and thus one set can carry its work up to where the other began, and on the return swing the other can work up to the first. More work can be done with this machine. Elaborate drawings would be necessary to elucidate all the details.

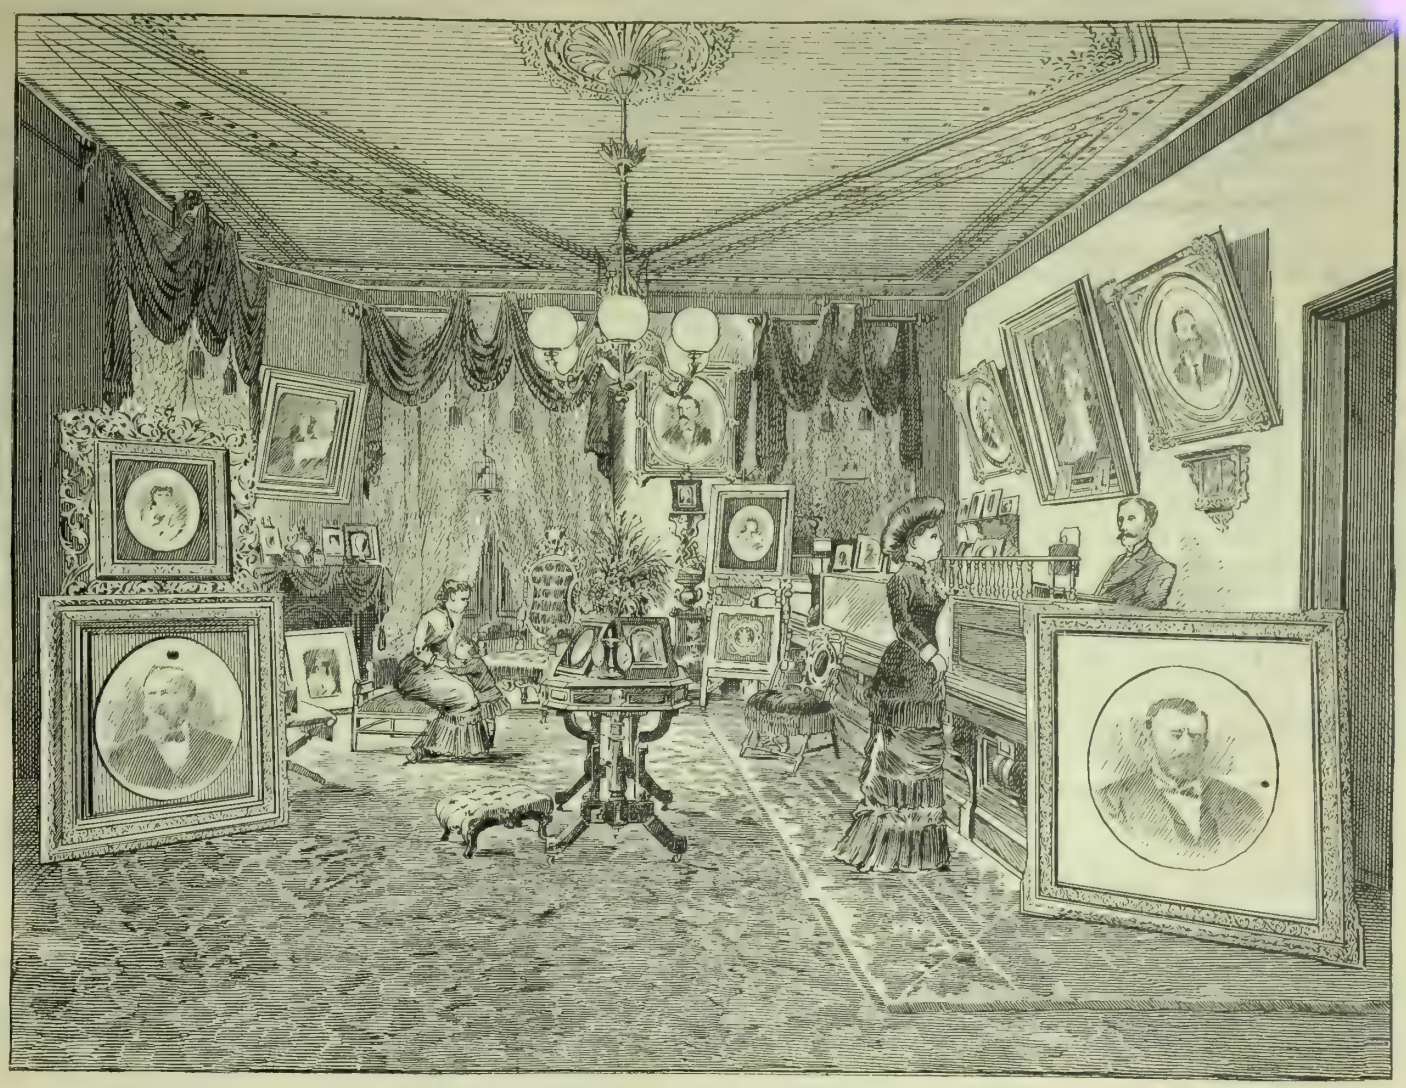
HAIR TONIC.—Lewis Forbes, S. F. No. 253,594. Dated Feb. 14, 1882. This composition consists of certain peculiar ingredients combined in suitable proportions, which, applied to the head, is intended to produce and restore hair. The application is by rubbing the scalp after first carefully shaving it. This operation is continued until the desired effect is produced.

Teaching Children Manners by Example.

"Pease etatuse me, mamma?" said Harry, as he finished his meal the other day.

"Oh, isn't that sweet!" exclaimed Mrs. Graham, who, together with her husband, had been invited to dine with Mrs. Owens.

Before Mr. G. had time to reply to his wife, Mrs. Owens said, "No, my son, I cannot excuse you until you have placed your knife and fork in proper position."



While the little fellow was arranging his knife and fork Mr. G. spoke as follows: "Yes," said he, "it is certainly a pleasure to see children polite and mannerly, especially at the table. It is really a pleasure to have the little ones around the table with us, when we can feel that there is no danger of being mortified at their disorderly conduct."

"By the way, Mrs. Owens," said Mrs. Graham, "it seems to me there must be a certain adaptability in parents in thus being able to so train children that their presence in company may be regarded as a pleasure."

"I think not," said Mrs. Owens. "My opinion regarding this matter is, that children are taught by *example*. For instance, my husband and myself make it a point to always be polite to our children, and see that they are polite to each other. If we request them to perform any duty, we find it no trouble nor do we forget to say 'please,' and the duty having been performed, it is only two small words to say, 'thank you.' There is no good reason why we should not raise our children so that they will be an honor rather than a disgrace to us. Impress upon their young minds the very important lesson that 'civility costs nothing.' And when we have ceased to be with them in the trials and struggles of life, they will remember us with gratitude and pride."

Taber's Photographic Parlors.

The accompanying cut is made from a photo, and shows the artistic reception room of the celebrated Photographic and Art Gallery of Bro. I. W. Taber, of this city. It is situated on the corner of Market and Montgomery Sts., over the Hibernia Bank, and occupies, with accessories, the most of the second and third floor, to which you can ascend in elevator at No. 8 Montgomery St. Bro. Taber has had an experience of 25 years in the art of photography, and with the aid of improved instruments, the best artists, and polite attendants, this gallery has become the chief resort for tourists and distinguished visitors, who have carried away to the Eastern States and foreign lands the finest specimens of art from the best view negatives made of the scenery of the Pacific coast from Puget Sound to Mexico. In portrait work this California establishment is equally noted, as you will find in the art galleries, salons, and boudoirs of the principal cities of Europe life-size portraits of many of the distinguished citizens of the world whose Photo was taken at TABER'S. These Photographic parlors have lately been enlarged and a collection of views from all parts of the Pacific coast and foreign countries, which are pronounced by experts to be the finest collection in the world. The new styles of Cabinet, Boudoir and Promenade Photographs, with new and unique backgrounds for effect, taken by improved instruments and skilled workmen, are the "acme of perfection," and the pride of our State, as we justly claim TABER as our California artist. Old pictures are copied and enlarged to any size, and finished in ivorytype style, crayons, India ink, water colors or oils. Novelties in this line are always kept in stock, consisting of elegant gilt and hand-carved frames, passe partouts, etc., etc., for the accommodation of his customers. In almost every household may be seen Photos with name Taber, and that result has been brought about by following one rule, making nothing but the best work and charging one price. While we have a State pride in our artists, we as Workmen, are gratified to know that it is such representative men as Bro. I. W. Taber, who form the great army on this coast whose benefactions are making the brightest page in our history.

I. W. TABER'S PHOTOGRAPH PARLORS, SAN FRANCISCO, CAL.

List of U. S. Patents for Pacific Coast Inventors.

From the official list of U. S. Patents in DEWEY & Co.'s SCIENTIFIC PRESS PATENT AGENCY, No. 252 Market St., S. F.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California
B. W. CROWELL—Humboldt and Trinity counties.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

The Californian.

Back Volumes and Single Numbers for Sale.

Copies of the above Magazine can be had in single Nos. or Vols. (bound or unbound) from No. 1, Jan., 1880, to July 1, 1881. Price, 35 cts. for single copies; $1.50 per volume; bound volumes, $2.25 "A handsome California gift." Prices reduced to the trade for large orders. Address this office.

Traveling Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

HOME BENEFIT ASSOCIATION,

Of San Francisco, Cal.

INCORPORATED UNDER CALIFORNIA LAWS.

The Home Benefit Association is an organization for Mutual Life Insurance. A Benefit Fund is created by payments from each member of sums assessed in proportion to age and amount of insurance.
The amount of insurance may be $1,000, $2,000, $3,000 or $5,000 in any one class.
The age to which persons are eligible for membership is 64 years, but those over 54, at the time of joining, are limited to $3,000 insurance in any one class. Vacancies, caused by deaths, or withdrawals, in any class, which has once been full, will be filled only from applicants under the age of 50 years.
TRUSTEES—Frank Eastman, Charles H. Fish, Jesse S Wall, William C. Randolph, John H. B. Wilkins, Harvey W. Snow, George T. Hawley, Frank C. Havens, Ambrose Cornwall.
HENRY J. BOOTH, President.
ANDREW S. BROWNELL Secretary.
SPENCER C. BROWNE, General Agent.
CHAS. N. ELLINWOOD, M. D., Medical Director.
Office—Safe Deposit Building, No. 328 Montgomery street, S. F.
N. B.—This is an important institution to those who wish to insure reliably and cheaply. Send for full plans and recommendations. No other equal to it has yet been established on this coast.

Pre-historic Tides.

Prof. Ball, of England, in a recent lecture, spoke as follows:

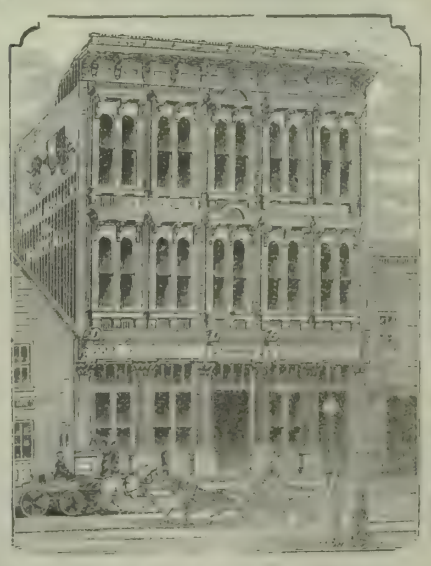
At present the moon is 240,000 miles away, but there was a time when the moon was only one-sixth part of this, or say 40,000 miles away. That time must have corresponded to some geological epoch. It may have been earlier than the time when Eozoon lived. It is more likely to have been later. I want to point out that when the moon was only 40,000 miles away, we had in it a geological engine of transcendent power. If the present tides be three ft., and if the early tides be 216 times their present amount, then it is plain that the ancient tides must have been 648 ft.

There can be no doubt that in ancient times tides of this amount, and even tides very much larger, must have occurred. I ask the geologists to take account of these facts, and to consider the effect—a tidal rise and fall of 648 ft. twice every day. Dwell for one moment on the sublime spectacle of a tide 648 ft. high, and see what an agent it would be for the performance of geological work! We are now standing, I suppose, some 500 ft. above the level of the sea. The sea is a good many miles from Birmingham, yet if the rise and fall at the coasts were 648 ft., Birmingham might be as great a seaport as Liverpool. Three-quarters tide would bring the sea into the streets of Birmingham. At high tide there would be about 150 ft. of blue water over our heads. Every house would be covered, and the tops of a few chimneys would alone indicate the site of the town.

In a few hours more the whole of this vast flood would have retreated. Not only would it leave England high and dry, but probably the Straits of Dover would be drained, and perhaps even Ireland would in a literal sense become a member of the United Kingdom. A few hours pass, and the whole of England is again inundated, but only again to be abandoned.

These mighty tides are the gift which astronomers have now made to the working machinery of the geologist. They constitute an engine of terrific power to aid in the great work of geology. What would the puny efforts of water in other ways accomplish when compared with these majestic tides and the great currents they produce?

In the great primeval tides will probably be found the explanation of what has long been a reproach to geology. The early palæozoic rocks form a stupendous mass of ocean-made beds, which, according to Prof. Williamson, are 20 miles thick up to the top of the silurian beds. It has long been a difficulty to conceive how such a gigantic quantity of material could have been ground up and deposited at the bottom of the sea. The geologists said: "The rivers and other agents of the present day will do it if you give them time enough." But, unfortunately, the mathematicians and the natural philosophers would not give them time enough, and they ordered the geologists to "hurry up their phenomena." The mathematicians had other reasons for believing that the earth could not have been so old as the geologists demanded. Now, however, the mathematicians have discovered the new and stupendous tidal grinding engine. With this powerful aid the geologists can get through their work in a reasonable period of time, and the geologists and the mathematicians may be reconciled.



DR. ALCOTT ON FRUIT AS FOOD.—The purest food is fruit, next the cereals, then the vegetables, which are properly the food of animals. If it is necessary that animal food should be eaten, or because you cannot leave off that diet at once, then take it in its milder form—in the egg or oyster. The change which would be wrought by such a regimen would be slow, as nature's changes are, but the results are not the less certain. Beautiful diet, beautiful form. All pure poets have abstained almost entirely from animal food. Especially does a minister take less meat when he has to write a sermon. The less meat the better sermon. Every animal feeder is sometimes a tyrant. If one would abate that fate, he must omit it entirely, but by a gradual process. Compare a table of the present day with that spread by the hands of Eve, in Paradise, to feed her ethereal guests. Then was gathered together a feast of the purest—a banquet of right. Scholars, if they would get their lessons, can do so in a great deal shorter time and know more by adopting a pure diet. The cause of ill-temper and want of harmony in women, and peevishness of infants, and difficulties in family and other relations might be easily intimated. We are composed of atoms, and every atom must be musical and tremulous with harmony to give the body that harmony that is musical. The consent of our atoms, the absolute consent of every atom to every other atom—that is harmony. Every passion leaves its impress, we know not how long. Every atom sympathizes with every other atom.—*From one of Bronson Alcott's Conversations.*

A NEW iron steamship for the Pacific Coast Steamship Co. has been launched at Philadelphia. She will be the finest specimen of naval architecture on the coast.

COUNSEL for prisoner—"Did you see the prisoner at the bar knock down the deceased?" Pat—"No, yir Honor; he was alive when I see him knocked down."

What to Eat.

Some Useful Hints from an Experienced Physician.

Two good hearty meals in the day are sufficient for health—one before going to work and the other after work is over; that is, breakfast and supper, or what is the same, late dinner. Some lunch is needed between these meals, but this should be light. A heavy meal in the middle of the day may suit children, but if hard work has to be resumed, it interferes with the work, and the work with digestion. Hot, heavy suppers taken shortly before going to bed prevent refreshing sleep, and are among the most frequent causes of attacks of indigestion; at the same time an empty stomach is to be avoided; a few biscuits, or something equally light, is all that is required.

Variety of diet is of importance to health; the stomach gets weary of a repetition of the same every day. Hurry at meals is to be avoided—eat slowly and chew well. Bodily toil and manual labor can be best supported by a vegetable diet, as bread, porridge, etc., with the addition of milk, eggs, butter and cheese; meat is much inferior to these as a supplier of strength. But it is very different with mental labor; here mixed diet, with animal food in moderation, is best. Fermenting drinks will always have a place among articles of diet, though health can be maintained best without them. The most wholesome are those which contain the least amount of alcohol, such as good, sound beer or claret. These, when taken moderately with meals, aid a weak digestion.

The practice of drinking stimulants as aids to work is a serious mistake; it checks the desire for wholesome food, leads to excess, and, sooner or later, injures the health. Tobacco should not be smoked just immediately before or after meals, as it weakens digestion. Too much smoking is a harmful habit, causing nervousness, shaky hands, palpitation of the heart, want of appetite and sleeplessness; when any of these occur, tobacco should be left off, or used very seldom. The practice of boys learning to smoke cannot be too strongly condemned. They think it manly, while they are really injuring their health and growth, so preventing themselves from becoming manly. Excessive tea-drinking is an evil not unusual among working women, producing ill-nourished mothers and weakly babes. Tea should not be taken more than once or twice a day, and should never take the place of a substantial meal. Health depends greatly on good cooking; the object of cooking is to render food digestible and attractive, and to give, at the same time, the greatest amount of nourishment with the least amount of waste. Every opportunity of learning and improving in this art should be eagerly seized.

Facts about the Eye.

The eye is preserved in the convenient form of a sphere, or ball, by the simple device of having its interior cavity filled with liquid, which prevents the limp and otherwise flexible coats from puckering up into any irregularity of shape. It is like a bladder distended with water, which is firm and tense on account of the contained liquid so shut in by the membraneous wall that it cannot possibly escape anywhere from the tight grasp in which it is held. There are, however, in the interior of the eye two distinct chambers in which the liquid is distributed, one in front of and one behind the crystalline lens. The lens hangs, as it were, in the midst of the liquid. The portion which is in front of the lens is a little more than a very weak aqueous solution of salt, and is on that account termed the aqueous humor of the eye. The portion which is behind more nearly resembles a solution of white of egg. On account of this somewhat thicker consistency, it is termed the vitreous, or glass-like humor. Both humors, however, exert very nearly the same influence upon the vibrations of the light, and the optical part of the eye thus comes to be considered as composed simply of two refracting parts—the denser lens and the thinner humors.

The iris is loosely suspended in the aqueous humor in front of the lens, so that it has the water-like liquid bathing both surfaces, and thus enjoys the same ready freedom of movement that it would possess if it were simply immersed in water. The humors of the eyes are supplementary aids to the image-forming capacities of the lens. But they are only subordinate aids, as their influence in this particular is comparatively small. For simplicity's sake the crystal lens and the associated humors may be looked upon as together constituting one single lens, and the visual power of the eye in reality depends upon three curved surfaces which are found in the combination of humors and lens—the front surface of the globe or corner, upon which light in the first instance strikes as it enters the transparent media of the eye, and the front and the back protuberant surfaces are of the crystalline mass itself. The position of the definite image within the eye is determined by the form of these surfaces, taken in connection with the density of the crystalline substance and its associated humors.—*Edinburg Review.*

MASKS OF MICA.—A German manufacturer has succeeeded in producing serviceable face masks of mica, for the protection of metal and glass melters, stone-masons and other workmen exposed to heat, dust and noxious vapors. These masks allow the eyes to be turned in any direction, and there is space enough for spectacles, in case the eyesight is defective.

WILLIAMS'

BALSAMIC

CREAM OF ROSES.

For Beautifying the Complexion, Softening the Skin and Producing that Natural Freshness to the Complexion not obtained by any other Preparation.

DIRECTIONS:

Apply to the face and hands at night, just before retiring, and apply a little in the morning, rubbing it well into the skin. After being in the sun any length of time, or riding when the wind has been blowing, a small quantity of the Balsamic Cream of Roses will prevent tanning or roughness, and is sure to bring to the complexion that ruddy and healthy glow so much sought for, and seldom obtained. Its action on the skin is to restore natural circulation to the blood.

Postal Savings Banks.

The bill now before Congress having for its object the establishment of a system of savings banks in connection with the postoffice is one which seems would be of great benefit to the people. The question has been agitated for some time, but nothing has come of it owing to the opposition of savings banks capitalists, they fearing that it would interfere with their business. In 1873 a bill for the establishment of the postal bank system was introduced into Cangress and referred to the Banking and Currency Committee, where it was strangled. In 1878 another bill was introduced and referred to the Postoffice Committee, who reported it back with amendments, but a vote was never reached in the House. The bill now before Congress has been prepared by the Committee on Postoffices of the House, and is in a fair way of becoming a law. The main points of its provisions are the establishment of postal savings depositories for the protection of small savings, to facilitate their withdrawal and to produce revenue. Depositories may be opened at any money order office in the discretion of the Postmaster-General. Persons from twelve years old upward may become members. The smallest deposit which the Government will take is to be $3, for which a book is provided containing ten stamps aggregating this amount. After this deposit has been made, additional deposits will be received in $1 or its multiples. Interest is to be computed at the central office in Washington upon all sums of $3, and even multiples at the rate of two per cent. per annum, which will be computed for every calendar month. Money, when deposited, may be withdrawn without previous notice, but interest is to be only allowed at the end of the calendar month. The money received from the deposits is to be invested by the Secretary of the Treasury in interest-bearing securities of the United States, or in case the money cannot be invested in this class of securities, it shall be invested in approved State securities, but not in railroad or other bonds. All deposits are to be free from United States, State or local taxation. No person can deposit more than $100 during a period of thirty days, and the aggregate amount allowed to any single depositor is not to exceed $500. These, in brief, are some of the principal features of the bill, although it is probable they may be modified before its final passage. The system of postal savings banks has found great favor in England, where it was established over twenty years ago. At the close of 1879 there were nearly 2,000,000 separate accounts, and the amount standing to the credit of depositors exceeded $155,000,000. The annual interest paid in England is two and one-half per cent. There seems to be no question but what if the system was adopted it would conduce to the thrift and economy of the people. There are many sections where no savings banks exist, and it would be of great benefit if the people could have some sure and safe place in which to deposit their surplus earnings. It would also add greatly to the money circulation of the country, for all the money that is now hoarded and lost to circulation would find active employment through the postal banks system. It would particularly further in the young lads and lassies of the country a spirit of frugality, and the many dimes and dollars that they now spend in useless pleasures could be turned to useful account in the postal bank. Let them once open an account and it would be pretty certain that they would seek to swell its proportions by the continual addition of small sums. By all means let the postal bank depositories be one of the features of the Government.

VIEW OF A WATER FLUME ON THE FACE OF A CLIFF.

A COMPILATION of the death rate of twelve of our largest cities and towns in California gives a mean annual mortality of 16 to each 1,000 inhabitants. This, as compared with the Eastern States and cities of Europe, is very favorable, as the mortality is from 20 to 30 to each 1,000 inhabitants. If the death rate has been 16, including all classes and all ages, it is a reasonable conclusion that, from a selected class from the ages of 21 to 50, it can not exceed 8 deaths to each 1,000 of the class who constitute our membership.

WE HAVE given, from time to time, items showing that father and son are members of our Order. We here state another fact of this kind, in which the two sons and father belong to the A. O. U. W. P. Fischer, father, is a member of Harmony, No. 9, and his two sons, Joseph, aged 24, and Michael, aged 21, are members of Magnolia, No. 41. It is pleasant to think, that in this day, when a "sack" is being raised for the purpose of disseminating false information in regard to the Order, that the members thereof hold fast to the faith which is in them and encourage their nearest of kin to enlist in the cause.

THE Supreme Lodge jurisdiction commences 1882-83 with assessments Nos. 1 and 2. The deaths to be paid for occurred in the following States: Ohio, 4; Kentucky, 2; Texas, 2; Maryland, 2; West Virginia, 2; total, 12.

I. A. Dunsmoor, D. D. G. M. W., Los Angeles, has had forwarded supplies to form two new Lodges, one to be located at Orange and one at San Fernando.

A Notable Undertaking.

It is needless to tell Californians of the romantic character of the mountain scenery of this State, or expatiate upon the wonderful gorges and canyons that can be met with in almost every county. They have seen with their eyes, and no pen picture can give adequate expression to the many sublime physical features which the State possesses. Our engraving on this page will give an idea of some of the wonders of our scenery, and will also serve to show how the seemingly impossible undertaking of crrrying a flume around the face of a vertical cliff was accomplished by the skill and ingenuity of one of our own citizens. This flume is located in what is called "Bracket canyon," in Butte county, about ten miles from Oroville. It was designed and constructed under the immediate supervision of Mr. Wm. H. Bellows, Superintendent of Construction of the Miocene Mining Co.'s ditch and flumes. In order to escape the necessity of a trestle work 186 ft. high, as designed by the engineer who located the line, Mr. Bellows determined to run a line of ditch up the canyon some 200 yards, where it ends against a perpendicular wall of rock 350 ft. high. Around this wall the flume was carried on iron brackets set eight ft. apart, each bracket capable of sustaining a weight of 14½ tons. The length of this bracketed portion is 486 ft. The flume runs around 118 ft. above the bed of the ravine, and from the flume to the top of the cliff aboveis over 200 ft.

An idea of the character of the undertaking may be formed from the fact that the men were swung from the top of the beetling cliffs above, and holes drilled in the sides of the basalt walls, which in this locality are 350 ft. high and as straight as the side of a house. T rails of 30-lb. railroad iron were then bent into the form of an L, 10 ft. being left for the bed of the flume to rest on, 2 ft. rounded off and set into ring bolts clamped and soldered into the holes in the rock. These iron brackets are 8 ft. apart, and each capable of sustaining 14½ tons. From the uprights at the side of the flume run suspenders, ⅞ inch round iron being used, they also having had holes drilled in the rock for their insertion, and are clamped and soldered securely. The flume is 4 ft. wide, inside measurement, and 3 ft. deep, and has a capacity for 3,000 inches of water. It combines beauty of design and strength of construction, and, when seen at a distance, seems to be suspended in the air. It is a noteworthy fact in this connection that not a single accident occurred, except in one case, where the man himself was more careless than his surroundings justified.

Home Miscellany.

What the Years Bring.

Two sunny-haired and clear-voiced children stood
Among the flowers all careless; sunshine played
About their golden heads; and in the wood
The birds rejoiced, and pleasant music made.
Ah! Life's fresh morning is so gay and sweet,
They cared not for the flowers beneath their feet.

A youth and maiden in the summer noon
Wandered, and looked into each other's eyes,
And thought that love was such a priceless boon,
That having it, no little cloud could rise
Upon their sky—so radiant, when we love,
Grows earth around us, and the sky above.

Two happy lives close welded into one;
Bright children playing 'round them, and the light
Of love and home, like to the blessed sun
Shining about them, while the calm years' flight
Brings only happiness, for home and love
Are dear as heaven and the saints above.

One widowed heart, whose life-pulse beats alone;
Children all fatherless, and hope all fled.
What matter that she makes such bitter moan,
Or shrouds in fruitless woe her golden head?
The world goes by all careless of her woe;
Cold world, which ever treats our sorrow so!

A grave, where tender maidens come to weep,
Bringing fresh garlands, when the old are dead.
What matters it? Their love breaks not the sleep
Of the quiet ears which hear no more their tread
Such are our little lives; but heaven is ours,
When faded are our hopes, our loves and flowers.

Sam Sperry's Pension.

For more than two years it was the joke of Bloomington Center—that bright hope, that idle dream, that fond delusive fancy, known as "Sam Sperry's pension."

The wits who congregated in the bar-room and grocery of the Bloomington Center post office sometimes had only a sad consciousness of futility in their best efforts; the column of facetiæ in the local newapaper frequently palled on the senses; but Sam Sperry's lank and stooping figure as he descended faithfully, twice every week, from his lone home on the distant mountain, to "learn the news from Washington," bore with it an aroma of never failing interest and diversion.

"Any 'ficial dokkerments arrived for me?" Sam was accustomed to inquire, on entering the postoffice, with an air of ill-concealed consequence; and on being answered in the negative, the look of sudden surprise and incredulity which overspread his features was always as fresh and real as it had been during the first six months he had undergone the blow. His recovery was as complete and instantaneous, when seated on the counter with the "boys," he derided the very existence of his proud nation's capital in terms of the most reckless sarcasm, or, in softer mood, induced by certain grateful potations, palliated the weakness of official judges with a forbearance which his listeners found even more irresistibly entertaining.

"They think they're comin' it over me, down there to Washington," Sam observed on one occasion, rolling his eyes upon his near neighbor on the counter with a look which was dark without menace, and at the same time forcibly introducing the sharp point of his elbow to that gentleman's ribs—"they think they're comin' it over me, down there to Washington. And all the time they're hangin' off about my pension, what's accumulatin'?—what's accumulatin'?" Here Sam's companion was actually obliged to move an inch or two away in order to escape the too severe emphasis of that emaciated elbow. "Back pay!" chuckled Sam; "that's what's accumulatin'—back pay. Let 'em hold off ten or a dozen years longer, and I'll be swimmin' in back pay—I'll be fairly wallerin' in it."

With which the deeply confidential aspect of Sam's face changed to a triumphant simper, and, turning to nudge another companion (as he supposed) on his right, he inadvertently thrust his elbow through the wrappings of a large parcel of sugar, the contents of which were scattered over the grocery floor.

Sam's expression of dismay was pitiful.

"Have it charged to your back pay, Sam," cried an uproarious though cheerful voice.

Sam took up the cue, and ever after that his descent from the West Mountain, which had before been significant of a small invoice of skunks' fur, blueberries, and the like, at the Bloomington grocery, missed the hampering weight of those hardly acquired products, and Sam's business transactions at the counter—the understanding being good between the grocer and those jolly Bloomington boys—were rounded by a regally careless, "Charge it to pension, Ned—reg'lar pension or back pay, I don't care which."

Rarely, very rarely, Sam really did find a document waiting for him at the postoffice, marked with the mysterious seal of the Department of the Interior, and opened it with fingers of trembling expectation, only to find a printed sheet of painfully-worded statistics, to the effect that "besides the two hundred and ninety thousand filed claims, others were constantly being entered, but that in due time each would receive careful consideration." His first heat of desperate indignation yielded later to tears of unaffected sentiment, as he murmured: "Pension! I guess so, boys!—the grass'll be growing over my grave before I see any pension," and later still to smiles and hope again.

The gunshot wound in his right hand upon which Sam had based his claim on the national bounty, was of small account compared with the harm which he had suffered, both in body and soul, from the soldiers' camp life, the Southern marshes—above all, the Southern prisons.

"I don't know what Sam might 'a been, or what he might not 'a been," said Judge Holcomb, a prosperous citizen of Bloomington, who had been incarcerated with Sam at Andersonville. "'Pon my honor, boys, he began uncommon bright, though he wa'nt never what ye'd call petrick'ler tough or long-winded. But I can tell ye one thing, Sam Sperry wa'n't never the same man after he come out o' that prison."

Even after this asservation, I do not know that any of the frequenters of the Bloomington bazar remarked that the boyish head on Sam's bent shoulders, with its rings of close-curling light hair, was of Byronic cast, or that his eyes, when not filmy from the effects of ague or rum, were of such a perfect and heavenly blue as is seldom seen even in the undimmed orbs of children. Sam was their Punch, their by-word, their theatre comique; they would have paid twice the price of his lordly, though prudent, negotiations at the counter rather than miss the zest afforded by his semi-weekly appearance. With a touch of real pity, too, perhaps, for their old comrade, they cajoled with him in his forlorn hope, encouraged in him at all times the freest expression of his sentiments, flattered him, and regaled him. And often, alas! the feet which had come shuffling down the mountain awkwardly enough and loosely enough, retraced their steps in a still more desultory and uncertain manner, and chance passers-by have told how Sam, pausing at length by some wayside fence, frequently nudged the post with his elbow, as though having just committed to it some gravely confidential or facetious remark.

There was one person whom Sam's weaknesses and derelictions failed to inspire with appreciative mirth. In the neighborhood of Sam's house on the mountain there were two other homes. One was possessed by Isaac Travers with his beligerent wife and numerous small children; in the other, Mary Ellsworth dwelt alone with her mother.

Years ago, Sam and Mary had gone down, hand in hand, to the school kept in the little hamlet at the foot of the mountain. Mary still keeps the green-covered "speller" in which she and Sam studied their lessons together. And they were at the head of the class always, the mountain boy and girl—always at the head of the class, and always first and most imperious in play; Mary, small, brown-eyed, sharp-witted, and Sam, handsome and tall, with his cherubic curls and saucy, red lips.

Then Sam's parents died, and he went over to help John Ellsworth in his mill, and the work prospered under his strong blithe hand. And as the days passed by, Sam and Mary shrank coyly away from the affectionate intimacy of their childhood, and ended by falling as deeply in love with each other as though they had now for the first time exchanged glances across the rapturous bounds of manhood and maidenhood. Their love, having such tender root in the past, sent out bright branches of hope for the future, and was as strong as life with them both. Mary would have borne anything for Sam; and Sam, who was of a quick and impetuous nature, found his equilibrium in the sweet firmness of Mary's character, and adored her for the loving sarcasm with which she rebuked his pet faults—such bright and captivating faults as Sam's were then.

Sam and Mary were engaged when the war broke out; and the two men of John Ellsworth's household went away, and the two women waited in their solitary home on the mountain, cheered by letters at first; afterward their only hope lay in some chance returning figure along the road that came winding up from the villages below. John Ellsworth never came back along that dear familiar road; and when Sam returned one day, weak, ague-shaken, demented, but still fondly, foolishly faithful, Mary, called of God to endure this greater sorrow than any death could bring, spent the solitude of one black night in terrible rebellion, and, when the morning dawned, laid her broken heart at the foot of the cross and rose with a calm "I will—for evermore."

Sam went back wonderingly to occupy the long-deserted home of his childhood; but it was Mary's hand that brought him bread and meat, that made his bed, and swept his floor, and furnished his poor home with every comfort.

Sam knew that it was all changed somehow. The tongue, once so winningly sarcastic, was now ever too thoughtfully kind, the once laughing eyes too deeply compassionate. He sorrowed over it with the vague sorrow of a child. But he trusted Mary. She knew; she would set it all right in time. The light, the hope, the promise of his youth, so helplessly, so mysteriously lost—they were all kept waiting for him somewhere in Mary's great dark eyes.

But when Sam came tottering up the hill on his return home, he had brought with him a parcel the contents of which he had not revealed to any eye. It contained his wedding clothes, new and sleek, of the finest black broadcloth. In the pathetic loneliness of his home he acquired a habit of fondling these, of gloating over them, even of trying them on before the glass; and then, as he stood in his best mood, with his bonny hair curled, one never saw so sweet and weak a face. Sam longed, yet ever hesitated, to appear before Mary in these splendid habiliments. That strange trouble on his mind deterred him. He was never so shy, so simple, so conscious of his lost estate, as when in "Miss Mary's" presence—never withal so strangely happy and content. One evening as he sat before her, the wedding garments he had left at home filled all his thought.

"I—I never cared for any girl but you, Mary," he exclaimed abruptly, with a spark of the old fire in his eyes. "I—I never could."

"No, Sam," Mary answered, gently, "I don't believe you ever could."

"You—promised to marry me once," said Sam, that brief fire changing, for another instant, to a look of solemn wonder and reproach.

A deathly palor crept over Mary's face. Then she came close to Sam, and laid her hand on his, and looked into his eyes with all the beautiful tenderness and pity of her deeply-tried soul.

"I shall always be true to you, Sam," she said. "There are some things we can't understand. We must be patient. But that—what we hoped for once—now—in this world—that, dear Sam, must never be!"

"Yes, Mary," Sam answered, sweetly obedient, thrilled through and through by the touch of her dear hand, "that must never be." And he repeated the words simply all the way home, "that must never be." It was all right, somehow. "Mary knew." But he folded the wedding clothes and put them away that night as one who should never need to take them out again.

After this, the ruined life clung still closer to that strong and patient one, and the little services which Sam was accustomed to perform for Mary, when not suffering with the ague, or following after the fond hallucination of his "pension"—the fetching of wood and drawing of water—these lost to his poor adoring mind every base and menial quality, and were like the offering of a devotee laid tremblingly at the feet of an angel.

And the time passed all too swiftly for the work of Mary's hands. Besides her ministrations to Sam and her mother, her generous thought for the wretched Travers family, the name of Mary Ellsworth, for the gracious help and sympathy which is implied, was known and loved in all the villages below, and in times of sickness, or sorrow, or added care, the journey up the mountain side was cheap which could procure a day of those coveted services.

It was the affliction of unexpected company which had overtaken Judge Holcomb's wifeless home and refractory servants. Mary, with rare firmness, established there in a day her universal rule of peace. Among the other guests was a young actress from New York, the Judge's niece, blonde, handsome, magnificent. At evening, as Mary stood, before her return home, waiting an instant in the hall, so quiet and demure, with her dark hair parted in an old, old fashion, and her sad, lustrous eyes, and her face breathing that ineffable refinement which the calm endurance of some hidden and exalted sorrow alone can give, the dashing young actress advanced upon her suddenly, and folded her with an impetuous gesture in her strong white arms. "I love you!" she whispered. "I love you desperately!"

The Judge's own wooing was less impassioned, when, some weeks afterward, he left his smart horse and buggy at Mary's gate, and entered the house.

"I formed a very fav'rable opinion of you Mary," said this grandiose personage, "a good many years ago, and I've never had any cause to alter that opinion. In fact I come in here to say that I should like to have you come down to my house in the capacity of a wife."

There was a grace, a perfect self-reliance, in Mary's old-fashioned manner, which relieved it from any imputation of stiffness, as she answered, in much the same words that she had used in addressing Sam some time before, but with such a different tone in the ring of her clear voice: "I thank you, but that can never be." And the Judge drove away, amazed and disappointed, but most of all sorry for Mary.

Sam was the next caller. He had seen the smart buggy at Mary's gate. He entered, timid and hesitating, and sat for some time shifting uneasily about in his chair. At length he said: "I—I never cared for any girl but you, Mary. I—I never could," he repeated, earnestly.

And Mary answered, as she had done before: "No, Sam, I don't believe you ever could."

Sam drew his sleeve quickly across his eyes.

"You—you ain't goin' to leave the mountain, are you, Mary?" he gasped. "You ain't goin' to leave the mountain, Mary?"

"Never!" answered Mary, and as before, her tone quieted and consoled him.

After what seemed a long time, though, the tears were still standing in Sam's blue eyes:

"I forgot, Mary," he said, meekly. "I came to say—you're young yet, and handsome, Mary,—and if you had a better chance—I don't know what I—what we should do without you—but if you had a better chance—you—you mustn't—you know—Mary—"

There he paused. Mary did not smile, but her heart yearned over Sam as a mother's might over a child who has tried in vain to be good, and brave, and unselfish. And Sam went away comforted.

It was the third bleak winter since Sam's return to the mountain, and he meanwhile growing weaker and sillier with each successive season, but ever faithful in his inquiries after his pension at the Bloomington postoffice. The Bloomington boys thought it a rare joke to impress upon his mind that the only reason why Miss Mary deferred giving him her hand in marriage was his continued inability to obtain his pension.

"Just wait till you get your pension, Sam," said Ned Hemingway, the store-keeper, delicately hinting on this point, "and then you'll see."

And Sam doubted utterly at first—away down in his heart doubted always; but as he lent himself more and more to the erratic fancy, it fired and consumed his brain.

One night, from the alternate chills and fevers which shook his frame, Sam fell asleep. Instead of his lone, dark room, the road winding from the mountain to the village rose before his eyes. That road, usually so tortuous and long, was straight, and bathed in light. He traversed it. At the end a palace gate, and at the gate a white-winged angel stood, his pension in her shining hand. Sam gazed. Above those peaceful wings was Mary's face. She smiled as she had smiled upon him long ago. He awoke, and slept no more that night.

With the morning he put on his wedding clothes. No doubt or hesitation possessed him now. There was a terrible exultation in his eyes. This time he did not stop, as was his wont, at Miss Mary's house. The road down the mountain side was tortuous and long. There was no palace gate at the end; no pension. Those who watched Sam's face in this last instance of his ever-recurring disappointment, say that a look came over it which had never been there before. He rested on the counter, and drowsed, and almost fainted, but he would not drink. This provoked unbounded astonishment. Sam's dying flesh craved the cup with an awful thirst, but Mary's eyes were stronger, and Mary's eyes seemed to be upon him, and he would not drink.

"It would choke me, boys," he tried to say, turning weakly away.

He manifested a desire to make his will. It was a rare occasion at the Bloomington grocery.

"Its all to go to Mary," he exclaimed, excitedly, "pension, back pay and all." The last flame of the fever was flickering and wasting in his eyes. He rested and dozed again. At noon he started for home; at four o'clock he had traversed only half of the lonely winter road; at the foot of the mountain—it was sunset—he staggered and fell down. We shrink from the records of fates so sad. We need not fear. One greater than we, and more compassionate by far, comforts the death of His lambs when they fall in the desolate places. The pain in Sam's body ceased. Across his mind flitted a brief trouble.

"I wish Mary could know," he said, "that I wouldn't touch it—for her sake." And later and more solemnly: "I wish Mary could know—that I seem now—to understand. I seem—now—to see—"

An old story tells of the prodigal who wandered, and who came back to his father's house; of the purpose, running through all the weakness and sin, of the wonder and suffering of our human lives, to make us hungry and to bring us home. So over Sam's wasting face there crept first the infinite, unbearable hunger of the soul, and then the quiet look of one whom God leads home; and the blue eyes, piercing now beyond the light of sun or moon, met unshrinkingly the shadows of the deepening night, and unshrinkingly the clear gaze of the solemn stars.

And Mary knew. When they brought Sam home to her in his wedding garments, she looked upon his face, and she knew that the bridegroom had indeed come back, clothed and joyful, to the bride; the lost spirit to the strength and beauty of its first estate. And she kissed the dead lips in that last act of perfect love and consecration, and knelt and thanked God.

A few days after Sam's death, Ned Hemingway entered Mary's house, either from curiosity or worthier motives, with a stammered apology, and the words: "Of course it ain't o' no account, but I thought ye might like to keep it," handed Mary the will in which Sam had devised to her his pension. As he did this, the mirthful grocer cast down his eyes and blushed to the roots of his hair. Mary took the little parchment, read it quietly, and just the shadow of a smile played about the beautiful tenderness of her lips. Then she turned to the grocer, and unconsciously transfixed him with her clear, thoughtful, half-inattentive gaze.

"I think Sam owed you something," she said.

"Oh, no, no," stammered the grocer. "That's all right. The boys will see to that."

"I should prefer to have you give me the bill," Mary said; and still transfixed by that courteously compelling gaze, the abashed and reluctant grocer complied.

Mary keeps the will in which Sam gave her his pension, with a lock of hair that was always golden and boyish, and the green-covered spelling-book. Sometimes in the pauses of her toil, she can smile her tender smile over these; she can weep blessed tears over them

But if any one should say that hers had been a famished heart—famished for all the joyful possibilities, the wifehood, the motherhood that might have been—the thought would pale before the tranquil glory of her eyes. There has come to the life of this lone watcher on the mountain, a fullness such as few may know. The autumn winds that speak with their low wail of death to the dwellers in the valley land below, bring to her clearer sense, sweet messages of home.—*Harper's Monthly.*

For our Boys and Girls.

Our Puzzle Box.

Riddle.

I serve many and varied purposes. I am the honest man's friend, the iniquitous man's deadliest enemy. I travel over the world at will, and puny man has little power to hinder my approach. My capabilities can hardly be estimated. Whatever place I honor by my cheer thrives and prospers, while the places where I am never seen are gloomy and deserted. When I move abroad the flying express train and the ball which speeds shrieking from the cannon's mouth travel at a snail's pace in comparison with the velocity of my motions. I have existed for untold ages, and shall continue to exist so long as any portion of the universe is peopled with living beings. The history of the past records the result of my labors, the present bears testimony to my vast utility and power, and the future appears hopeless indeed when contemplated as devoid of my presence. Thus, it seems, I am a great comforter. I soothe the pains of the afflicted, ease the hearts of the sorrowing, cheer the minds of the desponding. I am the friend of man, and labor ever for his advancement, although (such is human ingratitude) he seldom rewards me by even a thought. Finally, and most wonderful of all, although visible, I am intangible, and no one has ever felt my presence.

MELANCTHON.

Hidden Towns.

1. Mag Raymond has left this vale of tears.
2. I sow in neither kind of soil, neighbor Brown,
3. He placed his hand under her chin and playfully raised her head.

UNCLE CLAUDE.

Syllable Puzzle.

My first is novel; second is discovered; third, territory; whole is an island.

JERRY.

Cross-word Enigma.

My first is in man, but not in boy;
My second is in pain, but not in joy;
My third is in light, but not in dark;
My fourth is in forest but not in park;
My fifth is in pot, but not in kettle;
My sixth is in strong, but not in brittle;
My whole was an English poet.

ZENA.

Reversals.

1. Reverse a measure and obtain part of a house.
2. Reverse a narrow plank and obtain a falsifier.
3. Reverse to haul and obtain to keep guard.
4. Reverse a band and obtain an exclamation of contempt.
5. Reverse clothing and obtain to boast.
6. Reverse a vehicle and obtain the same vehicle.

C. B. A.

Answers to Last Puzzles.

NUMERICAL ENIGMA.—Captain John Smith.

DECAPITATIONS.—1. Cauk, auk. 2. Chop, hop. 3. Crake, rake. 4. Hash, ash. 5, Stare, tare. 6. Trow, row.

CHARADE.—Passing away.

BLANKS.—1. Rat, tar. 2. Ports, sport. 3. Part, trap.

TRANSPOSITIONS.—1. Dray, yard. 2. Dan, and. 3. Pot, top. 4. Mite, emit, time.

How Cap was Cured of Disturbing the Cats.

We have a fine sociable dog on the ranch named "Cap." He is a good-natured dog, and fond of a frolic. After the men have their dinner he has his, and by the time they are ready to go for their teams, he is ready to accompany them. There was one thing he got to treating himself to pretty regularly, and that was to start from the house on a run around the corner of the barn, to the south side, where the cats of the ranch took their noonday sun baths. He knew the cats were there, and never thought of looking around the corner to see if they were there, but aimed to make the surprise as complete as possible by dashing headlong right amongst them; at which times cats could be seen climbing in all directions. Cap enjoyed the sport amazingly, and it became his regular after-dinner exercise, which all the folks on the ranch were well aware of.

One morning one of the men killed a large wild-cat along the creek and brought it home, all unknown to Cap. "Now," says he, "we will have some fun." Cap was kept out of the way. The wild-cat was taken to the cats' sunning place on the south side of the barn and set up, as natural as life, facing the corner around which Cap always made his appearance.

After dinner the men lounged around till Cap got his dinner, when they started for the barn. Cap frisked around and then started for the cats around the barn. He never stopped until he ran slap up against that wildcat, looking fierce enough to eat him. The shock was so great he nearly fainted; he was so scared he couldn't bark, his tail fell to the ground and his tottering legs could hardly take him away from that awful cat. He staggered across the yard as best he could before he ventured to look back; he was too weak to make more than one bow-wow as he crept into the blacksmith shop, where he staid the rest of the day.

The next day he felt better and after dinner made a couple of bounds towards the barn, when he remembered the wild cat, and turned short about and went around the house.

He never goes to the south side of the barn any more, and the cats enjoy their sun baths undisturbed—not suspecting the good turn one of their wild sisters from the woods had done for them.—*G. W. T. C., Point of Timber.*

PEABLOSSOM, a young saddle-colored youth, was up before the Recorder for stealing a pair of shoes from Mose Schaumburg's store. "Don't you know it was not right to take those shoes?" "Yes, sah; I knows I didn't take de right shoes. My mudder tole me dey was not de right ones as soon as I bring 'em home. De highpriced ladies' shoes on de shelf was de right ones; but I couldn't reach 'em, sah."

Humorous.

Chips.

QUERY—When a man has his teeth stopped ought he to charge the cost to inci-dental expenses?

"WHAT's that fellow doing, John?" "Why, he's a naturalist." "What's that?" "Why, one who catches gnats, to be sure!"

A RECENT African explorer, in giving an account of his travels, speaks of ants one inch long. The insects must be gi-ants.

IF a two-wheeled vehicle is a bicycle, and a three-wheeled a tricycle, it does not follow that a one-wheeled is an icicle. It is a wheel-barrow.

ON being asked what he thought fire-flies were made for, a little boy answered, "I think God made them for candles to light the little frogs to bed."

"I SAY, mister," asked a dirty-looking chap, "will that dog bite?" "Guess not," replied Fogg. "He won't bite you; or at least I wouldn't if I were a dog. You'd have to wash yourself first."

"WE approach Thee, O Lord, under the auspices of the Essex County Agricultural Society," was the modest phrase with which the clergyman offered the opening prayer at a Massachusetts fair.

"MA," said a girl who had just commenced her lessons in geography, "whereabouts'shall I find the state of matrimony?" "Oh," replied the mother, "you will find that to be one of the United States."

"PA, do horses run away with wagons because they love 'em?" "Well, I should say not; but what put that absurd notion into your small head, my son?" "Why, pa, it's in the paper. Whenever a horse runs away the paper says 'a horse attached to a wagon.'"

A SCOTCH minister was once busy catechising his young parishioners before the congregation, when he put the first question to a stout girl whose father kept a public house: "What is your name?" No reply. The question having been repeated, the girl replied, "Nane o' yer fun, Mr. Minister; ye ken my name weel eneuch. D'ye no say when ye come to our house on a night, 'Bet, bring me some ale?'"

"FATHER, did you ever have another wife besides mother?" "No, my boy; what possessed you to ask such a question?" "Because I saw in the old family bible where you married Anno Domini, in 1835, and that isn't mother."

Household Hints.

WINTER SALADS.—(1.) Slice a cold boiled or baked beet root; arrange it in slices overlapping each other; pour a mixture over made with cream, a very little vinegar, pepper and salt; garnish the dish with horse-radish and hard-boiled eggs, whites and yelks separate. (2.) Slice some cold boiled carrots; arrange them in a dish with a dressing made with cream and lemon juice, or oil and vinegar, with pepper and salt; garnish the dish with hard-boiled eggs shredded, with minced parsley and capers and chopped olives. (3.) Pick the flower from one or two cold boiled cauliflowers; dispose them in a dish, and pour over them some dressing made with cream and lemon juice, or oil and vinegar, with pepper and salt to taste; garnish with minced parsley, powdered sweet herbs and capers.

ROAST LEG OF PORK.—Make a sage-and-onion stuffing; choose a small tender leg of pork, and score the skin in stripes with a sharp knife; cut an opening in the knuckle, loosen the skin and fill with the sage-and-onion stuffing; spread the whole leg with a thin coating of fresh butter, and put it before a clear fire, but not too near; baste well while cooking, and when nearly done draw a little nearer the fire to brown; thicken the dipping with a little flour, add boiling water, season with salt and pepper, boil up at once, and serve in a gravy tureen.

LIVER CHEESE.—This is an excellent thing to have ready for an emergency when something extra is desired for breakfast. Boil a beef's liver, heart and tongue; remove all the hard and sinewy parts and chop the remainder fine; add to this half a pound of boiled pork also chopped fine; season with sweet herbs, some grated nutmeg, a bay leaf, the flavor of an onion, pepper and salt; put it in a pan and press upon it a heavy weight. In a few hours turn it out in a solid cake for the table on a Wedgwood platter, accompanied by a silver-bladed knife to slice it with.

POTATO SALAD.—Potatoes boiled in the "jacket" and peeled while warm, cut evenly into fine slices, and when cold mix with fine olive oil. After having drawn with this for a little while, add salt, pepper, chopped onion, and mix all this by shaking it up, as using a spoon would break the potatoes and make them unsightly. Add good vinegar.

INDIAN MEAL CAKE.—Take as much meal as may be required, scald it partially; then take some drippings of lard and warm water—melt the fat with it, then take the meal and mix it with milk to the proper consistency; add a little salt and a beaten egg, or the egg may be omitted; bake on the griddle, and you will have an excellent cake.

Health Column.

Drinking Water as a Source of Disease.

I cannot go further into the consideration of these circumstances; I only cite them as evidence of the influence of moisture in the soil so far as it is measurable by the proportion of ground water present. We are more nearly concerned with the relation of the soil to the water which we apply to our own use, which we draw from wells and springs, to water as a vehicle conveying matters out from the soil. When typhus or cholera rages epidemically in any place, two parties immediately set up a contention as to whether the epidemic influence proceeds from the water or the air. It must be admitted henceforth that either is possible, that a so-called sickly soil can impart its noxious properties equally to the water and to the air it contains, but it may also be that only one of these ways is possible as to certain matters and lower organisms. Observation and experiment must decide upon that. Most physicians have hitherto considered that infection was probably most directly conveyed through the water, and the so-called drinking-water theory has been developed from this view. It has, however, been ascertained that the best known infectious agent in the soil, the *Bacillus malariæ*, which Klebs and Tommasi-Crudelli have discovered and studied in the Roman fever districts, cannot live without air. These investigators found that the malarial poison was not communicated to the water that stood over a richly malarious mud. Tommasi says, in his latest work on the Roman malaria and the ancient drainage of the Roman hills, that "the *Bacillus malariæ* is preeminently an air-living organism." Among the conditions favorable to its propagation in a malarial soil—which need not be a swamp soil—Tommasi specifies a temperature of about 20° C. (68° Fahr.), a moderate degree of steady moisture, and the direct action of the oxygen of the air on all parts of the mass. He says further: "The lack of one of these conditions is enough to cause a suspension of the development of the spores and of the increase of the malarial ferment." If anyone, however, believes that this organism must also remain inoperative when it passes into our blood because that is a fluid, he should be reminded that it makes a great difference whether we put such organisms, taken from their airy nests in a moist soil, into cold water, or into warm blood where air is supplied to them from the corpuscles.

We cannot, indeed, answer, with the results of experiment and microscopical investigation, questions respecting the infectious diseases with the specific germs of which we are not acquainted, but we may be guided in the matter by other facts. Naegelli says: "Contagion fungi can keep up their peculiar activity in water only for a short time. The purer it is, the less food they find in it; they are very soon removed by exhaustion in clear spring water; and, even in water that contains food for them and where they can multiply fast, degeneration quickly sets in, and they are changed into common ferments."—*"Sanitary Relations of the Soil," in Popular Science Monthly.*

Simple Remedy for Catarrh and Bronchitis.

It is now generally known that carbolic acid is strongly disinfectant, and very usefully applied to putrid sores or purulent wounds. Wood *creosote* is similar, is decidedly antiseptic, and quite volatile. It is, therefore, natural to suppose it would be useful when applied to catarrhal and bronchial affections which arise from diseased or putrifying mucus. We learned of its use for this purpose from Dr. Pescetto, a leading physician in the noted Italian medical school in Genoa, Italy, from whose conversation we gleaned portions of the important article on "Catching Cold and the Remedies," given in last December's *American Agriculturist.* We have since recommended the following treatment in many cases with the best results. It can do no harm, is simple and is eminently worthy of trial, both for temporary and chronic affections:

For bronchitis: Get from the druggist's a little good wood creosote. Put two drops of it into a bottle holding a pint or so. Pour in a little more than half a pint of clear water, and shake it well; also, shake well always before using it. Take a mouthful of this, throw the head back, gargle it some time in the throat, and then swallow it. Repeat this every two hours, more or less, so as to use up the liquid within 24 hours. For each subsequent 24 hours use three drops of the creosote in three to four gills of water. This three drops a day may be continued as long as any bronchitis appears. Two or four days is usually enough, though it may be continued indefinitely without harm.

For catarrh: Prepare the creosote water as above, to any amount, at the rate of one drop of creosote to one gill of water (four drops to the pint), or a little more water if the creosote be very strong and the water too irritating. Make a fresh mixture once in two or three days and as much oftener as more is needed. Take a handful of this water, previously well shaken, and snuff it through the nose into the mouth and eject it. A little going down the throat will do no harm. Do this two or three times and repeat it at bed-time, in the morning on rising, and, if need be, occasionally during the day. In fact, keep the nasal passages washed out with the creosote water. Its vapor will even penetrate the bony cavities, and also be drawn into the lungs with useful results. It destroys the purulent mucus, and tends to prevent its further secretion. It is useful for any discharges from the nose or lungs produced by colds or general weakness.

Worth Knowing.

Dyeing Leather Gloves.

A new and easy method for dyeing ordinary leather gloves violet, black or yellow is given by the *Moniteur Industriel.* The gloves are first cleaned from all greasy matter by a warm but weak solution of sal soda; they are left in this alkaline bath for about 45 minutes, are then taken out, washed, rinsed and pressed out. The gloves, thus cleansed, are put in their original shape again and *well stretched*, after which they are ready to be dyed.

Dyeing violet. Either aniline violet, or archil can be used, according to the desired shade.

1. The color is applied by means of a brush or a piece of cloth, which is saturated with the coloring matter.

2. The gloves receive, after the first treatment with the coloring matter, several coats of an alum solution, after which they are dried, and after this one or two coats of coloring matter. The coloring solution should be applied warm.

3. Before the gloves are perfectly dry, they are polished with cloth cushions, wrapped up in fine linen, which is the best way to produce the grain.

Dyeing black. The same means are used as above, and all the manipulations can be used. (The coloring matter is the same that is commonly taken for blacks).

Dyeing yellow. This requires less complicated manipulations. A decoction of Persian berries is used with the addition of some alum. Several coats are required, after which the gloves are polished in the same manner as above described.

ASBESTOS PAINT AND FABRIC.—Some interesting tests have lately been made in England of the value of asbestos paint applied to wood, canvas and other combustible materials. Among other experiments, a piece of light pine wood, about six inches long by four inches square, painted with five coats, was placed for upwards of half an hour in an ordinary grate fire, but, although the wood within was reduced to charcoal, there was no blaze whatever emitted during the charring. A small model theater, built of wood, with net scenes and accessories, was sprinkled with turpentine and set on fire. Every portion ignited and the whole was consumed. A similar model, with the net scenes and the wood framing all painted with asbestos, was drenched with turpentine and set fire to, but the thin scenes were only partially charred at the lower ends with the turpentine flames, while the timbering was not even ignited. Similar illustrations were made with two models of larger size, about four ft. cube, built on a bed-plate of one-inch deal board, and set fire to by a bundle of shavings. The one was burned and the bed-plate set on fire. In the other case, where the framing scenes and the bed-plate had been painted with asbestos, no ignition was effected, and, although the lower portions of the light scenes were destroyed by the fierce flames of the shavings, the rest remained intact.

PINE OIL.—A. M. Stanley, of Wilmington, N. C., has discovered that there is literally such a thing as "fat pine," and has invented a machine with which to make pine oil from slabs and other piney refuse from mills. He claims that one cord of light wood will yield 80 gallons of pine oil, worth, at manufacturers' prices, 25 cents per gallon; also, that this cord of wood will net $20. He not only gets the oil, but also 50 bushels of charcoal, which he readily sells at 10 cents per bushel; also, 100 gallons of pyroligneous acid, and 50 lbs. of vegetable asphaltum, making a fine black varnish. The pine oil, which is the principal yield, contains a large percentage of creosote, and has been found to be one of the best preservatives of wood known, protecting it from the attacks of insects and worms, particularly from the teredo, or salt-water worm, which destroys all the piling underneath wharves along the sea coast. If Mr. Stanley's undertaking is a success, he has a fortune at hand. The yearly waste in our pine forests is immense, and if it could be utilized as this invention would indicate, mill refuse could be turned into great profit.

VISUAL PHENOMENA.—It is well known that a black object on a white ground will appear to be much larger than it really is. A white stripe, for instance, on a black surface seems broader than a black stripe on a white surface, although both be of the same width. This phenomenon of simultaneous contrast is physiologically explained by Peter Scherffer in this way: When one of our senses receives a double sensation, one of which is active and strong while the other is weak, it will be found that the latter is not felt. This must be particularly the case when both impressions are of the same kind, or when a strong effect from an object on one of the senses is followed by another of the same kind which is milder and weaker.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

District Meeting held at Pythian Castle, in Myrtle Lodge, No. 42.

On Saturday evening, Feb. 25th, a district meeting was held in the hall of Myrtle, No. 42. There was a full meeting and representatives from a large number of the city Lodges. The usual business was transacted, amongst which was to grant material assistance to a distressed brother. The time having arrived to hear from visitors the Grand Master made a speech that might be termed a review of the past year, and a carefully prepared statement of the results of the labors of the last year. His remarks were listened to with much favor, as evidenced by the hearty applause given at the close. E F. Loud, Deputy Grand Master, followed in one of his telling speeches, taking up many of the features of our Order, particular stress being laid upon the importance of cultivating closer and more fraternal relations in our organization. A recess was had and general greetings indulged in for a short time when a short programme was given as follows: Remarks by C. C. Gilmore, P. M. W., in the course of which he hoped that the Receiver of Myrtle for a number of years, Bro. Chas. E. Baker, would succeed in being honored with the degree of Past Master at the session of the Grand Lodge. Solo—A. N. Bogart, organist of Myrtle, who, as usual, delighted his audience. H. F. Morris, Financier, then pictured, in an original essay, the life of a Workman, and that bright picture was intended for Bro. Baker. Jas. H. Barry, P. M. W., then gave some reminiscences and humorous incidents of the past, and, in the course of his remarks, paid a very high compliment to the administration of the Grand Master and his officers, as also to the growth of our Order, relating a circumstance in the early history of our organization, viz: Harmony No. 9, now with her membership of 240, was formed at 11 o'clock at night, and to make up the number, they coaxed a man out of bed to make the constitutional number—*ten*. His interesting remarks were well received. Song—Chas. E. Baker; a fine effort that was heartily encored. Reading—Prof. Eastman, organist of Sts. John. Subject: "Asleep on the Track." A fine, professional effort that was duly appreciated. Comic song—J. M. Lyons, Foreman of Myrtle; just the spice for the evening for merriment and variety. A. A. Egleston made a few timely remarks that were listened to with close attention. At request, the Grand Master sang a sentimental song, closing with a few pertinent and congratulatory remarks, that filled up a grand and profitable meeting.

District Meeting.

A grand meeting of A. A. Egleston's District was held at the corner of Sixteenth and Mission streets, on Monday evening, March 6th. The commodious hall was comfortably filled, there being representatives from a large number of the Lodges in this city, including a number of the members of the Grand Lodge. The business of the Lodge was soon finished, and the usual fraternal greetings were commenced, the Master Workman, R. T. Delano, inviting Wm. H. Barnes, G. M. W., to make a few remarks. His well-timed and interesting statistical speech was listened to with the closest attention and received with great favor. In the course of his remarks he paid a high compliment to Dep. Egleston, by saying that he had been a faithful officer, and would retire from his arduous duties with honor and the best wishes of District No. 4. To the several Lodges of this District he pointed with pride and satisfaction, as making a record and increase in membership that will long be remembered. E. F. Loud, Dep. G. M. W., followed in one of his telling speeches, making some solid arguments on the question of making our Lodge meetings interesting, and cultivating closer and fraternal relations with each other. A. A. Egleston, Deputy, then made one of his congratulatory speeches, laying particular stress on the success of the last year to the fact that each member considered himself an integral part of this grand structure and had stood shoulder to shoulder, bringing the results we see to-night. Caleb Brind, Deputy No. 1, then made a few remarks that were well received. Wm. Thackery, P. M. W. of Harmony, was called upon to sing a humorous song, which he did, to the pleasure and expressed satisfaction of all present by receiving a hearty encore. G. W. Lamont, Receiver of Bernal for a number of years, was then called, and made a few remarks, which were apt and just suited to the occasion, as he remarked, "the brethren would now be served with lunch and coffee," which was quite bountiful and extensive. At the close of the banquet, Bro. Lamont presented the Grand Master with what appeared to be a highly ornamented and large cake, requesting him to cut it and divide it among the members present. The Grand Master, having had experience, and anticipating something, invited his Deputy, Bro. Egleston, to do the honors of cutting the cake, which was passed to him. Deputy Egleston, anticipating that there was a joke in the thing, quietly remarked that he thought it would be appropriate for the next Grand Lodge; however, before sending it, he said he would sound it, and, from ominous sounds, it appeared to be a round-shaped piece of wood nicely frosted. A sigh was heard from Bro. Lamont, who observed, "Sold again." This little bit of pleasantry was followed by a grand speech by J. G. Severance, P. M. W., with humorous hits and personal allusions, that earned for him the position as the orator of District No. 4 on this occasion. Bro. C. L. Stone was then asked to give a recitation, which he did in that admirable and artistic manner in which he so often favors us on occasions of this kind, and at the close, in answer to a hearty recall, gave them a humorous piece, that was loudly applauded. The Grand Master was requested to sing a song, which he did in his inimitable manner, to the great delight of all. Recitation—Bro. W. G. Brown; a fine sentimental piece, that was given in an eloquent manner. Sol. S. Purdy, M. W. of Yerba Buena, was called on for a burlesque speech, which he fulfilled, having for his subject: "The Union, it shall be Preserved," and for an encore sang a very acceptable song. Recitation—J. D. Thompson, P. M. W., who, instead, made some complimentary remarks to the present officers, and read resolutions to that effect, which were unanimously adopted, and are herewith given:

Hall of Bernal Lodge, No. 19, March 6, 1882.

Master Workman, Officers and Members of District No. 4, A. O. U. W.—SIRS AND BROTHERS:

WHEREAS, The growth, stability, perpetuity and general prosperity of the A. O. U. W., like all other organizations, depends in a great measure on the strength of character, adaptability and general efficiency of its chief executive officers; therefore,

Resolved, That the growth and prosperity of our Order in this State, its firm hold on the confidence of our people, notwithstanding the many and varied attacks that have been made upon it by enemies, and its proud and prominent place in the grand army of Workmen in the United States, proves that not only does the P. G. M. W. of the State of Cal. but also in a marked degree does the present G. M. W. of this State possess all of the requisite qualities of mind and heart, that make at once the efficient officer and fraternal advisor.

Resolved, That in his official capacity he has striven with voice and pen to sustain the honor and dignity of the Order throughout the State successfully, answered the many sophistical arguments adduced by friends of the regular insurance companies, and aimed as blows at the fundamental principle, the beneficiary system of our Order, and wherever his duties have called him encouraged the brethren, cheering them onward to renewed efforts in the good work before them, until his name in connection with our Order has become a synonym of success

Resolved, That in addition to all this he has especially endeared himself to the brethren of District No. 4, by his readiness on every occasion (when not absolutely prevented by business) to contribute to our social and fraternal entertainment and amusement, and bringing with him an atmosphere of mirthfulness and good feeling, by the exercise of those versatile talents for which he is so justly noted.

Resolved, That we as brothers of the Order in this State and members of District No. 4, comprised of Yerba Buena, No. 14, Bernal, No. 19, and Noe Valley, No. 185, do hereby convey to our G. M. W., Bro. W. H. Barnes, by collective and unanimous voice in some degree a sense of our fraternal attachment and keen appreciation of the sterling qualities as officer, man and brother, that have characterized him during our intercourse as fellow members of the A. O. U. W.

Resolved, That while we extend to our G. M. W. these expressions of love and esteem, we are not insensible to the noble qualities and sterling worth of his representative in this district, Bro. A. A. Egleston, than whom a fitter and more efficient representative could not have been selected, and who has given with earnestness and energy his time and talent to the furtherance of our noble cause. Ever in the path of duty, affable and brotherly in his intercourse, with all he has sustained the honor and dignity of the position he has occupied, as D. D. G. M. W., and gained the love and esteem of many and the confidence and respect of all of the members of District, No 4.

Resolved, That our old and tried servant, friend and brother, E. F. Loud, D. G. M. W., by his untiring labors in the cause we hold so dear, the ability he has brought to the work, his kind and courteous bearing in his intercourse with us, entitles him to a place in our hearts second to none among the noble Workmen who have worked side by side with us, or who have taken the lead as he has done and led us onward in the grand battle of C. H. & P. against misery, want and distress.

J. D. THOMPSON, of No. 185.
H. G. MCCORMACK, of No. 19.
CHAS. D. COON, of No. 14.

Recitation—Bro. J. Brown; depicting in a fine style a tragic scene that was true to life. C. H. M. Curry, P. M. W., in a short speech, uttered ideas and sentiments which were so good that they should be repeated at some future time and published. This was a grand meeting, and the brethren of Bernal deserve the highest praise for the royal and fraternal greeting given to their guests.

District Meeting of No. 1.

The district meeting of No. 1 last Wednesday evening, March 8th, Caleb Brind, Deputy, was largely attended. Delegations from each Lodge of this district were present, together with a goodly number of the members of the Grand Lodge and visiting brethren from the city and country. The M. W. degree was given to one candidate in a creditable manner, especially so by the veteran Guide, Bro. De Elom, and the M. W., D. C. Breed. Under head Good of the Order, H. G. Pratt, Grand Recorder, was asked to make a few remarks. He said: "It is a great pleasure to meet with you to-night in the Lodge-room of the old pioneer whose mortuary record is without a parallel in the United States; a Lodge that has had an existence for over five years and not a death within it or of anyone who has ever been a member of this honored Lodge. My heart sinks within me sometimes when I see the action of some who, forgetting their fraternal obligations, the foundation of our success, look upon this Order solely as a business life insurance company. The great security of this Order is the faith of one brother pledged to another, as we cannot invoke or use force or the civil law to compel an enforcement of pledge or promise. Since I have been Grand Recorder, I have paid nearly one-half a million of dollars to the widows and representatives of Workmen, and I have noticed that in the majority of cases the $2,000 paid has been the major part of the estate, and in many cases all that was left. E. F. Loud, Deputy Grand Master Workman, then made a short trenchant speech that was well received. Caleb Brind, Deputy, was then introduced as one of the very faithful officers for the last year. Bro. Brind took occasion to say, that in his judgment, the security and success of our Order would be doubly assured if all our Lodges would provide a system of weekly sick benefits. A. A. Egleston, Deputy of District No. 4, then, in some well timed and appropriate remarks, entertained his hearers, in the course of which he said that one of the pillars of this great Order was the PACIFIC STATES WATCHMAN. Our Grand Master followed in one of his best efforts, drawing bright pictures in life of those who have the benefits and protection of the great fraternal societies of our land, in contradistinction to those who are wrapt up in self, contracted in soul, and living useless and mistaken lives; going down to their graves unwept, unhonored and unsung. We have a grand army with 1,200 captains and lieutenants, and 14,000 in rank and file, who are standing shoulder to shoulder, an able and well conducted newspaper, whose representatives are alive as publishers, and deserving of our confidence, and the benefits may be readily seen when, on the morrow, instead of 150 listening to these words of cheer, the homes of 10,000 Workmen through this land will know that the grand old pioneer, San Francisco, No. 4, had the honor to entertain the brethren of District No. 1. He closed with some impromptu verses, giving the names of the Lodges of this district:

We have here the noble Spartan band, that
Resting beneath the protecting foliage of the thrifty
Magnolia with Friendship in their grasp, and
Unity in their hearts, meet together in fraternal
Conclave, as District No. 1, beneath the time
Honored root-tree of old San Francisco, No. 4.

May the courage of Spartans imbue one and all,
And Friendship impel us to honor each and
That may be made on pass brothers depart;
May Unity ever cement each heart;
May the world in its verdict acknowledge our worth
To be rich as the breath the Magnolia sends forth,
And honors still dwell as in days of yore
Around the fair brow of good No. 1.
May Charity, Hope and Protect on true,
With Fraternity's love, dwell ever with you,
And when all the Districts their good work have done,
We know near the head will be seen No. 1.

The efficient Master Workman, D. C. Breed, thanked his visitors for this visit and the speakers for their noble words, only regretting that the late hour prevented him from calling on the many good talkers who were present.

Noe Valley, 185.

This Lodge gave one of its characteristic entertainments, and for which it has become so famous, on the evening of February 28th. In 20 minutes after the doors were opened, Edward's spacious hall was filled to overflowing—standing-room was at a premium, and the anterooms were filled with the brave who had yielded their seats to the fair. Promptly on time, Bro. J. D. Thompson, Master of Ceremonies, announced Miss Sadie Welbon in a piano solo. This popular contributor to Noe Valley's entertainments was received with enthusiastic demonstrations of recognition, and gracefully responded to resistless recall. An elaborate and carefully prepared essay was read by Miss A. E. Dudley, an effort of which she may justly be proud. "Just splendid!" "Now, that's good!" and similar observations were heard all over the hall. A primary effort—a piano duet by Misses Fannie Fisher and Lina Rau—was well rendered and well received. The feature of the evening, a comedy—*The Pawnbrokers*—acted by Bros. Leon Carrare, A. V. Thompson and J. W. Lawton, kept the audience holding their sides for half an hour. Some hard jokes were cracked at the expense of three or four of the most conspicuous members of the Lodge, which were highly appreciated by the audience. The victims spent the evening in explaining, "you know." The play was decidedly "moneish." Mrs. Dr. McDermot, a well-known and favorite contributor, favored the company with a piano solo, and kindly responded to a deafening recall. A juvenile quintette, composed of Misses Maggie Rau, Florence Judson, Katie Fisher, Annie and Mamie Madsen, sang "Over the Sea" in a very creditable manner; Miss Maggie Carmen presided at the piano. *Love in the Kitchen*, a farce, by the Misses Sullivan, pleased the young folks immensely. Bro. J. D. Lawton wound up the literary exercises with a medley character song. The costume was Dutch, the brogue Irish, and, after a night's reflection, your reporter has decided the song to be Snide (r). At 9:30 the capacious floors were cleared and waxed, and, inspired by fascinating music, the merry dancers filled the hall until a seasonable hour, when, congratulating each other upon what a good time they had, all departed to their homes well satisfied.

B. MUDDLED.

Burns, 68.

Burns, 68, is enjoying her usual prosperity. Thursday evening, March 2d, there were several applications, and one candidate received the J. W. degree. There was a large meeting, and several important questions were discussed, principally the question instructing the representatives to the Grand Lodge to put some restrictions on causing our policies to be null and void when death is caused by suicide. During the evening the resignation of S. H. Hall was tendered as medical examiner of No. 68, and by a vote of the Lodge, it was unanimously resolved not to accept it. After a full discussion, in which most of the brethren took part, it was settled by a unanimous vote of the Lodge to instruct their representatives to let the law remain as it is at present.

Yerba Buena, 14.

At no time in the history of this old pioneer, has there been more general prosperity than at present. February 24th three took the M. W. degree, and the work was given in a masterly and dignified manner. In fact, a visitor remarked: "You carry on the work very nicely." Several very important matters were discussed, a feature of which was to provide a funeral benefit for each deceased member of $100. Under the head, "Good of the Order," Bro. Dodson, Deputy from Santa Cruz, made a very acceptable speech, urging strongly a closer and more fraternal union in our Order, as the cornerstone of our grand superstructure. Bros. Curry, Eggleston, Severance and others made remarks that were listened to with marked approbation. On this evening the Secretary announced that their membership was 210. A peculiar feature of this Lodge is that a critic is appointed on each evening, who criticises the whole work of the evening. Thus far this new departure from the usual custom has proved very interesting and profitable.

District Meeting at Pythian Castle.

The members of District No. 3, H. H. Mayhew, Deputy, met in Pythian Castle on Thursday evening, March 9th. The hall was completely filled with the large delegations that arrived from the different Lodges and were admitted in a body with the honors of the Lodge. The regular order of business was suspended, and the usual speechmaking was commenced by calling on Deputy H. H. Mayhew for an accounting of the status and doings in his district. Bro. Mayhew made a succinct statement of the important events in the several Lodges of his District, which was very interesting. E. F. Loud, Deputy Grand Master, was introduced as one of the tried and efficient workers. His short congratulatory speech was followed by an extended statistical address from the Grand Master. Among many good things, he said: "I take occasion to say that this has been a prosperous year in District No. 3, and your efficient Deputy, Bro. Mayhew, has done faithful service and is deserving your hearty commendation, which I know he has." Judge Turner, of Harmony, was called, and made an eloquent and acceptable speech. Bro. D. J. Toohey, of Franklin, was selected to represent 44, which he did in that unique, humorous and masterly manner for which he is noted, and his remarks were listened to with the closest attention. F. M. Stone, P. M. W. of Excelsior, was then called, and made a few humorous remarks that were well received, and was followed by G. J. Johnson, of Memorial 174, in a short speech. Robert Wilson, P. M. W. of Burns 68, was asked to say something for them which was ably carried out. John H. Gyselaar, P. M. of Memorial, in that truly eloquent and fraternal manner, addressed the meeting, which was well received. Solo, humorous song, Wm. Thackery, P. M. W., which was loudly applauded. Sam Booth, P. M. W. of Excelsior, then made a few well-timed remarks, closing with some original poetry. L. M. Manzer, M. W., was called upon, and in his logical manner entertained the Lodge with his views as to the relations that should exist as members of a great fraternal and beneficiary organization. By request the Grand Master sang a sentimental song. E. M. Reading, P. M. W., was requested to make a few remarks, which he did, paying a high compliment to our Grand Master and the several officers of the Ancient Order of United Workmen. The M. W. of Burns, M. J. McGrath, showed tact and ability as presiding officer on this grand occasion, and the district meeting of No. 3 was in every respect a grand success.

Silver Spray, S. D. of H.

On Feb. 27th, three candidates took the degree. There was an unusually large attendance, the hall being completely filled. Under head, "Good of the Order," several of the sisters and brothers made acceptable and congratulatory speeches. Sister Staunton announced that she would, at some future time, give the history of the D. of H., which will be published in the WATCHMAN.

Lodge Locals.

Los Gatos, 76.

Bro. Walker, of the Los Gatos *News*, gives the following account of the grand entertainment, and dedication of the new Hall in which the Lodge will hereafter meet: The entertainment which came off on Thursday evening at Lyndon Hall, was the notable event of the season. If fact it was just about the biggest affair of the kind ever witnessed in Los Gatos. The number present has been estimated by "good judges of human nature" to approximate very closely to 600. Aside from all complimentaries and family reductions nearly $200 was taken in.

To give tone to the occasion the services of the Los Gatos Cornet Band was called in, playing a national air upon the arrival of the train from San Francisco, also discoursing some very fine music in front of the hall before the opening of the performance; and we will say right here that considering the time they had been together, they have just reasons to be proud of their advancement; and their young leader, Mr. Ed. Dow, deserves a plume in his cap for his mode of training the boys. At 7 o'clock the members of the A. O. U. W. met at their new hall, and after calling the Lodge to order, Grand Master Barnes proceeded to dedicate the new hall to "Hope, Charity and Protection," which

he did in a very eloquent and impressive manner. At the conclusion of this ceremony, the meeting was closed and the Order fell into line and marched over to Lyndon Hall, to enjoy together with the vast host assembled the rare feast before them. The entertainment was opened with music by the band, followed by a spirited address by the Grand Master, in which he portrayed in eloquent phraze the noble work thus far achieved by the Order. The entertainment then began in earnest, consisting of songs, sung in a most exquisite manner by Miss Lou Singletary; recitations, musical and vocal imitations, by Mr. Barnes, delivered in his usual happy and unapproachable manner. Miss Singletary has a voice of unusual sweetness; and the sound of her melodious voice will always be welcomed in Los Gatos. In response to one of the many encores tendered her by the audience, she sang that dear old song, which we think improves with age, "Annie Laurie," in a manner we have never heard excelled. Mr. Barnes in contributing his fund of entertainment amply sustained his reputation of being "a host within himself," and left everybody feeling a little nearer heaven than ever before. His matchless imitation of "The Vagabond" and the railroad train, run without steam on the piano broad guage, carried the house by storm. We will conclude by saying, that after the entertainment, the seats were cleared away and dancing commenced, lasting until the "wee sma' hours," and when the sunlight of Friday morning flashed over the Eastern hill-tops it was loudly whispered on the streets that the grandest event in the history of Los Gatos had happened on Thursday night, March 2d, 1882.

Visalia, 79.

The Visalia *Delta* gives the following particulars of the social held by this Lodge Feb. 28th: It was well calculated to sustain the reputation of that excellent Order for getting up first-class entertainments, for sociability, hospitality and other good qualities. The members of the Order and the invited guests assembled at the hall about 8 o'clock in the evening, and for the few minutes not occupied by the programme enjoyed themselves in conversation. Capt. White then took the chair and announced that the first thing upon the programme was music by the choir. A quartette—"Away to the Fields"—was well rendered by the following persons: Mrs. R. E. Hyde, soprano; Mrs. S. B. Hunt, alto; C. J. Giddings, tenor; Oregon Sanders, bass. Alfred Daggett, the orator of the evening, then came forward and delivered an interesting and instructive discourse on "Charity," which was received with frequent applause. He took the ground that the actions and works of men are far too frequently the subjects of adverse criticism; that we are inclined to put upon every act of a man's life, and upon every word he utters, the worst construction it will bear, instead of the best or even a fair construction. He seemed of the opinion that this was the result of bad education—of perverted views of religious duties. In the olden times charity was only a name. It was nowhere to be found in reality. Whoever differed from the prevailing superstition of his time was not an object of charity or compassion, but of hatred and persecution. Men believed that God had revealed the whole truth, and it was natural that they should think themselves authorized to kill whomsoever that differed with the revelation. Hence religious wars and persecutions, the burning of witches, and the extirpation of charity from the human heart. At the conclusion of the oration another quartette—"Come, Rise with the Lark"—by the following choir: Mrs. C. J. Giddings, soprano; Miss Anna A. Mills, alto; C. J. Giddings, tenor; O. Sanders, bass. Prof. A. R. Orr then read the paper, which abounded in amusing articles written by various members and friends of the Order. R. E. Hyde followed with an essay on a subject selected, he said, by Mrs. S. B. Hunt—the subject of "Spring." The essay on this subject was, "Come, Gentle Spring, Ethereal Mildness, Come." It was received with applause more long-continued than the essay. Mr. Hyde then read an essay worthy of any audience, on what he saw on his recent trip to the Eastern States, winding up with a description of what greeted his eyes on returning to California. The programme was then completed by a solo by Mrs. S. B. Hunt, which was finely rendered and well received. The feast prepared for the occasion was sumptuous in the highest degree. After supper the audience for the most part repaired to City hall and enjoyed a social dance.

Magnolia, 6, D. of H.

The members of Magnolia Lodge, No. 6, Degree of Honor, of the A. O. U. W., gave a pleasant social to Mrs. A. P. Murgotten, at the Lodge-room the evening of Feb. 21, 1882. Under the head of Unfinished Business, Mrs. Murgotten was escorted to the chair of the Worthy Sister of Honor by Sisters Moreland and Chadwick, when she was presented with an elegant silver card receiver and bouquet holder combined. The presentation was made by Mrs. S. A. Potts, the Worthy Sister of Honor of the Lodge, in the following eloquent words: *Sister Murgotten:*—The pleasing duty devolves upon me this evening to perform one of those happy offices which gives to life its most joyous and peculiar charms. It is well if, in our journey of life, beset by cares and troubles, we can reach a point where we can pause, rest ourselves, indulge in pleasant memories and allow the kindly feelings of our hearts to well up and overflow. To such a place have we come this evening. The Secretary's chair of this Lodge for two terms was occupied by you, who not only filled the place with dignity to yourself, but with great satisfaction to your brothers and sisters. No one in life, whatever may be their situation, will fail to secure the gratitude and esteem of their fellow beings if they discharge faithfully and honestly the duties devolving upon them. So you, our worthy sister, have earned the respect and good will of all by the creditable manner in which you have performed your task. Then, in the name of Magnolia Lodge, and on behalf of your brothers and sisters, I present you this small token of our good will. May you always be thus faithful in the discharge of all the duties and relations of life. So when you reach the haven of rest you may then, as now, receive the welcome plaudit, "Well done, good and faithful servant." The recipient, though taken completely by surprise, very feelingly thanked the members for the beautiful testimonial of their confidence and esteem, feeling, as she did, that if she had performed the small duties devolving upon her to the satisfaction of her fellow members, she had been suitably rewarded. After the Lodge adjourned they were visited fraternally by Enterprise Lodge, No. 17, which added greatly to the enjoyment of the evening. An elegant banquet had been prepared, to which all were invited. Dancing and other festivities made up the evening's amusement. The music was furnished by Bronson & Lydston, the hall was crowded and all spent a pleasant evening. All joined in pronouncing it one of the most enjoyable evenings the Lodge had ever had.

A Reply to Some Recent Attacks.

EDITORS WATCHMAN:—Will you kindly permit me space in your valuable journal for a few common-sense remarks.

Public benefaction, whether uttered or performed by individuals, corporations or communities, carries the weight of good results according to its merit. Such intended benefaction, however, must stand the test of sifting. That is the subject I wish to comment upon.

The San Francisco *Chronicle* of Feb. 26th contains a three-column item, headed, "Is it a Phantom?" etc., purporting to have been gathered from the *Coast Review*. The statistical figures in that item are enough to bewilder a score of astronomers. And all this patient research of every secret organization, all this valuable space of two leading journals is given with such grace to a suffering community, with an apparent conviction, how wrongfully the assessments of the A. O. U. W. insurance beneficiaries are graded. Let us sift the good Samaritan exposition and find its true worth. Neither of these journals, nor any other existing, can possibly advance a theory showing that the A. O. U. W. is not exerting a salutary influence in every sphere of its existence, and why this herculean effort to condemn the statutes of its regulated laws?

Does it not appear to common sense that all these uncalled for summary researches were created in the sumptuous private office of those high-salaried insurance Presidents; or perhaps in the more humble rear office of their over-zealous agents? The *Coast Review* surely must have wandered to these abodes, mistaking them for the more lofty archives of secret organizations. As for the *Chronicle's* devotion of space for such, to them, disinterested subject, I venture to say that the glib tongues of the above named gentlemen carried its influence rather, perhaps, than any remunerative compensation.

The rapid growth of the A. O. U. W. and the veneration of its members to their laws is proof sufficient that harmony and good will dwell among them. What matter is it to the *Coast Review* or *Chronicle* how the A. O. U. W. grades its assessment? Can it be possible that in this wicked world of ours there are to be found such high-minded, noble souls to give their time and talent towards pointing out a future result in present errors to a body of men numbering one hundred and odd thousand? Such disinterested sentiment might perhaps have been credited to their noble talent, were there not traces of spiteful utterances reflected upon Bros. Barnes and Kinsley and the PACIFIC STATES WATCHMAN. By the use of dust you can tell wherefrom the wind blows. Life insurance, apparently, is driven to the wall. Just imagine what a splendid harvest it would be for the corporations to have the 14,000 California Master Workmen insured on their books—$2,000 each. No wonder they dislike the WATCHMAN and Bros. Barnes and Kinsley for advocating a cause that works so disastrously to their pockets.

I do not intend to monopolize the WATCHMAN, and will confine myself to answer a few points they contend will be ruinous to the Order. A man at the age of from 40 to 49, joining the Order, the good Samaritans contend, will have the $2,000 paid long before one joining at the age of 25 years. Well, and good; by the time those present 49 will have passed the dark river, there will certainly be a new lot of them taking the place of the departed 49ers, for it is apparent to a close observer, while young men join the Order more for the benefit of social and fraternal intercourse, the 49ers hurry to the ranks for fear of being left out in the cold, and those always sure to be 49 will fill the ranks and help pay the $2,000 for those that pass hence until time immutable.

Point in answer to No. 2: Showing so conclusively, to their own satisfaction, how a member of the A. O. U. W. pays in the course of seven years from $40 to $60 more than the insurance premium calls for the amount so insured. Admitting it as fact, though experience might change the problem, how is the relative position of the recipients? Who would not rather pay five to eight dollars a year more, knowing such amount to go towards relief of a brother's widow, than pay a trifle less toward enriching a corporation, who in common greedily grasps for the premium, paying its losses only too often under protest.

Let a person with a life insurance accidentally drown, a cry is raised of willful suicide, and what strenuous effort will be brought to bear to deprive that bereaved widow of her just dues. Does the A. O. U. W. question a cause of death? Find one if you can.

Point in answer to No. 3, reliability: Who can question it of an organized body of such magnitude, whose funds remain in the individual possession, and gathered only as they are needed. How the boot fits the other foot, remains for private contemplation.

Again, they say we insure from month to month. That point is advocated in our favor. Supposing a premium on policy of insurance fall due, and through forgetfulness neglected to pay. One day thereafter the person so insured dies suddenly, will the heirs get that insurance? Ask the board of directors. We meet fraternally every week, and a member is reminded of his obligation that often. Delinquencies are of rare occurence, and generally are provided for by some brother present. I, myself, have kept absent brothers in standing for months, receiving their grateful appreciation therefor.

Consider, with all these fraternal advantages, the good work of our business committees in procuring labor for the unemployed, the loving solicitude of our relief committees in administering to the wants of a brother's family in distress. Look at our records, and find how a worthy brother, when incapacitated to work, is kept in good standing by his Lodge. See how many Lodges are, even now, regulating affairs, organizing a regular system of weekly benefits to be paid sick brothers, and the flimsy finishing remark of that three-column item in the San Francisco *Chronicle* of Feb. 26th (It is the hope and promise of cheap insurance upon life, remove this, and the Order would cease to exist.) lays bare the siftings. What are they but chaff thrown to the winds?

If for the first time I sign a communication, it is for the purpose of showing that its humblest member stands ready to defend our noble Order from its assailants. B. GALLAND.
Member of Gold Hill Lodge No. 2, A. O. U. W.

Why the Degree of Honor Should be Recognized by the Grand Lodge.

EDITORS WATCHMAN:—In the Lodge of which I am a member, a committee was appointed to consider the perplexing question as to how we could get our members to be present and take an interest in the meetings. We experimented in various ways, such as giving literary, musical and social entertainments. At all such entertainments, the work fell on the shoulders of a few members, who, however, would gladly have borne the burden, if we attained the end desired. But alas! it was not to be. Our Lodge meetings were the same, and applications were very few. Finally a personal conference of the members was had, and the reason a majority of them gave for not attending, was that they lived far away and did not like to leave their wives at home alone. The committee then held a meeting, and to reach this class of members, concluded to recommend the formation of a Degree of Honor Lodge. At a regular meeting of the Lodge, after a full discussion as to the benefit it would be to the Lodge and to the Order, it was decided to try the experiment for a few months. In order to lessen expenses, which is very important in the formation of Lodges, a resolution was passed that we meet at 7:30 on the second meeting night in the month, transact whatever urgent business we might have, and at 8 o'clock turn the Lodge room over to the Degree of Honor, thereby saving the expense of renting a hall. As the main object of instituting the degree was to get as full an attendance as possible of the members on one meeting night in the month, we concluded not to solicit members of any other Lodge, so that in case of failure, none but our own members would suffer.

Aurora Lodge, No. 8, D. of H., was instituted in May, 1881, with 44 charter members, and as to the success of the undertaking and its result, it is best answered by figures, which are no prevaricators of truth. For the six months previous to the institution of the D. of H. Lodge, we paid to the Grand Recorder for assessments, in the month of November, 1880, $68; December, $71; January, 1881, $71; February, $71; March, $70; April, $70. So you can see, for six months we were at a standstill. We therefore concluded it was time we took the "bull by the horns" and wrestled with him. Now we will see the result: We instituted the D. of H. in May, which month we paid for our assessments, $74; June, $74; July, $81; August, $81; September, $84; October, $85; November, $89; December, $90; January, 1882, $95; February, $100. We have now 105, a net gain of nearly 50% of our total membership in a few months. Such facts and figures as these are convincing proof as to the advantage not only to the Lodge but the Order in general.

So much for the financial benefit that is to be derived, which, while it is the principal object of the Order, is not the only one. In the days of our prosperity we must not lose sight of the fraternal feature, for without fraternity the Order would not live a year. It is the grand bulwark which guards against selfishness in man.

How pleasant it is to see a brother with his wife and daughters coming into the Lodge-room, paying his assessments, and introducing his family to those whom, when the Supreme Master Workman calls him home, are to share their sorrow, and who will extend to the distressed family the hand of protection. The D. of H. is something we should have considered long ago, but the old adage comes in well here: "Better late than never." There is another good feature if the Degree is connected with a Lodge of Workmen—a brother will only recommend good men into his Lodge, for the reason that he will not care to have persons associate with the members of his family whom he believes do not possess the proper moral qualifications. Hoping that the Degree of Honor will receive the earnest consideration of the Grand Lodge, I am yours, in C. H. and P.—E. H.

The Ritual not the Cause of Non-Attendance.

EDITORS WATCHMAN:—In your issue of March 1st you mention the fact that Bro. F. D. Connor, G. M. W. of Indiana, attributes the lack of attendance to the fault of a poor ritual, and ask if any of your readers have anything to say on the subject. I beg leave to submit the following on taking issue directly with the Brother. Although it must be conceded that our ritual is a plain one in floor work, as compared with the Odd Fellows, Knights of Pythias or Masons, it yet contains in it some beautiful truths well expressed and worthy at all times of deep attention, not only from the candidate, but from listening brothers. There is not in any society any very marked difference of attendance on evenings when there is initiation. Our Order, like all others of its class, seeks to improve and elevate the character of man; but let me ask how many who join our ranks, think twice, after becoming a member, of the fraternal part of it. An observing membership of six years inclines me to the belief, that not one-tenth of the members who join ever after visit a Lodge room, and the reason of that is not because of the poor ritual, because they never attend to pass judgment; not of the unsociable element, because absence prevents an acquaintance being made; not of the uninteresting character of the meetings, because I venture to say in no Order is the head "Good of the Order" so well observed in spirit and letter as in ours. In none of these I take it can be found the reason, but in a fact which I think has escaped just observation, and it is this: *The practice or law of allowing Financiers to receive dues and assessments outside of the Lodge room.* My experience as Financier goes to prove in the case of my Lodge—and I am sure other Financiers will bear me out—that more than two-thirds of the brothers pay to the Financiers outside of the Lodge, sending money by their wives and children. Thus they have no occasion to come to Lodge for any purpose; their dues and assessments are paid and their "cheap insurance" is assured, so as far as they are concerned fraternity in the A. O. U. W. can go to the dogs. It is a severe thing to have to say, but it is undeniably true. The remedy for this, in view of the fact that the Financier of a Lodge cannot legally refuse to accept money at any time, is to elect such a man as Financier whose business or duties would prevent his receiving money during the week, and make it as convenient for the brother to come to Lodge and pay as to have to hunt him up. In other Orders of which I am a member, the attendance is much larger at all times than in the A. O. U. W., and particularly so at the end of the quarter when even very lax members are compelled to come and pay dues.

Not having read the article of Bro. Connor, I am in no condition to dispute, but think that the ritual, or a good or bad delivery of it, will make no difference in the numerical strength of a Lodge or in the attendance, in the face of the present practice of the payment of dues and assessments. Yours in C. H. & P.

FINANCIER.

BRO. SCHAEZLEIN, of Olympic, No. 127, is doing some really artistic work in his line. His Lodge shields of different designs are now gracing the pedestals of many of our Lodges, and attract considerable attention. He is also manufacturing the new D. of H. badges, and their neatness is commended by all who have seen them. The D. of H. charms for presentation are in the shape of a heart, a diamond being set near the top, with other ornate designs, and are made in 14 carat gold. They make handsome souvenirs for presentation. The P. M. W. badges which Bro. Schaezlein manufactures are of different designs in solid gold. As a home artist, our brother is deserving of commendation. His work is always done neatly and promptly.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits and give our enterprise the benefit of their friendship and substantial support as far as possible. Our terms of subscription are usually to be found on the eighth page of each issue. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

Our Matrimonial Antipodes.

Of the three forms of Egyptian writing, hieroglyphic, hieratic and demotic, the last is far the most difficult, and only during the last five or six years has become intelligible to the most cultured Egyptologists, some half dozen men perhaps, in the world. Many documents in this occult demotic script have lain dark and dumb for centuries in various archives. Now persevering science has struck the spark needful to their illumination, and such light as they may have for us is once more radiant. A page of history is lighted up which shows how woman's rights were advocated, and successfully advocated, centuries before our first bluestockings were heard from. I use "successfully" in a qualified sense. Women were successful in obtaining something more than equality. The infatuated husband, having *accepted* a wife on trial for one year, at the end of that year, if the wife proved acceptable, *established* her as his wife for life, and made over himself, goods, chattels, lands and cash to this established wife, merely stipulating that she should bed and board, embalm and bury him. Here is a sample contract:

No. 2439. Papyrus of the Louvre collection in Paris.

A certain Petorpra assigns to his wife, Neshorpchrat, not only his house and all his landed property, present and prospective, but likewise his "silver and copper money, his furniture, and all the title deeds and documents concerning his property, not only in the holy city of Thebes, but in any other part of the country."

And here is a sample of a wretched victim's stipulation, with which he, in then current phrase, would have written, "my heart is satisfied." Pchelchons is his name, and Neschons his wife's:

"It is incumbent upon thee to take care of me during my life, and to charge thyself with the expenses of my embalmment and my memorial chapel after my death. Neither son nor daughter has any concern in this deed. It is for me to protect thee against claims of theirs. Take, therefore, this surrender of my property forever."

Neschons, in truth, stepped into the place of Pchelchons, and inherited his property during his litetime, he becoming a mere instrument in her hands, with nothing to do but act as her agent and obey her commands. It is not wonderful that the Greeks found abundant matter for pleasantry in facts such as these; nor that, while Diodorus kept strictly within the bounds of truth in stating that,, Egyptian husbands promised in their marriage contracts to submit themselves in all things to the power of their wives," other writers, as Sophocles and Herodotus, indulged in some satirical license when they averred that the women did all the trading and marketing, while the men sat at home at the loom.

It is obvious that before the woman thus almost entirely usurped the man's place, the male sexed was so sunk in sloth and cowardice as to have entirely lost all manly vigor and virtue, and had become the easy prey to a hardier and more masculine race; that, if possible, the Egyptian nation was then even lower in the scale of humanity than it is at the present day.

Your readers may be left to draw such inferences as their respective bias teaches them. I favor "woman's rights" entirely in the sense that a woman should have all such rights as pertain to her as sister, mother, wife or damsel (*femme seule*, or single woman); in this last character the right of earning an honest livelihood in any fitting capacity, not only *unhindered* therein, but protected and assisted by that chivalrous spirit which is inherent in every man worthy of the name. I cannot, however, divest my mind of the idea that neither the characters, capacities nor qualities of ideal manhood and ideal womanhood are identical. To endeavor to prove them so is to give the lie to Nature's entire handiwork. I neither admire masculinity in a woman nor effeminacy in a man.

EDWD. BERWICK.

Thriving on Uncooked Food.

I. B. Rumford, an old resident of Kern county, is giving Eastern people an idea of his new theory of sustenance. He writes to the N. Y. *Tribune* as follows: We began the experiment a few months ago of living entirely upon uncooked food, consisting of nuts, fruit and grainia, the latter made of any kind of grain, though usually of wheat or rye, ground hardly fine enough to go through ordinary cheese strainer cloth, the bran cut up just as fine as the rest of the grain. The result of our experiment thus far has been so favorable in every respect, that we shall probably continue it the rest of our lives. It has every advantage over the cooked diet; saves a world of labor to the women; dispenses with the unpleasant heating of the house with a cook stove in summer; saves a large amount of fuel, which is quite an item of labor, even here where we only have to cut it. It soon becomes quite as palatable, satisfies the appetite better, and keeps it satisfied longer; and, better than all, has completely cured my dispepsia, which had been a companion from youth until over 48 years of age; also restored my sight, so that spectacles, which had become continually necessary, are no longer used. We shall make a study of how to perfect this diet in every possible way, and to that end ask for help from any of your correspondents in regard especially to the best method of cleaning grain. We do not mean taking the bran off, but of scouring the outer coat of the grain to make it clean, as there may be something better than washing with the hands and water; something like a dry burnishing machine.

We make a cake by crushing raisins between two iron rollers so as to mash the seed fine, as they are a valuable part, and chop fine, with a hand chopping knife, then mix with grainia; as everyone is fond of it, it goes off so fast we would like to know if there is not some kind of machine that would cut up the skin while the seed was being crushed, and if it would knead in the grainia all the better? Again, would it be possible to press such meal into cakes without adding moisture, and what pressure would be required? Have grape seed, tomato seed or blackberry seed been analyzed, and where could the result be found? We find the seed of ripe Muscat raisins a great aid to digestion. I hope to visit others who have used the uncooked diet for two years; will give you some of the results, with such experience as we get from time to time, if you desire.

HYGIENE OF BEDS.—Beds should be made of such material as will absorb as little as possible of dampness or impurities of any sort. One of the most important means of keeping a bed in a wholesome condition is thorough airing every morning. Immediately after rising, the occupant should throw open the bed and the windows of the room, thus securing a thorough removal of the foul emanations from the body which accumulate during sleep. When this is not done, the foul products accumulate, and the bed may become a source of disease.

WITH one of the trains which went East last week was a car containing 25 sea lions, consigned by A. C. Robison to Charles Richie & Brother of New York for transportation to Europe. The animals were captured off the Santa Cruz Islands, and are of all sizes. They will be placed in crates, and from time to time will be deluged with water from a hose to preserve them in good condition.

Woman as a Free Agent.

Some years ago in conversing with a conservative man upon the subject of woman as man's equal, he brought forward the oft-repeated remark that women do not lead in fine arts, poetry, music, science, literature, or inventions, a statement quite true literally. They do not *lead*, perhaps, but from the fact of women to-day taking prominent places in every department of art, and inventions even, is proved their capability of leading had they the opportunity. And the power of appreciating all of man's highest productions, is still further proof of her equal capacity to do. Again, is she not man's inspiration to all of his highest and best works and thoughts, proving that in her spiritual nature or growth she is his superior. Were women free agents of their highest and best abilities, be it in fine arts or motherhood, her god-like duty of creation would not so often prove a curse to herself and mankind, and the higher æsthetic nature of nations would be the result. That she is not a free agent in any way whatever is proven by her social position, which tells her what to do, what to wear, where to go, what to say, and who to go with.

In marriage she gives up her name, and is bound to her husband and lover, who has control of the home and the purse, as well as her duties and actions, and even her pleasures all center in him and for him. In motherhood, if life be spared her, she enters upon a sacred, but rigid round of duties, cares and responsibilities that no heart or hand can take away, though they may be lightened. Sleepless nights in sickness, anxieties and cares by day, entire self abnegation, and self control on the one hand, or fretful repinings and weakness on the other.

Old age, the prime of her womanhood and glory of her life, might redeem her and make her free, but for one obstacle that universally attends our women of 60 and upwards—failing health, and diseased constitution. Worn out with the many duties and burdens of her life, she is usually a wreck in mind and body, a child herself to be cared for. Fortunate she, if willing and kind hands perform their duty.

Such is the round of life to the masses, and with but few exceptions are they better. No wonder then that we boast of but few great artists, authors, poets or musicians among the mothers of the land. Few are situated so as to be relieved of their burdens, that they may study or think; and they, many of them, become the peers of our great men.

Already do we see a brighter day dawning for women, when she shall stand by the side of man, as his equal, in politics and home; when her duties *at home*, shall be recognized as equivalent to his at his trade or profession, and her opinion be *needed*, upon all questions of church and state. Woman as a free agent will prove that reform means improvement, that politics need not degrade or demoralize its workers, while intemperance is always a crime against humanity; immorality is always a vice in man or woman; and that woman herself is the stronger and purer for being free to do, and be her own self, instead of the slave to circumstances and the sovereignty of man.—*Jewell.*

COLORS AND WARMTH.—It may not be generally known, says London *Truth*, that a man wearing dark clothes is more liable to infection from contagious diseases than he who wears light-colored garments, because particles which emanate from deceased or decaying bodies are much more rapidly absorbed by dark than by light fabrics. This is easy of proof. Expose a light and dark coat to the fumes of tobacco for five minutes, and it will be found that the dark one smells stronger than the other of tobacco smoke.

An Ice Locked Ship.

The loss of the *Jeannette* by ice crushing and the toilings of her crew upon the waters and snowfields of the cruel Siberian coast give heightened interest to the accounts of Arctic dangers. The latest news is that a portion of the survivors of the *Jeannette* expedition who succeeded in reaching the Siberian settlements, had set their faces again northward in search for their companions who were thought to be leading a forlorn hope in the trackless ice and snow wastes adjacent to the mouth of the Lena river. It is to be hoped that the search may prove successful and the sufferers rescued.

The engraving on this page, which shows the *Corwin* in the grasp of the ice field, will give the reader some idea of the perils of Arctic navigation. The *Corwin*, it will be remembered, was first sent out by the United States Government, in 1880, to search for the *Jeannette*, and was ordered out on a second voyage, for a similar purpose, in 1881. Upon his return from the cruise, Capt. Hooper reported to the Secretary of the Navy the incidents of his voyage, accompanied by some drawings to show the perils into which he came and the geographical observations made. From this report we take the accompanying engraving and descriptive notes:

On the morning of the 15th we found ourselves utterly helpless, drifting with the pack to the southward and eastward about two miles per hour. At first this caused no uneasiness, but about 8 A M. it was noticed that we were amorg grounded ice. We had only five fathoms of water, and many large pieces were hard and faston the bottom. Coming in contact with some of these grounded pieces the vessel got some pretty sharp nips, which tried le strength. At one time she was lifted bodily up several feet, and held suspended for some minutes; coming in contact with one, "stern on," the rudder was forced over, the screw steering-gear carried away, and the wheel-chains parted. Happily the rudder-stock, which is of the best Oregon oak, stood the strain, although for a time it seemed as if nothing could save it.

With this experience of the danger to which the rudder was exposed, I saw the necessity of having it rigged so that it could be unshipped at short notice, and set to work accordingly. All hands piled sacks of coal on the forecastle until the vessel was tipped sufficiently to raise her stern and allow us to get at and split out the wood-lock. A piece of oak plank was secured across the rudder-head by means of four long iron bolts, in such a way as to keep the rudder from unshipping by the action of the sea, and to be readily removed should it become necessary. We next cut a piece on the apron the size of the rudder-casing, so that the rudder-head could go forward sufficiently to allow it to unship without removing the apron entirely, then rigged a pair of shears and rove off a purchase, so that the rudder could be taken in, out of the way of danger, in a few minutes. On the 16th, we drifted helplessly in the pack all day. On the morning of the 17th, clear water could be seen, from the mast-head, to the northward and westward. At the same time a slight roll of the sea was perceived, indicating that it was quite a large space. After working toward it all day, we succeeded in reaching clear water in the evening, having made about four miles in 10 hours.

The *Corwin* thus escaped to fight the ice again another day. The *Jeannette* met a harder fate. For 18 months she was ice locked and her crew prisoners. Then she yielded to the crushing of the ice and her crew were forced to the perils and adventures of which a full account is to be given on the return of the survivors.

THE ARCTIC EXPLORING SHIP "CORWIN" IN A NIP OFF CAPE ROMANZOFF.

Inquisitive Woman!

Blessed man may ask questions the length and breadth of the land, may stride the deck of the ship bearing him o'er wide seas plying officers and sailors for facts, may drain every buss driver dry and collapse every hotel clerk or usher of public buildings with his exhaustive pumpings; but woman must be content with what she can see or hear in earshot of well-informed man. Thank the Lord that our eyes are in front of our ears, so that we can see more than we can get a chance to bear!

Of course he'll answer her questions politely, wondering what the inconsequent, inquisitive creature wants to know for. He'll take a run to a distant town, gaining items all the way, till his arms are full of faggots wherewith to kindle ablaze the fire of narrative to warm his hearers; while she watches the stretching valleys, mountains and streams, not certain of their names, or of the names the glib conductor calls out for the towns. He'll stroll about town asking questions of everybody, anybody, it's all right. She'll be entertained in the best room, with all the sweet prosperities, small cares and troubles of her friend, or sit in the hotel, perhaps take a flying drive through the town, scrape a few facts into her traveling bag and return for man to compare her to the walking stick that was carried around the world, and yet, as Sydney Smith said, was only a walking stick still. Is she persistent in her inquiries, soon she feels the serpent breath of slanders and retires behind the rampart of small talk, neighborhood news, fashion, etc., while man marvels at the littleness of woman's mind.—*Mrs. W. D. Ashley, Stockton.*

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.

At No. 232 Market Street, San Francisco, Cal.

Take Elevator No. 12 Front Street.

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (¼ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - March 15, 1882

Assessment Notice for March.

Two assessments for March. Lodges organized on or since Dec. 31, 1881, will not be liable on both assessments except it be for members admitted by card. Those organized since Jan. 17, will not be liable on either. The same rule applies to members. The following is a list of deaths:

Bro. John Hyslop, of Mountain Lodge, No. 105, Truckee, died Dec. 31, 1881, from crushing of head between two logs, aged 27 years. Joined the Order May 26, 1879.

Bro. John T. Connick, of Valley Lodge, No. 30, of San Francisco, died Dec. 6, 1881, of organic disease of liver and stomach, aged 42 years. Joined the Order Dec. 24, 1879.

Bro. David L. Thomas, of Yerba Buena Lodge, No. 14, San Francisco, died Jan. 9, 1882, of hypertrophy and valvular disease of the heart, aged 37 years. Joined the Order July 26, 1878.

Bro. Simpson Ballenger, of Lakeport Lodge, No. 34, died Jan. 12, 1882, of pleura pneumonia, aged 51 years. Joined the Order June 7, 1878.

Bro. L. D. Gardner, of Santa Cruz Lodge, No. 46, died Jan. 15, 1882, of suicide, aged 30 years. Joined the Order March 29, 1879.

Bro. Edward Curphey, of Fortuna Lodge, No. 13, Napa, died Jan. 15, 1882, of heart disease, aged 33 years. Joined the Order May 7, 1879.

Bro. Chas. F. Briggs, of Hanford Lodge, No. 89, died Jan. 17, 1882, of pneumonia, aged 43 years. Joined the Order Dec, 25, 1880.

Bro. Chas. Petterson, of Navarro Lodge, No. 200, died Jan. 18, 1882, of pneumonia, aged 37 years. Joined the Order Oct. 1, 1881.

Bro. Solomon Moose, of Sacramento Lodge, No. 80, died Jan. 22, 1882, of blood poisoning, aged 51 years. Joined the Order July 20, 1880.

Bro. Edgar L. Schackleton, of Covenant Lodge, No. 96, died Jan. 22, 1882, of consumption, aged 42 years. Joined the Order May 12, 1879.

Bro. Frederic Kapp, of Mount Diablo Lodge, No. 91, Walnut Creek, died Feb. 5, 1882, of brain disease, aged 48 years. Joined the Order Dec. 16, 1881.

Bro. James M. Crawford, of Challenge Lodge, No. 190, Lockeford, died Feb. 5, 1882, of jaundice, aged 27 years. Joined the Order Jan. 13, 1831.

Healdsburg Lodge is having interesting meetings. A weekly programme of literary and musical exercises is indulged in with great zest. One of the recent subjects for discussion was "Should the A. O. U. W. pay for suicides." Past Masters J. S. Bell, A. G. Burnett, H. H. Pyne and L. A. Jordan, argued pro and con before a deciding committee of five. The Lodge has 108 members.

Bro. J. Stanley, first P. M. W. of Mission Lodge No. 56, called on us on the 25th of February. To use his expression: "We are taking them in every meeting." Mission Lodge No. 56 is in a very prosperous condition.

What does She Mean?

The Grand Jurisdiction of New York is the the largest in the Order. It has a good record. Towards liquidating the losses by yellow fever, she contributed the munificent sum of nearly $25,000. She has met every other obligation imposed upon her by the Order. She has a right to be dissatisfied if things don't go to suit her notions, and to respectfully petition the Supreme Lodge for a redress of any real grievance, and to have such petition receive a respectful consideration at the hands of that body. And yet we submit that she has no right to petition for some of the things asked for in the following resolutions, which were adopted at the last session of her Grand Lodge. We copy from the *Fraternal Censor* of Feb. 16th, ult:

Resolved, That our representatives to the Supreme Lodge (when elected) be instructed to respectfully petition of the Supreme Lodge—

First—The entire re-organization of that body and the basis of representation, and that the sessions shall not be more frequent than once in two years.

Second—A reduction of *per capita* tax at least one-half.

Third—That the Grand Lodge of the State of New York be exempted from each and every law, rule and regulation of the Supreme Lodge, of every name and nature whatever, except the password and secret work of the ritual.

Fourth—That said Supreme Lodge shall renounce all control, supervision or superintendence of the Grand Lodge of the State of New New York.

Resolved, That an order be drawn in favor of S. S. Davis, Supreme Receiver, for the sum of $1,629.40, to pay the *per capita* tax, and that such sum shall be in full for such tax for the present year.

Let us consider the various items in the first resolution *seriatim*, and see what our big sister would have:

First, She would have the Supreme Lodge reorganized and the basis of representation changed. Now, as to reorganization, we confess our inability to grasp the meaning hid away in the term if it has any, but as to a change of the basis of representation we catch the scope of that idea and most emphatically coincide. There is no justice in giving a Grand Lodge jurisdiction of 2,600 members as much voting strength in the Supreme Lodge as one of 16,600 like that of New York, or one of 14,300 like ours. This is all wrong and calls loudly for a speedy remedy. We also incline to favor biennial sessions.

Second, As to a reduction of the Supreme Lodge per capita tax at least one-half, we agree to that proposition also, if the interests of the Order can be met by biennial sessions, and we see now no good reason why this should not be so.

Third, We see no reason why New York should be exempted from the general laws, rules and regulations of the Order any more than any and all other Grand Lodges, and to exempt all would be to disband the Order altogether. Surely the Grand Lodge of New York does not want to do that, but that is just what would be the logical consequence of what she asks for. If this is not what she means, then she must mean something infinitely worse. She would send her representatives to the Supreme Lodge to vote according to her membership and legislate for the rest of the Order, being herself exempt from the consequences of their doings except in the matter of secret work alone, a proposition so monstrous that we are forced to the conclusion that either it was made and passed without consideration or by men completely out of their sober senses. We should at once believe the former to be true did we not find in the proceedings of the same body that the following preamble and resolution was also passed:

Whereas, Jonathan G. Armstrong has for six consecutive years most ably and efficiently served as Grand Recorder of the Grand Lodge of the A. O. U. W. of the State of New York, and by his unswerving integrity in office, his fidelity to the trusts committed to him, and his zeal and assiduity in promoting the best interests of the Order, has richly earned the highest testimonial this Grand Lodge can confer; therefore,

Resolved, That Bro. Jonathan G. Armstrong be, and is hereby declared to be entitled to all the honor and prerogatives of a Past Grand Master Workman of this Grand Lodge.

It thus appears that the Grand Lodge of New York would have the Supreme Lodge prescribe for them the secret work, but still would itself confer the P. G. M. W. degree, notwithstanding it can only be conferred by the Supreme Lodge. We were under the impression that Bro. Armstrong received the P. G. M. W. degree at the Boston session of the Supreme Lodge on recommendation of his Grand Lodge, as required by law; but whether he did or did not, the action above reported is of such an extraordinary character, and so inconsistent withal, that it really seems as if our worthy sister had gone clean daft.

The fourth item in the petition being essentially the same as the first, it calls for no additional remarks.

Our New York brethren have been worried a good deal. What with fighting the insurance companies, the courts and some other annoyances, they seem to have gotten their heads out of plumb, and in the absence of the old, tried and level-headed captains that have held the helm with a steady hand, they have lost their reckoning, and in sheer desperation have given the good old ship over to the elements of passion and unreason.

Poor (Insurance) Policy.

The Watchman has had no disposition to quarrel with life insurance companies. We do not consider it a wise policy, either for ourselves or for the Order, to enter into a newspaper controversy with the paid advocates of these corporations. Neither do we believe it right or just, or to the advantage of insurance companies (at least first-class institutions) to denounce our Order, and say that it is founded upon an unsound and impracticable basis. It is a reflection upon the intelligence of 14,000 of California's best citizens to say that the principle of the Order is chimerical. It is absurd to think that "regular" companies can do better than fraternal co-operative associations.

We are led to speak of this by the fact that a comparatively obscure monthly in this city has loaned its pages to a long and abusive article on our Order, the Watchman, Grand Master Workman Barnes and Past Grand Lecturer Kinsley, and in which, by array of figures ingeniously manipulated, attempts are made to defame the grand success the A. O. U. W. has met with in its benevolent work. By the system of figures given it is attempted to be shown that protection in the A. O. U. W. costs from one-third to one-half more than insurance in one of their companies. This will certainly prove news to our readers, and the system of mathematics by which the result is brought about is worthy of the profound mind which evolved them. In another part of the article in question it is said that we will fail because the members are paying in too low a rate. If the members of the Order are not paying in sufficient to meet the death losses, it is proper to know where the $500,000 came from which the Order has paid out in this State since the formation of the Grand Lodge. This sum has been collected from the members of the Order in amounts of $1 and $2 a month, or an average of $15 a year, and it has been found sufficient to pay every death loss in the Order. The members of the A. O. U. W. are also satisfied, for they know that every dollar that is paid into the beneficiary fund goes to relieve some brother's family, and is not squandered or used in disseminating false information, or in bolstering up bogus insurance companies through questionable advertising mediums.

The article in question has been re-advertised in one or more of the daily papers of this city, to the disadvantage, we believe, and probably to the disgust of first-class insurance managers. We have too good an opinion of the sagacity of the latter to believe that they would be so short-sighted as to advertise in such doubtful way, through so unpopular a medium as first inserted the article to which we allude. We believe it to be the work of weak-minded individuals, who are trying to bolster up mushroom insurance companies—a class that have proved the curse of thousands of policy holders, and brought disgrace upon the really first-class companies of the land—institutions which, we admit, like the A. O. U. W., are a legitimate benefit to the community.

One point more and we are done. Our fraternal organization is our bulwark. We have over 14,000 live and intelligent soldiers in our ranks. Our strength is within our own lines, and while we will stand by our guns when attacked, we do not propose to go off our own ground to fight insurance companies. We do not see the need of contending in the public press with those moribund concerns that use such questionable means for furthering their tottering fortunes by attempting to defame the Order and its advocates. The real insurance leaders would show a lack of common business sense (which we are loth to credit them with) if they themselves press an attack upon co-operative organizations, through flimsy newspaper articles, upon so worthy and well-organized a body of men. The faith that is in us will find expression on all occasions. Facts founded upon experience in our Order will always be presented, heedless of the barking of snarling curs.

Earnest Words.

The prosperity of this Jurisdiction has no parallel in the history of this, or, we believe, any other Order. From the beginning, things have gone smoothly. We have escaped the ills incident to most new enterprises. This has not been the result of mere chance, but of good, earnest, judicious and honest management. Since our Grand Lodge was organized, it has exhibited rare wisdom, both in the choice of officers and in legislation. Fraternity and loyalty have characterized every act it has performed, and no Jurisdiction has so promptly and cheerfully met every call made upon it by the Order. We are proud of our membership and proud of our record, and we have right to be. Our Grand Lodge is soon to meet again in annual session. Let every member of the body go to the work that shall come before him feeling his full responsibility as a Master Workman, and all will continue to be well with us. The motto should be: "Let well enough alone." Some trifling changes in our laws may be desirable; but, beyond such as seem plainly necessary to make, none should be attempted. Our business methods should in no wise be disturbed. Lodges and officers have come to understand them, and any innovation would work to the hurt of the Order instead of a benefit, in all probability, and there is no use in arranging probabilities against us. No doubt the Supreme Lodge Representatives will present for the consideration of our Grand Lodge such matters as were laid over by that body for such purpose, and we trust they may be disposed of with that wisdom characteristic of the Grand Lodge. Amongst the principal matters, will be the business of providing for a Chief Medical Examiner or Board; some action in relation to the Degree of Honor, to the end that it may be something or nothing; and the matter of graded assessments. In relation to the first, we will not attempt to prejudice the action of the Grand Lodge with any opinion of our own as to the best course to pursue, but will only say that whatever plan may be determined upon, the details thereof should be most carefully and wisely arranged, or the days of our prosperity will be among the things of the past. We must all the time remember that our doors should be wide open and easy of access to the worthy, but closed and double-barred to all others. Moreover, there should always be provided a ready road out of the Order for any unworthy one who may escape the vigilance of the Watchmen set about our portals, and so get within our gates.

As to the Degree of Honor, we desire only to say that if made what it is proposed to make it according to the plan submitted at the last session of the Supreme Lodge, it may become a grand success. Only one thing could possibly hinder, and that is the mingling of the sexes. Other societies with this feature seem to succeed. Certainly, the Workmen, with their great name and prestige, could do as well. But to leave the Degree as it now is, would be to perpetuate a shame and a failure.

Of graded assessments our ideas are well known. Some system might be made that would approximate justice more nearly than our present one, if we only had facts on which to base such system, but such facts are entirely wanting. Tables of expectancy of life will not answer, for men will not die in accordance therewith, nor can they, so long as we select out the healthy and leave the unhealthy, the moral and leave out the immoral, the unhazardous and leave out the hazardous, nor until we know the relative probability, according to age, of the men we take in remaining with us till they die. No statistics have ever been made to give us these facts, and it follows, therefore, that should we essay a change, we should more likely make matters worse rather than better. The only safe way is to wait till we know what we are doing before we disturb a system that is more simple, and probably more just than any other.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

WM. C. FLINT, ESQ., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

REPRESENTATIVES to the Grand Lodge will find our office at their service while in the city. The latch-string hangs outside the door.

OUR usual rate of increase is still maintained. This item is written on the 10th, and already 120 new beneficiary certificates are written for the month.

WE have provided a goodly supply of P. M. W. badges, so as to accommodate such Recorders, Financiers and Receivers as may receive the P. M. W. degree at the Grand Lodge. Anyone wishing to procure a badge in advance of the session can order from this office. Price, $1.50.

SEVERAL Lodges have not yet sent in their duplicate copy of Representative's certificate. It is wanted badly and at once, for the purpose of making up the list of representatives for the use of the Finance Committee, Committee on Credentials, and for use of the Grand Lodge in session. Recorders will please give prompt attention to this matter where not already attended to.

ON THE 1st of January last we were behind New York in membership 2,626. This year we may expect to see the figures reduced very considerably, judging by the past, and when, in the fulness of time, we shall have caught up to and passed her we shall know how to sympathize with old Alexander, in sorrow over the fact he had no more worlds to conquer.

RECORDERS will please bear in mind that the mere granting of a clearance card should not be reported on the monthly reports, nor should members holding such cards be reckoned out of the membership of the Lodge. Till a member is actually elected into another Lodge he belongs to the Lodge granting the card, and has all the rights and is subject to all the requirements of any other member. A member holding a clearance card, therefore, can speak, vote or hold office in his Lodge till accepted in some other, and can be suspended for non-payment of assessments, or tried for any misdemeanor. But, in the latter case, before proceeding prudence would dictate that his card be recalled, as the law provides.

WE PRINT in this issue a list of the representatives to the Grand Lodge, so far as we could procure their names. We suppose they are aware of the fact that any amendment to a law or laws of the Grand or Subordinate Lodges that can be improved must first be submitted to the committee on amendments, of which Bro. C. H. Dunton of Oakland is chairman. This is in accordance with a resolution of the last Grand Lodge, and was done to facilitate business, and to give the time necessary for their proper consideration. No amendment to the constitution can be introduced into the Grand Lodge without the consent of two-thirds of that body, hence it will be desirable for all members of the Grand Lodge to be quick in their action, as the committee will not consider any changes in the laws two weeks prior to the assembling of the Grand Lodge. All other work that will be presented to the Grand Lodge, should be earnestly studied by the members, the views of their constituents obtained, resolutions formulated, and documents, arguments, etc., well prepared. This is necessary in order that the work of the session may be done with quickness and dispatch, and at the same time done properly.

BRO. GUS POHLMAN, for a number of terms Recorder of Burns, 68, and who is well and favorably known as an amateur singer, has been blessed with the addition of a daughter to his interesting family. From the testimony of a number of his brother Workmen who have called to congratulate him, we are assured that the latest blessing will be likely to maintain the reputation of the family as a fine vocalist.

H. A. OLIVER, Deputy, has ordered a set of supplies to form a new Lodge to be located at Lakeport, Lake county.

Representatives to the Grand Lodge.

The following is a list of representatives (so far as received at the office of the Grand Recorder) to the Grand Lodge, A. O. U. W., which will meet in this city Tuesday, April 4th, at Dashaway hall, Post street, between Kearny and Dupont:

California, No. 1, Oakland—Geo. E. Bugbee, W. H. Wilkenson.
Oakland, No. 2—H. Griffin, S. H. Mitchell, F. M. Smith.
Brooklyn, No. 3—O. Whipple.
San Francisco, No. 4—L. H. Fuller, Chas. S. Fechheimer.
Alameda, No. 5—Wm. Sanderson.
Occidental, No. 6, Oakland—R. Woelffel, W. G. Hawkett, Wm. Pirrie.
Pacific, No. 7, Oakland—H. T. Smith, Will H. Burrall, Wm. Winnie, A. T. Eastland.
Golden Gate, No. 8, S. F.—A. C. Knudsen, Harry J. Lask.
Harmony, No. 9, S. F.—L. J. Henry, Wm. Decker, James McCann, John R. Fishbeck.
San Leandro, No. 12—F. Eber.
Fortuna, No. 13, Napa—William West, W. F. Henning.
Yerba Buena, No. 14, S. F.—Chas. H. M. Curry, J. G. Severance, A. A. Egleston, Frank B. May.
Protection, No. 16, Santa Clara—John E. Gowry.
Enterprise, No. 17, Santa Clara—Geo. Fetherston, S. B. Caldwell, L. Finigan, J. W. Lowry, P. V. Baker.
Bernal, No. 19, S. F.—George Powell, C. L. Houghton.
Saucelito, No. 20—Charles E. Wulferdinger.
Yolo, No. 22, Woodland—S. T. Pendegast.
Stockton, No. 23—E De Lano, John W. Payne, Geo. Lissenden.
Redwood, No. 25—Geo. F. Bradbury.
Gilroy, No. 26—A. Robinson.
Santa Rosa, No. 28—John Miller.
Valley, No. 30, S. F.—Wm. Broderick, Wm. Patterson, W. G. Buchanan, J. J. Hayes, Henry Hoeber, C. E. Hunt, A. Heussler, W. B. Lyon, E. F. Loud, F. Fillmore, D. McLoud, J. P. McMurray, T. H. Macdonald, C. C. Terrill, Geo. A. Case, E. H. Black.
Healdsburg, No. 31—H. H. Pyne, A. G. Burnett.
Cloverdale, No. 32—J. F. Hoadly.
Spartan, No. 36, S. F.—E. Danforth, A. W. Prevost, D. McClure.
Antioch, No. 37—H. W. Brewer.
Oroville, No. 40—Archie McNeil.
Magnolia, No. 41, S. F.—Caleb Brind, B. F. Jacobs, M. Warshauer.
Franklin, No. 44, S. F.—J. A. Fairweather, J. F. Brown, C. N. Payson.
Santa Cruz, No. 46—Benj. Knight, Jr.
Sausal, No. 47, Salinas—L. H. Garrigus.
Vacaville, No. 48—Jos. Stahle.
Suisun, No. 49—Geo. A. Gillespie.
Grass Valley, No. 51—Jas. W. Cooley.
Nevada City, No. 52—C. E. Mulloy.
Los Angeles, No. 55—W. Devereaux, S. Stoll, Jas. Cuzner.
Mission, No. 56—P. M. Fisher.
Live Oak, No. 57—H. Armstrong.
Chico, No. 58—A. F. Blood, H. B. Davidson.
Mountain View, No. 59—Jas. C. Smith.
Washington, No. 60, S. F.—R. A. Lindsey, Henry Wolfsohn, Philip Peck.
Livermore, No. 62—W. I. Horton.
Industry, No. 63, Pleasanton—C. E. Merwin.
Keystone, No. 64, Oakland—F. M. Cary, Chas. E. Alden.
Gridley, No. 67—Chas. J. Walsh.
Burns, No. 68, S. F.—Wm. C. Flint, L. G. Schord, Robt. Wilson.
Red Bluff, No. 69—Chas. R. Mayhew.
Shasta, No. 71—Wm. E. Hopping.
Reading, No. 72—O. J. Lawry.
Sts. John, No. 73, S. F.—J. W. Kinsley, H. G. Prince, J. O. Jephson.
Merced, No. 74—Jas. Leonard.
Vallejo, No. 75—A. L. Hatheway, J. W. Williams.
Alviso, No. 77—J. R. Billings.
Sacramento, No. 80—J. D. Kent, W. I. Orth, J. A. Woodson.
Santa Ana, No. 82—M. J. Bundy.
Lincoln, No. 83—C. C. Sanders.
Silver Star, No. 84, Downey City—E. S. Gray.
San Pablo, No. 86—Azro Rumrill.
Durham, No. 87—Joel M. Nelson.
University, No. 88, Berkeley—C. R. Lord.
Elmira, No. 89—J. H. Barrett.
Carquinez, No. 90, Martinez—C. Ed. Miller.
Pt. of Timber, No. 92—G. W. T. Carter.
Placer, No. 95, Newcastle—A. G. Abbott.
Covenant, No. 97, Auburn—J. C. Hawver.
Monterey, No. 90—D. J. Houghton.
Guardian, No. 100, Dutch Flat—J. E. Prewett.
Biggs, No. 102—F. F. Carnduff.
Highland, No. 104, Grass Valley—George Fletcher.
Mountain, No. 105, Truckee—J. L. Lewison.
Kern River, No. 106, Kernville—Andrew Brown.
Bridgeport, No. 107, North San Juan—F. Manhire.
Bay City, No. 111, Eureka—Fred. W. Bell.
Empire, No. 112, Modesto—John W. McCarthy.
Galt, No. 113—Jas. K. McKinstry.
Butte, No. 114, Meridian—C. P. Devore.
Willows, No. 115—G. A. Gutman.
Grand Island, No. 115—L. L. Hicok.
Confidence, No. 117, Williams—Nicholas Nelk.
El Dorado, No. 118, Placerville—Seneca Davis.
Smartsville, No. 119—Asher Park Brown.
Riverside, No. 120, Compton—A. McFarland.
Georgetown, No. 121—E. L. Crawford.
Camptonville, No. 122—Jas. R. Young.
Forest, No. 124—Robt. P. Mott.
Sierra City, No. 125—I. T. Mooney.
Excelsior, No. 126, S. F.—L. B. Mastick, Samuel Booth, F. S. Poland.
Olympic, No. 127, S. F.—F. W. Rossbach, D. L. Dunlap.
Quincy, No. 129—John D. Goodwin.
Wilmington, No. 130—N. DeJausserand.
Banner, No. 131, Plymouth—A. C. Smith.
Plumas, No. 132, Greenville—J. D. Compton.
Amador, No. 133—Jas. F. Parks.
Laurel, No. 134, Susanville—W. H. Crane.
Lake, No. 135, Janesville—A. B. Bronsen.
Fidelity, No. 136, S. F.—E. M. Reading, F. J. Symmes, E. B. Young, Wm. H. Penfield, Wm. B. Smith, W. H. Holmes.

Challenge, No. 190, Lockeford—J. B. Thorp.
Higuera, No. 194, San Luis Obispo—G. B. Nichols.
Sonora, No. 197—Frank W. Street.
Portersville, No. 199—Spencer Fay.
Navarro, No. 200—Fred. A. Walton.
Coloma, No. 203—Simeon Hunt.
Eden, No. 204, San Lorenzo—Edmond Hathaway.
Honcut, No. 205—D. P. Merrill.
Butte City, No. 206—H. G. Hartley.
Valley View, No. 208, Selma—Geo. B. Sargent.
Lookout, No 211—D. C. Brownell.
Olive, No. 212, San Luis Obispo—Kaufman Green.

From Supreme Master Workman

Relief Call, No. 2.

OFFICE OF SUPREME MASTER WORKMAN, A.O.U.W., DETROIT, MICH., Mar. 1, 1882.

To the Ancient Order of United Workmen:

At a meeting of the Supreme Lodge Relief Board, held at Terre Haute, Indiana, on Feb. 15th and 16th, 1882, the application of the Supreme Lodge beneficiary jurisdiction and that of the separate beneficiary jurisdiction of Indiana, for relief under the provisions under Article IX of the beneficiary laws of the Order, was fully considered; and the undersigned relief board do hereby certify to the correctness of the following statements of facts as ascertained by personal examination of the books and records, viz:

First, that, during the fiscal year ending March 1, 1882, the Supreme Lodge beneficiary jurisdiction has levied and collected twenty-four (24) assessments (its full maximum as required by law), from which one hundred and twenty-eight (128) death losses were paid, and that after the settlement of the above losses there still remain ten (10) death losses unpaid, requiring the sum of twenty thousand (20,000) dollars.

Second, that during the fiscal year ending January 1, 1882, the separate beneficiary jurisdiction of Indiana has levied and collected 20 assessments (its full maximum as required by law), from which 20 death losses were paid, and that after the settlement of the above losses there still remain 13 death losses unpaid, requiring the sum of $26,000.

Third, that from the proceeds of Relief Call No. 1, made April 15, 1881, the amount of $6,000 was paid to the separate jurisdiction of Indiana, and by it properly applied to the settlement of the death losses for which relief was granted, and that there remains at this date (Feb. 15th), the sum of $2,505.60 in the Relief Fund, in the hands of the Supreme Receiver.

To provide the sum for relief as above mentioned, viz.: For the Supreme Lodge jurisdiction $20,000, and for the jurisdiction of Indiana $26,000, a total of $46,000, is required. The Supreme Lodge Relief Board do hereby call upon the various Grand Master Workmen and upon the Master Workmen presiding over the various subordinate Lodges under the immediate jurisdiction of the Supreme Lodge, for the amount of one assessment of *50 cents* on each Master Workman degree member—the same to be collected and forwarded as provided in Sec. 2, Art. IX, Supreme Lodge Constitution.

The Supreme Lodge Relief Board desire to call especial attention to Sec. 2, Art. IX, Supreme Lodge Constitution, as amended at the last session of the Supreme Lodge, as follows:

SEC. 2.—"The Relief Fund shall be raised by levying assessments of amounts not more than sufficient to produce the amount required for the payment of each respective relief assessment; and such assessments shall be levied and collected in the same manner and under the same laws, rules and regulations as ordinary assessments for the beneficiary fund, and all laws of the Order in regard to suspensions for non-payment of ordinary assessments or reinstatement of members shall be applicable also to such relief assessments. All Master Workmen degree members in good standing at the date of the levy of such assessment shall be liable for the same. *Provided*, Subordinate Lodges may set apart such relief fund or assessment from their general fund, and that such assessments shall not exceed the sum of three dollars per member in any one year."

Subordinate Lodges will forward calls upon the relief fund through the same channel and in the same manner as beneficiary moneys are forwarded.

The Grand Recorder of each Grand jurisdiction will make report to the Supreme Recorder, not later than the 20th day of April, 1882, giving the name, number, location, and the amount paid by each subordinate Lodge, in the jurisdiction, and will forward with said report, by draft or postoffice money order, payable to the order of the Supreme Receiver, the amount due as shown by the report.

Each Grand Recorder will also report all Subordinate Lodges that have failed to forward their proportion of the relief fund as per the call made.

Respectfully submitted in C., H. and P.,
WM H. BAXTER, S. M. W., Chairman,
M. W. SACKETT, S. Rd'r, Secretary,
S. S. DAVIS, S. Rv'r,
JOHN FRIZZELL, Ch'n Com. L. and S.,
J. H. LENHART, Ch'n F. Com.,
Supreme Lodge Relief Board.

Issued by direction of Supreme Master Workman, M. W. SACKETT, Supreme Recorder.

OFFICE OF SUPREME MASTER WORKMAN, A. O. U. W., DETROIT, MICH., March, 1, '82

To all Grand and Subordinate Lodges of the Order.—GREETING: It having come to my knowledge that certain persons have been admitted to membership in the Order in violation of the laws and regulations thereof.

Notice is hereby given to all Grand and Subordinate Lodges that if they have any member or members who were admitted, subsequent to March 14, 1874, who were over 50 years of age at the time of their admission, all such persons must be proceeded against and expelled or otherwise separated from the Order without delay.

Under no circumstances will the Supreme Lodge be responsible for the death losses of such cases.

It is further directed that all medical examinations and certificates must conform to the requirements of law in every respect, and they must be made out in business-like style, and not written with lead pencil, but with pen and ink. Yours, in C., H. and P.,

WM. H. BAXTER, S. M. W.
Attest: M. W. SACKETT, S. R'dr.

THE brethren of Oak Leaf Lodge are giving a series of monthly entertainments, which are well attended by the members of the Lodge and their many friends. On Monday evening, Feb. 27th, the exercises consisted of a fine piano solo by Miss Kate Carmody, followed by a recitation by Charles H. Dunton. Col. E. M. Gibson delivered an interesting address on "Milton;" Mr. N. H. Babcock rendered a guitar solo in good style; Mrs. F. G. Beckett's vocal solo was very much appreciated; D. S. Hirshberg read a humorous article on "Mules;" a piano solo by Miss Beckett was well received; Messrs. Trost and Boquet entertained the audience with a zither duet, which was encored; W. J. Wilkinson, Master Workman of the Lodge, presided, and delivered appropriate remarks.

WE HAVE received from Wm P. Cole, Grand Recorder of Texas, a copy of the proceedings of the Grand Lodge, held at Sherman, January 10th and 11th. The session was quiet and harmonious. Twenty-seven new Lodges have been organized during the past year, and the membership at present writing is very nearly 2,000. Alex. Pope, of Marshall, was elected G. M. W. The Grand Lodge sessions have been changed from January to February.

The Early Scientists.

The contemplation of the progress of science in our days shows us a whole host of zealous investigators bringing stone after stone to raise to a prouder hight the structure of knowledge whose richly diversified pillars and towers, seemingly disposed without order, all contribute to the common design. From this view we readily turn to the foundations and basement stones of the edifice, which, gray and weathered as they seem to be, yet form the basis of the heaven-aspiring building. Our greatest interest is enlisted in the story of the men who, amid the general perversion of manners and contempt for all learning of the middle ages, lived for knowledge in their study-rooms or shut up in silent cloisters. Although they did not make any great discoveries, they still endeavored to keep alive the little flame which yet shone weakly from the intellectual fires of antiquity. Still more fascinating are such views in the case of men who came out into the life of the times, and, with their sharp minds schooled in the philosophy of the ancients, entered actively into the often erratic course of the world, and by word and writing presented themselves undismayed before those in power—here checking the spirit of boundless avarice and wild excess, there defending the oppressed.—*Popular Science Monthly.*

A Good Dessert for a Change.—Make nice short dough like pie-crust, roll quite thin, sprinkle on some thinly-sliced cooking apples, roll up not too tight, wrap in a thin clean cloth, tie rather loosely, and steam for nearly an hour and a half. Serve with wine sauce or cream and sugar, as you like best. Mix a pinch of soda in the flour thoroughly before the shortening.

Scientific Press

Patent Agency.

[ESTABLISHED 1860.]

Inventors on the Pacific Coast will find it greatly to their advantage to consult this old experienced, first-class Agency. We have able and trustworthy associates and Agents in Washington and the capital cities of the principal nations of the world. In connection with our editorial, scientific and Patent Law Library, and record of original cases in our office, we have other advantages far beyond those which can be offered home inventors by other Agencies. The information accumulated through long and careful practice before the Office, and the frequent examination of Patents already granted, for the purpose of determining the patentability of inventions brought before us, enables us often to give advice which will save inventors the expense of applying for Patents upon inventions which are not new. Circulars of advice sent free on receipt of postage. Address DEWEY & CO., Patent Agents, 252 Market St., S. F.

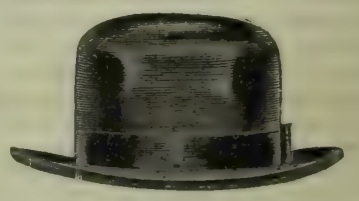
Women's Silk Culture Exhibition.

The Philadelphia *Ledger* has an account of the exhibition of the Women's Silk Culture Association which was held in that city week before last. The exhibition was largely attended and the greatest interest was manifested in the rare articles to be seen. A full band of music was in attendance every afternoon and evening. The Rev. O. H. Tiffany, who has lately returned from Europe, and who was present at the silk culture exhibition at Milan, pronounced the display in Philadelphia superior to the Milan exhibition in every respect.



Among the leading features of the present Exhibition, was the pattern of the silk dress to be presented to Mrs. Lucretia R. Garfield, and which will be paid for by subscription. A silk reel was worked day and evening. It was run by electricity and the silk was reeled from the cocoons at the rate of 250 revolutions per minute. It is claimed that there is nothing like it in the world. Then there was a magnificent blue silk dress and train ornamented with pearl beads, also some superb specimens of painting and embroidering on silk. A Jacquard loom was in operation making silk goods; a number of rich silk handkerchiefs were shown of American make, from the egg of the silk worm to the handkerchiefs themselves.

At the main table there was an immense variety of silk articles, all of American manufacture. A lady's dress of myrtle-colored velvet and embroidered silk, with pink satin skirt, attracted great attention, the material costing $15 per yard. There were 26 competitive jars of cocoons, each jar containing one pound of cocoons. Silk was shown through a microscope of such power that a single thread looked like a piece of rope. There were also cases showing how silk worms are raised and how they make cocoons. A loom for making plush goods attrcted attention, and there were some choice specimens of writing on silk done by a sewing machine. Hundreds of other interesting objects in the silk line were on exhibition.

The electric light has found its way into India. At Calcutta the public gardens are lighted by it, and the Elgin mills at Cawnpore also are.

The Wonders of the Spectroscope.

This little instrument combines with its qualities of a trap the advantages of a balance, which we may suppose is fine enough for the most fastidious fairy to weigh the nectar distilled in the dew-drop, or other delicacy of the season.

Our ideas of weight and size are purely relative, and that which seems a small or light object from one point of view may become large and heavy by a different comparison. To most of us, perhaps, a "grain-weight" suggests a little thing; we know that the apothecary and a few other small dealers split up the grain into halves, quarters, tenths and, perhaps, even hundredths, but then we regard them as homeopathic visionaries and laugh at their absurd little pellets; yet, strange to say, there is a vanishing-point in our minds, which, if an object is small enough to pass, it becomes larger and more important by reason of our astonishment and wonder at its minuteness. The most ordinary specimen under the microscope is an evidence of this, but when we realize that the ability of the spectroscope to reveal small particles of matter begins where the finest microscope searches with its highest power in vain, that the grain of matter may be divided, not merely into hundredths, thousandths or tens of thousandths, but into millionths and tens of millionths, and that a single one of these particles may be readily detected by this little searcher and held up for inspection, our wonder and amazement enhance our respect for its occult powers. The astronomer tells us that a comet often throws out a tail longer than the distance between the earth and the sun, and broad in proportion; yet the matter forming this tail is so attenuated that, if properly compressed, a gentleman's portmanteau, possibly his snuff-box, might take it in. Yet we have merely to point this little tell-tale at the comet, and, presto! we know what the matter is. Think of it! Not merely can we grasp infinitesimal particles at our hand, but we may sweep the firmament, gather up the star-dust and tell its composition. But we have not yet reached the end of our excursion; indeed, we have only entered the threshold of the scientist's sanctum, and the wonders of the arcanum eclipse those of the portico. That mysterious agency or force called electricity has been utilized, not merely for the benefit of bulls and bears, or for hundreds of utilitarian purposes with which we are familiarized every day, but it has been used as a fairy finger to probe nature's hidden structure, and, as it were, enable us to *feel* what the spectroscope has revealed to sight.—*Popular Science Monthly.*

WOMEN'S HEALTH.—"I would," says Gail Hamilton, "that women were happier." The wish meets an evident need, but if Gail had gone to the root of the matter she would have said "I would that women were healthier." It has come to be a commonplace truism that health holds, in itself, the secret of all life's success, but its full significance has never yet been adequately appreciated. Women are too apt to regard the measure of health as met if they are not actually ill. Now, true health is a positive, rather than a negative, state. It is physical exhilaration; it is the state when duty becomes delight, when the surplus energy craves exertion. In this state the keen morning air is like wine, and life takes on a rest, a glow, a sparkle. This is the physical state that renders possible mental enthusiasm, spiritual exaltations. "I'm so nervous," sighs a woman whose life is set in the midst of all comforts and perhaps luxuries. But wherefore? What need is there in being "so nervous," when exercise, sleep, proper food are attainable? "A woman of 20 ought to be as much ashamed of being dyspeptic as of being drunk," severely says the scintillating Gail, and it is true, even if severe. If women can once become regenerated with the fact that a state of vigorous, robust health is quite compatible with intellectual power and refinement, and being only negatively well is not necessarily synonymous with a lady, it will do more for women's advancement than all the ballots she could cast between Boston and San Francisco. Probably, however, she requires the discipline of political enfranchisement to educate her up to wider views of life and its possibilities and deep significance.

THE *Engineer* states, on the authority of a German journal, that there is a scientific reason why green or brown bottles are preferable to bottles of colorless glass for holding liquors. A disagreeable taste is acquired by liquors put into white bottles, which the same liquors are wholly free from when kept in bottles colored green or brown. Blue and violet bottles are stated to be as objectionable as white ones in the respect mentioned.

Intemperance and Tobacco.

[Original Essay, composed and recited at a monthly social of Washington, No. 60, by RACHEL WOLFSOHN, 9 years of age, daughter of HENRY WOLFSOHN, P. M. W. of No. 60.]

Tobacco and liquor are two curses that have been given to our enlightened age by the two great divisions of the people of the earth. There seems to be a rare sort of justice in the dispensation that makes each the return for the other, as it was the wild, untutored red man of the forest that gave this poisonous weed to Sir Walter Raleigh, who hastened to introduce to the enlightened and civilized people of Europe, a habit quite loathsome in itself and contrary to nature. My papa tells me that tobacco is a poison that cannot be introduced into the body without causing great disturbance there, followed by headache, nausea and weakening of the eyesight, as well as mental obscurity, and can be tolerated only in the body when it is perfectly soaked through with its vegetable poison.

The person of the smoker never presents the cleanly appearance that the non-smoker has. His clothing is full of ashes, his breath is offensive, and his fine sense of cleanliness, which, as the proverb has it, is next to Godliness, is greatly warped and blunted, while his health is gradually and surely undermined, owing to the injurious effects of nicotine, which is the deadly poison contained in tobacco, upon the nerves and muscular tissues of the individual. Look at the tobacco user and judge for yourself. His complexion is sallow, his appetite is poor, and his digestive faculties are always impaired.

The chewer of tobacco presents a horrid figure! He is continually squirting the brown and filthy-looking juice from a mouth that nature intended for the utterance of holy and good words, and for the introduction of wholesome and clean food into the body. The sense of taste is vitiated, and in most instances destroyed. If his food is not highly seasoned with condiments of all conceivable kinds, he can gain no pleasure from his food. He can't eat a dish naturally and plainly prepared, and for that reason nutritious and healthy, because the taste of tobacco is in his throat, on his tongue and lines all the walls of his mouth. This must be first washed down into the stomach, causing that useful member of the body much uneasiness before the chewer or smoker knows what he is eating. Why, if the chewer's or smoker's eyes were blindfolded, he could not tell what he was eating or drinking, as it would be either tobacco or tobacco juice, as far as the sense of taste was concerned.

And then the man that uses snuff. Is there anything more disgusting than to see a nose full of that nasty brown powder? And how he flourishes a handkerchief that for all the world looks as though it had been taken fresh from a dunghill. I will say that I cannot find in the man that uses either tobacco to chew or to smoke, or to snuff (and the latter has lost all sense of smell), *the man* whom God has created in his own image. And now, liquor. Is that food? No! Is it a natural and healthy drink? No! Almost every article of wholesome food or drink is furnished by nature, or very easily made nutritious by a simple process of cooking. Take barley, rice, potatoes, grain, and cook them simply, they will give good, healthy and nutritious food; but put them into the proper shape for making liquor of them, what must be done to get the alcohol out of them? Why, they must be let to rot, and this they call fermentation. When they have become sufficiently rotted, why, then, they go to work and, as they call it, refine them; as if filth, refined or otherwise, could be anything else but filth in the end. Corrupt and rotten in its fabrication, it is still corrupt and rotten in its effects, if drank from the most magnificently cut-crystal goblet, the silver horn or the golden cup; whether it is placed in green, blue, yellow or white bottles, with wax of any kind over the stopper, or labled with high-sounding names or gaudy lable. And it is introduced into the body, swallow by swallow, until the person who had the liquor in his power becomes overpowered by the liquor he himself once had power over. When this stage is reached, where is the God-like creature called man? Lost, forevermore lost.

It is unnatural to drink intoxicating liquors. The animals don't do it; it is against nature because it makes man a beast; it is demoralizing because it sets a bad example, and doubly and trebly so when indulged in in company with the use of tobacco.

Avoid them both; they are the arch fiends of human society, and the little good they may have done is more than overborne with their continual cause of evil. Beware of tobacco and intoxicating liquors. They are "Twin Evils."

A SET of supplies was sent on March 7th to Bro. A. M. Ayers, Deputy of Yolo county, for instituting a new Lodge at Dunnigan's, Yolo county. The Lodge will be formed next week, with 35 charter members.

A GENERAL meeting will be held at 12th and Franklin streets, Oakland, A. O. U. W. Hall, Pacific Lodge, Thursday evening, March 23d. This will be the last grand gathering before the session of the Grand Lodge.

Grand Recorder's Statement for February.

We condense from Grand Recorder Pratt's Financial Statement for February the following leading figures:

Excursion Season.

The coming season on this coast promises to be one of unusual interest to tourists, campers and pleasure seekers. Extensive preparations are being made at Pacific Grove, at Monterey, Hotel del Monte, Aptos, Santa Cruz and other resorts along the line of the Southern Pacific railroad, to meet the engagements and accommodate the immense army who are seeking repose and a place for overworked and exhausted humanity. The amount of tents that are being manufactured for this locality will make, when completed and in place, almost a tented field from Santa Cruz to Monterey. The S. P. R. R., anticipating the great rush of tourists and excursionists, have added to their rolling stock a number of magnificent coaches, and are prepared to meet the wants of this popular resort.

A neat circular is before us wherein the S. P. R. R. announces that in view of the great success attending the running of excursion trains to Monterey and Santa Cruz the past season, it is their intention to run special trains of first-class coaches from San Francisco to these popular resorts every Sunday during the summer season of 1882.

Military Companies, Sunday Schools, Societies, private parties to Belmont Park and the picnic grounds along the line of this road will be offered special inducements, and round trip tickets sold at very low rates. For terms, rates and other information apply at Room 33, Railroad Building, Fourth and Townsend Sts., H. P. Judah, Assistant Passenger and Ticket Agent.

LIFE INSURANCE.—We call attention to the advertisement of the Pacific Mutual Life Insurance Co., in another column. This company has for Directors a group of well-known and respected citizens of California, and they announce the following as characteristics of their organization:

1. Since its organization, A. D., 1868, it has paid 395 death losses on policies amounting in the aggregate to $1,908,297.
2. It has paid to policy-holders, for matured endowments, dividends and surrender values, in round numbers, $1,400,000.
3. It has repeatedly been examined by sworn experts, and most thorough and searching investigations made of its condition and business, and in every case its solvency and trustworthiness have been demonstrated.
4. Its stockholders and directors are widely known as among the most capable business men and ablest financiers of the State of California, and the integrity of their management is unquestioned.
5. The laws of the State, including the constitutional provisions affecting corporations, are of the most rigid character, such as to make the company one of the safest institutions of its kind.
6. Its policy contracts contain no restrictions upon residence or travel, and its forms of insurance are unusually attractive. The low rate, deposit endowment, and mutual investment policies, are peculiar to this company, and offer advantages to the insured which are not surpassed, if equalled, by those of any other company.

THE well-known Weston's bakery, No. 9 Stockton St., furnishes home-made bread, fresh, daily. It is a luxury that will be appreciated by all who try it.

"Sound It Along the Line."

Ever onward and upward is the motto of the A. O. U. W., and with the success of the Order is the WATCHMAN'S progress. There are, however, some Workmen who are not subscribers, and we wish to draw *their* attention to the merits of our journal. Those of our readers who have been with us from the start, and also those who have come later, can do much to not only aid our enterprise, but also that of our organization. They have been with us, seen our work, and can best tell whether the WATCHMAN has not been an earnest advocate of the Order's interests.

Members of the A. O. U. W. have a pecuniary interest, which renders an able exponent of their rights and privileges of paramount importance. Therefore, every member of the Order should take the paper, read it, and if he has some friend who is morally and physically qualified, lend him the paper for the purpose of hastening action.

Members of the WATCHMAN family who have felt strength and received encouragement from a perusal of the Order's doings in its columns would do well, also, to pass it occasionally around to the lukewarm, that they may be partakers in the faith which moves them.

The privileges we now enjoy by reason of our membership will last while life is in us, and when we are gone others will be ready to fill our places. If the Order should ever perish, lukewarmness will be the rock upon which we will split, and one of the greatest preventives of this will be the enthusiasm that is kept alive by a careful reading of the WATCHMAN.

We will send copies free for samples to those who are willing to assist in the circulation of our paper.

ANGLO-CALIFORNIA BANK.—This well-known commercial bank is the custodian of the funds of the Ancient Order of United Workmen. It has an authorized capital of $6,000,000 and a surplus of $300,000, and is recognized as one of the best managed institutions in this country. At the present time a fine building is being erected for this bank at the corner of Sansome and Pine, which will be one of the finest structures in the United States. A goodly number of the leading employees in this bank are Workmen.

DIAMOND LODGE, No. 5, D. of H., Hollister, gave an entertainment on Wednesday evening, Feb. 25th. The comedy, "My Turn Next," was well received. The refreshments were excellent, and sold readily. The proceeds of the entertainment will replenish the treasury of the Lodge to the extent of a little over $100.

THE house of Curtis, Dixon & Co., manufacturers and dealers in cigars, is favorably known as one of the best in this city. Having had a large experience they are enabled to select the leaf tobacco in the market, and keep their leading brands up to the standard, according to price, in fact one brand made by them is equal to any imported cigar and at one-half the cost. The demand of late is so great that they are hardly able to fill their orders.

BRO. TERRANCE SULLIVAN has opened a boot and shoe manufactory at 214 Sixteenth street, between Howard and Cap. He has the reputation of being a skilled workman, and will keep in stock and make to order all kinds of ladies' and gents', Misses' and boys' boots, shoes and gaiters. His charges are moderate and the finest class of work is turned out.

THERE are several excursions projected to San Jose during the coming summer months by several of our Lodges and societies. If any of our brethren should become hatless, we recommend them to Bro. Williams, the hatter, 251 Santa Clara street, San Jose, near the "Electric Tower."

BRO W. A. PARKHURST, real estate agent, Knox Block, San Jose, has a large list of choice country homes in and around the Garden City. Anyone who wishes to find a home in the world-renowned Santa Clara valley, would do well to call on our genial and well-informed Bro. Parkhurst, one of the leading agents of San Jose.

BRO. JOHN H. BABBIT, of Oregon, who has been head salesman in the firm of Farnham & Aiken in Portland for a number of years, has been admitted as a partner, Mr. Aiken retiring. Bro. Babbit has been a frequent visitor to the city Lodges and we hope he will continue them.

Canvassing Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

List of U. S. Patents for Pacific Coast Inventors.

From the official list of U. S. Patents in DEWEY & CO.'S SCIENTIFIC PRESS PATENT AGENCY, No. 252 Market St., S. F.

Taber's Photographic Parlors.

The accompanying cut is made from a photo, and shows the artistic reception room of the celebrated Photographic and Art Gallery of Bro. I. W. Taber, of this city. It is situated on the corner of Market and Montgomery Sts., over the Hibernia Bank, and occupies, with accessories, the most of the second and third floor, to which you can ascend in elevator at No. 8 Montgomery St. Bro. Taber has had an experience of 25 years in the art of photography, and with the aid of improved instruments, the best artists, and polite attendants, this gallery has become the chief resort for tourists and distinguished visitors, who have carried away to the Eastern States and foreign lands the finest specimens of art from the best view negatives made of the scenery of the Pacific coast from Puget Sound to Mexico. In portrait work this California establishment is equally noted, as you will find in the art galleries, salons, and boudoirs of the principal cities of Europe life-size portraits of many of the distinguished citizens of the world whose Photo was taken at TABER'S. These Photographic parlors have lately been enlarged and a collection of views from all parts of the Pacific coast and foreign countries, which are pronounced by experts to be the finest collection in the world. The new styles of Cabinet, Boudoir and Promenade Photographs, with new and unique backgrounds for effect, taken by improved instruments and skilled workmen, are the "acme of perfection," and the pride of our State, as we justly claim TABER as our California artist. Old pictures are copied and enlarged to any size, and finished in ivorytype style, crayons, India ink, water colors or oils. Novelties in this line are always kept in stock, consisting of elegant gilt and hand-carved frames, passe partouts, etc., etc., for the accommodation of his customers. In almost every household may be seen Photos with name Taber, and that result has been brought about by following one rule, making nothing but the best work and charging one price. While we have a State pride in our artists, we, as Workmen, are gratified to know that it is such representative men as Bro. I. W. Taber, who form the great army on this coast whose benefactions are making the brightest page in our history.

I. W. TABER'S PHOTOGRAPH PARLORS, SAN FRANCISCO, CAL.

The Origin of Our Moon.

Prof. Robert S. Ball, a somewhat distinguished English scientist delivered a lecture, recently in which he incidentally alluded to the probable formation of our moon in the following terms:

Let us leave the earth for a few minutes, and examine the past history of the moon. We have seen the moon revolves around the earth in an ever-widening orbit, and consequently the moon must in ancient times have been nearer the earth than it is now. No doubt the change is slow. There is not much difference between the orbit of the moon a thousand years ago and the orbit in which the moon is now moving.

But when we rise to millions of years the difference becomes very appreciable. Thirty or forty millions of years ago the moon was much closer to the earth than it is at present; very possibly the moon was then only half its present distance. We must, however, look still earlier, to a certain epoch not less than fifty millions of years ago. At that epoch the moon must have been so close to the earth that the two bodies were almost touching.

Everybody knows that the moon revolves now around the earth in a period of 27 days. The period depends upon the distance between the earth and the moon. The time and the distance are connected together by one of Kepler's celebrated laws, so that, as the distance shortens, so must the time of revolution shorten. In earlier times the month must have been shorter than our present month. Some millions of years ago the moon completed its journey in a week instead of taking 28 days, as at present. Looking back earlier still, we find the month has dwindled down to a day, then to a few hours, until at that wondrous epoch when the moon was almost touching the earth, the moon spun round the earth once every three hours.

We have hitherto been guided by the unerring light of dynamics, but at this momentous epoch dynamics desert us, and we have only probability to guide our faltering steps. One hint, however, dynamics does give. It reminds us that a rotation once in three hours is very close to the quickest rotation which the earth could have without falling to pieces. As the earth was thus predisposed to rupture, it is of extreme interest to observe that a cause tending to precipitate such a rupture was then ready to hand. It seems not unlikely that we are indebted to the sun as the occasion by which the moon was fractured off from the earth and assumed the dignity of an independent body. It must be remembered that the sun produces tides in the earth as well as the moon, but the solar tides are so small compared with the lunar tides, that we have hitherto been enabled to neglect them. There could, however, have been no lunar tides before the moon existed, and consequently in the early ages before the moon was detached the earth was disturbed by the solar tides, and by the solar tides alone.

The primæval earth thus rose and fell under the tidal action of the sun. Probably there were no oceans then on the earth; but tides do not require oceans, or even water, for their operation. The primitive tides were manifest as throbs in the actual body of the earth itself, which was then in a more or less fluid condition.

At the remote epoch of which we are speaking the solar tides were very small, as they are at present. Yet, small as they are, there was a particular circumstance which may have enormously increased their importance. The point to which I refer can be illustrated very simply. We have here a weight of 14 lbs. freely suspended, and here I have a small wooden mallet which barely weighs half an ounce, yet small as this mallet is, I can make the heavy weight swing by merely giving it blows with the mallet. Let me try. I give the weight blow after blow. I hit it as hard as I can, yet the weight hardly swings. I have not yet been successful. The art of succeeding is merely to time the blows properly; this I am now doing, and you see the weight swings in an arc which is steadily augmenting.

We therefore see that a succession of impulses, in themselves small, can yet produce a great effect when they are properly timed. In the present case the impulses should succeed each other at the same interval as this pendulum requires for one two-and-fro oscillation. The time therefore depends on the body struck, and not at all on the body which gives the impulses.

Just as this pendulum swings with a definite period so the vibrations of the primæval earth had a certain period appropriate to them. Suppose that the liquid primæval globe were pressed in on two quadrants and drawn out on the two others, and that the pressures were then released. The globe would attempt to regain its original form, but this it could not do at once, any more than the pendulum can at once regain its vertical position; the protruded portions would go in, but they would overshoot the mark, and the globe would thus oscillate to and fro. Now it has been shown that the period of such oscillations in our primitive globe is about an hour and a half, or very closely to a half the supposed length of the day at that time. The solar tides, however, also have a period half the length of the day. Here then we have a case precisely analogous to the 14 lb. weight I have just experimented on.

Oakland.

The following are some of the best business firms of Oakland. Readers wishing anything that they advertise, would do well to call upon them.

INGERSOLL,
Photographer,
STUDIO: 1069 BROADWAY, Cor. 12th, OAKLAND.
All styles of Pictures known to the Art executed in the best style. Children's Portraits a specialty.

A. CORNWALL,
DENTIST,
1069 Broadway, Oakland, Cal.

P. H. McGrew,
Carriage and Wagon
MANUFACTURER.
Nos 1056, 1058 and 1060 Thirteenth Avenues,

Solid Petroleum.

The conversion of Petroleum into a solid and safe substance for transportation seems to be attracting considerable attention in foreign countries where no pipe lines exist. A St. Petersburg paper says: How shall we transport petroleum? is to-day the most important question for all branches of the naphtha industry, and no less so for the consumers who live at a distance from the wells. All the methods of transporting petroleum hitherto in use, whether in wooden or paper barrels, in iron pipes, or iron caissons that are placed on ships or cars, possess disadvantages which are sufficiently well known, especially as regards leakage and evaporation, and also the great danger from fire.

These misfortunes which afflict so severely both dealers and consumers and increase the cost of an article of such importance in domestic economy, have been banished at a single stroke by the discovery of a German named Dittmar, who has succeeded in converting liquid petroleum into a solid substance. As early as 1872 the idea arose in America of solidifying petroleum so as to put it into a more suitable form for transportation, and in that year no less than 12 patents were taken out for this object without any single one of them being found practical. What a range such a discovery would cover, as would change petroleum into a solid wax-like body, can scarcely be conceived of, especially for the Caucasian naphtha industry, where there is a lack of suitable wood for making the barrels, which has a very serieffect upon the industry.

The Moscow *Zeitung* also contains a thorough discussion of the new invention. The journal says: Solid petroleum has not yet come into market because the patents have not yet been issued, but a company has been formed in Russia for carrying out the invention. By the process adopted by this company it is claimed that a quantity of petroleum, which would involve an expense of $36 to put it into proper cases for transportation, including the loss of leakage which would naturally ensue, might be rendered solid at a cost of only $4.

But to this and other remarks that have appeared in the technical journals the Russian *Pharmaceutical Zeitschrift* adds the following: It is found that petroleum when heated will take up a certain quantity of dry soap, and that the solution on cooling will form a jelly, which, when ignited, drops off in pieces that soon go out like burning sealing wax. Dilute acids, like acetic acid, restore the fluid condition (evidently owing to a decomposition of the soap). In this way is explained all that has been asserted and claimed for the solid petroleum.

Only 1½% of soap is required to form a gelatinous mass like opodeldoc, but with 3% of soap it is much more firm. In this operation there separates a small quantity of liquid products that do not become solid, and which probably consist of the lower boiling constituents of petroleum. The presence of these in the solid mass, is, of course, dangerous, and still more so because it always has to be liquefied before it is used. The contents of the wooden boxes used in transportation, will soon ooze through the wood and becoming mixed with air will give off explosive vapors. On this account the author comes to the conclusion that the advantages of solid petroleum are entirely imaginary, as being a tedious, troublesome, expensive and dangerous operation.

UNDERGROUND TELEGRAPH WIRES. — The present much mooted subject of underground telegraph wires is by no means a new one; neither are the practical difficulties attending such a system new. The first telegraph line ever constructed—that from Baltimore to Washington—was first laid underground, but it could not be made to work until it was placed upon poles as at present. Telegraph builders have ever since been trying to devise some means by which the current can be made to work as well underground as above. As yet, however, the problem is not considered fully solved, although in some parts of Europe sufficient progress has been made to introduce underground telegraphy to quite a considerable extent. Extensive experiments in this direction are also now being made in the United States.

PUT IT ON AT ONCE.—A loose red woolen flannel shirt should be worn next to the skin, both summer and winter. It must be "loose," so that its moving upon the skin may keep up a good circulation there; "red," because white flannel fills up, becomes stiff and impervious; "woolen," because woolen flannel conveys the perspiration from the under to its outer surface, where either the cotton shirt absorbs or the air dries it without injury to the body. On account of these properties, sailors wear woolen flannel even during midsummer in hot countries. Of course, a very thin material should be worn in summer.

WILLIAMS'
BALSAMIC
CREAM OF ROSES.

For Beautifying the Complexion, Softening the Skin and Producing that Natural Freshness to the Complexion not obtained by any other Preparation.
DIRECTIONS:
Apply to the face and hands at night, just before retiring, and apply a little in the morning, rubbing it well into the skin. After being in the sun any length of time, or riding when the wind has been blowing, a small quantity of the Balsamic Cream of Roses will prevent tanning or roughness, and is sure to bring to the complexion that ruddy and healthy glow so much sought for, and seldom obtained. Its action on the skin is to restore natural circulation to the blood.

The Big Trees of California.

The "big trees" of California furnish a subject both old and new. It is an old subject because scarcely anything written during recent years concerning our State has failed to include allusions to it. It is new because, as the trees are studied more carefully by lovers of nature and of science, new points are brought to light, and descriptions full of interesting particulars are furnished by appreciative writers. We have had engravings before which showed the oldest and largest of these forest giants. Upon this page may be seen two of more recent growth and more modest dimensions.

The average stature attained by the big tree, under favorable conditions, is perhaps 275 ft., with a diameter of 20 ft. Few full-grown specimens fall much short of this, while many are 25 ft. in diameter, and very nearly 300 ft. high. Fortunate trees, so situated as to have escaped the destructive action of fire, are occasionally found measuring 30 ft. in diameter, and very rarely one that is much larger. Yet so exquisitely harmonious are even the very mightiest of these monarchs in all their proportions and circumstances, there never is anything overgrown or huge-looking about them, not to say monstrous, and the first exclamation on coming upon a group for the first time is usually: "See what *beautiful* trees!" Their real god-like grandeur in the meantime is invisible; but to the loving eye it will be manifested sooner or later, stealing slowly on the senses, like the grandeur of Niagara, or of some lofty Yosemite dome. Even the mere arithmetical greatness is never guessed by the inexperienced, as long as the tree is comprehended from a little distance in one harmonious view. When, however, we approach so near that only the lower portion of the trunk is seen, and walk round and round the wide bulging base, then we begin to wonder at their vastness, and seek a measuring rod.

Sequoias bulge considerably at the base, yet not more than is required for beauty and safety; and the only reason that this bulging is so often remarked as excessive is because so small a section of the shaft is seen at once. No other tree in the Sierra forests has foliage so densely massed, or presents outlines so firmly drawn and so constantly subordinate to a special type. A knotty, angular, ungovernable-looking branch, eight or ten ft. thick, may often be seen pushing out abruptly from the trunk, as if sure to throw the outline curves into confusion, but as soon as the general outline is approached it stops short and dissolves in spreading, cushiony bosses, thus preserving the symmetry and the typical form of the species.

CALIFORNIA BIG TREES, MARIPOSA GROVE.

Look Before You Leap.

Marriage is a divine institution and is upheld by all good Christians as the most perfect state into which man or woman can enter. Being such, it is painful to see so many instances of domestic infelicity throughout the land. The divorce courts are burdened with parties seeking to rend asunder the ties once solemnly pledged to be upheld. There is a great deal of sham in the world. Two young people—young in years and worldly knowledge—meet, and being pleased, proceed to fall into what they think is love, but which is only passion. They forthwith proceed to get married, and after the glamour of the honeymoon is over and their ardor has cooled, the false face put on when a-courting is dropped and their natural self assumed. The result is that they suddenly find an incompatibility of temperament, and a rush is made to the divorce court to set aside the vows they once sincerely took. A case in point comes from one of our interior towns. A youth of 19 married a girl of 14, and after living together a short time, the usual result of such an immature union took place—peace and harmony were destroyed when their passion was extinguished.

It should be a fixed determination with every young man or woman not to enter the married state until the former has reached at least the age of 25 and the latter 20. By that time they will know something of the world and of the duties of the new life they are about to enter. Our young ladies must not think they will be "old maids," if, when they are 20 years of age, they are not married. Better, far better they should be than run the risk of blighting their young lives by a premature marriage. And a young man has no right to make a proposal of marriage to a girl unless he clearly sees his way to provide decently for household and personal comforts. We do not mean by this that a man should be rich, but we do insist that he should have some safe and reasonable way of meeting the calls which will be made upon him. He may be unfortunate in after life, but the true woman will never desert him if he has been honorable in his treatment. So look before you leap, young ladies and gentlemen. Marriage is a very important thing. Do not let your future life be blighted by hasty action.

Home Miscellany.

After Dark.

On San Joaquin

"Cuckoo, Cuckoo" sweet bird—
Out in the barren grain fields heard.
I wonder who are you,
In modulations sweet and true,
Calling through the dark, "cuckoo!"

Where is your bonnie nest?
What thought is trembling in your breast?
What color is the throat
That gives to night the distant note,
Like love to silence spoke?

"Cuckoo, cuckoo," so near.
Hast summoned any sweetheart dear
I wonder who you are?
Lone, plaintive, like a wandering star,
"Cuckoo"—so near—so far.

"Cuckoo"—my brave unknown;
The fields are wide, and dry, and lone.
There's dark, and wind, and dew,
The high, faint starlight struggling through;
Yet still sounds sweet "Cuckoo."

"Cuckoo, cuckoo," I hear,
Borne through the silent air—so clear.
My heart has lost its pain
Thus listening to the calm refrain—
"Cuckoo, cuckoo," again.

John's Little Joke.

"Well, I snum!" exclaimed Uncle Phil Wheeler, in his characteristic way, finishing the speech with a prolonged whistle.

"What's the matter, Uncle Phil?"

"Hey?"

"What's the matter?"

"Why, your Aunt Susan just bought another bureau!"

The speakers were Mr. Philip Wheeler, commonly called Uncle Phil, and his handsome, devil-may-care nephew, John Langdon. Uncle Phil was standing under the big, brown horse-chestnut tree, whittling a new handle for his hammer, when a hay-wagon, containing a bureau, stopped before the gate.

"Whose bureau's that?" demanded Uncle Phil.

"It's for Miss Wheeler," was the answer. "She bought it down at Squire Thomas's auction."

"Well, I snum!"

John Langdon, just coming from the woodhouse, armed cap-a-pie, with rod and lines, heard the exclamation and inquired the cause.

"So Aunt Susan has bought another bureau, has she?" he remarked, after a moment's scrutiny of that awful piece of household furniture. "I say, Uncle Phil, where is she going to put it?"

"Hey?" ejaculated Uncle Phil, staring hard at his nephew over his silver-bowed specs.

"Where is she going to put it?"

Uncle Phil shook his head and renewed his whittling.

"I'm blamed if I know," he said at last. "I reckon 'twill have to set atop of sumthing, for I don't believe there's floor room for it in the house."

"I've got three in my room now, and I shall protest against a fourth," laughed John. "Aunt Susan," addressing that lady, who appeared on the piazza to superintend the removal of her newly acquired treasure from the cart to the house, "where are you going to put that thing?"

"Well, John, if you want it, why, of course you can have it; but I did think I'd put it in the buttery; it would be so handy—"

"By all means," interrupted John; "the buttery is just the place for it; three are as many as I can occupy, inasmuch as I only brought a hand-bag along on my little visit. If you were to give me a fourth, I should be reduced to the necessity of remaining in bed in order to use it."

Oh, go away, you rogue," cried his aunt, looking lovingly at him; "and stop laughing at your old auntie. Here you (in alarm to the driver), take care there, you'll have that leg off! Hold on to the glass! My! my! How careless you be!"

After much anxiety on Aunt Susan's part, hair-breadth escapes on the bureau's and a good deal of harmless swearing, such as "I snum!" "by golly!" etc., on Uncle Phil's, the old bureau was at last deposited in the buttery, where it took up just three inches more room than it could with any degree of propriety be accommodated with. Consequently, being of a firm and unyielding nature, a sharp and uncompromising corner was thrust obtrusively and offendingly out, against which unwary toes and unfortunate shins would in all probability be frequently punished.

But Aunt Susan was not the woman to go forth to meet trouble, and no shadow rested upon her placid brow, nor misgivings annoyed or made afraid. The bureau was a bargain, and that sublime fact shed such a halo of glory over its somewhat battered surface as to completely put to rout the inconvenience of its position.

Next morning Aunt Susan rose betimes, sent for the woman who lived on the back road, and enjoyed a day of "putting to rights." Those days, in which she caused to be brought forth from garret, cellar and hidden store-rooms treasures collected from auctions innumerable, were dear to her heart, though abominations in the eyes of Uncle Phil, who wandered around amid the household gods in bitterness of spirit.

John watched the "cleaning" operation with an amused smile curling the corners of his handsome mouth, till at length a bright idea struck him.

"By Jove!" he muttered, "I believe we might do it!"

Five minutes later he might have been seen in earnest confab with Uncle Phil, who grinned and nodded his bead in evident satisfaction and full approval of the plan, whatever it was.

The day ended with great success in the cleaning line. Before sundown an array of spotless mahogany, brass, china, britannia, etc., might have been seen ornamenting Uncle Phil's front yard—articles which the waning rays of the sun touched and caused to reflect like polished mirrors. Soon everything was replaced, the old woman departed, and quiet brooded over the old farmhouse once more.

Next day John was to return home to C——, and Aunt Susan was to accompany him, for the double purpose of paying her sister—John's mother—a visit, and witnessing the ceremony which should give to John a wife.

This wedding was very near to her heart; first, because she loved John very dearly, and second, because he had bought a lovely little nest of a home close by her house and was, after a reasonable trip, to bring his young wife here, under Aunt Susan's motherly wing, while he began his career as a lawyer in the brisk little village near by,

Nothing short of the immense importance of this event could have induced the good woman to commit the daring act of risking her neck upon a railroad; for the 20-mile journey was as formidable to her, with her old-time notions, as would a visit to India be to a town-bred man.

The morning arrived, and Aunt Susan, with many injunctions and cautions, at last took her place in the wagon which was to convey her to the depot.

John delayed a few moments to take special parting with Uncle Phil. What was said no one heard save the parties interested; but John's low words called forth a series of energetic words from his uncle, and a dry, hard chuckle, betraying an unusual amount of interest.

The journey ended safely, and Aunt Susan was beginning to feel at home on springs, and to sleep in spite of the noise on the street, when a letter from home completely upset the good woman, and threatened to start her on her homeward track without delay.

"The house has been robbed," wrote Uncle Phil. "I was down to see Marthy"—his sister—"and it set in to storm so hard I stayed all night. Wall, when I got home I thought things looked sorter queer, and sure enough, I found lots of things gone. The bureau in the buttery and all the things outen the summer kitchen, a whole lot of brass things from the stairway closet, and no end of fixin's all over. I can't see," wrote the old gentleman, "as any close or silver has been took, and I guess the thieves must hev knowed of your bargains and come for them special. I've heard they set stores by them in big places. I reckon at a ruff guess we've lost about five burows, three sophies and six or seven parlor stoves, to say nothing of chiny and brass things."

To say that Aunt Susan was stunned would be but faintly to express her state of mind; but she determined John's happiness should not be dimmed by her anxiety, and so by a great effort she succeeded in overcoming her despondency and assuming a cheerful face.

The wedding day came and passed. John and Mary were bound in the holy bonds of wedlock, and had departed on their bridal trip.

Aunt Susan lingered a few days to complete some purchases, then returned to the even tenor of her quiet home, and waited with what patience she could for John's return.

Uncle Phil was waiting too—silently, but no less anxiously. In fact, a little air of mystery hung over the old house and hid shyly away amidst the wrinkles of the kindly old faces of its excellent owners. Uncle Phil had some secret he did not tell Aunt Susan, and Aunt Susan had some secret she did not confide to Uncle Phil, and stranger still, each was so engaged with his own as to be perfectly oblivious of the other's possession.

Only one person saw, understood, enjoyed and remained silent—Uncle Phil's sister, Martha.

The summer's heat slowly died out, and autumn was beginning to paint the tree-tops in the glories of red and gold, when John wrote that he was coming with his wife to take up his home in the little house. They were to remain at Uncle Phil's till their house was ready.

Of course everything was on tip-toe. Aunt Susan caused a supply of pies and cakes to be baked that would have victualed a man-of-war; while Uncle Phil spent the entire day shaking out buffalo robes, and polishing up the old carriage and wagon.

Train time came, so did John and Mary, and the old people drove them home from the depot with great pride, under the scrutinizing gaze of the entire village eye, so to speak.

Tea was soon ready, but not so soon but Uncle Phil had found time to divulge his secret to John, for from the woodhouse came a low murmur of voices, with now and then a hearty peal of laughter in John's clear voice, mingled with Uncle Phil's low guffaw.

Twice did Aunt Susan call out and demand to know the joke, and twice did she get her trouble for her pains, for no hint was given.

After tea the whole party strolled down to the new house. Now it was Aunt Susan's turn. With a proud step she marched ahead and opened the door of the house, a faint flush on her withered cheek. Mary followed closely, but Phil and John stood rooted in the hall, staring blankly and stupidly into the little parlor.

Certainly there was nothing there which ought to frighten two full-grown men—only four or five bureaus of somewhat antique design, several tables with massive pedestals and claw feet, two sofas large enough to accommodate the "prehistoric man" we hear about, and a goodly assortment of clocks, andirons, shovels, etc.

"You don't seem to be pleased," said Aunt Susan in a crestfallen manner, her kind old voice trembling a little. "Now I thought you would be tickled about to death with them. I found them all in C—— (Uncle Phil and John exchanged guilty looks), and I was so took aback at losing mine, and I noticed you looked kinder red and cut up the morning the news come, so I thought to myself, now I'll just buy these for you, John. This here burow"—placing her hand lovingly on a large and imposing piece of furniture—"did look so exactly like the one I bought of Squire Thomas and had in my buttery, that I couldn't help getting it. You know you kinder wanted it, John, the night it came home, and I alus felt sorter mean that I didn't give it to you then; so as soon as I sot my eyes on this one I up and bought it, and sent it down with the rest, unbeknown to anybody, so as to surprise you. You didn't suspect, did you, Phil?"

But Uncle Phil was still speechless, and even John's ready tongue refused to do its work.

While they yet stood, a silent and crestfallen group, a shrill, high treble broke upon the silence, and Aunt "Marthy" came walking in.

"Wall, I do say you look meeching enough! I told you, Phil, that Susan would find you out. I thought I should bust when Susan went to Caleb to go down to the depot and haul up these things just ten days after he hauled um down, though, as fur that, 'twas dark enough when he took um down, being night—"

At this awful stage John recovered himself sufficiently to confront Aunt Martha, and, by dint of winks and nods, made her understand that she was making a mess of it.

Poor "Marthy" stared as open-mouthed as the rest; but the warning had come too late. Aunt Susan was by no means slow, and the whole plot was as plain as daylight to her.

"And so, Philip Wheeler," she burst out with withering scorn, "you thought 'twould be fine fun to deceive me with your trumpt-up story of thieves that has made the shivers run down my back every night since I came home! Oh, you needn't say nothin'"—as Uncle Phil attempted to speak—"it's mity honest, mebbe, and does great credit to your profession. As fur you, John, I wouldn't have bel'ved you would have treated your old auntie in such a way. You ken take them old things and send um back to C——; I hate the sight of um!" And Aunt Susan fairly broke down, and, bowing her head on Mary's shoulder, burst into a shower of tears which caused Uncle Phil and John to feel not only like sneaks and scoundrels, but like midnight assassins and burglars as well.

There was not much to say, but what could be said John said; he explained that no harm was intended, and that it was but a foolish, boyish trick. And Uncle Phil scratched his head and tried to look boyish, and failed utterly, because he already looked so sheepish and mean.

But Mary did just what a warm-hearted, clear-headed woman should have done. She kissed Aunt Susan affectionately, and said:

"Uncle Phil and John meant to play off a good joke on you, but you have turned the tables finely, and I am doubly glad—first, because I do love to get the best of a joke, and secondly, because I dote on these dear, quaint old things. Why, aunty, you have given me treasures! Just wait till you see how sweet I'll make this little place look."

And so she did, so quaintly sweet, and altogether charming did the little house grow under her skillful fingers that it became the rage, and the demand for old things was almost as high in the village as it was in our big city, where something always rages.

John became a convert at a very early day, and even Uncle Phil said:

"I snum! I didn't know the old truck could look so kinder scratic."

To which Aunt Susan would reply:

"I a'lurs knowed 'twas 'ristocratic, Philip."

They are all very happy, and Aunt Susan has long since forgotten and forgiven John's little joke.

THE SUNNY SIDE OF DEATH.—Take the sunny side of death. Sooner or later it must come to all, and at the latest it is only a few swiftly-passing days distant. Kings and potentates have no refuge from the summons of the dread messenger. Death is the great leveler of man, and dust to dust is the heritage of all. Why, then, should we shrink from its contemplation? Why banish it from our thoughts with a shudder? It is not rational to permit death to shadow our lives; nor is it rational to turn in terror from what must as surely come as to-morrow's sun. Those who are suddenly chilled day after day by the thoughts of death, either shadow their lives by misdeeds or reject the philosophy that should make every well-ordered life wait serenely for its end. The rational apprehension of the upright man is, not that he may fall too soon in the race, but that he may linger too long and outlive everything but hope.

MORMON families are settling in Grant and Lincoln counties, New Mexico.

The Old-Fashioned Mother.

Thank God some of us have had an old-fashioned mother. Not a woman of the period, enameled and painted, with her great chignon, her curls, and bustle, whose white, jeweled hands never felt the clasp of baby fingers; but a dear old-fashioned, sweet-voiced mother, with eyes in whose clear depth the love light shown, and brown hair just threaded with silver, lying smooth upon her faded cheek. Those dear hands, worn with toil, gently guided our tottering steps in childhood, and smoothed our pillow in sickness, ever reaching out to us in yearning tenderness. Blessed is the memory of an old-fashioned mother. It floats to us now, like the beautiful perfume from some wooded blossoms. The music of other voices may be lost, but the entrancing memory of her will echo in our souls forever. Other faces may fade away, and be forgotten, but hers will shine on. When in the fitful pauses of busy life our feet wander back to the old homestead, and crossing the well-worn threshold, stand once more in the room so hallowed by her presence, how the feeling of childhood innocence and dependence comes over us, and we kneel down in the molten sunshine, streaming through the open window—just where long years ago we knelt by our mother's knee, lisping "Our Father." How many times, when the tempter lured us on, has the memory of those sacred hours, that mother's words, her faith and prayers, saved us from plunging into the deep abyss of sin. Years have filled great drifts between her and us, but they have not hidden from our ight the glory of her pure, unselfish love.

Spirit and Dignity.

The notion that it is undignified and unmanly for grown persons to participate in childish sports is absurd. There is no cause for shame in a father's being detected playing a game of "puss in the corner" with his children. It is not beneath the dignity of a true man, nor is it incompatible with his lofty views in regard to the purposes of life. Dignity has its proper place. It sits well on public men on public occasions; it becomes the statesman in the halls of Congress, and the judge in his robes; it sits well on the clergyman in his pulpit, and gives weight to the argument of the lawyer. But in the home circle, surrounded by children who delight, above all else, in "papa's fun," dignity can be well laid aside. Let mirth and freedom take its place for awhile. Not only the children, but the parents, too, are benefited by a good game of romps, and the home ties are drawn closer by this loving association of tastes.

Life is a sad thing to the sober ones. They are always brooding over some perplexing thought; always anxious; always dissatisfied; always fearful what the future may have in store for them.

The better way is so to mingle labor and recreation as to preserve the vigor of the body, the freshness of the heart and the ease of the mind. Let us indulge discriminately in amusements, whether they consist in athletic sports, in botanizing and naturalizing in the fields, or in a game at the fireside. Let us not, by unrelaxing toil, make life's pathway a weary treadmill, from which we long to be taken away into the certain rest which awaits us all in the mysterious beyond.

Mother.

Yes, it is always mother. I do not think there is one person like mother. I do not think there is one person, however thoughtless, who does not sometimes think of mother—perhaps hundreds of miles away; perhaps in heaven. We cannot forget her ever gentle, loving hand, ready to do everything to make us feel contented and happy; *dear patient mother*, never once complaining. But soon, too soon, we see her failing fast; the angel of death has lain his hand heavily upon her. We do not see until it is too late, that mother needed rest. Instead of her waiting upon us, we should have waited upon ourselves and her too. Ere long the hour of parting comes, the slow mournful procession moves from the once happy cottage wending its way to the quiet churchyard, to lay our dear mother in her last resting place beside a grave we know so well—the grave of father. Alas, we do not appreciate her while she is with us; we are heedless and do not think until she is dead and gone, that she was our life and light. The troubles of the world soon fall upon our shoulders and our hearts are weighted down with sorrow, not one to love us or take us to their heart as mother did. There is no love like a mother's love.

SUGAR MEAL.—A new danger has appeared in feeding "sugar meal," which is sold by the glucose factories for fodder. This meal is supposed to be the non-starchy part of corn, and to have come in contact with nothing but water in the course of its preparation. If this were true there ought to be no harm in feeding it when fresh. The fact is, that in the vicinity of Buffalo, N. Y., it has gained the reputation of sour meal, from its strong acid taste. An unusual amount of cholera infantum has lately prevailed in a city in the western part of New York State, which is claimed to be due to the acid in the milk of the cows fed on this meal. Cheese-makers have had such bad luck in making cheese, which they claim, also, is due to the acid in the meal, that they have, in many instances, refused to receive milk from dairies where this milk is fed.

For our Boys and Girls.

Our Puzzle Box.

Literary Enigma.

This enigma is composed of 67 letters.

The 35, 37, 8, 61, 28, 31, 16, 46, 4 was the author of "The Traveler."

The 64, 34, 57, 42, 9 was pronounced "The English Aristophanes."

The 15, 2, 7, 41, 56, 13, 26 was a great lexicographer.

The 6, 62, 1, 3, 36, 14 was one of the greatest of English poets.

The 4, 5, 66, 32 was an English historian and skeptic.

The 10, 12, 58, 26, 43, 27 was an old writer and translator of Arabian scientific literature—sometimes called "The Philosopher."

The 11, 57, 20, 35, 64, 67, 43, 52, 34, 22, is an American poet.

The 17, 19, 40, 45, 39, 26 was a distinguished scholar, diplomatist and traveler.

The 43, 21, 26, 60, 54, 18, 25, 24 was the probable author of a celebrated enigma often claimed by Lord Byron's editors.

The 23, 49, 59, 35, 47, 63 was a London publisher of considerable repute in the early part of the present century.

The 29, 30, 26, 33, 62, 20, 35 was an old English Chronicler who prepared a "Metrical Chronicle of England" from the earliest times to the reign of Henry IV.

The 46, 55, 59, 43, 26, 59 was an eminent French historian.

The 33, 48, 20, 44 is an American scientific writer.

The 50, 16, 39, 61, 59, 49 was an eminent English biographer, celebrated by his brother as "Poor Tom Bowling, the darling of our crew."

The 51, 53, 26, 60, 41 was a Scotch poet.

The 65 is contained in "Daniel Deronda."

The whole is a beautiful couplet by Pope.

Keep the Soul on Top.

Little Bertie Blynn had just finished his dinner. He was in the cozy library, keeping still for a few minutes after eating, according to his mother's rule. She got it from the family doctor, and a good rule it is. Bertie was sitting in his own rocking-chair before the pleasant grate fire. He had in his hand two fine apples—a rich red, and a green. His father sat at the window reading a newspaper. Presently he heard the child say:

"Thank you, little master."

Dropping his paper, he said; "I thought we were alone, Bertie. Who was here just now?"

"Nobody, papa, only you and I."

"Didn't you say just now, 'Thank you little master?'"

The child did not answer at first, but laughed a sly laugh. Soon he said:

"I'm afraid you'll laugh at me if I tell you, papa."

"Well, you have just laughed; and why mayn't I?"

"But I mean you'll make fun of me."

"No, I won't make fun of you; but perhaps I'll have fun with you. It will help us digest our roast beef."

"I'll tell you about it, papa. I had eaten my red apple, and wanted to eat the green one, too. Just then I remembered something I'd learned in school about eating, and I thought that one big apple was enough. My stomach will be glad if I don't give it the green one to grind. It seemed to me for a minute just as if it said to me: 'Thank you, little master;' but I know I said it myself."

"Bertie, what is it that Miss McLaren has been teaching you about eating?"

"She told us to be careful not to give our stomachs too much food to grind. If we do so, she says, it will make bad blood, that will run up into our brains, and make them dull and stupid, so that we can't get our lessons well, and perhaps give us headaches, too. If we give our stomachs just enough work to do, they will give us pure, lively blood, that will make us feel bright and cheerful in school. Miss McLaren says that sometimes when she eats too much of something she likes very much, it seems almost as if her stomach moaned and complained; but when she denies herself, and don't eat too much, it seems as if it was thankful and glad."

"That's as good preaching as the minister's, Bertie. What more did Miss McLaren tell you about this matter?"

"She taught us a verse one day about 'Keeping the soul on top.' That was'nt just the words, but it's what she meant."

"Weren't these the words: 'I keep my body under?'"

"Oh, yes! that was it; but it means just the same. If I keep my body under, of course my soul is on top."

"Of course it is, my boy! Keep your soul on top, and you'll belong to the grandest style of man that walks the earth."

Humorous.

Chips.

CHINAMEN don't rock the cradle; they make the sky rocket.

A BOOK with a loose leaf should be bound over to keep the piece.

THERE is one town in Connecticut that has no fear of the measles. It's Haddam.

A RECENT African explorer, in giving an account of his travels, speaks of ants one inch long. The insects must be gi-ants.

THERE is a whistling buoy anchored off Block Island. Oh, that all the whistling boys could be anchored in deep water far away!

"KNOW thyself" may be an excellent sort of proverb, but it's forcing a pretty tough acquaintance on some folks.

A FRENCHMAN on the point of being guillotined was asked if he had any last wish to make. The dying man's wish is held sacred. "Yes," he replied, "I wish to learn the English language."

"MOTHER," said little Ned, one morning, after having fallen out of bed, "I think I know why I fell out of bed last night. It was because I slept too near where I got in." Musing a little while, as if in doubt whether he had given the right explanation, he added, "No, that wasn't the reason; it was because I slept too near where I fell out."

A SCOTCH minister was once busy catechising his young parishioners before the congregation, when he put the first question to a stout girl whose father kept a public house: "What is your name?" No reply. The question having been repeated, the girl replied, "Nane o' yer fun, Mr. Minister; ye ken my name weel eneuch. D'ye no say when ye come to our house on a night, 'Bet, bring me some ale?'"

Household Hints.

BOILED FOWL WITH MACARONI.—Break twelve sticks of macaroni in pieces about two inches long; throw them into one quart of boiling water; add salt and pepper; boil rapidly for twelve minutes, then take up and drain off the water; season with one tablespoonful of butter, and add more salt if necessary. After the fowl have been singed and cleaned, stuff with the macaroni; truss them, and then pin in a floured cloth and plunge into enough boiling water to cover them. Boil rapidly for fifteen minutes; then set back where they will just simmer for from one and a half to two and a half hours. The time of cooking depends upon the age of the birds. Serve with an egg or a Bechamel sauce. The quantity of macaroni given is for two fowl. Plain boiled macaroni should be served with this dish.

ROYAL CORN BREAD.—Make a pint of batter of two-thirds nice corn meal and one-third coarse flour stirred in water; let it stand in a warm place until it ferments well; then add warm water, two or three spoonfuls of molasses, a teaspoonful of salt and a teaspoonful of soda (or enough to correct the acidity), then thicken with corn meal and coarse flour, in the same proportion as at first, making the batter about the same consistency as for griddle cakes; oil your baking dish and fill about half full, always have about a pint of the batter to start with again. Place the loaf in a steamer and steam it two hours for a two-quart loaf, and bake it in the oven about thirty minutes to brown it. The same recipe may be used for griddle cakes.

LEMON PIES.—Moisten three tablespoonfuls of corn starch with cold water, then pour boiling water on it gradually until it is of the consistency of and as clear as prepared starch. While this is cooling, prepare the juice and grated peel of three lemons, two cups of sugar and the well-beaten yelks of four eggs. Mix with the partially cooled corn starch, and pour into three pie dishes previously lined with pastry. Bake about half an hour, then cover with meringue, prepared by beating the whites of four eggs to a stiff froth, and three tablespoonfuls of powdered sugar. Return the pies to the oven until the meringue turns to a light yellow, which requires a very short time. To be eaten cold.

SUET PUDDING.—One cup of milk, two of suet (scanted) chopped fine, three of flour, one cup of seeded raisins (chop part of them), one teaspoonful of cloves, one of cinnamon, a little nutmeg, one teaspoonful of soda. Steam three hours. The longer they are cooked the better they are. Sauce—One cup of sugar, one-half cup of butter, one egg beaten to a stiff froth, one-half cup of boiling wine.

STEAMED PUDDING.—One cup of sweet milk, two eggs, two tablespoonfuls of melted butter, one-half cup of sugar, one pint of flour, two teaspoonfuls of baking powder. Steam one-half hour. It is nice with a cup of raisins added to it.

CREAM PIE.—Half a pound of butter, four eggs, sugar, salt and nutmeg to your taste, and two tablespoonfuls of arrowroot, wet; pour on it a pint of boiling milk and stir the whole together. To be baked in deep dishes.

Health Column.

How to Apply the Soda Remedy in Burns and Scalds.

It is now many years ago (see the London *Medical Gazette* of March, 1844) that the author of this paper, while engaged in some investigations as to the qualities and effects of the alkalies in inflammations of the skin, etc., was fortunate enough to discover that a saline lotion, or *saturated* solution of the bicarbonated soda in either plain water or camphorated water, if applied speedily, or as soon as possible, to a burned or scalded part, was most effectual in immediately relieving the acute burning pain; and, when the burn was only superficial, or not severe, removing all pain in the course of a very short time; having also the very great advantage of cleanliness, and, if applied at once, of preventing the usual consequences—a painful blistering of the skin, separation of the epidermis, and, perhaps, more or less of suppuration.

For this purpose, all that is necessary is to cut a piece of lint, or old soft rag, or even thick blotting paper, of a size sufficient to cover the burned or scalded parts, and to keep it constantly well wetted with the sodaic lotion so as to prevent its drying. By this means, it usually happens that all pain ceases in from a quarter to half an hour, or even in much less time.

When the main part of a limb, such as the hand and forearm, or the foot and leg, has been burned, it is best, when practicable, to plunge the part at once into a jug, or pail, or other convenient vessel filled with the soda lotion, and keep it there until the pain subsides; or the limb may be swathed or encircled with a surgeon's cotton bandage previously soaked in the *saturated* solution, and kept constantly wetted with it, the relief being usually immediate, provided the solution be saturated and cold.

What is now usually sold as bicarbonate of soda is what I have commonly used and recommended; although this is well known to vary much in quality, according to where it is manufactured—but it will be found to answer the purpose, although, probably, Howard's is most to be depended on, the common carbonate being too caustic. It is believed that a large proportion of medical practitioners are still unaware of the remarkable qualities of this easily-applied remedy, which recommends itself for obvious reasons.—*Popular Science Monthly.*

Action of Coffee and Sugar in Digestion.

M. Leuen makes a report before the Paris Biological Society of the effects of these articles of food, in connection with Dr. Semerie. There is great diversity of opinion on these subjects. Some, as Trousseau and Pidoux, consider coffee an excellent digestive. Others, on the contrary, consider it very injurious.

M. Leuen thus writes: He mixed 30 grams of coffee in 150 grams of water, for a dog, which is killed three hours after. The mucous membrane of the stomach is found pale, discolored and profoundly anæmic. The vessels on the internal surface, as well as those in the periphery, are contracted. There remains 145 grams of the mixture undigested, and the stomach digestion diminished, because the contraction of the vessels, and the consequent anæmic condition of the mucous membrane, prevent the secretion of the gastric juice. The abuse of coffee will produce dyspepsia. Thus the English and the Dutch, who drink freely both of tea and coffee, are very dyspeptic. Coffee increases the cerebral functions, an effect useful, agreeable and innocuous.

Sugar has been denounced by modern chemists as a substance whose effects on dyspeptics are deplorable.

Dr. Leuen does not partake of these fears. He cites the case of a dyspeptic doctor, who for 20 years had a terror of sugar, but who now consumes 120 grams (3¾ ozs.) of sugar daily, without inconvenience. He followed similar experiments with sugar. A dog ate 80 grains of sugar with 200 of other food. Six hours afterward its stomach showed little food. The mucous lining of the stomach was red and highly congested. The congestion of the liver was notable. If one opens an animal after eating 200 grains of food and no sugar, 90 to 100 grams of food is undigested. Sugar, then, favors the secretion of the gastric juice. Coffee sweetened loses part of its defects.—*Le Medecin Practicien.*

RAPID BREATHING AS AN ANÆSTHETIC.—Dr. M. T. Yates, in a letter published in the *Biblical Recorder*, says of the surgical operation to which he has recently submitted: "My doctors said that they had seen it stated by an American doctor that if a person would breathe as rapidly as possible under an operation, he would not feel the pain of cutting, and they wished to try it on me, to which proposition I assented. Dr. MacLeod superintended the breathing—which was like that of a dog on a hot summer day—holding, out of my sight, a handkerchief in his hand, to be dropped as a signal when he saw the color come to my face, for Henderson, the operating doctor, to go ahead. When MacLeod told me, 'That will do,' I was surprised to find that the operation had been performed. This I have tried three times, and have not at either time felt more pain than is usually inflicted in the case of vaccination. I heard the knife rip through the flesh like the sound produced in cutting leather, but did not feel the pain. What is the philosophy of this kind of an anæsthetic

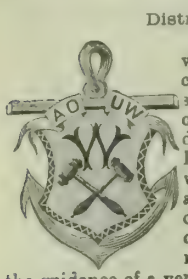
Worth Knowing.

GUNPOWDER WITHOUT SULPHUR seems at first rather a startling proposition. All the world over gunpowder is, and has always been, made of three ingredients—salpeter, sulphur and charcoal—and it seems rash to attempt to do without any one of them. But experiments were made a good many years ago with sulphurless gunpowder, and the result astonished the experimenters. The old "*eprovette* mortar," which was then used to prove the quality of powder, gave as good results with the non-sulphur powder as with the ordinary kind. But the manufacture of gunpowder was at that time in a crude and unscientific state. There were no such tests for density, and so on, as now prevail; so the experimenters made their non-sulphur powder too light, and abandoned the pursuit, thinking that it was in its nature porous and weak in texture. The subject comes up again under new conditions, both of manufacture and of tests for various qualities. We understand that in England under the direction of Sir William Armstrong powder lately made without sulphur has given very good results in guns. The subject seems worth pursuing.

TO CLEAN PAINT.—The following directions, says the *Manufacturer and Builder*, are simple, and will be found to answer very satisfactorily for cleaning paint on woodwork: Provide a plate with some of the best whiting, and have ready some clean warm water and a piece of flannel, which dip into the water and squeeze nearly dry; then take up as much whiting as will adhere to it, apply it to the painted surface, when a little rubbing will quickly remove any dirt or grease stains. After this wash the part well with clean water, rubbing it dry with a soft chamois. Paint thus cleaned is said to look as well as when first put on, and the operation may be tried without fear of injury to the most delicate colors. It is said to answer far better than the use of soap, and does not require more than one-half the time and labor. Another simple method is the following: Put a tablespoonful of aqua-ammonia in a quart of moderately hot water, dip in a flannel cloth and with this merely wipe over the surface of the woodwork. No rubbing is necessary. The first recipe is preferable, except where the paint is badly discolored.

HOW TO MAKE BROWN BRASS.—The following recipe is said to produce a good brown tone upon brass: The article, having been thoroughly cleansed and freed of all traces of grease, then polished, is dipped for about half a minute into a cold solution of 10 grains of hypomanganate of potash, 50 grains green vitriol, 5 grains muriatic acid, and 1 liter water; then rinse well and dry in soft sawdust; if a reddish cast is desired, dip the article into a second bath heated to 60° C., of 10 grains chromic acid, 10 grains chloric acid, 10 grains hypomanganate of potash, and 50 grains blue vitriol (sulphate of copper) dissolved in 1 liter water. The latter mixture alone produces a light bronze. The article may afterward be heated in an oven, which operation, it is said, produces a very rich tone.

BLACKING BRASS.—A correspondent of the *English Mechanic* says: I have tried all the various recipes recommended—nitrate of silver, platinum bichloride, etc.—but never found any work so satisfactorily and cheaply done as by the reduction of nitrate of copper to the oxide. I find the best way of using is to apply the solution to the brass to be blacked with a camel-hair brush, previously slightly heating the metal; then to raise the heat until the requisite color is produced; finishing by rubbing with a soft rag, and either oiling or lacquering. I can confidently recommend this as the very best method of producing that good black seen in first-class optical goods, observing that the process will not do for soft-soldered articles, as the heat necessary to produce the black is greater than the melting point of soft solder.



GUT BELTING is made chiefly of sheep's entrails. They are on an average over 50 ft. long, and after being cleaned, are put into brine, when they shrink in thickness very much. They are then treated as if they were twine to make a round rope from, or they are connected in strands and woven on a loom into flat belts in the same way as ribbon is made. They are now made in Oakland, Cal., round ones, from one-sixteenth to one and one-half inches in diameter, and the flat ones of any size desired. They are so strong that a three-quarter-inch round belt will stand a strain of over seven tons, and a three-eighth-inch, consisting of 150 strands, almost half as much. They are claimed to last 10 years, while the best hemp rope, with the usual usage, scarcely asts three years.

PEAR WOOD.—The timber of the pear tree is of a yellow color. Gerard says the timber of the wild pear is very firm and solid, and good to be cut into molds. The plates for his "Herbal" were cut out of this wood, as were, says he, breastplates for English gentlewomen. At the present day it is much used by turners and pattern makers; the blocks with which the designs for floor cloths are painted are made from 'pear wood. When dyed black it can scarcely be distinguished from ebony. Handles for carpenters' tools, measuring rules, etc., are made from this wood. The wood of the pear makes excellent fuel, giving out an intense heat with a bright flame.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

District No. 5.

A large district meeting was held at Hamilton hall, corner of Steiner and Geary streets, in the Lodge-room of Hercules No. 53, on Friday evening, March 10th. Each Lodge in this district was well represented, with a goodly number from other city Lodges, as also several of the Grand Lodge. The routine of business, under the guidance of a very efficient corps of officers, was well done, and the M. W. degree was given to two candidates in a dignified and impressive manner—the unwritten work as given was almost letter perfect. One petition was read for the degrees. At the close of the business, Bro. Manzer, M. W., asked the Grand Master to preside, who took the chair, and called on Henry Wolfsohn, P. M. W. of Washington, who, in his modest way, spoke a few cheering words. J. O. Jephson, P. M. W., was asked to say something for Sts. John. He, in a chaste and polished manner and well-chosen words, made a short speech, and one that was especially complimentary to Wm. H. Smith, Deputy of No. 5, which was received with much approval. On the part of Fidelity, 136, J. M. Belden, M. W., was called. He said that he had vivid reminders of the beneficence of the Ancient Order of United Workmen, as he was employed in a bank that had received from the Grand Receiver, Bro. Haile, during the past year, nearly $200,000 for the protection of our widows and orphans. E. M. Reading, P. M. W., was called, and made an eloquent speech that was very cordially received. On the part of Olympic, Geo. W. Dixon, P. M. W., made one of his trenchant speeches, particularly eulogizing the D. of H. as a great auxilliary in our Order; and, as an adjunct, he said our efficient semi-monthly paper, the WATCHMAN, was pre-eminently the best fraternal paper in the United States. On the part of Hercules, 53, Bro. Manzer, M. W., was called and made a short speech whose central idea was fraternal and beneficiary societies, a necessity of the age and the genius of an advanced and higher civilization. E. F. Loud, Deputy Grand Master, was called and introduced as the best talker in the ranks of Workmen. As usual, his words of counsel and instruction were well received. W. Morrison, P. M. W., was called and made a few remarks on the practice of making our business officers correct as the safest guard. Bro. S. D. Lount, of Phœnix, Arizona, and a member of the jurisdiction of Tennessee, was then called on. His remarks were addressed to the subject of protection in our Order as the feature, rather than an insurance company. The Grand Master was then introduced by Bro. L. M. Manzer, M. W. His speech was an epitome of his labors for the last 14 months. I have traveled in my official capacity over 13,000 miles, addressed 130 Workman meetings, and written 1,500 personal letters. We have 15,000 Workmen on the roll—over 4,000 net gain in this term—and $252,000 paid to our widows and orphans, at a cost to each one of only $20. The masterly and eloquent address was a fitting close to a grand and successful year. Sam Booth, P. M. W., favored the Lodge with an original song. Thus closed the last of the series of district meetings in this city. All have been well attended, and much good has been accomplished.

Fidelity, 136.

The remarkable growth and position this Lodge occupies in our Order is a sample of what men can do in fraternal association. Starting under adverse circumstances in October, 1879, this Lodge now numbers 350 Workmen, a large proportion being leading and prominent men in business or filling important positions of trust, and representing all of the professions. The unostentatious and liberal donations to humane institutions and members, the fraternal and kindly care exhibited to each other will live in history as a bright oasis in life.

Golden Gate, No. 8.

The monthly social of Golden Gate, No. 8, was one of rare excellence. Their large hall in Shiels' building was well filled with guests, including ladies and little folks. The programme was carried out with spirit to a delighted and appreciative audience, as follows: Opening piano solo, Harry J. Lask, P. M. W. As usual, this was a good performance. Solo, Miss Gracie Goodwin. Her pleasing effort was awarded a hearty recall, which was kindly answered. Song, sentimental, Wm. H. Voorhees, P. M. W., which won a hearty encore. Cornet solo, R. E. Hazelton, with piano accompaniment by Harry J. Lask. This highly pleasing effort received an enthusiastic recall. Comic song, Prof. Josh Davis, the humorist. On all occasions he carries his audience to the highest pitch, and, as usual, was given four recalls. Instrumental solo, on flute, followed by the harmonica, Mr. John Schacht. A very pleasing and artistic effort that was loudly applauded. Duet, "Larboard Watch," Wm. H. Voorhees and R. E. Hazelton. A pleasing and acceptable effort. Recitation, Prof. H. C. Eastman. This was a tragic and inspiring piece that was rendered in that masterly manner that is usual for our accommodating elocutionist. Solo, Miss Cora Kammerling. A sentimental song that was highly interesting, entitled "Must We Meet as Strangers." This young lady has a full, sweet and cultivated voice, and her effort was received with much favor, and at the close she was presented with a large bouquet, and given a hearty recall, which was answered. Violin solo, Master Henry Foster, a little blind boy of eight years. His performance was remarkable, and given a hearty and merited applause. Solo, with guitar accompaniment, Mrs. E. G. Little. A highly artistic effort that was given a recall, and at the close presented a large bouquet. Comic recitation, Wm. B. Marshutz, Recorder of Sts. John. As a humorist, our genial Brother often favors the Lodges with his rare efforts in this line. Solo, Mrs. Emma Peer, daughter of Bro. I. Wisler, Receiver. Although she was suffering from a cold, her effort was highly prized, and at the close she was handed a fine large bouquet. Piano solo, Miss Mamie Whitter. At the request of the Master of Ceremonies, Harry J. Lask, the whole audience joined in singing our closing ode. This monthly social was one of the best of the season, and did honor to this old pioneer Lodge and the Committee having it in charge.

Harmony, 9.

Harmony, No. 9, is one of our model Lodges in many respects. The attendance is always good, the members take a deep and lively interest in their meetings and there is always something of interest going on, either in conferring degrees, literary exercises and hardly a night passes but some one of their members is assisted in a substantial manner pecuniarily, or assisted some way in this battle of life. On Saturday evening, March 18th, the M. W. degree was conferred on four. A real shower of speeches and suggestions were made by different brothers and visitors. Under the proper head of business Bros. Eastman, organist; McGrath, M. W. of Burns; Montgomery, of Unity; Decker, P. M. W. of Harmony; Cohen, Growney, Johnson and others, were the speakers of the evening, which was interesting and instructive to all present.

On March 24, 1882, after the work of the evening, in which three were admitted by card, a very good impromptu programme was given, viz.: Address, Deputy Mayhew; overture, Prof. K. G. Schwartze; character song, Z. Whitten, P. M. W.; dramatic recitation, H. H. Mayhew, D. D. G. M. W.; solo, J. P. Locke; sentimental song, H. C. Eastman; reading, F. Blight; piano solo, Prof. Schwartze. It is now settled that on the last meeting night of each month there will be a social and literary programme given in Harmony.

Spartan, 36.

A very interesting meeting was held by Spartan, No. 36, on Friday evening, March 17th, 1882. The J. W. degree was given to two candidates in a very creditable manner. Judge Robt. Ferral, G. W. T. Carter, P. M. W. of Pt. of Timber, I. Alexander, F., Thos. W. Bethel and E. D. Danforth, P. M. W., made very interesting and profitable remarks on different questions that are likely to come up in the next Grand Lodge. Bro. Danforth gave a succinct account of his travels and visit East, and spoke in glowing accounts of his reception, as he was greeted with cordiality and fraternity everywhere he went. The six New England States had just formed a separate jurisdiction, and felt a jubilant and confident feeling of grand success. Bro. H. C. Eastman, at request, gave a recitation, which was kindly received. Bro. Ferral took occasion to say that this grand fraternity, which has incorporated this great and universal insurance principle that can reach the homes of all, poor and rich, will receive from history a place by the side of the best and most ancient fraternal organizations. A. W. Prevost, P. M. W., made a few earnest remarks on the duties we owe to each other as a great confraternity. "I claim that the privileges I receive, and every Workman receives, in belonging to this great society, are equal in benefits to all the moneys paid out and the insurance policy of $2,000, which protects his family and mine, and is a clear net gain, costing nothing."

On Friday evening, March 24th, there was a full attendance, and two received the M. W. degree. Under the usual head, David McClure, P. M. W., in a short speech said: "The record we have made as an organization is unparalleled in the history of secret beneficiary societies. Our position is attracting the attention of corporations and antagonizing life-insurance companies to such an extent that a hired press is trying to wound us in our strongholds. Let attacks come from whatever source they may, we feel that around our altars there is a bond of fraternity and security that makes our foundation as firm as the eternal hills. I feel that this organization will live and flourish long after we have been lain in our graves." G. W. T. Carter, P. M. W., of Point of Timber, was called, and made some pertinent and valuable remarks. He said among many things which had given us this great prosperity was the paper, PACIFIC STATES WATCHMAN, which to Workmen in the country was a mirror for them to see what had been done throughout the State, and bound them together like bands of iron. E. Danforth, P. M. W., I. Alexander, T. W. Bethel and others made speeches, that were timely and acceptable.

Valley, 30.

No. 30 is marching ahead, steadily gaining in membership and interesting meetings. On Wednesday evening, March 22d, there was a very large attendance, and the M. W. degree was conferred on nine candidates. The work was a model of correctness and showed that the officers of Valley under the present administration are in keeping with the past history of Valley No. 30, among the best in this jurisdiction. The coming anniversary promises to be a grand affair, and the details are being settled with careful consideration. Under the head of "Good of the Order, G. W. T. Carter made some very acceptable remarks that were well received, after which George T. Shaw, Deputy, read an official communication from the Supreme Lodge. Although this was the last night to pay assessments there was but six beneficiary certificates suspended.

Oakland Lodge Locals.

Meeting of District No. 2, L. J. Rector, Dep'y.

A very large meeting was held at A. O. U. W. hall, Oakland, in the Lodge-room of Pacific, No. 7, on Thursday evening, March 23, 1882. All of the Oakland and Alameda Lodges were well represented, some of them having large delegations, as also visitors from San Francisco, including several Grand officers, who were received with honors and graceful welcome by A. W. Palmer, M. W. The following exercises were given: Organ solo, Prof. N. L. Le Noir, Organist of Pacific; remarks, H. G. Pratt, Grand Recorder, followed by Chas. H. Haile, Grand Receiver, after which E. F. Loud, D. G. M., made extended remarks, reviewing our past history and discussing the probable policy we should pursue in the future. W. H. Fiske, Deputy from No. 1, was called, and excused himself. D. S. Hirshberg, P. M. W., made a few humorous remarks and subsided. Judge Turner, of Harmony, No. 9, was called, but excused himself. Quartette, C. G. Reed, P. M. W., H. F. Smith, P. M. W., A. A. Guernsey, Jr., J. A. Britton, Fin. C. G. Reed, P. M. W., made a few remarks, giving a hearty welcome to all brethren present. C. H. Dunton, P. M. W., entertained this select company in a short, eloquent speech, that was well received. After which A. T. Eastland, P. M. W., made some humorous remarks; followed by H. T. Smith, P. M. W., giving a short review of his Lodge, Pacific, No. 7. Solo, J. A. Britton, a fine artistic performance, that was heartily applauded. The Grand Master then made one of his grand speeches, that was listened to with the closest attention. Among many things, he said, in reviewing the work of the past fourteen months: Four thousand six hundred have applied for membership; 600 have been rejected; and, deducting losses and deaths, 3,500 net gain in membership have been gathered into the fold of the A. O. U. W. of California. We have paid over $500,000 in four and a half years. He that runs may read what we have done. Older societies have greater numerical strength in membership, but we shall live to see the A. O. U. W. outnumber any one of them. Organized opposition is made against us, and that has cemented us and nerved us to harder work. Then the Pacific Quartette gave a sentimental song that was well received. C. K. Robinson, P. M. W. and Mayor-elect of Oakland, then made a few interesting remarks, that were received with much favor; followed by Judge Turner in some happy congratulatory remarks, particularly so to the Grand Master and financial Grand officers. Some more good music and intellectual sparring between members of Oak Leaf and Pacific made a happy termination to the last of the Grand meetings for this year.

Keystone, 64.

Instructions were given to two junior Workmen, March 14th. At the previous meeting the Lodge donated $20 to a brother distressed, and the same amount to one sick, and closed in due form about 9 o'clock. Just as "the Workmen true" were leaving their stations, a signal sounded, and Ivy Lodge, Degree of Honor, came "marching in." They were greeted with a hearty welcome by Master Workman Nelson and the brothers of Keystone. Sister Emma F. Sturrock, Secretary, and other sisters and brothers of Ivy, made some sprightly remarks and a forcible suggestion that the representatives of Keystone should urge the importance of the Degree of Honor being made a beneficiary organization to the extent of issuing at least $500 certificates. Good reasons were advanced why such favors should be granted, and the Ivy delegates not only captured the Grand Lodge members, but seemed gracefully to entwine the hearts of all the brethren present. Come again, and let there be more visits and coffee and sociability enjoyed mutually by Workmen and Degree Lodges, say all.

Pacific, 7.

The very bright and gratifying history that this old pioneer has made should be put on record as one of the best subordinates in our jurisdiction. Her roster shows a membership of 230, mostly young, active and representative business men of Oakland. A feature of Pacific, No. 7, is the payment of sick benefits of $8 per week; and during the last year, by prudent management of their funds, they have paid every extra assessment over $1 this year, and on Thursday evening, March 23d, drew on the general fund to pay the Supreme Lodge assessment of 50 cents a member, probably among the first paid in this jurisdiction. Some of our prominent and representative men are members of Pacific, among whom we may mention Wm. H. Jordan, P. G. M. W.

Lodge Locals.

District Visit to Alameda, No. 5.

Following a custom that has been received with much favor of late, a district meeting was held at Odd Fellows' hall, Alameda, in the Lodge room of Alameda, No. 5. Although the night was stormy there was a good gathering of the brethren of Alameda, including a number from San Francisco. A delegation was at the depot to welcome the Grand officers and escort them to the Lodge room. The exercises were opened by a request to E. M. Reading, P. M. W., of Fidelity, to make a few remarks. His short, eloquent speech was well received. E. F. Loud, D. G. M., then exemplified the unwritten work in the J. W. and M. W. degree, closing with a few words of wholesome advice The Grand Master made an extended and masterly address, reviewing the labors of the past year. Among the many things he said was: We have arrived at that period which demonstrates that if the rest of the A. O. U. W., outside of California, shall cut loose we are able to stand alone. I have made 131 official visits, addressed 60 public meetings and have had over 75,000 hearers during the year to listen to the tenets and features of the A. O. U. W. I shall honor Alameda county with my last official visits. She has the honor of being the place where this grand Order was planted, and we know that the Workmen of Alameda are always ready to greet our brethren. Judge Turner, of Harmony, No. 9, was then asked to make some remarks which he did, in a manner that was quite complimentary to the Grand Officer and his lieutenants. The Grand Master took occasion to say that, in the name of the Grand Lodge, he thanked Wm. Sanderson, D. D. G. M. W., for his efficiency and good work for the last year, and asked him to make a few remarks. Bro. Sanderson said that his district was in a prosperous condition and increasing fast in membership. He believed that the coming year would be one of great prosperity. The Lodge was then closed and an invitation extended to the brethren present to march to Wm. H. Smith's restaurant (the Delmonico of Alameda), where was spread a most magnificent and choice banquet. Nearly an hour was spent in going through a bill of fare that was, in every respect, one of the best of the season. Congratulations, social converse, with good Havanas, was the order until the train started for the city, when the whole company marched down to the depot and thus ended a most successful visit.

A Grand Visit.

One of those very pleasant and historic events so common in our Order took place on Monday evening, March 13th. It was a visit to Enterprise Lodge, No. 17, of San Jose, by a large number of the Workmen of San Francisco, under the auspices of Unity, No. 27. Harmony, No. 9, sent a large delegation, with a goodly number from Excelsior, No. 126, Magnolia, No. 41, Fidelity, No. 136, and quite a good sprinkling of individual members of various Lodges, even from Portland, Oregon. The party left on S. P. C. Railroad at 5:30 P. M., amid cheers and general congratulations, although the rain was pouring down. The most regretful feature was that a number of ladies could hardly stem the torrents of rain, and had to let their lords move off alone. The trip was made in good time, a happy, jolly lot, numbering over 90, arriving at the depot at 7:30, where a delegation from Enterprise No. 17, with a string of cars and carriages, were in waiting. Arriving at the Lodge they were received with honors and a speech of welcome from the Master Workman, T. Soper, after a very appropiate introduction by Geo. Featherston, P. M. W. As there was a large delegation of ladies in waiting—the beauty and fairest of the Garden City—the Lodge was closed, and the large A. O. U. W. Hall was filled to repletion. Sam Booth, P. M. W. of Excelsior, was requested, and kindly consented to favor the audience with one of his unique and original poems, which is herewith given:

"THE WORKMEN."

Of all the guilds of charity
In country, town, or city,
That ply the gentle labors of
Beneficence and pity;
For kindly hearts and helpful hands,
And charitable deeds,
And works of love's sweet ministry,
The Workmen take the lead.
And so we sing the Workmen,
The Brotherhood of Workmen,
For charity is all the plea
That binds us to the Workmen.

Here laboring men sit side by side
With lawyers and physicians,
And simple minded, honest men
With cunning politicians.
Here famous men and millionaires
Are in the same degree,
And claim a common brotherhood.
With men like you and me.
And so we sing the Workmen,
The noble band of Workmen,
For kindness and fraternity
Abound among the Workmen

Here you may meet fraternally
Your many friends and neighbors,
Good men and true, to share with you
Your pleasures and your labors
Here you may find a brother's aid
For all the ills of life,
And when you die we give two thous-
And dollars to your wife.
And so we sing the Workmen,
The Ancient Order of Workmen,
For charity and fraternity
Are found among the Workmen.

This poem was received with enthusiasm, and was rewarded by a hearty encore. Address, E. F. Loud, D. G. M., who made a short

speech with trenchant, practical remarks that were well received, followed by Caleb Brind, District Deputy, in his interesting manner, but excused himself from an extended speech, as he said there were too many beautiful women present having the neat badge of the D. of H. Comic song, Wm. Thackery, P. M. W. of Harmony, No. 9, and for a recall gave a fine recitation that was heartily applauded. Overture, Don Quixotte, A. F. Lydston and K. Bronson, piano and violin; a fine, artistic effort that was well received. Speech, E. M. Reading, P. M. W. of Fidelity, No. 136, who made an extended and quite a congratulatory speech that was listened to with close attention and well received. Comic recitation, Bro. C. J. Hirsch, of Enterprise, and for a hearty recall gave a fine sentimental piece that held his audience in wrapt attention. Speech, A. R. Gunnison, of Excelsior, No. 126, who, in his humorous and interesting manner, kept his audience in a happy mood for a very short time. He paid a fine compliment to the PACIFIC STATES WATCHMAN and our auxiliary, the D. of H. Wm. Vintner, Foreman of Mt. Hamilton, was then called, and made a grand fraternal speech that was enthusiastically received. Musical imitations on the violin, Mr. Charles Funkenstein, which created much amusement and a recall. The master of ceremonies, T. Soper, M. W. of Enterprise, at a signal from the irrepressible on all occasions of this kind, A. P. Murgotten, P, M. W., announced that refreshments, prepared by the sisters of Magnolia, D. of H., were ready, and that the literary exercises were ended. The guests were invited to form in line and march to the banquet-room, while the rest would follow in Terpsichorean exercises in the hall. This alternate feasting and most enjoyable dancing was kept up until after 12 o'clock, when the whistle was sounded for the city. The elegant collation was of the best, and in bountiful supply and admirably arranged. A marked feature of the evening was an exuberance of kindly feeling and happiness. As the merry dance went on and the welcome rain beat against the window-pane, the brethren of the Garden City were heard to exclaim: "This rain is worth a million to this valley. Well, we'll have a good year." The return was made in good time, without an accident or event to mar the very auspicious and happy visit. The generous, welcome, bountiful and fine collation, free ride from the depot, electric light suspended 200 ft. high to light the city, and the cordial greeting given by the sisters to the brethren of San Francisco, will long be held in remembrance, and was in keeping with the reputation that our San Jose brethren bear of being hospitable, fraternal and generous.

Alviso, 77.

Alviso Lodge, No. 77, having dispensed with their officers' regalia, generously voted to present them to Bay View Lodge, I. O. G. T. They therefore extended a cordial invitation to the members of Bay View Lodge to meet them in their hall in Alviso, there to make this generous gift, which they did. They also entertained them in a capital manner with a supper, music and dancing. Mr. J. R. Billings was selected to make the presentation, which he did with the following speech, to which Mr. L. P. Alexander, in behalf of the Bay View Lodge, replied, accepting with many thanks:

Worthy Chief, Ladies and Gentlemen: The Ancient Order of United Workmen is not strictly a temperance organization; yet we are taught to admire and practice temperance, not only in that which we drink, but in our conversation also. I think that the A. O. U. W., as an Order, has good cause to be proud of the prosperity of the I. O. G. T., for it is a well-known fact that to be temperate prolongs life. To me has been assigned the pleasant duty of presenting to Bay View Lodge, No. 393, I. O. G. T., these regalia. By offering you this small testimonial, we hope to show you that we appreciate the endeavor made by you to implant in the minds of our youthful friends the true principles of temperance and sobriety. I now, in behalf of Alviso Lodge, No. 77, A. O. U. W., present you with these regalia. We only hope that you will receive them in the same friendly spirit in which they are presented.

There was a good attendance, and the supper and dance were much enjoyed. The time, until one o'clock A. M., was spent in a very pleasant social way, tending to strengthen the bonds of respect and esteem between the different organizations.

Silver Star, 84.

EDITORS WATCHMAN:—Our Lodge is now three years old. It was instituted March 3, 1879, with 21 charter members. We now have 42 members in good standing. Total number admitted during the time, 48, being a loss of 6. The greater part of these have gone to other Lodges, and are not lost to the Order. At first we were poor, financially, several of the brethren advancing money to keep up the expenses of the Lodge. But, happily, we are all over that now, and have paid within the last six months three beneficiary assessments from the general fund. The death angel has not visited us. We have grumbled some and wondered why so large a percentage of deaths has occurred in and around San Francisco. We cannot feel that all is right—that some do not do their duty. Consumption claims too many victims. As to the next Grand Lodge, we would say, "Hands off, brethren," and amend the constitution so as to meet but once in two years. It seems we are not keeping the Order with its machinery as simple as we should. The tendency seems to be to get more salaried officers, if we may judge aright. Keep its working simple and it will live the longer and be loved the more. Our per capita tax was 25 cents per term of six months when we were weak and numbered but five or six thousand; now it is 30 cents per member for the same time and we number twice as many. That looks strange, and to my knowledge has not been explained. On the 6th of March we celebrated our third anniversary by a social, consisting of music, declamations, speeches and a lunch such as would do credit to any Lodge. The festivities were kept up until after midnight, when we sang the closing ode, and felt that the third anniversary was something to be long remembered by Silver Star Lodge.—JOSEPH SMITH, Recorder, Downey City, March 10th.

Sacramento Lodges.

EDITORS WATCHMAN:—I have not written you for some time; not because news is scarce, or that the Order is failing here. On the contrary, I had the pleasure of witnessing the initiation of six Junior Workmen this evening by Union Lodge. The candidates, fine, intelligent men, would be an honor to any Order. The officers of Union certainly deserve great credit for the manner in which they conferred the degree, letter perfect, and without reference to the ritual, and a full attendance of the members encouraged them to do their best. "The good of the Order" was not allowed to remain a dead letter; entertaining speakers; wit and humor seemed contagious, and a more pleasant evening I have not spent in a Lodge-room. The members of Union are thoroughly aroused, and each is trying to make the Lodge-room the most agreeable resort in town, and they have succeeded well, as their immensely increased attendance and rapidly increasing membership amply proves.—B. MUDDLED, Sacramento, March 11th.

EDITORS WATCHMAN:—Upon a review of the past month we have nothing to feel ashamed of. Sacramento Lodge has added four members during the month, and last Tuesday night I witnessed the conferring of the M. W. degree on seven members at once in Union Lodge. The same evening a committee of two, consisting of Bros. R. B. Mosby and J. J. McConnell, accompanied by Bro. John Mull, from Yolo Lodge, visited Union Lodge for the purpose of interesting the Lodges here in a grand union picnic, to be held at Woodland, May 1, 1882. On the succeeding Tuesday Bros. S. T. Pendegast and T. Spaulding, accompanied by Bro. J. H. Lawrence, visited Sacramento Lodge for the same purpose, and aside from the excellent speeches and appropriate remarks by the visiting brethren, a general good time was had. Union Lodge having a literary and amusement committee in full operation, and one of the unavoidable kind, has no lack of entertainment and social enjoyment. To-night Bro. Magan delivered an address on the origin of secret Orders, full of pertinent facts, deep thought and evident research, and the approval of the Lodge will no doubt encourage Bro. Magan to try again. Bro. Davis, an oratorical standby of Chico Lodge, followed with a well-timed and appropriate address of congratulation. It is hoped he will soon become a member of Union Lodge, having lately become a resident of Sacramento city. Bro. A. D. Jordan, of Noe Valley Lodge, was called on for a promised speech and succeeded in raising a laugh at some of his chimerical schemes. Bro. M. T. Brewer, P. G. M., wound up the evening's entertainment with a whole-souled enthusiastic exhortation such as only Mr. Brewer can give. The social element got so worked up that long after the Lodge was dismissed, a crowd lingered around the organ, presided over by Bro. Bradley, M. W., singing songs and exchanging wit. Nothing of stirring importance has transpired here during the month. More anon.—B. MUDDLED, March 25th, 1882.

New Lodges.

A large Lodge of the Ancient Order of United Workmen was organized at Lower Lake on Monday and Tuesday, March 13th and 14th, by H. A. Oliver, District Deputy Grand Master Workman. The Lodge was organized with a membership of about forty. The following members were duly elected officers of the Lodge to serve for the current term: R. K. Nichols, P. M. W.; W. H. Cunningham, M. W.; L. H. Gruwell, Foreman; J. B. Baccus, Jr., Overseer; W. H. Adamson, Financier; M. Levy, Receiver; S. H. Thompson, Guide; Wm. J. Masterson, Recorder; Dr. F. V. Hopkins, Med. Ex.; W. G. Rogers, I. W.; J. W. Ransdell, O. W.; R. K. Nichols, F. M. Herndon, W. E. Mitchell, Trustee, and were duly installed on Tuesday evening by the D. D. G. M. W. The Lodge was organized under the brightest auspices.

San Fernando, No. 214, Los Angeles county, was instituted on March 8th, by I. A. Dunsmoor, D. D. G. M. W., with the following list of officers: A. B. Moffit, P. M. W.; H. C. Hubbard, M. W.; T. M. Wright For.; Jacob Horps, O; E hyder Hammond, Rdr.; J. Z. Barnett, Fin.; F. E. Slaughter, Rvr.; Edgar Peterson, G.; W. B. Shang, I. W.; A. C. Hall, O. W.

Dunnigan, No. 215, Yolo county, was instituted March 11, by A. M. Ayres, D. D. G. M. W., with the following list of officers: R. T. Buckley, P. M. W.; G. F. McDonald, M. W.; L. M. Clark, For.; W. F. Glascock, O.; Horace Haynes, Rdr; Thos. Mitchell, Fin.; G. B. Lewis, Rvr; J. M. Lillie, G.; Wm. H. H. Copp, I. W.; J. C. Patrey, O. W.

Degree of Honor.

EDITORS WATCHMAN:—As the question of making the D. of H. a beneficiary organization has been brought before the various Lodges in this jurisdiction, and an expression of opinion requested on the matter by the Grand Master, it has been taken into the serious consideration of most of the thinking and intelligent members of the Order, and, as might have been expected on a subject of so much importance to the welfare of the Order, various opinions have been expressed.

The writer is a member of Golden Dawn D. of H., No. 10—the last Lodge of the Order instituted. This question of introducing the beneficiary feature was submitted to us. A committee was appointed to consider the matter, and, after earnest, careful consideration, for reasons which they thought sufficiently important, they reported against the proposition. Their report was adopted, and the Secretary instructed to forward it to the G. M. as the unanimous opinion of the Lodge.

I notice in the last issue of the WATCHMAN you take strong ground in *favor* of the proposition. It would take too much of your space to give at length the reasons why we oppose it. Indeed, I should not have troubled you at all about the matter had it not been that you made use of some expressions in your brief advocacy of the measure to which I strongly object.

The aim of the founders of the Degree of Honor was to establish a social auxiliary of the A. O. U. W., where the female members of the families of the brethren might have opportunities for pleasant social intercourse and mutual acquaintance. As far as my observation and experience goes, it has in this regard been eminently successful, as is, I think, abundantly manifest in the meetings of the Lodges in this city, in Oakland and in San Jose. But, according to a communication in the same number of the paper before alluded to, it is something more. The writer of that letter says that, since the establishment of a Lodge of the D. of H. in connection with the Lodge of Workmen of which he is a member, a new interest has been enkindled among the brethren, and the Lodge has in a few months doubled its membership. And yet you speak of the mingling of the sexes in the meetings of the Order, *i. e.*, the social intercourse of the brethren with their and each other's mothers, wives, sisters and daughters, as the dreaded rock on which the Order was in danger of going awreck. In other words, the carrying out of the idea which the founders of the Order had in view in its establishment was likely to prove its destruction. You conclude your allusion to the Order wiih these astounding words: "To leave the Degree as it now is would be to perpetuate a shame and a failure." These words would seem to imply either that you were cognizant of some iniquity in the Order, or that in your zealous advocacy of your side of the question you had in your imagination conjured up some monstrous evils not apparent to the majority of its members.

The few meetings we have had, of the Lodge to which I belong, have been so pleasant; fulfilling in every respect, as has seemed to its members, the objects for which the Order was founded, that we have taken every opportunity of persuading others to join, with no expectation or desire of making it other than it is: a pleasant social adjunct of the A. O. U. W. But if your declarations, or fears are well grounded we would like to know on what they are based, so that if the reasons are sufficient we may not be guilty of drawing any more of our friends into what is, or may be a delusion and a snare. Begging your indulgence for troubling you at such length, yet hoping that in your courtesy you will not refuse a hearing to our side of the question. I am yours. S. B.

HEALDSBURG LODGE, No. 31, is making its meetings interesting by debating practical subjects. On March 17th, "Should the Lodge Pay Sick Benefits," was wrestled with, Bros. Carter and Pyne affirming and Luedke and Montgomery in the negative. The first argued that theoretical charity began only when absolute beggary approached, which is sometimes true and not altogether improper. The latter argued that the A. O. U. W. was organized for another purpose, and to change would be to enter the field of other organizations devoted to the principle under discussion; furthermore, the principle had been demonstrated to be subject to such abuse that it was of doubtful practicability. Decision for the negative. On the 24th, "Graded Fees and Assessments," was discussed, E. K. Vaughn leader on the affirmative, and A. Wright leader on the negative. A. G. Burnett, H. H. Pyne and other debators were present.

"THE Gun and How to Use It," by Gwynne Price, is the title of a book which should be in the hands of every sportsman. It is a plain and careful treatise on the gun and how to use it to kill every fair wing shot. It also contains the game laws of California, Oregon, Nevada and Washington Territory. Price, 25 cents. Copies can be had of E. T. Allen, 416 Market street.

IT is rumored that a grand visit from the members of San Jose and a large number of Magnolia, D. of H., will soon be made to San Francisco, probably to Golded Dawn, D. of H.

$3,000.

A few weeks ago Dr. E. L. Shackleton, an old and much respected citizen of Auburn, Placer county, and a Past Master Workman of Covenant Lodge, No 97, departed this life, to the regret of every one who had ever known him as a citizen, physician or brother. By his death two interesting children are bereft of their sole protector, their mother having died some time ago.

Bro. Shackleton's beneficiary certificate in the A. O. U. W. for $2,000, is made payable to these two children, as is also a certificate in the Workmen Guarantee Fund Association for $1,000.

We understand Covenant Lodge will soon give a public entertainment in Auburn, at which Wm. H. Barnes, G. M. W., Bro. Pratt, Grand Recorder of the A. O. U. W., and Bro. E. M. Reading, Secretary of the Workmen Guarantee Fund Association will be invited to publicly present to the guardian of these orphan children, respectively the sums of $2,000 and $1,000.

We take pleasure in mentioning these facts, as it shows the practical workings of the simplest and grandest beneficial organization in the world.

The orphaned children are now provided with $3,000, which, with judicious care, will leave them far above want or embarrassment, and all through the fraternal obligation of the members of the A. O. U. W., as the Guarantee Fund Association paying the $1,000, is composed exclusively of members belonging to the Order.

Thus, the Order practically pays the $3,000 at a cost within the reach of almost every man of family, being last year fourteen assessments in one, and but six in the other. We deem it a duty we owe the women and children of California to make these facts public and to urge upon the husband and father not to delay making the necessary provisions for the support of those he holds near and dear after he has passed from this life to another.

Assessment Notice for April.

One assessment for April. Lodges organized on or since Feb. 11, 1882, will not be liable on this call unless it be for members admitted by card, and only such members should be assessed in such case. The following is a list of deaths:

Robt. D. Dyer, Santa Rosa 28, died Jan. 24, 1882, of quick consumption, aged 42 years. Joined May 24, 1878.

N. P. B. Moller, Unity 27, S. F., died Feb. 11, 1882, of small-pox, aged 33 years. Joined Sept. 2, 1879.

Jas. K. Berry, Union 21, Sacramento, died Feb. 11, 1882, of pistol shot, causing inflammation of the brain, aged 34 years. Joined June 1, 1878.

Geo. W. Swart, Los Angeles 55, died Feb. 12, 1882, from being crushed between two wagons, aged 45. Joined Nov. 6, 1878.

Antone Mauretich, Union 21, Sacramento, died Feb. 18, 1882, of general debility, aged 51 years. Joined June 1, 1878.

W. J. N. Prydz, Bay View 159, S. F., died Feb. 20, 1882, of acute aneurism at base of the aorta, aged 39 years. Joined Jan. 30, 1880.

Jas. Armstrong, Bay View 159, S. F., died Feb. 20, 1882, by being gored by a cow, aged 39 years. Joined Jan. 30, 1880.

N. A. Son, Magnolia 41, S. F., died Feb. 22, 1882, from suicide, aged 47 years. Joined Nov. 18, 1879.

Relief assessment No. 2, of 50 cts. per member, is also called for in accordance with the circular of the Grand Master Workman, herewith appended.

From Grand Master Workman.

OFFICE OF G. M. W., A. O. U. W. OF CAL.
525 Montgomery St., S. F., March 20, 1882.

To the Subordinate Lodges of California:

OFFICERS AND MEMBERS:—In consequence of the refusal of Iowa to conform with the laws of the Order, the Supreme Master Workman has suspended the charter of the Grand Lodge of that State, and ordered that all fraternal intercourse with said jurisdiction shall be severed. A new password has been promulgated and sent to Deputies, which you will please cause to be immediately substituted for the one now in use.

The deaths in the Lodges under the immediate supervision of the Supreme Lodge have been, during the year, in excess of the maximum assessments (24) assigned as its rate, and 10 deaths remain unpaid. The jurisdiction of Indiana has again suffered heavily, requiring 33 assessments, or 13 beyond its maximum (20). The two items above require $46,000, which under the Supreme Relief Law, will be contributed by those States who have been so fortunate as not to have been called upon for their maximum in 1881. California's maximum is 20; during 1881, we were so favored that only 14 assessments were necessary. I feel confident that all will cheerfully and promptly respond. The *pro rata* to meet the deficit above, is fifty cents per member. You will please, therefore, collect from each Master Workman of your Lodge, who was in good standing on March 1st, 1882, the sum of fifty cents, or appropriate from your general fund a sum equivalent to said amount, and forward the amount to the Grand Recorder, on or before May 1st, 1882.

Congratulating the Order and the Lodges on the continued prosperity that has attended our Fraternity during the term now closing, I remain, Fraternally yours,

WM. H. BARNES, G. M. W.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

OFFICERS and members of the A. O. U. W. receiving a complimentary number of the WATCHMAN with this notice marked are invited to examine its merits and give our enterprise the benefit of their friendship and substantial support as far as possible. Our terms of subscription are usually to be found on the eighth page of each issue. Persons receiving duplicate copies are requested to circulate them to the advantage of our cause and the publishers.

Garfield, Our Chief, is Dead.

BY J. A. MILLER, M. D., D. D.

On Atlanta's distant shore, a silent, weeping throng
Has gathered round the dying couch
Of one of earth's most noble sons.
Scientific skill, mistaken, or exhausted, now
Can do no more, all hope is lost!
It's ten o'clock, each sigh is hushed, and every heart stands still.

A nation has prayed, but not in vain.
Each prayer but drew the trusting soul nearer its God
In expectation strong. Yet taught it in submission meek
To say, "Thy will be done." The answer came,
True, not as men had wished; but just as wisdom pleased,
To teach mankind a lesson, which all are slow to learn.

The suffering form has lost its flesh, the eye its native fire,
He sinks! he has almost ceased to breathe, the quivering pulse is nearly still;
It is half-past ten, yet he still lingers here, as though waiting
For the attendant angel, to bear him hence, away
To the immortal shores of life. Five minutes more have passed,
And all is still. The messenger has come. *Garfield is dead!*

Go bring the electric current from the lurid sky,
Haste! flash the tidings through the expectant land;
Send it through the dark caverns of the deep blue sea,
To distant lands beyond. Wake a world to woe;
And let it feel that burning pang of human grief,
Which levels all distinction and makes mankind as one.

Go! toll the ponderous funeral bell,
Muffle its clanging tongue by human sympathy,
And let it echo forth a stricken nation's grief.
Go! beat the rolling funeral drum,
With shrouded head, its solemn strains
Will wake a mourning, bleeding nation's agony.

Go! charge the murderous cannon
With wild, sulphurious blast; let its thunder roll,
With solemn peal, to wake from lethargy.
Light the silent fuse; apply it slowly
Lest its thunder jar on quivering hearts now stung by grief,
And rouse a weeping nation's irony.

Should nations ask, "What means to-day this tolling bell,
This beating drum, this cannon's suppressed and hollow roar;
Shaking the hearts of men with fear. Making stout hearts bend
Beneath the storm, like withes before the wind;
Or like the wild tornado, laying all before it low in dust,
Leaving in its wake a scene of ruins, which years of care may not o'ercome."

We answer, yonder beside a silent bier. See! a nation stand
With uncovered head, with quivering lips, with eyes
Suffused with tears, with bated breath, with pulsating heart
That is almost standing still; transfixed by grief's wild storm
They sadly whisper forth, in accents scarcely heard,
Garfield, our noble chief, our President beloved, *is dead.*

Go! Spread the mournful news throughout the land,
Spread it, on land and sea, in islands far away
Let it be known, wherever man is found
In nature's wide domain. There in solemn strains let it
Be sadly whispered forth, in words that breathe and thoughts
That burn, Garfield, our chief, *is dead.*

But see! beside yon bier, are other forms, crowned heads are there;
Behold! yon female form, draped in the majestic garb
Of England's stately royalty. Victoria the great, in grief
Kneels at his head, and with reverential awe
Presents her floral gift, inscribed, "To a weeping wife
And a stricken nation sunk in grief."

That gift bedewed with England's tears,
Speaks loud of England's sympathy, which yet shall bind
All Christian hearts as one. It now makes nations feel
The common pang, wrung by a dastard hand, from human hearts
Intent on peace with all mankind. Following in swift pursuit
The noblest aims of life, to obtain the goal of human good.

Victor Immanuel, from Italia's sunny clime
Stands silent there. His Holiness, the Pope,
Rome's royal pontiff, in sacredotal robes,
Looks sadly on. The Emperor of Russia, from his ice-bound coast,
His chilly regions of northern snow, has ventured forth,
Fearless of the assassin's hand, to join the loud acclaim of woe.

Joseph of Austria, has left his regal throng,
His pomp of Court, his royal couch of ease,
To stand beside our nation's bier, and feel the pang
That rends each bleeding heart, and wakes emotions
Such as this nation felt but once before,
And ne'r may feel again, while time shall last.

Alfonzo, too, of Spain, though in the hunt and chase,
Above the clanging of the horn and braying of the hound,
He hears the distant tolling bell, and stops to think.
It cries, "Away beyond the rolling seas, a friend is dead."
He stays the hunt, calls back the hound, lays by his horn,
Puts sackcloth on, and hastes to come to gaze upon our dead.

France! gay, sunny, cheerful, merry France,
Is startled by the wail, that echoes o'er the sea,
And stops her song, fixes a period to her mirth,
And asks, "What can it mean?" Then hastens to come
With flying steps, to render homage to our silent chief,
And swell the heartfelt strain of woe.

Thus nations, kingdoms, islands, distant seas,
Snow-clad, barren mountain ranges and distant vales below;
Regions locked in endless frost, and sunny foreign climes
Have come, kings, queens and princes, with all
Their royal train, now recognize in yonder lifeless form,
Their silent chief, *their President*, among the sons of men.

Elected by a nation's love to honor greater far than their's,
To fill the Presidential chair, to wear a martyr's crown.
And hence, they join a nation's wail, and add to tolling bell
And beating drum, and thundering cannon's muffled roar.
The sad lament of aching hearts, borne on the breeze of earth,
To distant lands, Garfield, our noble chief, *is dead.*

O, let the ringing hammer cease to move,
The busy loom stand still; the plowboy stop his song,
The reaper cease to gather in his ready sheaf.
Those busy scenes of commerce stop; the wellsprung mall be furled,
Ye gentle breezes cease to blow, be hushed into a silent calm,
For all mankind is sunk in grief. *Garfield is dead.*

No darkness vails the sun, as when the world's redeemer died,

No quaking earth, no rending rocks, no rising dead
Attends the tragic scene. But darkness vails the human heart
And quaking courts, and trembling kings, and silent groans
Blot out every twinkling star of hope, and makes all nations pause
And think, how vain is life. *Garfield is dead.*

Now in that pompous throng another form appears.
No diadem bedecks her brow, but that implanted by her God.
The noble seal of womanhood is printed their by hands Divine.
Wife, mother, and all the hallowed sweets which these blest terms imply,
Are centered here in this loved form, now stricken down with grief,
As low she moans in anguish deep, beside her loved and lost.

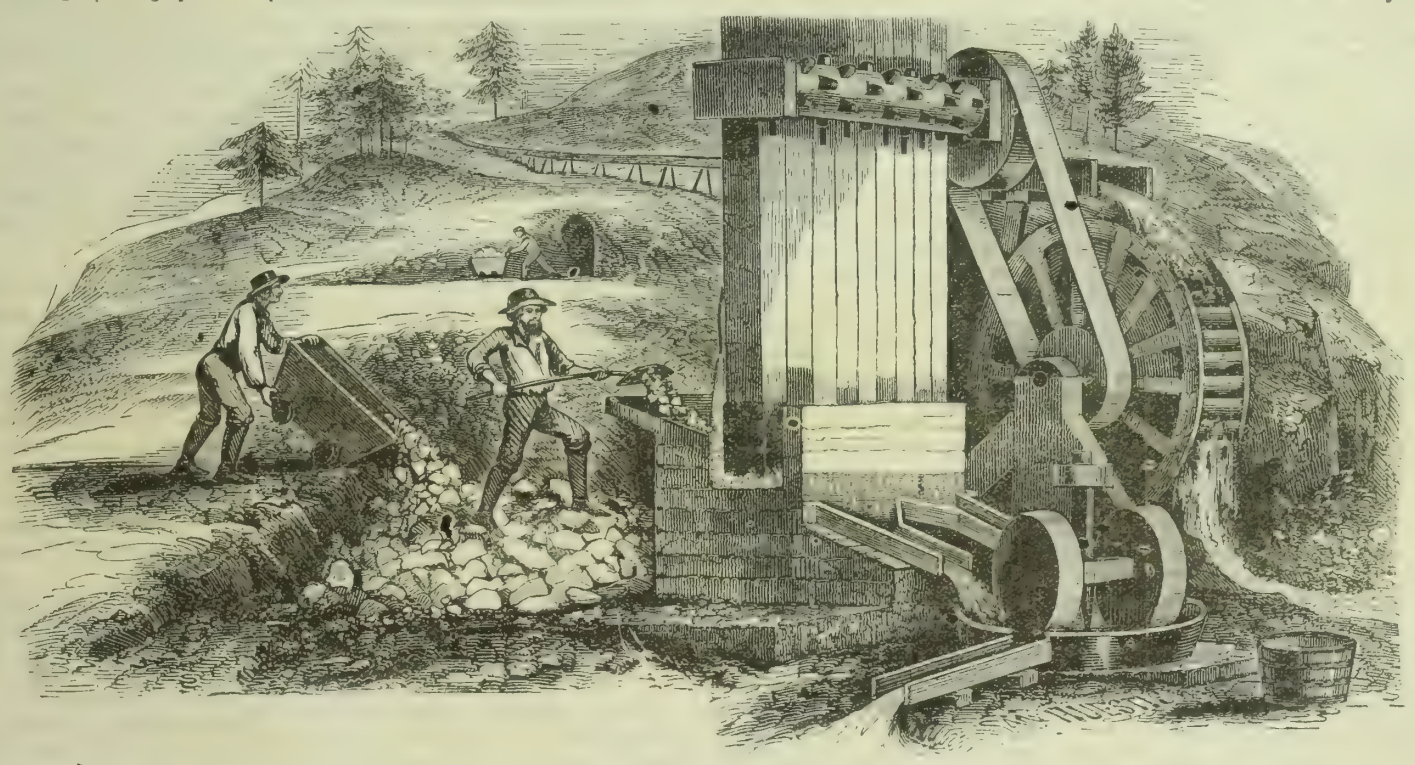
The fearful shock, the dreary ride, the meeting in that White House room,
The long sad watch, the lonely hours of secret, silent prayer,
The sinking form, the last sad look of love, all, all, is past
And, Oh! the agony untold, which wrings that bleeding, faithful female heart,
As she hears the distant wail and feels the present pang,
Garfield, my own! My love! My life! My all on earth, *is dead!*

Next in that throng a group of children dear, appears,
Whose young hearts sorrow never knew.
Nursed by a mother's tenderest love, and by a father's fondest care
Sustained, but each now is swept by grief's wild storm,
As sadly they look on that loved form, and warble forth
In accents like the wounded dove, Garfield, my father dear, *is dead.*

Kings, queens, princes, nations now stand aside,
Clanging bells now cease to peal, shrouded drums now cease to beat,
And thundering cannons, now cease to roar, a riven heart is here.
A mother, whose four score years are nearly past,
Comes leaning on her staff to gaze upon that manly form
On which she oft was wont to gaze, in twilight sacred hour.

To her, he's not the noble chief, the President of Kings,
The honored of the sons of men, elected by a nation's love
To reign supreme on earth. Her aged heart
Looks back, but to the joy which filled it at his birth,
And then o'ercome with grief which none can feel;
Crowned heads may turn away and weep, when from a
Broken heart she whispers forth, Garfield, my *babe, is dead.*

Dead! died he by some fell disease struck down,
Or was he by the rolling flight of time removed?
Or was it by mysterious chance, such as oft befall the sons of men?
Ah, no, when in the prime of life, and working for a nation's weal,
To ease the burdens men are wont to bear, diffusing charity
And love to all mankind, obedient to the high command.



A loathsome thing, a filthy dog, a crawling snake,
A vile mephitis, secreted under friendship's garb,
Approached unheeded by the throng, and sent the fatal shot
Which laid our Chieftain low in death—
Crushed a nation's hope, filled our world with woe,
Such as only nations feel, intent on peace with all mankind.

O, Eternal God, if reptiles are ever in their nature changed,
So as to be admitted to the plains of light, change this
Mean dog, Eternal Goodness, but be sure he's changed.
And let him, muzzled, lick the dust of glory from the feet
Of the great, noble soul, his wild ambition
Sent before, while endless ages roll.

But if redeeming blood cannot wash out his stain,
And even grace cannot effect a change in his
Mean soul. If his vile nature must e'er remain the same,
Then thrust him in the deep abyss of woe,
And let tormenting recollections of the past forever prey
Upon his guilty soul, until eternity is passed.

Ye
And all the bloodwashed sons of earth,
And all the saints within thy bright abode,
And angels who stand near thy throne,
Seeing thy righteous deed, the justice of thy act
Will say, Amen! Thy will be done, his punishment is just.

He laid earth's greatest chieftain low—GARFIELD IS DEAD.

AN OLD FASHIONED QUARTZ MILL OF PIONEER DAYS.

California's Mechanical Progress.

Perhaps in no other branch of mechanical industry has California so far distinguished herself as in that pertaining to the appliances connected with mining. Beginning in a field new to all, the early pioneers felt compelled to devise for themselves machinery suitable for beneficiating their ores and working their gravel and dirt. The crude Mexican appliances were too slow for the go-ahead Americans, and, from improving on what they found, they began to branch out in new directions. These improvements gradually but surely displaced the old-fashioned means employed for the same purposes.

People who have ever seen a modern quartz mill will recognize what these improvements have been when looking at the engraving on this page, which represents an old-fashioned mill, with its wooden stamps and crude mechanism for raising them, its supplementary chile mill for grinding and amalgamating, and its generally rough and unfinished appearance. From this rough beginning has come, by gradual improvement, the finished, complete and perfectly-working California quartz mill of to-day.

ROAST PORK is the hardest food to digest known to the domestic table. It requires over five hours for the process after being taken into the stomach. Boiled rice will digest in one hour, roast or boiled mutton in three hours, turkey in two hours, beef, fried, four hours, roast or broiled, two and a half hours.

ABOUT $1,000,000,000 of the national debt has been paid since the war ended. France has now nearly treble the debt of the United States, and Great Britian more than double. Even Spain has a bigger debt than that which remains of the United States.

MONTANA people expect an addition of 30,000 to their population this season.

Lake Tahoe in Winter.

A correspondent of the *Rural Press* writes Such a perfect glory as this world was yesterday morning, Thursday! It snowed all day long and every one of the green trees in this forest kept the snowflakes as they fell, until they were drooping in their white robes. The sun shone out bright, and from every shrub came the cheerful voices of the sturdy little chickadees. How they do stand the cold! The mercury was 40 above zero, the windows draped with frost-lace curtains, rather prettier than it was comfortable.

To-day it is snowing again. We would bid it welcome if we knew that those who need the rain so much were getting it now. But as it is, the roads are blocked and the mail has to come in on snow-shoes. It is very hard work, the snow is so light and drifting. It would be quite a discouraging task to a less enterprising and energetic people than the lake dwellers. Those of us who live a few miles from the post-office have to wait and wait. Just now a young man came to the door to see if any mail had reached this far in the last ten days; but not a bit was here. He said, "It's kinder lonesome without the mail, ain't it?" and went right back to camp, though his was the first face seen and the first voice heard in five days.

It is surprising how diffident people become who live so isolated. A mile back from the lake the snow is so deep that the woodchoppers cannot work with any profit.

You who have always lived where you can always go into your gardens for fruit and flowers at all seasons, cannot imagine the happiness that comes with the few fruits that reach us here. A tiny box of red-ripe raspberries, grown right out doors, without a bit of shelter, came. We ate the luscious drupes and kept the box, which is fragrant yet. There were sent to us from St. Helena, Napa county, a pair of Japanese persimmons, the first we ever saw, with instructions not to taste them until they were soft. We were glad that they were hard, and hoped they would stay so forever, they were so bright and such an ornamant in the study, noticed and admired by all; but in the course of two months they grew a shade darker and began to shrivel. One of the neighbors said, "Let 'em freeze and thaw before you eat 'em. They were best after they were froze in Missouri." So we put them out and let them "freeze and thaw;" then we removed the top of the shell, and there was a cup of the most delicious jelly we ever tasted.

WHAT TO DO FOR A SICK HEADACHE.—Don't take a cup of strong tea, nor a dose of "blue mas," or a lot of anti-billious pills, but drink a pint of warm (not hot) water. Keep on drinking until vomiting is induced. That is the better way to relieve the stomach of its undigested, decomposing mass of food. If anything more is needed, take a hot enema, apply hot fermentations to the bowels, and drink freely of hot (not merely warm) water. Eat little or nothing for 24 hours, then commence with fruit or some simple diet, avoiding meats, butter, pastry, and all other indigestible food.

DIED FROM HAVING HER EARS PIERCED.—A Brooklyn girl, of 18, died the other day from the effects of having her ears pierced. A few days before Christmas she was told that she was going to have a pair of earrings for a present, and in order that she might wear them on the holiday, she immediately had her ears pierced by her brother-in-law. Unfortunately she caught cold, and three days later erysipelas set in, which was followed by meningitis, and after lingering about a week she died.

PACIFIC STATES WATCHMAN.

Issued on the 1st and 15th of each month.
At No. 252 Market Street, San Francisco, Cal.
☞ *Take Elevator No. 12 Front Street.* ☜

Subscription (in Advance), $2 a Year.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the Pacific States Watchman our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and Watchman together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*

Whereas, the Pacific States Watchman, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the Watchman as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - April 1, 1882

Our Rituals.

Several of the Grand Lodges of our Order are becoming exorcised over our ritual. Some want it shortened; some want less sermonizing; some one thing and some another. We approve of the agitation. We hope it will go on until a square, honest effort be made on the part of the Supreme Lodge to give us a ritual second to that of no other Order in existence. But such a ritual cannot be as short as some would have it. It should not be prosy, nor long enough to be tiresome; but no orator was ever eloquent enough to deliver a good oration in a minute. Perhaps the best ritual ever made by man is that of the Masons. Its excellence does not consist in its extreme brevity, we believe. The best poems ever produced are not the shortest ones. A ritual should be a work of inspiration, and, if really good, it can be of even more than of ordinary length and still be acceptable. Any ritual that would strengthen our bonds of fraternity would be acceptable, and, no matter what the cost of a change, the Order could afford it. That is what a ritual should be for, and for nothing else. And now while we are on the subject, we may as well renew our regular annual appeal to the powers that be to give us not only a Subordinate Lodge Ritual, that shall be above and beyond all just criticism, but a Grand Lodge and a Supreme Lodge ritual also and likewise. Nor would we forget the poor neglected Degree of Honor in this regard. Heretofore it has been almost impossible to get any proper consideration given to our fraternal needs; but since the Iowa disgrace, the membership begin to appreciate the fact that all we have of strength, all we have of hope in permancy, rests on fraternity, and we may expect to see done what ought to have been done long ago. Make our rituals good, beautiful and strong, and we shall live—else we perish.

Newark Lodge, No. 169, will celebrate its third anniversary by a ball in the pavilion in Newark park, on Friday evening, April 14th. The occasion will be a success for the Lodge, as well as a grand affair for their friends who participate.

We have received a copy of the address of J. M. Damenil, G. W. M., of Ohio, delivered before the Grand Lodge of Ohio at its session held at Cincinnati, Ohio. It breathes the spirit of a true Workman, and we hope his realizations will be fulfilled during the coming term.

Ring of the True Metal.

The Supreme Master has issued an order of suspension against the Grand Lodge of Iowa, and sent out circulars to all the subordinate Lodges of the Order in that jusisdiction, directing them to report directly to the Supreme Recorder, and to forward a sum equal to 10 cents per member to fulfill the requirements of Relief Call No. 1. Such as comply will maintain their standing in the Order. Such as do not, will be cut off.

Evidently in William H. Baxter the Order has a supreme executive officer that has no lack of backbone. In this we are constrained to rejoice and take courage. If there is anything which a fraternal body should not tolerate, it is insubordination. It has but one method to enforce obedience to its laws, to-wit: by cutting off the disobedient; and this only resort should not be brought into contempt by dilly-dallying with men who have no regard for the obligations they have solemnly taken before God and man.

We trust enough good and true Workmen can still be found in Iowa to speedily reorganize and form another Grand Lodge that will in reality be a part of the Order, and not a mere pretense and a fraud—a whited sepulcher, fair to look upon, but full of dead men's bones within.

Now that the session of the Supreme Lodge is near at hand, and all these matters must come up for review, we submit that, as the fact of Grand Lodges being incorporated has in several cases already afforded a pretense for disobedience of our fraternal laws, and as there are grave dangers that must continually threaten us from this cause, (for a man who has perjury in his heart will resort to any vile expedient to fool and hoodwink the little conscience he has), we most earnestly suggest that some measures be taken to prevent the incorporation of any more of these bodies, and, if possible, to disincorporate those we now have incorporated. The latter we may not be able to accomplish; but the former we can, and the sooner we proceed in this direction the better. To permit corporations to form in our Grand and Subordinate bodies, is simply to give over the adjudication of our laws and methods to the courts of the country, and to make our laws and edicts fit matters for sneers and contempt. Moreover, thereby litigation is invited, where it should be discouraged; and, worse than all else, the only means of protection a fraternal society has against traitors and law-breakers in its midst, is liable to be swept away by some unfriendly decision of an unfriendly judge, and so compel us to tolerate a moral leper in the body of the organization, or disband altogether. And what is to be gained for all this danger of distraint and threatened disruption? Absolutely nothing of any value whatever.

It has been 14 months since the meeting of the Grand Lodge, and the members will come together on Tuesday, April 4th, with the satisfaction of knowing that the present year has been the most successful in the history of the Order in this State. The first Lodge instituted for the present term was No. 194, and the last 217, making an increase of 24 new Lodges. These Lodges are scattered all over the State—north, south, east and west. The increase in membership has been fully 3,500, while 4,000 new certificates have been written. About 500 names have been dropped from the rolls for various causes, and the rejections have been 500. There have been 18 assessments during the 14 months, and the amount paid to the beneficiaries has been $228,000. It is interesting to know that the Grand Trustees, in figuring the probable increase, placed it at 1,200, whereas it was nearly three times that figure. Besides the above increase in Lodges, there have been 6 D. of H. Lodges, which must be placed to the credit of the year. Truly, the Grand Lodge on assembling ought to have a veritable love-feast. Of all the Orders which are blessing our State with their ministrations, old and young alike, it is pleasant to think that, through wise management and hard work upon the part of the officers, the A. O. U. W. has done so well. May it always be kept in such good and wise control.

At a special meeting of the General Relief Committee, held in Pythian Castle on March 24th, the sum of $55 was advanced and donated to Bro. Workmen.

Degree of Honor Again.

Our remarks in the last issue of the Watchman have called forth some unfriendly criticism in that we said that to leave the Degree as it now is would be to perpetuate a shame and a failure. It seems our meaning has been misconstrued. The Degree of Honor is as old as the Supreme Lodge itself, having been projected into being at the first session of that body. Many efforts have been made by the friends of the Degree to so perfect it as to make it a credit to the Order. So far, such efforts have been of little avail. Many Lodges have been formed, but few remain. Their history is a history of failures. On the other hand, the history of the other Lodges of the A. O. U. W. is a history of grand successes. Why the difference? One kind is not beneficial, the other is; in the one the sexes are mingled, in the other only males are eligible. We are forced to the conclusion that because of one or the other features of dif. ference, we have failure on the one hand and success on the other. We know by experience that the beneficial feature would not make a failure, nor do we believe that the mingling of the sexes would eventuate in such a result; but if a beneficial feature were attached to the D. of H., with a complete system of laws to govern it, we can conceive of no reason why it should not prove a success, unless it should be for the other feature.

That the Degree as constituted has been and is a failure, generally speaking, goes without argument; that it has been shamefully treated and neglected by the Order is just as patent. That consequently the Degree is no credit to the Order (we speak in general terms) must be patent to everyone who has taken the trouble to look over the sorry record of its existence. Now, if this be true, does not the Supreme Lodge, in refusing to make any honest effort to care for its offspring, do a shameful thing and perpetuate a failure? We know some of our D. of H. Lodges are an exception to the rule; but the fact that they are exceptions proves the rule. We want the rule reversed, or we want the Degree cut off from the Order altogether. In a few cases the Degree adds strength to the Order; in the many it gives weakness. The Order cannot afford this state of things. Let's change it. We are in favor of making a spoon or spoiling a horn.

Relief Call No. 2.

With the assessment call for April, goes out Relief Call No. 2, by direction of the Supreme Lodge. No doubt it will be met by this jurisdiction with the promptness characteristic of California Workmen. There will be no repetition of the Iowa business here. California Workmen believe in living up to their obligations or quitting the Order altogether, recognizing the fact that the whole stability of any fraternal organization rests on the faith of brother plighted to brother, and that the moment insurbordination and faith-breaking is tolerated, that moment our Samson is shorn of his strength, and we must of necessity fall an easy prey to the destroyer. Those jurisdictions that wonder at the prosperity of the A. O. U. W. in California may as well understand that the true secret of our success is not altogether owing to the superior goodness of our people, but largely—very largely—to the inculcation of the true principles of fraternity, and in holding every member strictly to the requirements of the laws and his obligations.

Grand Recorder Newcomb, of Oregon, delivered an address before Multnomah, No. 48, which is published in the *Pacific Overseer*, and from which we take the following concerning our veteran Grand Recorder: "The Order was first introduced upon this coast in 1875, by Bro. H. G. Pratt, of California, who has been since its organization, and is still the Grand Recorder of that State. It will be no flattery on my part to say that our Order has never had a more true, earnest and hard worker than Bro. Pratt. To him much is due for the grand result now obtained. Less than six years ago, when he first started upon his labors, there was not a single Lodge of Workmen in this far-off Western land; to-day there are nigh on 400, with a membership of near 20,000. He has been intimately connected with all our movements, and the history of Pacific Workmen is his history."

Let Its Influence be Extended.

The Watchman has recently had articles on the subject of making the A. O. U. W. universal; in other words, allowing any foreign country to have the "work" of the Order, but to manage its own beneficiary department, which shall be totally separate and independent from the Supreme Lodge. We have occasion to know that the subject has met with the warm approval of many of our readers, notwithstanding that some of the A. O. U. W. papers in the East give it the cold shoulder, but without offering any real argument why it should not be done. The Order, as at present constituted, restricts the institution of Lodges to the United States and the Dominion of Canada. Is Canada a "foreign" country? Of course it is, just as much as England, France, or any other European country, as a Canadian, in order to become a citizen of the United States, must conform to all the rules and regulations in such cases provided. Well, if the A. O. U. W. is a good thing for Canada, why is it not for the mother country—England—and elsewhere on the continent of Europe? Of course, Canada, on account of its proximity to the United States, has its beneficiary department under the control of the Supreme Lodge. It is generally subject to the same conditions prevailing in the United States, and hence it is quite feasible. But if the Supreme Lodge, in its wisdom, were to pass a law allowing Lodges of the A. O. U. W. to be organized in any country, it would, of course, be with the understanding that all financial obligations incurred would have to be met by the members of said Lodges themselves. Now what earthly objection can there be to that? The plea that we have enough missionary work to do at home does not hold good. All that is asked is for the Supreme Lodge to grant the secret and ritualistic work, and also the signs, tokens, passwords and emblems, so that when a citizen of the United States visits a foreign country he can have the privilege of meeting his brothers of the A. O. U. W. If a person should come to the United States or Canada from a foreign country, and reside for several years, and in the mean time become a member of the A. O. U. W., then if his business or other reasons call him to his native land to reside permanently, and if he wishes to still retain membership in our Order, why should he be put to great inconvenience in order to do so? The commercial activity of nations, sight-seeing, etc., is causing an ever increasing tide of travel between this country and Europe, and it would seem that the plan outlined should be adopted. We hope to live to see the day when a member of the A. O. U. W. can visit any portion of the civilized globe and there find his brothers to extend to him the right hand of fellowship. The A. O. U. W. having proven such a great blessing to the people of this country, its influence should be extended so as to embrace all nations who are willing to adopt its principles. What is to prevent the A. O. U. W. from doing what the Ancient Order of Foresters has done. A Forester of a Court in California, go where he will, wherever the English language is spoken, will find a Court of his Order and brothers who will extend to him a fraternal greeting, and if need be give him succor.

Our Supreme Lodge will soon meet and we suppose the matter will be brought to the attention of that body by some of our Representatives. At the last session Grand Recorder Pratt introduced an amendment to the constitution giving foreign countries the privilege of instituting Lodges of the Order, but for some inexplicable reason it did not meet with favor. Perhaps it will receive more support this time. We sincerely hope it will, and that wherever there are people intelligent enough to appreciate the principles of the Ancient Order of United Workmen, there will be found a Lodge of the Order.

Yolo Lodge, No. 22, A. O. U. W., will hold its third annual picnic at Coil's Grove, near Woodland, May 1st. It is the intention of the Lodge to make this gathering the most successful and enjoyable affair of the year. A cordial invitation is extended to all friends to meet with them on that occasion. Committee of Invitation—S. T. Pendegast, C. M. Casler, J. I. McConnell. The Lodge hopes to unite with the seven Lodges of the district and the two of Sacramento.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

There have been over 16,500 beneficiary certificates issued from this office. The number issued for March was 287.

Our Lodges, instead of making wry faces over the Relief assessment, seem to be vieing with each other in the alacrity with which they respond to the call.

Probably the Grand Lodge will be able to dispense of its business in three days, by holding one evening session. If this can be done we shall not be cramped in our finances as, will be the case otherwise.

A very considerable number of Recorders, Financiers and Receivers, will be present at the Grand Lodge to receive the P. M. W. degree. No doubt those eligible by reason of three years' service in their respective positions will be vouchsafed the honor which, in most cases, they abundantly deserve.

It is suggested that our Grand Lodge raise a committee to prepare a new ritual, and unwritten work for the Grand and Supreme Lodge degrees, to be presented to the Supreme Lodge through our representatives to that body. The necessity for this work is just now imperative, and it would be peculiarly gratifying to us if to our jurisdiction could come the honor of supplying so great and important a need. Let us make an effort in this direction.

The future welfare of the Order will no doubt depend largely on the action our Grand Lodge shall take in support of the Supreme Master Workman, in his efforts to uphold the dignity of the Supreme Lodge and the laws of the Order. The hopes of loyal Workmen will not be disappointed. Violators of fraternal obligations will find no comfort in the doings of California Workmen. They believe that no one has any business to remain in the Order who is disloyal. If he will not quietly step out he should be forced out.

About Obligations.

It has become so common a thing for men to join a multiplicity of societies, and to take the required obligations prescribed by each, that it has come to pass that the business is done in a sort of oblivious or mechanical manner. It is safe to say that one-half the members of fraternal organizations do not know what their obligations require of them. They may be aware of full approval of the things required when the obligation was assumed, but the words went into one ear and out at the other, leaving no impress behind; or if any, of so slight a nature that a little time has wiped it away altogether. It cannot be thought for a moment that 10,000 men in Iowa, or half 10,000 gathered around the Workmen's altar with even possible perjury in their hearts, yet everyone of them who have, while in the Order, refused to aid and enforce a strict observance of the constitution, laws and edicts of the Supreme Lodge stands before God and the brotherhood a moral perjurer, to-day. The slight weight with which members of various societies have come to place upon their obligations is do doubt largely due to the laxity with which the societies themselves have dealt with obligation violators. That class of people should be summarily dealt with and at once expelled. No person has any business to join a fraternal society and then refuse to obey its laws. If the laws are conceived to be wrong, it is proper, in the way provided, to seek their repeal or modification; but if this cannot be accomplished, those still dissatisfied should withdraw at once, and not remain as a disturbing element. But those who will disturb and will not step down and out, should be forced out. A member who will violate his obligation, and so destroy, so far as he can, the only tie that binds his society together is not a fit person for good men to associate with, and the sooner he is cast off, the better.

The General Relief Committee has announced that a yearly grand picnic will be held this year. Time and place has not been agreed upon, but Belmont seems to meet with general favor.

Representatives to the Grand Lodge.

The following is a list of representatives to the Grand Lodge, A. O. U. W., which will meet in this city Tuesday, April 4th, at Dashaway hall, Post street, between Kearny and Dupont:

California, No. 1, Oakland—Geo. E. Bugbee, W. H. Wilkinson.
Oakland, No. 2—H. Griffin, S. H. Mitchell, F. M. Smith.
Brooklyn, No. 3—O. Whipple.
San Francisco, No. 4—L. H. Fuller, Chas. S. Fechheimer.
Alameda, No. 5—Fred K. Krauth, Jr.
Occidental, No. 6, Oakland—R. Woelffel, W. G. Hawkett, Wm. Pirrie.
Pacific, No. 7, Oakland—H. T. Smith, Will H. Burrall, Wm. Winnie, A. T. Eastland.
Golden Gate, No. 8, S. F.—A. C. Knudsen, Harry J. Lask.
Harmony, No. 9, S. F.—L. J. Henry, Wm. Decker, James McCann, John R. Fishbeck.
Berkeley, No. 10—F. H. Payne.
Temple, No. 11, North Temescal—Wm. H. Eadon.
San Leandro, No. 12—F. Eber.
Fortuna, No. 13, Napa—William West, W. F. Henning.
Yerba Buena, No. 14, S. F.—Chas. H. M. Curry, J. G. Severance, A. A. Egleston, John Henderson, Jr.
Protection, No. 16, Santa Clara—John E. Lowry.
Enterprise, No. 17, Santa Clara—Geo. Fetherston, S. B. Caldwell, L. Finigan, J. W. Lowry, P. V. Baker.
Haywards, No. 18—A. Harrington.
Bernal, No. 19, S. F.—George Powell, C. L. Houghton.
Saucelito, No. 20—Charles E. Wulferdinger.
Union, No. 21, Sacramento—M. T. Brewer, J. N. Young, S. A. Wolfe, E. F. Aitken and H. J. Norton.
Yolo, No. 22, Woodland—S. T. Pendegast.
Stockton, No. 23—E. De Lano, John W. Payne, Geo. Lissenden.
Redwood, No. 25—Geo. F. Bradbury.
Gilroy, No. 26—A. Robinson.
Unity, No. 27, S. F.—G. Winehill, P. Abrahamson, S. Rosenfeld, P. T. Hollings.
Santa Rosa, No. 28—John Miller.
Petaluma, No. 29—S. J. Hopkins, J. C. Gwin.
Valley, No. 30, S. F.—Wm. Broderick, Wm. Patterson, W. G. Buchanan, J. J. Hayes, Henry Hoeber, C. E. Hunt, A. Heussler, W. B. Lyon, E. F. Loud, F. Fillmore, D. McLeod, J. P. McMurray, T. H. Macdonald, C. C. Terrill, Geo. A. Case, E. H. Black.
Healdsburg, No. 31—H. H. Pyne, A. G. Burnett.
Cloverdale, No. 32—J. F. Hoadley.
Ukiah, No. 33—A. O. Carpenter.

A. O. U. W. Headquarters.

Editors Watchman:—For trespassing on your valuable space I make no apology, for I know that what I am about to write will be echoed from many a Workman's heart. Several months ago a committee was appointed by the Lodges of this city for the purpose of considering the advisability of establishing a library, reading-room and headquarters for the A. O. U. W. in this city. After making a report favorable, nothing more was done in the matter, which was thus allowed to sleep, and has been sleeping ever since. I would like to see this sleep ended and the Lodges take hold and do something to further this object—an object that will in the near future, if carried out in a business-like manner, do much to build up and sustain our beloved Order on this coast; for there is no doubt but that the whole Pacific coast would profit by it. The A. O. U. W. is now very strong in this city, having 23 Lodges, with a membership of about 4,000. Two-thirds of the Lodges would, no doubt, if the matter was earnestly discussed at the Lodge meetings, join and put their shoulders to the wheel, and soon San Francisco could boast of a fine hall, with its ample and commodious Lodge-rooms, committee-rooms, library and reading-room, large hall for entertainments, and everything necessary to carry on the work of the A. O. U. W. in a business and compact way. There the Grand officers would have their offices, the Grand Lodge meet at its annual meetings, and when the Workmen of the East meet with the Workmen of the West at the Supreme Lodge, then the Workmen of San Francisco and of the Pacific coast could welcome them in their own home, with A. O. U. W. over the door. Who will set the ball in motion, and be the first to lead on and help in building the A. O. U. W. hall? I am sure that in San Francisco there are Workmen who could make this a grand success.

What is required is unity of action among the brethren.

I would favor an incorporated company of 10,000 shares at $10 per share, $100,000 or more if necessary. The stock to be held by Workmen, only by Lodges and Brothers.

I merely throw this out as a suggestion, hoping that others will do something to aid in carrying out the object I have in view, in writing this letter.

If any brother Workman will look at it in a business view, I think when I say that the 17 Lodges and the Grand Lodge pay for rents $6,000 per year (which is lost to the Order) the profit of which should belong to the A. O. U. W., they will agree with me that the Workmen of the Queen City of the Pacific ought not to be behind some of the small towns of the Golden State who have and own their beautiful halls, with A. O. U. W. over the door. Union.

Presentation.—Golden Gate, No. 8, had one of those enjoyable affairs so common among Workmen on Thursday evening, March 30th. E. Lewis, P. M. W., in one of his interesting and feeling speeches, presented A. C. Knudsen, acting P. M. W. and representative to Grand Lodge, a fine, solid gold P. M. W. badge, on which is inscribed, "Presented P. M W., A. C. Knudsen, Golden Gate Lodge, No. 8, A. O. U. W., March 20, 1882." Bro. Knudsen was completely taken by surprise, and could only thank his brethren for this honor.

The invitations for the fourth anniversary of Valley, No. 30, which takes place at Union hall, on Friday evening, April 21st, are out. The cards, as specimens of artistic design and good taste, are hard to beat, and will be souvenirs of this grand event. It is quite probable this ball will be ahead of any given heretofore. The prince of caterers, Mr. Chas. A. Seaburg, has been engaged to furnish a grand supper.

New Workman Diploma.—The New Workmen Diploma has received flattering testimonials from the Supreme Lodge and Grand Officers of this State. It is a work of art, and Workmen are being supplied throughout the United States. Copies can be seen and procured at Sol. F. Purdy's jewelry store, No. 16 Fourth street., or copies will be forwarded on receipt of price, $2, or sent C. O. D. Address C. H. M. Curry, No. 16 Fourth st., S. F.

A Commercial View of Life and Death.

The London *Sanitary Record* quotes a recent writer on vital statistics who calculates that of 10 children born in Norway, a little over 7 reach their twentieth year; that in England and the United States of America somewhat less than 7 reach that stage; that in France only 5 reach it, and in Ireland less than 5. He tells us that in Norway, out of 10,000 born, rather more than one out of three reaches the age of seventy; in England, one out of four; in the United States, if both sexes be computed, less than one out of four; in France, less than one out of eight, and in Ireland less than one out of eleven, and he adds this significant computation, based on what may be called the commercial view of the vital question: In producing dead machinery, the cost of all that is broken in the making is charged to the cost of that which is completed. If we estimated by this same rule the cost of rearing children to manhood, if we calculate up the number of years lived by those who fell with the years of those who passed successfully to manhood, there would be found between the two extremes presented in Norway and Ireland —both, be it observed, unnatural—a loss of 120% greater in the first year of life, 75% greater in the first four years of life, and 120% greater in the years between the fifth and the twentieth, in Ireland than in Norway. In Norway the average length of life of the effective population is 39, and rather more than a half, years, in England 35½ years, in France not quite 33 years, and in Ireland not quite 29 years. Thus, again comparing the best with the worst of a scale of vitality, in which both are bad, in Norway the proportion of the population that reaches 20 survives nearly 40 years, or four-fifths of the effective period, to contribute to the wealth of the community; while in Ireland the same proportion survives less than 29, or considerably under three-fifths of the effective period.

The best of

Through Dewey & Co.'s Scientific Press Patent Agency.

No. 252 Market Street. Elevator, 12 Front St., S. F. Telephone No 658

OUR U. S. AND FOREIGN PATENT AGENCY presents many and important advantages as a Home Agency over all others, by reason of long establishment, great experience, thorough system, intimate acquaintance with the subjects of inventions in our own community, and our most extensive law and reference library containing official American and foreign reports, files of scientific and mechanical publications, etc. All worthy inventions patented through our Agency will have the benefit of an illustration or a description in the MINING AND SCIENTIFIC PRESS. We transact every branch of Patent business, and obtain Patents in all countries which grant protection to inventors. The large majority of U. S. and Foreign Patents issued to inventors on the Pacific Coast have been obtained through our Agency. We can give the best and most *reliable* advice as to the patentability of new inventions. Our prices are as low as any first-class agencies in the Eastern States, while our advantages for Pacific Coast inventors are far superior. Advice and Circulars free. DEWEY & CO., PATENT AGENTS.

Hints about Eating Breakfast.

Having tested a number of meals in a general way, eating more or less each time, find out as near as may be what is the proper amount for a meal. Begin with a very light breakfast of ordinary food, such as you have been accustomed to, and note the number of hours you can go without feeling a want of more food. For a very light breakfast, say one roll, a cup of coffee and a very small piece of meat, three hours or less will be found the limit. This is not offered as a rule, but as a suggestion, for it makes a vast difference what you do in those three hours. A given amount of food will go farther in manual labor, as brain work is more exhausting than hand work. The next time try a little more, and in the course of a dozen breakfasts you will learn to judge pretty closely what you require to carry on your work till the hour of the next meal. Having found out just what you need, never on any consideration, take more. Never mind how nice the steak, how tempting any food may be, shut right down on the whole eating business the instant you have had enough. Too little can be repaired by eating a light lunch before the next meal. Too much cannot be repaired, and you must pay for the indiscretion. In all this there must be plain common sense. Do not imitate the invalid who kept a pair of scales on the breakfast table to weigh his daily bread. Eat and be satisfied, and then stop.—*Food and Health.*

THE steamer *Julia*, a double-ender, will soon be put on the route between Vallejo and the Junction, and will carry wagons and teams, a wagon road being in course of construction from the Junction to connect with the roads of Contra Costa county.

The Game Law.

The enforcement of the law prohibiting the killing of game at certain seasons of the year has heretofore been very lax, but the organization of sportsmen's clubs will probably result in a due observance of the statute, as the members are determined that as far as they are able, the law shall be strictly enforced, and all violators prosecuted to the fullest extent. The following is an abstract of the sections referred to:

Every person who, in any of the counties in this State, between the 15th day of March and the 15th day of September, in each year, hunts, pursues, takes, kills or destroys quail, partridge or grouse, or any kind of duck, or rail, or marsh hens, is guilty of a misdemeanor. Every person, who, in the State of California, between the 1st day of January and the 1st day of July in each year, hunts, pursues, takes, kills or destroys doves, is guilty of a misdemeanor. Every person who, at any time, takes, gathers or destroys the eggs of any mallard, wood or summer duck, red-head, teal, gadwell or gray duck, or any other species of wild duck, is guilty of a misdemeanor. Every person who shall have any of the aforesaid game, or any male deer or buck, or any female deer or doe, or any antelope, elk or mountain sheep in his possession at a time when it is unlawful to kill the same within the county wherein the same is found, shall be *prima facie* evidence in any prosecution for a violation of any of the provisions of this section, that the person or persons in whose possession the same is found killed, took or destroyed the same in the county wherein the same is found, during the period when it was unlawful to take, kill or destroy the same.

Section 631 of the Penal Code is amended so as to read as follows: Any person or persons who shall, at any time, net, pound, weir, cage or trap any quail, partridge or grouse, or who shall take from any net, pound, weir, cage or trap any quail, partridge or grouse, retain in his possession, or sell or give away the same, is guilty of a misdemeanor.

SAND BAG FOR THE SICK-ROOM.—One of the most convenient articles to be used in a sick-room is a sand bag. Get some clean, fine sand, dry it thoroughly in a kettle on the stove; make a bag about eight inches square of flannel, fill it with the dry sand, sew the opening carefully together, and cover the bag with cotton or linen cloth. This will prevent the sand from sifting out, and will also enable you to heat the bag quickly by placing it in the oven, or even on top of the stove. After once using this you will never again attempt to warm the feet or hands of a sick person with a bottle of hot water or a brick. The sand holds the heat for a long time, and the bag can be tucked up to the back without hurting the invalid. It is a good plan to make two or three of the bags and have them ready for use.

SICK-ROOM.—Food should not be left in a sick-room, but after the patient has tasted of it remove it, if no more is wanted, immediately. Never keep it by the sick one with the hope that he or she may partake of it by-and-by.

A Glimpse at a Packing House.

The packing of meat products is a prosaic subject to write about; nevertheless, it is one of the most important industries on this coast and, as such, a few facts gleaned from a personal inspection of one of the largest pork-packing houses on this coast will no doubt prove of interest to our many readers. We have long promised ourselves the pleasure of visiting one of these establishments and of learning something of the *modus operandi* of the converting of the raw product into choice hams, bacon, corned beef, lard, etc. It necessarily occurred to us which establishment offered the best means and facilities of affording an insight into the business, and knowing that one of our prominent Workmen was the owner of the largest packing house on this coast, thither were our steps directed.

The San Francisco Packing and Provision Co. was originally established, in 1873, by several of our well-known provision merchants, and W. K. Deitrick was chosen manager. The corporation prospered from the start, and at the end of two years Mr. H. Rossbach purchased a controlling interest in the corporation and succeeded to the management, who eventually purchased the entire stock of the company and became the sole proprietor. He continued at the head of affairs, increasing and expanding the trade of the house until his death, in 1879, when he was succeeded by his son, Frank W. Rossbach, P. M. W., of Olympic Lodge, No. 127.

The premises occupied by the San Francisco Packing and Provision Company is located at Nos. 513 to 521 Washington street, having a frontage of 50 ft. and extending 137½ ft. back to Merchant. In connection with this, in the portion known as the Washington market, are two stalls devoted to the retail trade, one supplying families with fresh meat products and the other with bacon, hams, corn beef, etc. Entering at the main entrance on Washington street we found ourselves surrounded on all sides with goods ready for shipment and awaiting the calls of the trade. In the rear is a large room devoted to rendering the lard. Here were seen a number of men busy at work. The pure fat is put into a large kettle capable of cooking 3,000 pounds at a time, where a heavy fire soon renders it, and from thence it is conveyed by a spout into a larger receptacle, where a man is constantly stirring the mass of liquid with a rake-like implement. An idea of the extent of the trade of this house may be gathered from the fact that 21,000 cases of the California lard has been sold during the year, and Bro. Rossbach informs us that such is the popularity of the brand that his resources are taxed to the utmost in order to meet the demand of the trade. The rendering of lard so as to have it sweet and free from all ingredients is a matter that has been made a careful study by Bro. Rossbach, who has succeeded in his endeavors, claiming that the lard put up by him is equal to the Eastern in all respects. The idea is a false one that Eastern lard is better than California. Such being the case, it is to our interest to encourage and foster the home industry. He is also agent for the Whitehorn & Alton's pure, refined family lard, of Chicago, of which 12,000 cases have been sold during the past year.

Descending into the cellar an immense area is discovered devoted to the curing, packing, etc., of the meat products. The meat is first delivered on the main floor, where, after a rigid inspection by Bro. Rossbach in person, as it is an important feature of the business, and only the best grain-fed pork is received, it is delivered to the dressers, who, after ridding the meat of all superfluous fat and other matter, pass it down a chute into the curing-room. The sides for bacon and the hams are then placed on long tables and salted with the best Liverpool salt, where it remains for two days. It is then taken and placed in large hogsheads, where it remains until ready for smoking. There are three smoking-rooms, each capable of holding 12,000 lbs. apiece, and after remaining three days, the cured meat is taken down, packed, and is then ready for the market. In the cellar are large tubs filled with corned beef, which is in great demand on sea-going vessels and steamers. In another part of the cellar is a large space devoted to storing the Liverpool salt used in curing, an average of 75 tons being constantly kept on hand. There is also a large room devoted to the storage of saw-dust for use in the smoking house. Wood is first used to kindle the fire and afterwards saw-dust is employed.

The reputation this house has gained for the superior quality of its goods is not confined to this State alone, for the foreign trade is quite large. An order is now filling for 40,000 lbs. of meat products to go to China, Japan, and also Victoria, B. C. The amount of sales last year reached 3,000,000 lbs. Bro. Rossbach paid out for labor over $8000 last year, employing from 15 to 20 hands.

Perfect cleanliness is scrupulously maintained throughout the entire establishment, notwithstanding the greasy nature of the products handled. Bro. Rossbach has been in the business for 13 years, and is thoroughly acquainted with all its branches. He has gone on increasing his trade, until, at present, he stands among the leading packers of this State. His goods have attained such a wide reputation, based upon thorough knowledge and careful attention to his business, that our leading provision merchants have come to recognize his brand of goods as equal to the best. The packers have a Board organized for the purpose of regulating matters connected with the trade, of which Bro. Rossbach is Secretary.

In connection with the establishment is a slaughter-house located at Butchertown. There is accommodation for holding 1,800 hogs at any one time.

Bro. Rossbach is a young man. He graduated from college at the age of 13, and immediately went to work to learn the business of his father (now deceased), and it is through the experience thus derived in early years that he is enabled to conduct a manufacturing business such as requires a great amount of experience and practice. Bro. R. is a thorough butcher, to use the term, not alone to manufacture, but to kill and dress a hog, etc.

We take pleasure in calling attention to this house, tending, as it does, to show the standing of our Order among the business community. Anybody desiring to visit this establishment will find the proprietor both courteous and willing to show them through the various departments, and it will well repay their time.

A Caning at Campi's.

About fifty Workmen of Triumph, No. 180, with their friends and guests, assembled at Campi's Restaurant on Thursday evening, March 30th, where a grand banquet had been prepared in the highest style of this noted place. At 9 o'clock Bro. Nicolaysen, Receiver of Triumph Lodge, was marched in and seated at the head of the table, when James Watterman, P. M. W., in an appropriate speech recited the earnest work of the Receiver, and presented him with a magnificent ebony cane, fully and heavily mounted, with gold head. On the end of the handle are engraved the anchor and shield, with the letters A. O. U. W., the top of which are the cross keys, the insignia of his office. The inscription is in these words: "Presented to F. N. Nicolaysen by his friends of Triumph Lodge, No. 180, A. O. U. W." Bro. Nicolaysen said: "You have completely taken me by surprise. I am not deserving of this honor. What I have done has been for the good of the Order. I am out of my latitude, and cannot speak; but from the bottom of my heart I thank you." After the good things had been disposed of, and the cigars had been passed, impromptu speeches were made by the Grand Master, Jas. Watterman, W. J. McKay, Geo. T. Shaw, District Deputy, Dan. Seawell, Ernest Lichau, M. Lipman, D. Finley, H. H. Russell, C. D. Coon, A. Buswell, R. Levi, and a number of others. It was a grand good time; the best of feeling prevailed throughout the evening, and at the close the following impromptu lines were given by the Grand Master. The auspicious and happy affair was brought to a close at a late hour, with song, anecdote and good cheer.

May the present to-night—
That glitters so bright—
  Be ever remembered with love;
And pure as the gold
That its heavy head holds,
  May its owner's life hereafter prove.

This token, so dear,
Doth the brother's heart cheer,
  And his pulse beats triumphantly, too;
And long may all live,
To give and receive,
  To members fraternal and true.

Success to all here!
Do right without fear!
  And work 'neath the light of the sun;
By day and by night,
Still strive for the right,
  And you'll hear the warm plaudit, "Well done!"

THE FUNERAL of Bro. Henry Lacroix, who died in this city on Sunday, the 12th inst., took place from Shiel's building, 32 O'Farrell St., on Wednesday, the 15th inst. The services were held in the beautiful Lodge-room of Yerba Buena Lodge, No. 14, A. O. U. W., of which our deceased brother was a member. The services, which were very impressive, were commenced by the singing of the hymn, "Nearer, My God, to Thee," led by Mrs. Blake Alverson, assisted by Bros. Butt and Thomas, Bro. F. B. May, P. M. W., acting as organist. After the singing of this hymn, Bro. Master Workman S. F. Purdy, in very appropriate and feeling words, spoke of the sad and solemn event that had called us together on this occasion, and then called on Rev. Bro. E. R. Dille, pastor of the Central Methodist Episcopal church of this city, who offered an earnest prayer, which was followed with the singing of "Flee as a Bird," by Mrs. Blake Alverson. Rev. E. R. Dille then delivered a very eloquent and earnest address, referring in a very feeling manner, to the many manly qualities and virtues of their deceased brother, and also speaking in the highest terms of our Order, lauding its mission, viz., that of helping one another to bear the ills of life and providing for one another's families when we shall have exchanged this life for the one beyond the grave. He also offered words of consolation and comfort to the bereaved widow, and commended her and her three fatherless children to the tender mercies of their heavenly Father. After the singing of a hymn by Mrs. Blake Alverson, the funeral procession, preceded by the members of the Lodge, over 50 in number, started on its solemn march to the Odd Fellows' cemetery, where all that was mortal of our brother was laid to rest. At the grave the beautiful and impressive burial service of our Order was very appropriately rendered by Master Workman Purdy and Past Master Workman May, and the funeral ode was sung by the Lodge.

BRO. S. V. MOONEY, manager of the John A. Robeling's Sons Co., wire-rope manufactory, at Trenton, N. J., depot, 14 Drum street, have the largest stock of iron and steel wire rope; also, telegraph wire of the highest electrical qualities and the best materials. The New York and Brooklyn suspension bridge, W. A. Roebling, chief engineer, is being constructed by this firm, as also a large number of the leading suspension bridges in the United States, including the suspension bridge at Niagara Falls. Furnishing wire cable and telegraph wire of the highest electrical qualities a specialty.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
B. W. CROWELL—Humboldt and Trinity counties.

Attend to This.

Our subscribers will find the date they have paid to printed on the label of their paper. If it is not correct, or if the paper should ever come beyond the time desired, be sure to notify the publishers by letter or postal card. If we are not notified within a reasonable time we cannot be responsible for the errors or omission of agents.

A TURNED LEAF will point out the article supposed to be of special interest to persons receiving sample copies of this paper.

THE WORKMEN GUARANTEE FUND ASSOCIATION, organized for the special and exclusive benefit of members of the A. O. U. W. by giving to those who desire it an additional protection of $1,000 at a cost of about $8 a year, is meeting with unqualified success. Established only about two years ago, it has already issued over 1,600 certificates. Past Grand Master Workman, Wm. H. Jordan is the President; Grand Receiver, C. H. Haile, Treasurer; and Past Master, E. M. Reading, Secretary; all Brothers in high esteem in the Order, and having the respect and confidence of the entire fraternity.

Employment.

A medium-aged man of family is desirous of immediate employment (at very reasonable wages), as carpenter, assistant book-keeper, or for office work. Will go to the country, but prefers S. F. Can give satisfactory reference in S. F. or Oakland. Is a member in good standing of one of our leading fraternal societies. Address C. E. L., at No. 412 Jones St., S. F.

MANSION HOUSE.—First-class in every respect, and reasonable prices.—When you visit Stockton stop at the Mansion House. Free Coach to the house.

J. H. CROSS, Proprietor.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Rooms and Board in Oakland.

Rooms (with or without board) can be had in Oakland on reasonable terms, with a family of English people, location, a pleasant one within 3 blocks of Postoffice. Good references furnished and required. Call or address No. 1274 Franklin St., Oakland, or enquire at the office of this paper.

Canvassing Agents.

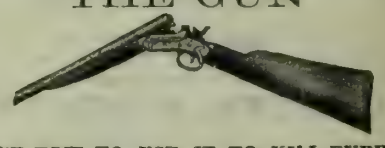
We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

HOME BENEFIT
ASSOCIATION,
Of San Francisco, Cal.
INCORPORATED UNDER CALIFORNIA LAWS.

The Home Benefit Association is an organization for Mutual Life Insurance. A Benefit Fund is created by payments from each member of sums assessed in proportion to age and amount of insurance.

The amount of insurance may be $1,000, $2,000, $3,000 or $5,000 in any one class.

The age to which persons are eligible for membership is 64 years, but those over 54, at the time of joining, are limited to $3,000 insurance in any one class. Vacancies, caused by deaths, or withdrawals, in any class, which has once been full, will be filled only from applicants under the age of 50 years.



TRUSTEES—Frank Eastman, Charles H. Fish, Jesse S. Wall, William C. Randolph, John H. B. Wilkins, Harvey W. Snow, George T. Hawley, Frank C. Havens, Ambrose Cornwall.

☞ Store and Office Fitting. ☞ Jobbing attended to. All kinds of Elevators Repaired. Grave fences made to order.

WE herewith give a front view of one of the largest furniture houses on the Pacific coast. The house was built especially for this firm. It has a frontage of 40 ft. on Market St., and 170 ft. deep, running through to Stevenson St. The building is four stories with basement; the upper floor is used for manufacturing purposes, the third story as a wareroom, and the first and second stories as sales-rooms. A large elevator is used in this building; and there are employed by this firm from 40 to 50 skilled workmen all the year. The immense stock represents all kinds of furniture used in humble life, and also of the finest class used in our palatial residences, ranging in price for bedroom sets from $20 to $500, and side-boards from $15 to $800. Combining home manufactured goods with all the latest patterns and newest designs of imported goods. Although the house deals in a general line of furniture, curtains, window draperies and lambrequins, pedestals, Louis XV. ebony furniture, etc., still they are prepared to furnish a private house or hotel from the floor up. Bro. F. S. Chadbourne is a representative Workman; one of the leading and enterprising men of this great city, and with the assistance of an able and polite corps of assistants, take great pleasure in showing visitors through this labyrinth of furniture, etc. It is with pleasure and pride that we have frequent occasion to refer to our leading citizens and solid business men as one of the great organizations who are helping us and each other in this humanitarian work.

New Colors in Upholstery Goods.

With the revival of the Renaissance and the prevailing æsthetic element in household decoration, especially abroad, innumerable new and exquisite colors and shades have sprung up in all classes of upholstery stuffs. Primary color combinations are now almost obsolete, although the conventional triple combinations with which every designer is familiar will probably live forever (through the patronage of the masses) as standard rules of crude harmony.

But these rules, standard and conventional though they may be, are ignored just now with consummate disregard for precedent and with an apparently reckless desire to reach novelty in effects. In the axiom of primary color harmony, orange and reds are supposed to result in discord when used together; though in the new velours frise, satin de gene, and satin lampage they are combined with rich effect.

Authorities at one period of decorative art universally accepted the following formula, and designers observed it with profound obeisance.

Yellow—With white, gray, or black—and red.

Red—With white, gray, or black—and blue.

Blue—With white, gray, or black—and yellow.

It will be seen that by this system two primary colors are used, such as yellow and red, red and blue, or blue and yellow, in combination with white, gray or black.

Another conventional principle was combining yellow and green, red and orange, red and violet, red and green, blue and orange, or blue and violet, with white, gray or black.

Of course, these combinations depend for their harmony greatly upon the proportion in which they are used together, but, at best, they were bad rules for any colorist to adopt.

The new colors which are in use to-day, particularly upon foreign upholstery goods, are not different from what could have been prepared years ago, but their liberal use and application set at variance all previous laws of harmony, and the effects produced are as rich as they are novel.

The peculiar color of a crushed strawberry is known to everybody, and all can easily imagine its appearance in plush or velours, in the several shades which are run off.

Cuivre rouge is a shade which has a grim, dusty appearance, feu (fire) another shade having a dazzling effect when the light plays over the nap; the sheen upon this colored goods is exquisite, and suggests to our minds other shades, which would be very popular if procurable.

Something on this same order is the capote or blue, the capucine (a shade of garnet) and brique, a peculiar shade of red. Then gros blues, or heavy rich shades, which just at present are very much in use, and, indeed, the sapphire color has also proved of service, and commends itself by its soft beauty. All these, with bottle greens, apple olives, ocean blues, ciel (sky) blues, vieux (old) blues and rouge Romaine (Roman red), are forming what we believe to be the nucleus of a new school of color harmony.—*The Carpet Trade Review.*

HOW TO DISCOVER SEWER GAS.—I purchased several ounces of essence of peppermint. Late in the evening I went to the fourth story, turned on the water from the hot-water faucet for several minutes, and then, allowing the flow of hot water to continue, poured the essence into the outlet from the basin. Returning to my library, I inquired from my wife if she noticed any peculiar smell in the house. She said, "No." I requested her to go to the kitchen and ask the same question. She did so, and immediately one of the servants exclaimed: "Why, I was just telling Ellen that there was a smell of peppermint candy in the kitchen." The next day, with my plumber, repeating the experiment, and tearing up the cellar bottom, we found a crack in the soil pipe. I understand the Health Department of this city has within a year to two adopted this mode for detection of sewer gas.—*N. Y. Post.*

The Opportunity in the West.

The Arizona *Democrat* says: If nature has endowed you with some energy, a fair amount of "grit," a modicum of common sense, a willing hand and a not too sluggish head, come West! If you are willing to earn your bread in accordance with the fore-ordained destiny of man, come West! If you are willing to take your chances in the fierce and eager race for wealth and distinction among the young, active and enterprising element of the frontier, come West! If you are prepared to fight the battle of life, and have the nerve and staying qualities that can snatch victory from the jaws of defeat, come West! If you are the happy possessor of a light heart that can smile at fate and take the whips and scorns of outrageous fortune serenely, come West! If you have a good constitution, an honest heart and a not too elastic conscience, come West and grow up with the country. You may, perhaps, think that we are asking for too many good qualities and natural gifts in a young man from the East. We are aware that it is difficult to find many who will fill the bill, but we are also aware that these are the qualities that command success in a new country. They are qualities to some extent native and to the Western manner born. They are the rule and not the exception among the young, active, go-ahead spirits of the border, and he who is deficient in them had better not enter the lists for fame or fortune in the far West.

We claim that to-day there is not a finer field on the globe, for the display of every attribute that goes to make a man, than the Western States and Territories. The doctrine of the survival of the fittest here finds its truest exposition; merit and true manhood here finds recognition and appreciation. The youth who was born with a silver spoon in his mouth is treated with no more consideration than his plebian neighbor who had to be content with an iron one. Men are placed upon their natural level, with a fair start in the race of life, and the goal is first reached by him whose pluck, and bottom, and staying qualities are the best. So, young man, if you think that nature has equipped you with the gifts that will enable you to hold your own in the rough-and-tumble fight for fortune on the distant frontier, by all means, come on. We will give you a hearty welcome, a fair start and a good send off. You will find a country worthy of your best efforts, and a people not slow to acknowledge them. You will find a land with grand resources, blessed with a perfect climate, and endowed by the Creator with every natural advantage to make a great and prosperous State. So, come, be one of us, take your share in our grand heritage, cast your lot with our future, and take part in the glorious fruition of our hopes, so near at hand. Turn your steps to a region, the sun of whose future greatness, just rising above the horizon, is shedding its golden beams over valley, mountain and mesa, and whose midday splendor will cover with a blaze of glory this favored land. Come to Arizona, the mineral monarch of the Western world, which will yet become—

"The State of every State the pride,
Beloved of Heaven and all the world beside."

TO PREVENT SPERM OIL FROM GUMMING.—If kerosene oil is added to sperm oil it will prevent the latter from gumming. Mix thoroughly 100 parts of oil with 4 parts chloride of lime and 12 parts of water. Now add a small quantity of the decoction of oak bark to destroy all traces of gelatinous matter still remaining, and allow the impurities to settle. Next agitate the clear part with a little sulphuric acid; settle once more and remove the acid by washing, and see to it that none of the acid remains. If the oil shows any signs of becoming rancid, it ought to be boiled with water and a little bicarbonate of magnesia for about 15 minutes, when it will likely lose the power to redden litmus paper.

IN the City of Mexico the press is almost unanimous in denouncing the importation of negro labor for railway work.

WILLIAMS'
BALSAMIC
CREAM OF ROSES.

For Beautifying the Complexion, Softening the Skin and Producing that Natural Freshness to the Complexion not obtained by any other Preparation.
DIRECTIONS:
Apply to the face and hands at night, just before retiring, and apply a little in the morning, rubbing it well into the skin. After being in the sun any length of time, or riding when the wind has been blowing, a small quantity of the Balsamic Cream of Roses will prevent tanning or roughness, and is sure to bring to the complexion that ruddy and healthy glow so much sought for, and seldom obtained. Its action on the skin is to restore natural circulation to the blood.
JOHN R. WILLIAMS, Proprietor,
Stockton, Cal.
Price, 50 cents. For sale by all Druggists.

The NEW ENGLAND LIFE is the only Company doing business on this Coast that is governed by the MASSACHUSETTS NON-FORFEITURE LAW.

Every Policy-holder is protected by this law against the great risk of forfeiture and loss to which he is subject if a member of a Company organized outside of Massachusetts. The new law of 1880 provides that

FIRST—No Policy shall become forfeited or void for non-payment of premium after the payment of two annual premiums.

SECOND—In default of payment of subsequent premiums it is binding on the Company to issue a Paid-up Policy WITHOUT FURTHER NEGOTIATION OR STIPULATION.

THIRD—On failure of insurable interest the Policy-holder may demand and receive the net value of the policy in CASH

LIBERALITY AND EQUITY in its relations with Policy-holders have always been the governing principles of this Company, and the conditions of its policies in regard to limits of Residence and Travel are of the most liberal description. Before insuring in any other Company examine the application and policy contract of the NEW ENGLAND LIFE, and practical working of the New Massachusetts Law.

The Relief Committee.

A general report of the work accomplished by the General Relief Committee of this city since its organization to the year ending Jan. 15, 1882, has been issued. The Board of Relief was organized Aug. 4, 1878. For the term ending Jan. 12, 1879, there were 43 applications for employment, and positions obtained for 31; receipts, $86.75; disbursements, $10. For the term ending July 13, 1879, there were 23 applications for employment, and 16 furnished; cash on hand, $76.75; disbursements, $62.50. For the term ending Jan. 10, 1880, applications for employment, 27; furnished, 18; receipts, $165.25; disbursements, $102.44. For the term ending Aug. 14, 1880, applications for employment, 22; furnished, 9; five brethren furnished with financial aid; receipts, $1,389.64; disbursements, $1,186.72.

For the term ending Jan. 14, 1882, five brothers were pecuniarily assisted and employment secured for 19; receipts $533.72 disbursements, $88.50, leaving a balance on hand of $445.22. We quote from the report of E. M. Reading, Secretary for the term ending Jan. 14, 1882.

We have attended and cared for two brothers at the hospital, relieved their necessities, nursed them through their sufferings, cheered them by visitation, and in other ways contributed to their comfort and happiness. We have visited and relieved the families of our unfortunate brothers in distress, and through the instrumentality of this committee suffering has been robbed of its pain, and destitution and hunger have been averted. Such has been the work of this committee for the last six months, and such has been its history for more than two years, while I have been connected with it. And now, as your Secretary for two years, I feel proud of the great good we have done—of the tears we have chased away—of the hope we have renewed—of the bond of brotherhood we have cemented—and last, but not least, of the fact that this committee has proven by its work that the Ancient Order of United Workmen is as grand in its fraternal feature as it is prompt in the discharge of its pecuniary obligations.

Charity Misapplied.

Benevolence is a characteristic of our Lodges. It is a rare case, indeed, where a worthy brother is turned away in distress, if it is in the power of his Lodge to give relief. Oftener the spirit of benevolence carries the Lodges too far, rather than otherwise. Many, very many times, a member's dues and assessments are paid from the funds of the Lodge, when a positive injury is done such member instead of a benefit. Except in cases of known inability on the part of a member to meet his pecuniary obligations, either from poverty, or other untoward circumstance, a Lodge should not intervene between a member and his duty. It is better that everyone should feel that on himself alone depends his good standing in the brotherhood. Most Lodges learn this sooner or later, but often not until they have been out and injured to a considerable amount, and their benefactions wasted on an unprofitable and unappreciative member. St. Paul once said, that he who will not provide for his own household is worse than an infidel, and no doubt he was correct in the opinion. Such a one is certainly not a fit associate for a good and benevolent people. Let him go, and then supply his place with some one more worthy. This is the true policy to pursue. We should never grieve over the loss of a bad member by suspension. A little leaven leaveneth the whole lump, and the leaven of evil is quite as active as the leaven of good.

Our Report.

The very full reports which we give this time in the WATCHMAN, of the Grand Lodge proceedings will be found of great interest and should be reviewed by all interested in the welfare and success of the Order. The report will be found to be somewhat condensed from the official report to be published in pamphlet form, one or more copies of which will be distributed to each Lodge.

We aim in the report to give the essential features, in a condensed manner, so that it may be most readily appropriated by the reader.

The timely publication of such reports in such a form will be apparent to all interested, and its value to the Order is not a little. So comprehensive a report will be useful both to individuals and to Lodges.

Owing to the publication of the Grand Lodge report in this number of the WATCHMAN, we have been obliged to curtail our usual variety of reading matter. We shall, in the next number, however, present more of a variety than usual and make the paper doubly interesting.

HOPE LODGE, No. 1, was instituted in Portland, Oregon, August 9, 1878, with 11 charter members. Oregon has now over 3,568 members, and is in a prosperous condition. Oregon and Washington were separated from the Supreme Lodge 11 months ago, and the increase since then has been five per day.

In the Forest.

Now that the sun's rays are becoming more direct, and the thought of shady retreats forces itself upon the mind, what is more grateful than the cool shade and musical air of the forest to one who has toiled or traveled for hours under the burning sun? The forest and its charms have furnished themes for the grandest poems, and they fill with pleasure those who can feel poetry they cannot express. The little scene which the artist has caught in the picture upon this page will suggest to many the pleasures of summer rambles. It will be good to let the scene be a prompting to the over-busy ones to escape to the restful quiet of the forest, that their tired natures may be refreshed by it, and their minds and bodies strengthened for longer life and more zealous deeds.

MOONLIGHT IN THE FOREST.

MR. S. P. VANDYKE, late a member and P. G. of Unity Lodge, No. 131, I. O. O. F., who was killed by the falling of a windmill at Haywards, had recently signified his intention of joining Valley Lodge, A. O. U. W. Delays sometimes are dangerous.

THE salary of the Grand Recorder of Missouri for the present year has been fixed at $3,000, he to pay all clerk hire out of this sum. The salary of the Grand Receiver of that jurisdiction is $500 per year. The total membership of the Order in Missouri is 7,343.

A. O. U. W. in Grand Council.

Fifth Annual Session of the Grand Lodge, A. O. U. W. of California.

Convened at Dashaway Hall, San Francisco, April 4, 1882.

The Grand Lodge was opened in due form by G. M. W., W. H. Barnes.

Officers present—P. G. M. W., Clay W. Taylor; G. M. W., Wm. H. Barnes; G. Overseer, Jas. T. Rogers; G. Recorder, H. G. Pratt; G. Receiver, C. H. Haile; P. G. M. W., H. G. Pratt, M. T. Brewer, Clay W. Taylor, M. W. Fish; G. Trustees, Chas. G. Reed, I. A. Dunsmoor; Corp. Directors, W. H. Barnes, H. G. Pratt, D. S. Hirshberg, Geo. Sanderson, J. M. La Rue, A. P. Murgotten, J. H. Flint, T. A. Lewis.

Officers absent—Grand Foreman, F. G. Beatty; Grand Guide, Eugene J. Gregory; Grand Watchman, William Wiltse, Jr. A dispatch stated that G. F. Beatty was unavoidably detained. G. W. Wiltse, Jr., was indisposed.

The Grand Master appointed Grand Overseer James T. Rogers, G. F.; J. H. Barrett, G. O.; Harry J. Lask, G. G.; Seneca Davis, G. W.

The Grand Master appointed the following Committee on Credentials: H. Hoeber, Andrew Brown, C. E. Mulloy.

At half-past 10 o'clock the Grand Lodge took a recess of half an hour.

The Committee on Credentials made the following report, which was on motion adopted:

Grand Lodge Ancient Order of United Workmen of California: Your Committee on Credentials beg leave to submit the following report: They have examined the certificates of the following named Representatives (see list on page —— of this paper), and find them correct.

We find that the following Lodges have not made returns of Representatives: Nos. 65, 139, 148, 157, 160, 166, 176 and 192.

We have also examined the certificates of the following P. M.'s (see list), and find them correct and entitled to receive the Grand Lodge degree, as well as those Representatives who have not previously received it.

We have also examined the certificates of the following Recorders, Financiers and Receivers (see list), who have served three consecutive years and find them correct, and recommend that the Grand Lodge degree be conferred upon them, in accordance with the law of the Supreme Lodge.—HENRY HOEBER, C. E. MULLOY, A. BROWN.

The P. M. W. degree was conferred, in accordance with above report.

A motion to admit Mr. L. Weil, as Representative of Wahtoga Lodge, No. 186, was lost.

M. T. Brewer offered the following resolution:

WHEREAS, The Supreme Master Workman has found it necessary, in sustaining the dignity of the Order and the laws of our Supreme Lodge, to suspend the Grand Jurisdiction of Iowa for declining to comply with our laws; therefore, be it

Resolved, That, while the Grand Lodge of California regrets the necessity for such action, we desire to place upon our records, as the first business of our fifth annual session, our hearty approval of the action of Supreme Master Workman Baxter.

Adopted, and substance ordered telegraphed to S. M. W. Baxter.

On motion of W. B. Lyon, Past Master O. Whipple, of No. 3, was elected Assistant Grand Recorder, for the session.

On motion of Rep. Kinsley, the following committee was appointed, on resolutions: J. W. Kinsley, F. H. Payne, E. M. Reading, L. Finnigan, F. K. Krauth, Fred. W. Bell, G. B. Nichols.

Recess till 1:30 P. M.

Afternoon Session.

The minutes of last session being in print, the reading was, on motion of H. G. Pratt, Grand Recorder, dispensed with. Roll called.

On motion, the G. M. appointed the following Committee on the Degree of Honor: W. B. Lyon, A. P. Murgotten, F. W. Rossbach, A. J. Holloway, F. S. Poland.

The G. M. W., Wm. H. Barnes, then read his report, which will be found on the next page.

Grand Master Workman's Report.

Officers and Members:—Fourteen months have passed since last we assembled as a Grand Lodge. The year has been fraught with success, and the approval of our Heavenly Father has rested upon our efforts. Otherwise you and I would not be here in health and strength to rejoice over the wonderful progress of Workmanship in California.

You committed to my hands 193 Lodges, and something over 11,000 members. I return that trust to you with 218 Lodges, and nearly 15,000 brethren.

This grand result is due to the combined, united, energetic efforts of all, and not to any one individual. Briefly as possible I submit an account of my stewardship. As my appointments were published in the last Journal, I deem it unnecessary to reiterate them here, but append the following table showing the labor that has been done by my faithful Deputies throughout the State:

District	Deputy	No. of Lodges.	Official Visits	Miles Traveled	Compensation by Lodges.

DEGREE OF HONOR LODGES INSTITUTED.

The following were instituted in 1881 by G. M. W. Barnes, with the exception of No. 7, instituted by D. S. Hirshberg:

Date.	No.	Name.	Locality.	No. of Charter Members.
Feb. 18	5.	Diamond	Hollister	62
Mar. 1	6.	Magnolia	San Jose	99
Apr. 6	7.	Bay Leaf	Walnut Creek	35
Mar. 10	8.	Aurora	San Francisco	41
July 5	9.	Keystone	Amador City	32
Oct. 29	10	Golden Dawn	San Francisco	21

OFFICIAL VISITATIONS.

Believing that the prosperity of an Order requires not only the visitation of Lodges, instruction in "the work," and encouragement of the membership, but that to successfully increase it is necessary that the aims, objects, progress and results of a fraternity must be properly presented to the public, I have endeavored as far as possible to combine these ideas during my term.

No bill has been rendered, or charge of any kind ever made to a Lodge for any services, either private or public. In a number of instances where public addresses have been made, the committees have insisted upon my accepting amounts to aid in paying expenses, which have been devoted to said purpose.

GRAND MASTER WORKMAN'S EXPENSES, ETC.

The following are the principal items of expense incurred by the G. M. W. from Feb. 1, 1881, to April 1, 1882: Traveling expenses, $781.50; postage, express and telegrams, $56-.45; copying letters, clerk hire, etc. (60 weeks), $120; total, $957.95.

There have been other expenses incidental to the position, consequent upon the time required to discharge its duties, but the office was accepted with a full knowledge of its demands, and therefore such items have no proper place in this report. As has been stated, some moneys have been received from various committees, which, with $750 drawn from the treasury for the 14 months, have all been expended.

A brief synopsis is as follows: Visitations made, 133; representatives met from 202 Lodges; miles traveled (outside of San Francisco), 13,-344; letters written, 1,596; printed documents sent out by G. M. W., 980; public addresses, 59; dispensations, 107; beneficiary certificates refused, 25.

DECISIONS.

Many questions have been submitted during the term. A large majority of them have been answered by simply referring to laws existing upon the subject. Others have been presented for which law has had to be made; and when such have occurred, I have availed myself of the decisions of the older Orders, and of the best fraternal counsel attainable upon the matters involved. The following are the most important:

1.—In the early part of the year I held that an applicant could join any Lodge in his district, (county), but the injustice of this being apparent in several cases, I investigated the law upon the subject, and find it to be as follows. (491 Digest). That where a Grand Lodge has laid down no specific rule, a candidate must be initiated in the Lodge nearest his residence, or with the consent of such Lodge, and as there is no such "specific rule" in our laws, I have held it to be for the interest of Lodges and the Order, to require the consent of Lodges at a party's place of residence when he desired to join a Lodge in another town.

2.—All officers of a subordinate Lodge, except P. M.W., are eligible for re-election. Any P. M. W. (not serving his term), is eligible to election to any office in Lodge.

3.—If by sickness an officer is unable to fill his chair the majority of the nights of a term, he does not forfeit the honors thereof.

4.—By-laws of a Lodge are not in force until approved by the Committee on Laws and Subordinates.

5.—A brother joining from a Lodge in same jurisdiction, does not have to be re-examined by a physician.

6.—A by-law prohibiting a Financier from receiving money from brethren except at Lodge meetings is illegal, contrary to the spirit of our Order, and to the decision of the courts.

7.—If a Lodge has but one P. M. W., and he should die, the vacancy must be filled by electing another brother to said office.

8.—Parties from another district can only be admitted by consent of Lodge nearest their residence, upon receiving which the G. M. W. will grant dispensation.

9. D. D. G. M.'s have no right to give the P. W.'s to any persons except the proper officers of the Lodges they install.

10.—When a member who is clear of charges severs his connection with a Lodge by written resignation, all liability of the Order to him or his heirs, or by him to the Order, ceases on the date of the reception of said resignation. No person can be compelled to remain in the Order, except when charges are pending.

11.—A brother cannot hold the office of D. D. G. M. W., and that of M. W. of his Lodge at the same time.

12.—A brother suspended in a Lodge can only be reinstated in said Lodge, and if through ignorance of law another Lodge has admitted him to membership, said admission is illegal and void. He must be reinstated in the first Lodge, take a clearance card and deposit it with the second Lodge, in order to be a legal member of said second Lodge.

13.—A man with one leg or a man with one eye is eligible for membership. It is left to the discretion of the Lodge to decide whether such parties would make good members.

14.—When a brother takes a clearance card and deposits it in another jurisdiction, the dollar in the beneficiary fund to his credit is sent to the Grand Recorder of this State. If he joins another Lodge in this State, it is sent to that Lodge.

15.—A Master Workman left the locality of his Lodge in November, 1880, moving away with his family. The Foreman filled the M. W.'s chair to end of term, and was then elected Master Workman. In February or March, 1881, the former Master Workman returned and claimed the honors of P. M. W. Decided, that he was not entitled to them as he was not in Master's chair at end of term.

16.—A Financier could act as Recorder, but a Recorder cannot act regularly as Financier, without giving bonds. The latter official must be a bonded officer to protect the Lodge.

17.—Neither the D. D. G. M. W. nor the G. M. W., can grant a dispensation to confer both degrees in one evening in an old Lodge, unless notice has been received from the Grand Recorder's office that a beneficiary certificate will be granted to the applicant.

18. While I would not positively prohibit the admission to membership of one or two men in each powder mill or powder works, I deem it decidedly dangerous to admit a number of parties engaged in said business in any one mill, and it must not be done.

19.—When an applicant has been refused admission, or when a J. W. has been refused a beneficiary certificate, all moneys that have been paid by said applicants for initiation and degree fees should be returned to them.

20. Lodges desiring to hold a public gathering of any character, when the regalia of the Order is to be worn, or the name of the Order used, should apply to the deputy of their district for a dispensation permitting the same.

21.—An officer who is elected at the beginning of a term must serve a majority of nights (except in case of sickness), to be entitled to the honors of the office, and must be in the chair at end of term, but an officer elected to fill a vacancy at close of term, if he serve but a single night, is entitled to the honors of said office.

22. It is neither proper or consistent for the chief executive of any Order to be a representative of any one subordinate. Following the laws of older societies, I decide that the G. M. W. is not eligible to be elected as representative from his own Lodge to the Grand Lodge, but that said Lodge is entitled to its proper number of representatives upon the floor of the Grand Body, independent of the G. M. W.

23. A favorable ballot can be reconsidered at any time prior to the conferring of the degree for which the ballot was taken.

24.—In case that a Lodge has a member in another jurisdiction, who, in order to reinstate, it is necessary to have re-examined, said Lodge by its regular Medical Examiner, may authorize a competent physician at said brother's residence to examine him.

25.—A motion to reconsider must be made at the same meeting at which the action is taken which it is proposed to reconsider, or notice be given at said meeting that such a motion will be made at a specified subsequent meeting. Without such notice it is not in order to reconsider at a subsequent meeting.

CERTIFICATES TO "WILL" OR "ORDER."

Owing to negligence or carelessness in directing payments of certificates, and merely saying, "subject to my will" or "order," and then neglecting to prepare such "will" or "order," I saw that grave complications, annoyances and trouble were likely to arise, and therefore had published the decision that such certificates were null and void, in order that brethren who had their matters in this negligent condition should immediately correct them, and it has had a prompt and beneficial effect. Some jurisdictions have gone so far as to say that no moneys would be paid on any such certificates. My decisions on the subject are as follows:

26. The mere possession of a beneficiary certificate of a deceased brother gives no claim to the holder against the Order, unless said certificate is made payable to said holder. Beneficiary certificates are the Order's "promises to pay" at a death, upon certain conditions, all of which must be complied with, or the certificate is void. Therefore, although a party may have advanced money to the deceased, hold his note for same, and also have in his possession said beneficiary certificate, unless said certificate positively directs that the money be paid to said holder, and is so recorded in the Grand Lodge office, his claim cannot and will not be admitted, but the money must and will be paid as the certificate directs, and as the record stands in the office of the Grand Recorder.

27. Beneficiary certificates made payable "to will" or "to order" are only legally payable on presentation of a "will" or "order," for the following reasons: That said certificates are but agreements to pay a certain amount upon the express conditions that the requirements of law are complied with. These requirements are, that when a brother applies for a certificate, he shall specify to whom it is to be paid; and when it is delivered to him, he is told that it will be paid in the manner he has directed; and at his death, the law requires it to be paid to the person named by the brother while living. Therefore, a failure upon the part of the brother to comply with the law and give proper direction to the payment of the money, legally releases the Order.

28. Beneficiary moneys can only be considered as part of a deceased brother's estate when certificate reads, "payable to my estate," or "subject to my debts" (Sec. 206). The Supreme Courts of many States have decided that beneficiary moneys of this character cannot be taken by creditors. No claim of an administrator can be admitted, recognized or allowed, except in a case as above, or where there is a question, etc., when the heirs may select an administrator, under Sec. 233, Digest.

29. While holding that there is no legal obligation to pay those certificates made payable to "will" or "order," and where no "will" or "order" has been made, it is also held that there is a fraternal and moral obligation resting upon us, and by above decisions it is not designed to convey the idea that California desires to evade the payment of these moneys, but that it does not acknowledge any legal claim. Its practice has been, and will be for the present, to pay these moneys to the true heirs, or next of kin, when such are thoroughly and properly identified, said next of kin to be as defined by the laws of California.

30. If a beneficiary certificate is made payable to "Mary Jones," and she dies after the death of the member making the certificate, and before the money is paid, said money is payable to the heirs of said "Mary Jones."

Three cases have arisen during the year where brethren have died, leaving their certificates in this condition: George W. Durham, of Durham Lodge, No. 87; D. J. Underwood, of Kern River Lodge, No. 106; Geo. H. Allen, of Kern River Lodge, No. 106.

A brief outline of these cases may not be uninteresting:

In the Durham case, W. W. Durham, administrator of the estate, asked for the $2,000. Under my decision I declined to admit any such claim. Upon further correspondence, and learning that it would be perfectly satisfactory to all concerned to pay the amount to the widow of our deceased brother, I ordered the amount paid to her.

In the case of D. J. Underwood, several claimants appeared: The brother died in Arizona, having his certificate, it is supposed, with him; on April 22, 1881, I received a claim from his father, in Illinois, for the money, submitting affidavits of relationship, etc., naming the various relatives, and asking the G. M. W. to forward the money. Sent a copy of above decisions and filed claim.

May 16.—Was notified by a party at Kernville that he had been appointed administrator, and wished the money sent to him. He also received the gist of the above decisions.

July 14.—Received notice from an attorney in Arizona, stating that he represented the wife and child of the deceased brother, and desired that the money should be paid to them. Sent him decisions, and asked him to support with affidavits, proofs of marriage, birth of child, etc.

Numerous letters passed, the result of which showed that the administrator at Kernville had no authority from the heirs to act for them; in fact, positive evidence to the contrary, and requests to pay no money to him are on file, and the G. M. W. informed him that the attempt to obtain this money was not very creditable. Threats of suing, etc., were made, but as said administrator never had the slightest shadow of a claim, or any evidence of the indebtedness of this Order to him, I have not felt any great degree of alarm from this source, and so expressed myself.

Correspondence also proved the alleged wife and child in Arizona to be "bogus" creations, that the attorney in charge had been deceived and threw up the case, and so informed me. He afterwards, at my request, and that of the heirs, made a search for the certificate, without avail.

The case then narrowed down to the father of the deceased, who was properly identified, made suitable affidavits, gave a bond for $2,000 to protect the Order in case of a "will" being found, a duplicate certificate was issued, properly receipted, and the money paid to him.

In the Allen case, the relatives consist of several brothers and sisters in Arkansas, who being properly identified, and giving requisite bonds, will be paid pro rata, under our State law.

LODGES REVERSING THEIR ACTION.

The following decision has been made:

31.—When a Lodge has intentionally or erroneously inflicted a penalty upon one of its members for infringement or violation of its local law, said Lodge possesses the inherent right and power, by its action at a subsequent meeting, to rescind or reverse its former action, whether said penalty was reprimand, fine, suspension for a definite period, or suspension for non-payment of dues.

Three cases have occurred to which this decision has been applied.

1.—A Lodge on certain evidence fined a brother, and subsequently discovered that the evidence was false and malicious. It was not enough to remit the fine, but the original action ought to be, and was repealed or annulled, and proper entry made.

2.—A Lodge suspended a brother for non-payment of dues; the by-laws of said Lodge require that before a brother can be suspended for this cause, he shall have three weeks' notice, etc. Owing to the neglect of proper officer, the delinquent brother was not notified, but was suspended. On a statement of the case, I ordered action as per decision.

3.—Valley Lodge, No. 30, suspended two members for N. P. D., and desiring to reverse its action, did so, under the above decision. From this an appeal was taken by E. F. Loud, D. G. M., the papers of which are herewith submitted.

APPEALS.

Quite a number of appeals have been received, and by kind words and fraternal courtesy a marked percentage of them have been amicably adjusted. The others, as a rule, have been submitted to the Committee on Appeals, and decided by said Committee with the approval of the G. M. W. The papers in the following are submitted with this report. I deem it only necessary to give the case and the points involved.

[We consider it more judicious to refer those specially interested in these appeals to the coming pamphlet report of the G. R., rather than extending our report here for general readers.—EDS. WATCHMAN.]

DISPENSATIONS.

I have given dispensations during term, viz: To confer M. W. Degree, 35; permission having been granted by Lodge nearest residence, to admit an applicant from another district, 20; to meet twice a month, 12; to take a new ballot, 20; to change night of meeting, 11; to change place of meeting, 5; for public assemblies in the name of the Order, 2; to Deputies to act as Medical Examiners for new Lodges, 2. Total, 107. Dispensations by Deputies, 120.

CHARTERS SURRENDERED.

In the early history of the Order in this State, zealous Deputies were anxious to organize as many Lodges as possible, and in some instances planted them so close together that there was not sufficient territory to support them. From this fact three Lodges have surrendered their charters, and their membership have attached themselves to other Lodges. The Lodges are:

Cache Creek, 179. Surrendered March 26, 1881.
Castroville, 103. Surrendered January 5, 1882.
Elk Grove, 110. Surrendered January 24, 1882.

BENEFICIARY CERTIFICATES REFUSED.

I have declined to issue beneficiary certificates in a number of instances. In each case the instructions to Medical Examiners imperatively prohibited the reception of the applicant, such as only "1½ inch expansion," "pulse 94," or above, "respiration 22," or above, etc. The Medical Examiners seem to overlook the instructions on page 18, which state that if an applicant daily and habitually uses alcoholic stimulant, or is a member of the liquor manufacturing or selling class, that "immunity from intemperance must be proved."

In one case, when drinking was acknowledged to the extent of 10 to 15 drinks per day by an applicant, and I refused a certificate, I received a warm protest from some brothers, "that the man was in the business, had to drink to keep his customers, and that I ought to take that into consideration." I replied, "that it was that very fact I had taken into consideration, which was the reason the certificate was refused."

Every medical examination has been carefully scrutinized, and I have not hesitated to refuse a certificate when I deemed the laws and interests of the Order called for such action.

DEGREE OF HONOR.

Believing that to be successful, it was necessary to increase the membership of this degree, I have devoted some attention in this direction, and six new Lodges have been instituted during the term. With but two exceptions their meetings are well attended and interesting. On January 23d I addressed a letter to each, asking their views as to whether they deemed an endowment feature would be of benefit, and find that opinion is divided upon the question, the majority favoring the continuance of the degree as a social element, with such relief features as may come up spontaneously in the Lodges. The city Lodges (Silver Spray, Aurora and Dawn of Hope) are in excellent condition, and I would recommend to the Lodges of the interior the plan adopted by Olympic, No. 127, with Aurora

Lodge (which is principally composed of the relatives of the members of No. 127), viz: On one night of the month No. 127 meets early and adjourns, so that Aurora can take possession by 8 o'clock. This not only brings out the ladies, but a large attendance of the brothers, who take this opportunity to pay the Financier of 127. The evening is pleasantly enjoyed and no expense is incurred by the Degree of Honor Lodge. Besides this it serves the purpose of social gatherings and mutual organization, and if generally adopted throughout the State, cannot fail to be of advantage and interest, not only to those who participate, but to the Order at large.

I suggest the appointment of a Special Committee of five on the Degree of Honor, to whom shall be referred the communications that have been received, and request said committee to report at this session such legislation as may be deemed beneficial to this degree. The action of the Supreme Lodge leaves the entire subject in the hands of Grand Lodges.

CHANGE OF BENEFICIARY CERTIFICATE.

While the practice is not to be commended, there are instances where money has been borrowed, and the beneficiary certificate given as collateral security. There are also many instances where a wife or child, with the certificate made out in their favor, have kept up the dues and assessments when the husband and father had left them. As the law now stands, it is left entirely optional with a brother at any time to change the direction of payment, and under the decision of the Supreme Lodge of 1880, if a brother makes affidavit that the beneficiary certificate is in the possession of some one who will not give it up, a duplicate must be issued to him. There is an opening here for great injustice to be done, and I would recommend that this Grand Lodge suggest to the Supreme Lodge the necessity of more stringent laws in regard to the change of beneficiary certificates, and that the same be not done without the endorsement and recommendation of the Subordinate Lodge to which the brother belongs.

PETITIONS FOR NEW LODGES.

A petition and a number of medical examinations were received for a new Lodge at Millville, Shasta. These examinations, with but two or three exceptions, bore evident marks of haste. The figures were wrong, transposed and incorrect. I declined to issue a charter upon them, but returned the whole of them for revision and correction. Since which time I have not heard from them.

A petition signed by 26 persons, three of them being members of the Order, was received to institute a Lodge in the north end of the city of San Francisco. This met with an earnest opposition from some of the membership, and by their influence and representations, the city Lodges refused almost unanimously to endorse the petition.

Personally, I am in favor of establishing new Lodges at remote points in said city, whenever a proper number of petitioners of right material, and a proper locality for Lodge room can be obtained.

DISPENSATIONS DECLINED.

On several occasions I have declined to grant a re-ballot on applications for membership, when I have been requested not to do so, either orally or in writing, by two or more members of the Lodge asking for the dispensation. In the great majority of cases, I have always given dispensations for re-ballot when requested under seal of Lodge.

BACK BENEFICIARY MONEYS.

As the payment to the Grand Recorder of moneys received by Lodges did not seem to be clearly understood, I requested Brother Pratt, on February 28, 1881, to issue instructions and directions to Lodges on said point, which was done, since which time there has been no misapprehension on the subject.

UNWRITTEN WORK.

It having been brought to my notice that in the institution of some Lodges, what were called "Keys to the Work," which were neither more nor less than written explanations of our secret work, were in possession of different parties, I deemed it my duty to request my Deputies to require the destruction of all such "Keys." As far as I know, this has been complied with. All brothers should understand that it is a grave offense to jeopardize our Order by having any written copies of its secret work in the possession of any one, except at the office of the Grand Recorder.

RECORDS, PAPERS, ETC.

March 3, 1881, printed notices were placed in the Grand Recorder's office, that the books, papers, etc., of that office were private records of the Grand Lodge, and that if information was desired in regard to any of them, it must be obtained from said Grand officer.

GRAND RECORDER'S ASSISTANT.

Report of Grand Trustees, (p. 117, Journal of 1881,) provided for a clerk to the Grand Recorder, naming his qualifications in the Order and salary. While the intention was laudable and generally understood, the failure to have a resolution introduced creating such assistant, made it somewhat irregular. Beside this, the Grand Recorder being under bonds, should be the judge of the qualifications, etc., of his employees. In the case referred to, it made no difference as to the brother employed, but until the office of Assistant Grand Recorder is made by law, the appropriation for salary and clerical expenses of Grand Recorder's office should be made directly to that officer, and he be allowed to expend it as he may deem for the benefit of his department.

LODGE INSTALLATIONS.

Some Lodges forgetting that it is the special prerogative of the Grand Master and his Deputies to install the officers of subordinates, and see that said officers are competent before they are installed, have, without authority, installed themselves. But three such cases have occurred, however, and the intention to disregard law has been disclaimed by said Lodges. The G. M. W., or his Deputy, are the proper officers either to install or deputize a competent brother to do so.

SQUARE AND COMPASSES.

The Supreme Lodge abolished the square and compasses from our emblems, and adopted a different badge for regalia, yet in such a way as not to prejudice any regalia in possession of subordinates. I therefore did not feel at liberty to imperatively prohibit the use of aprons bearing said emblems; but I have requested and would here suggest that all Lodges at earliest convenience supply themselves with the correct badges of our fraternity.

GENERAL RELIEF COMMITTEE.

I take pleasure in calling attention to this practical and worthy body, which, unostentatiously, has done a creditable work in this city during the year. Many stranger brothers have received kind attention at its hands, and its circle of benevolence is only limited by its means. The General Relief Committees of the I. O. O. F. are recognized by the Grand Lodge of that Order as being of the greatest importance; I see no good reason why the same meed of praise and formal indorsement should not be awarded by this Grand Lodge to this committee.

DEAF, DUMB AND BLIND.

In reply to a query upon this subject, following the rule of older orders, I gave it as my opinion that it was not expedient to admit to membership any person totally deprived of the use of sight, hearing or speech.

GARFIELD OBSEQUIES.

Our loved President died September 19th, 1881, and I deemed it proper and in consonance with the feelings of the membership to participate in the public memorial services held in this city and throughout the State on the 26th, and issued a proclamation to that effect. In this city 1,000 Workmen were in line of procession, and in other localities the Order appeared in creditable numbers, to testify their respect for the honored dead.

GARFIELD MONUMENT FUND.

H. W. Preston, Secretary of this fund, forwarded a subscription book to me, with circulars, etc. While personally endorsing the movement, I did not deem it within my province to memorialize the Lodges, or officially call their attention to the enterprise. I therefore answered the Secretary that I would present the matter to the Grand Lodge for its consideration, which is herewith done.

BONDS.

The bonds of the various Grand Officers, Deputies, etc., have been duly filed, and were approved by the G. M. W. The law comprehends that these bonds shall also be approved by the Grand Foreman and Grand Overseer. As a rule, these bonds are filed at different periods for three months after the meeting of the Grand Lodge, and these officers live at different points, and probably only meet at some date long subsequent to the filing of bonds. I would recommend that the approval of these bonds hereafter be by the G. M. W., with the consent of the Finance Committee.

DEDICATIONS.

I have had the pleasure of dedicating two new halls, erected by enterprising Lodges of the Order, during the term. One at Walnut Creek, Contra Costa county, where, on October 6th, assisted by Grand Recorder Pratt, Deputy Wilson, and E. M. Reading, P. M. W., a fine building was set apart to the uses of the A. O. U. W. The other, at Los Gatos, which was dedicated March 2, 1882. At this latter point the brethren have one of the handsomest rooms in the State, and elegantly furnished. There is no ceremony in our Rituals for dedication, and, consequently the exercises were of a more or less impromtu character, but, I think, appropriate.

GEO. W. GREEN CASE.

At the time Bro. Geo. W. Green, of Redwood City, joined the Order, he was a widower with two children, and made his certificate payable "to my children." Bro. Green subsequently married again, and a child was born of the second marriage. Bro. Green died, and the question was asked: "If the child of the second marriage was entitled to any part of the $2,000?" I replied: "No; it was notoriously known who was meant by 'my children' when the certificate was granted, and if any change of direction of payment had been desired to be made on the birth of the last child, the law points out the only way it could have been done. Without changes are made, according to law, the only safe plan to pursue is to pay the moneys to those parties that would have been entitled to it, if the brother had died immediately after receiving the M. W. Degree."

REIN CASE.

August 8, 1881.—D. McMullen claimed the $2,000 due on death of Oscar Rein, of Olympic Lodge, No. 127. Grand Recorder's books showed that it was payable to said McMullen. Said Rein was alleged to have died in New York city, November 17, 1880. Notified Olympic Lodge, and asked for information.

August 12.—Olympic, No. 127, reported Rein suspended December 31, 1880, and forwarded letters written by E. Rein, of Providence, R. I., dated March 22 and April 19, enclosing certificate from Health department of New York, giving date of death, place of burial, name of undertaker, etc.

As Olympic Lodge had not suspended the said Rein until December, if he had died in November, the certificate was payable, and to verify the correctness of this death, I invoked the assistance of a friend, John Medole, P. G. M. of the I. O. O. F., a well-known and reliable gentleman of New York city, who kindly traced up the entire matter, and placed beyond doubt that the deceased was Oscar Rein, a former member of the Order in this State, and had died November 17, 1880.

August 18—I received a letter from W. F. Channing, an attorney of Providence, R. I., stating that on behalf of the relatives of said deceased there, he should commence suit in the U. S. Courts against the A. O. U. W. of California for the $2,000, to which I replied that it was entirely unnecessary, but that, if any evidence could be produced that this Grand Lodge owed his clients a penny, it would be paid at sight.

September 30.—It being stated that the beneficiary certificate was in the possession of E. Rein, a telegram was sent to Providence for information. The telegraph company returned answer: "Can't deliver—Rein has gone to Germany."

October 3, 1881.—McMullen made affidavit that the beneficiary certificate payable to him was in possession of parties to him unknown, and not obtainable, and petitioned for a duplicate, which was granted, and the amount of claim paid October 20, 1881.

TEMPERANCE.

I believe the A. O. U. W. is as free from drunkards as any association of like character in the world, and yet the general social customs of the day and age are surely sapping the vitality of many of our membership. Men have turned from stronger liquors to beer, flattering themselves that there is no danger in the cheap and seemingly harmless beverage, yet the fearful increase of kidney and liver diseases, and deaths from seemingly trifling hurts, are directly traceable to cheap beer.

A large proportion of our accidents and suicides, intemperance is directly responsible for, to say nothing of blasted reputations, broken homes, and mourning families. As long as men invite and encourage each other to drink, so long will the curse continue to afflict our race. We are very particular about evidences of consumption, heart disease, what a man's parents died of, how the respiration and pulsation stands, but men propose and doctors endorse those who are known to be regular drinkers without scarcely a question, and if a man who is in the liquor business has his beneficiary certificate declined, because his examination shows that under the instructions to Medical Examiners, he ought to be rejected, a fiery protest is received, or a long argument made, or a numerously signed petition by every member of the Lodge, asking that the decision be rescinded, as the applicant is "such a good man." Although, personally, I wish that no man ever drank a drop of any kind of liquor; although I know that the death rate among moderate drinkers is largely in excess of that among total abstainers, yet I have never rejected an applicant simply from this cause, unless his medical examination showed him to be a dangerous risk, and his habits such as unfitted him for a place among us.

Standing here to-day as your Chief Executive, I say to you it is not consumption, heart disease or Bright's disease that you need spend hours in debating how to guard against, but the great evil overshadowing all of these is liquor and beer drinking, which leads not only to all manner of disease, but also to accidents, suicides and murders.

Solve this problem and the rest is easy. I place more faith in the earnest and fraternal efforts of man with man than I do in acts of legislation on this subject. If every Workman will resolve that as far as he is concerned, hereafter, there shall be reform in this particular, and that he will do what he can to aid his brother, at least 15,000 men will be free from this evil, and there will be certainly 15,000 happy homes in California. Is it not worth the effort?

PUBLIC ASSEMBLIES.

In this progressive nineteenth century, the idea that any enterprise, however good, or Order, however grand, can prosper and advance, without being brought into public notice, is simply absurd. We live in such a moving and rapid age, that the news of yesterday is superseded and forgotten in that of to-day, and to be in the front rank, Orders, like individuals, must keep abreast with the line. With a dozen earnest competitive fraternities in the field, with their zealous officials and deputies in every section of the State, canvassing the public and presenting the claims of their societies, I saw, at the beginning of the term, that if the A. O. U. W. intended to keep up its prosperous career, it must also be favorably and frequently brought before the public. My first circular to Deputies suggested and encouraged these assemblages, in Lodge rooms and public halls, with families and friends, and they have been held throughout the State, and the success attending them has been unparalleled. The mighty gathering at the Pavilion in this city last year, the thousands at Bidwell's Grove, in Chico, the grand assemblages at Los Angeles, Sacramento, Oakland, Stockton, San Jose, Plymouth, Petaluma, Napa, Monterey, Santa Cruz, Hollister, Salinas, Redwood, and a hundred other points I could name, have given our Order an impetus and reputation that has sent it far in the advance. The people have been gathered by the tens of thousands during the year; the aims, objects, and practical workings of our system presented to them, their attention attracted, and their co-operation enlisted. In addition, at these gatherings, rational, enjoyable and legitimate entertainment has been presented, and the guests have returned to their homes, not only familiar with the mission and progress of the Order, but realizing that they have had, as we term it, "a real good time." That it has brought us in hundreds of good men, and made whole communities our friends, is beyond all question.

Let this public feature be kept up, for it must not be forgotten that the vitality of the Order lies in a healthy increase, and while Lodge visitations are commendable and essential, it is from the outside world we draw our new material, and they cannot come to us until we have first gone to them.

VISITS BY LODGES.

A very pleasant, fraternal practice during the year, in city and country, has been the visitations of Lodges to each other; sometimes by special trains, sometimes by huge omnibus and wagon loads, sometimes by the march of a few blocks, but however and whenever done, fraught with enjoyment, inspiration and appreciation. May the practice still continue. Members of the same family are in duty bound to call upon their relatives occasionally, and get better acquainted.

MEDICAL EXAMINERS.

At the last session of the Supreme Lodge a law was passed making it obligatory upon Grand Lodges to elect or appoint a State Medical Examiner or Medical Board, to whom medical examinations should be submitted for inspection, and it was also directed that the degrees should not be conferred upon applicants until the medical examinations had been approved by said authority. This law was passed in June, 1881, and although the Grand Master undoubtedly had a right to appoint such an officer or create such a Board during the recess, he refrained from doing so for several reasons:

First—That he believes the entire responsibility rests with the Lodge Examiner, and if said local examiner sends up a "clean bill of health," all the experts in the world could only pass the candidate.

Second—That if there is any reason why the applicant should not pass, and the questions are honestly filled out, an examination of each record is already faithfully made by the Grand Officers, and he would be rejected.

Third—That in some Orders there are these Grand or Supreme Medical Examiners who receive a fee of 50 cents on every examination, and while their method entails extra expense and delay, their death record from consumption, Bright's disease, heart disease and chronic complaints is fully as large as ours, if not larger, and no advantage being perceptible, I desire to put myself upon record as being opposed to any paid Grand Examiner, or having any tax laid upon applicants for that purpose. At the same time, I urge the same careful scrutiny by the Grand Officers, in the future as in the past, of every examination, and the prompt rejection of those who, by the rules provided upon the subject, are inadmissible.

All that is required is for the Lodge Examiner to make his report faithfully. The local doctor sometimes does not like to reject, because it may injure his practice, but if a faithful and honest statement of the applicant is sent up to headquarters, if there is anything wrong it will be quickly detected and a beneficiary certificate refused.

To comply with the Supreme laws, I would recommend that the Grand Master, Grand Recorder and Grand Receiver be constituted such Examining Board, and perform its duties without any additional expense to Lodges or applicants.

"PACIFIC STATES WATCHMAN."

I may probably be thought a little prejudiced in speaking of the press, but I believe all impartial minds will assent to its value in bringing to the notice of the public any enterprise, and that said enterprise may be faithfully and earnestly presented, the public mind is impressed and becomes familiar with it. Our Order has had good friends among the editors and writers of the Pacific coast who are not connected with fraternal journals, but it is not of them I intend to speak at this time, but of one particular paper, and that, the PACIFIC STATES WATCHMAN; and to say that if ever there was an Order that had an able, correct, persistent, unflagging organ that deserved recognition and unanimous support, the A. O. U. W. of California is that Order, and the WATCHMAN is that organ.

GRAND LECTURER.

The Grand Lecturer, J. W. Kingsley, who, during the preceding years, had done such faithful and valuable service among the Lodges of this jurisdiction, was compelled by his business arrangements to tender his resignation, which was reluctantly accepted on March 22d, 1881.

Owing to the difficulty of finding another brother, who, with the ability, could spare the necessary time, this vacancy has not been filled; but the Grand Master, assisted by Deputy Grand Master Loud, and the District Deputies of the State, has endeavored to see that the Lodges have had the proper instruction.

DEPUTY GRAND MASTERS.

To the efficient and zealous labors of my District Deputies I have been greatly indebted,

and to their faithful work does the Order owe much of the grand reputation it enjoys for "correctness." Their instructions, visitations and words of encouragement have been productive of great practical good; they have proven themselves worthy of the trust confided to them, and have the thanks of the Order, as well as the approval of their own hearts. I thank them one and all in the name of our Fraternity.

To Deputy Grand Master Loud, more than an ordinary word is due. From the time that the new work was received in 1880, up to date, he has been untiring in his efforts to instruct, and have it uniformly known among the officers. Days and nights he has patiently labored, and the result has been success. During the past term he has made many visitations with me and for me, at home and abroad, having traveled over 2,000 miles (outside of San Francisco), issued 5 dispensations, and made 108 visits. I take pleasure in testifying to his zeal and ability, and thank him for the valuable aid rendered to me, and to the Order at large during the term.

GRAND RECORDER'S OFFICE.

Every working day that I have been in the city since our last session, I have visited the Grand Recorder's office. The work of the term has been conducted with faithfulness, promptness and general satisfaction. Our honored Bro. Pratt, to whom we are indebted for this Order in California, can always be found at his post, and ever alive to the interests of this fraternity. For his uniform courtesy, counsel and assistance, and for his presence at many visitations and words of cheer, I return my sincere and heartfelt acknowledgments, and pray that the Giver of all good may spare him to us for many years to come.

In this connection the valuable services of his assistant, Bro. J. W. Watson, deserve favorable mention; correct, persevering and assiduous in the discharge of duty, he is not only competent in his clerical work, but also in the work of the Order, and has ever proved himself ready and willing to aid in furthering our common cause.

Grand Receiver Haile is another of our well-known officers, honest and reliable. The trifle now allowed by the Grand Lodge for his contingent expenses ($25 per month) is but an atom in comparison with the large amount of money for which he is responsible. Formerly the amount of money paid this officer was termed "salary," and contingent expenses were extra. Now, the entire amount is called "contingent," and I would recommend that at least sufficient to pay the Grand Receiver's fare to and from Alameda to San Francisco be appropriated in addition to said "contingent fund," and also that a reasonable amount be appropriated to this office, to be termed "salary," and "contingent fund" in reference to this office be abolished.

COMMITTEES.

The Order at large scarcely realizes the great amount of work done by its officers in a year. The results are seen and applauded, but the continuous and faithful labors are hidden except to the few. The Finance, Appeal and Laws and Supervision Committees are no sinecures, but require constant and continuous attention, involving time and thought. I well know how conscientiously they have discharged their arduous duties during the long term now closing, and how their promptness has aided the Grand Officers, and kept the entire machinery of the Order in harmonious motion. In the name of our great Fraternity I thank them one and all.

Although not brought so directly in contact with the new Committee on Amendments, yet I am sure its report will show that it has not been idle.

I would suggest to this Grand Lodge the propriety of raising more regular committees, for two reasons: 1st, that we have not a sufficient number at present; and 2nd, that the labors may be divided among a larger number, and the ability of more brethren be enlisted. There should at least be committees on Good of the Order, on Legislation and on Resolutions provided for, to be appointed at the beginning of a session from the representatives, to serve through said session. I recommend this matter to your attention.

On a question submitted by the Finance Committee at the beginning of the term, I held that the appropriation of $25 per month was designated "contingent," and not "salary," for Grand Receiver, and bills to that amount only could be audited for that officer. I have alluded to this office elsewhere.

As the budget of expenses, etc., at last session was only designed for twelve months, and subsequently the Grand Lodge changed its time of meeting to April, making the term fourteen months. I have authorized the auditing of bills for salaries, contingent expenses, etc., for the two additional months, pro rata with those which preceded them.

RELIEF CALLS.

On May 4, 1881, I received from S. M. W. Rose notice that aid was needed for Indiana, and that under the recent Relief Law a call was made for 10 cents pro rata on the general membership. I issued the necessary circular to Subordinates; the amount was cheerfully donated and promptly forwarded to the Supreme Lodge.

On March 14, 1882, Supreme Master Workman Baxter informed me that $46,000 was required to pay for extra assessments in Indiana and Supreme Lodge Jurisdictions, and that 50 cents per member was needed to cover the amount. I immediately issued the necessary circular, which is now before the Lodges, and I have no doubt it will meet the prompt response characteristic of the A. O. U. W. of California.

IOWA.

I have received official information of the suspension of various Grand officers of Iowa, and recently of the suspension of the charter of the Grand Lodge of that jurisdiction, for palpable violation and defiance of law. The action of Supreme Master Workman Baxter meets my cordial approval, and I trust that he will receive from this Grand Lodge its unanimous voice of approbation for his noble defense and maintenance of the good and fraternal laws of this great Order.

PRACTICAL BENEVOLENCE.

During the year two tangible evidences of the benefits of our Fraternity have come directly under my notice and co-operation. One was the uniting of a committee of Odd Fellows and Workmen, in giving an entertainment whereby sufficient money was raised to discharge a mortgage of $500 which rested upon the home of an unfortunate brother, the release of which I had the pleasure of presenting to the wife and mother.

The other was the adoption by Unity Lodge, No. 27, of the orphan boy of our late brother, DeWolf, for which I obtained the consent of all interested; and said boy has been placed where he will be educated, and all of his interests cared for.

Results like these are not only grand monuments for our Order that will be lasting, but I shall value the memory of being privileged to somewhat aid in them, far more than titles, jewels, or official rank.

Brethren, my report is done. I regret that I have not been able to accomplish much more, but I have endeavored to keep my promise that I would do the best that I could; I valued the honor conferred upon me, for it had come unsolicited and unanimous from a great Fraternity, and as far as in my power I dertermined to show my appreciation of the generous compliment. To be a faithful Grand Master of this Order in California means "work," from the date he is installed until his term expires. Constant, untiring energy makes success, creates enthusiasm and produces great results. Negligence, carelessness and delays are the causes of rust, decay and demoralization.

Our Order stands on a high plane on the American continent, and no star in its diadem shines brighter than that of California. Step by step we have passed our sister jurisdictions in numerical strength, until we stand with but one State between us and the head of the line. While wishing for all jurisdictions progress and prosperity, yet California aspires to be second to none. I feel confident that this Grand Body and its officials, in common with the entire membership, will keep alive for many years to come the enthusiasm and energy which is now so marked and manifest in this jurisdiction.

I would have liked to have stood in every Lodge room, but that was simply an impossibility. To those I have met, for their grand receptions and fraternal courtesies, I tender my sincere thanks. While life remains, the memory of these visits will ever be pleasant and grateful. I trust they have been for the good of our Order and of humanity.

The labors of the office have cost time, toil, care, anxiety and thought, but the result has warranted the outlay. I leave to our Grand Recorder the details of statistics and figures. They will gratify and inspire you.

In conclusion, once again, I thank you all for your confidence and assistance, and return to you the trust confided to me. May wisdom, justice, moderation and harmony guide this Grand Lodge in all its deliberations. May God grant continued prosperity to the A. O. U. W.; and bless fraternal, unselfish efforts to uplift and upbuild mankind, whenever and wherever made. Fraternally yours,

WM. H. BARNES,
April 4, 1882. Grand Master Workman.

On motion of M. T. Brewer, the G. M. W.'s report was referred to the following Committee on Distribution: M. T. Brewer, Wm. E. Hopping, J. B. Finch.

The reports of Grand Recorder, Grand Receiver, Supreme Lodge Representatives and Finance Committee, being in print, were referred to the Committee on Distribution without reading. We, however, give the principal reports in full.

Grand Recorder's Report.

To the G. L., A. O. U. W., of California—SIRS AND BROTHERS: In obedience to the requirements of our laws, I herewith submit my annual report:

The unexampled prosperity which has characterized this jurisdiction from the beginning, suffered no abatement during the term just past, as will appear from the exhibits attached to this report. General harmony has prevailed and, it is believed, a spirit of fraternity largely increased.

CHARACTER OF NEW MEMBERS.

The popularity which the A. O. U. W. has justly attained, necessitates increased vigilance on the part of our membership to guard against the admission of unfit persons into the Order. This fact seems in most instances to have been fully appreciated by our Lodges, for during the fiscal year ending Dec. 31, 1881, of all persons applying for membership, nearly 10% were rejected, either by our Medical Examiners or Lodges, the proportion of such rejections being about one by the former to three by the latter. A few who have been accepted by both the physicians and Lodges have been rejected by the Grand Master, as not coming within the rules applying to eligibility of candidates.

ADMISSIONS, DEATHS, ETC.

The admissions during the fiscal year were 3,529. The losses by death were 96, and by withdrawals, suspensions and expulsions, 622. The average duration of membership of all these losses was one and a half years, and the average aggregate payments of each into the Beneficiary Fund of the Order, $22.50, very nearly. It thus appears that during the last year there came to the credit side of our beneficiary account, from lapsed and annulled certificates, the sum of $13,995.

While the death losses during the year aggregated 96, as before stated, only 88 were officially reported up to its close. Fourteen assessments on the membership became necessary to meet the obligations thus incurred. The amount received on each of these assessments is shown elsewhere, the whole aggregating $166,452.

Of these deaths 13 were from accidental causes, 8 from consumption, 8 from pneumonia, 6 from suicide, 5 from heart disease, and the rest from a variety of diseases.

Since the advent of the present year, our death losses have been unprecedentedly heavy, as they have been almost everywhere throughout our common country, yet, on the whole, we have no reason to complain, much less to be alarmed. From March 1, 1880, to March 1, 1881, we had 16 assessments; and from March 1, 1881, to March 1, 1882, the same number. We may not reasonably expect that, as the Order increases in age, we shall have less than about 18 assessments a year on the average.

It is a source of much gratification that, so prompt have our Lodges been in meeting their financial obligations, that not a single instance has occurred since the organization of the Order on this coast, where a suspension of a charter became necessary. This is in striking contrast with what has been the case in other organizations of similar character.

MORTUARY STATISTICS.

The system of mortuary statistics inaugurated last year has been continued, and much labor and care bestowed on the tables presented herewith. The correctness of the figures may be relied on. The showing is somewhat different in detail from that of last year, the death rate being more even according to ages at admission, yet, on the whole, it is substantially the same. As before, the average hazard is shown to be almost exactly the same on those admitted at the various ages, from 31 to 49 inclusive. Since the tables were compiled, the death losses show a larger proportion of young men than has been the average heretofore, but, nevertheless, those admitted at 21 to 30, inclusive, have cost the Order less, in proportion to their numbers, than the balance of the membership. This shows our experience, covering a period of six and a half years, and, while it is not at all conclusive as to what may be the result in the future, still, it is fair to presume that little variation will be seen from the general result as now shown.

At the last session of the Supreme Lodge a strong effort was made to engraft a system of graded assessments upon the Order, and tables submitted, based upon the so-called Tables of American Experience of Life. These experience tables purport to have been made by selecting 100,000 lives in extreme youth, and then, by keeping a record of deaths occurring in their number till all had died, the expectancy of life according to age was thus obtained. This is probably true only to a degree, yet, no doubt, as showing the expectancy of life of our people in general, the tables may be considered reliable; but to use such tables as a basis on which to determine a just plan of graded assessments would be manifestly wrong, unless people in general were taken into the organization, excluding no one on account of ill-health, bad morals, dangerous occupation, or other untoward circumstance. Looking at the question from a purely business stand-point, it is plain that he who is most likely to die while in the Order, no matter at what age admitted, is the poorest risk, and he who is least liable, the best risk. It is also plain that, in justice, each should pay in exact proportion to the hazard the organization assumes in his behalf. Unfortunately, no statistics have ever been compiled, so far as I am aware, to show this hazard. For the purpose of supplying this want, at least so far as our Order is concerned, the system found in these reports was inaugurated, which is, beyond doubt, the only correct one to determine the liability incurred by the Order in admitting members, so far as age is concerned.

It is most earnestly hoped that, should the Supreme Lodge determine upon some system of graded assessments, our representatives may be able to have such system based on our experience and not on the expectancy of life, for, by taking our experience, we might possibly get a comparatively just system, while, on the other hand, we must of necessity go wrong. Common prudence, however, would seem to dictate that no change should be made in our simple system until carefully compiled statistics, covering a period of not less than a score of years, might indicate how to do it.

Again, it is of more than doubtful propriety to base any system of graded assessments upon age at admission, alone. Occupation, personal habits and family history are quite as important factors in determining prospective longevity as the matter of age. Why, then, use but one factor instead of four in fixing a scale of payments fashioned on the idea of equity? It is a fact admitted on all hands that a man even past the meridian of life, of good habits, robust health, following some safe occupation and of long-lived parentage, is a better risk than a young man of doubtful morals, following the occupation of bartender, and coming from a family tainted with some hereditary disease. Why should the better pay more than the poorer risk? Equity demands the reverse.

DEGREE OF HONOR.

Blanks for semi-annual reports were furnished all of our Degree of Honor Lodges, but only four have responded. The general condition of these Lodges is not flattering. A few seem to succeed, but the many fail. Our experience is that of the Order everywhere. So, on the whole, the Degree may be counted a failure, and in my judgment should be made beneficial or abandoned altogether. If placed on substantially the same basis as other subordinate Lodges, there is no good reason why it should not become a grand success, unless it be true, as claimed by many, that the mingling of the sexes in a fraternal organization militates against it. The experience of some societies seems to sustain this view, but that of others to refute it.

RELIEF OF BRO. UPCHURCH.

Up to the time of making my report to the last session of this Grand Lodge, there has been contributed by this jurisdiction, for the relief of Bro. J. J. Upchurch, the founder of the Order, the sum of $860.40. This has since been augmented to $1,010 95, more than double that, I believe, contributed by any other jurisdiction. It is a source of profound regret, that contributions for so worthy a purpose should not have been sufficient to place the old veteran Workman beyond the danger of pecuniary want for the balance of his days.

SEMI-ANNUAL REPORTS.

Many of our Lodges have semi-annual report blanks of a form now obsolete, as they do not meet the requirements of the law as it now stands, and hence are useless for most statistical purposes. I suggest that henceforth the Grand Recorder be authorized to furnish duplicate blank reports to the Lodges, before the close of each term, to be used in lieu of those now in their possession. Uniformity will thus be secured and much valuable information obtained for compilation and dissemination in the future.

PACIFIC STATES WATCHMAN.

Again, I wish to commend to the brotherhood the PACIFIC STATES WATCHMAN. As an able and pure expositor of the principles of our Order, it stands, I believe, without a peer. Our prosperity and unity is in a large degree due to the powerful influence the paper has exerted.

Financial Exhibit.

The Grand Recorder's minute statement of financial transactions is too extended for our columns.

STATEMENT OF GENERAL FUND.

Cash in hands Grand Receiver, Jan. 1, 1881	$ 2 135.87
Total amount received to Jan. 1, 1882	14,994.90
Total	$17,130.77

Total amt. received on Relief Call No. 2	$452.00

Fraternally submitted in C. H. & P.,
H. G. PRATT, Grand Recorder.

Supreme Lodge Representatives' Report.

Supreme Representatives, Wm. H. Jordan, Clay W. Taylor and H. G. Pratt (Bro. Brewer being detained from attending S. L. was duly received and filed). [The facts contained in the same have principally appeared in our columns from time to time.]

Finance Committee Report.

We extract the following of interest from this report: We would respectfully call the attention of this Grand body, and each and all the members present, to the necessity of a proper and correct remittance report, as furnished by the Grand Recorder, accompanying each and every amount of money sent to his office. This being the only check, the Finance Committee or, in fact, anyone has upon the receipts in that office, renders it imperatively necessary that Recorders of subordinate Lodges should invariably observe this rule. Most of the Lodges have sent complete and satisfactory reports with each remittance, still there are some who either wholly neglect to send a report, or send one so incomplete that it retards, instead of helps us in our examinations.

In making out the pay roll of the last session of the Grand Lodge, your committee found a great difference in the amounts claimed by some of the representatives hailing from the same locality. In justice to all concerned, and in order that your Finance Committee be enabled to act fairly and intelligently in the premises, we would request the Grand Lodge to define plainly the clause in Art. V, Sec. 5, Grand Lodge constitution, wherein it says: "Also their traveling expenses by the shortest traveled route."

In conclusion we desire to express our appreciation of the uniform courtesy shown us by Bro. H. G. Pratt, Grand Recorder; Bro. J. W. Watson, his assistant, and Bro. C. H. Haile, Grand Receiver, and hereby acknowledge that it assisted us materially in our labors.—CHAS. C. TERRILL, PHILIP PECK, ED. H. MORGAN, Finance Committee.

Report of Committee on Amendments.

SIRS:—Your Committee on Amendments, appointed at the last session of the Grand Lodge, respectfully submit the following report:

We have received during the past term 24 propositions to amend the Constitution of Grand and Subordinate Lodges. We have also received three resolutions with which we have nothing to do, and we ask permission to refer them to the Committee on Resolutions appointed by this Grand Lodge.

We are of the opinion that the law creating the committee is an excellent one, but that it has failed to accomplish all that was contemplated, because of the failure of those having propositions to submit to forward them to us earlier in the term.

Of the 24 amendments submitted to us, 23 of them were received by your chairman during the past three weeks, thereby rendering it impossible for him to transmit copies to each member of the committee, so that each might have time to study the proposition in all its bearings. In consequence of this, all the work of your committee had to be performed at the session Monday; but allow us to say that each and every amendment received our earnest and careful consideration, and the conclusions we have arrived at are those of mature deliberation.

We recommend that in the future, those having propositions to submit to this committee, forward them as long prior to the meeting of the Grand Lodge as possible, thereby securing for them longer and more careful consideration, and insuring for the Order wiser and better legislation. We are of the opinion that the laws of the Order are, though simple, nearly perfect. We have felt that very few changes are necessary, and have recommended them only where we thought the welfare of our Order would be advanced by so doing.

General Business.

Invitations were received and accepted to attend Lodge meetings this evening from J. Waterman, E. Lichan, representatives of Triumph Lodge, and Thos. P. Williams, Recorder of Unity Lodge, S. F.

Henry Voorman, Chairman of the Committee on Appeals and Grievances, being absent, E. Danforth was appointed to fill the vacancy.

Annexed to this report, and forming a part of it, we present a detailed statement, together with our recommendation, on each and every proposition submitted to us.—C. H. Dunton, S. Ehrman, G. Winehill, H. S. Ball, L. L. Dunbar. Received and ordered printed. Such amendments as were finally adopted will appear in this report.

A resolution by A. L Hatheway, of Vallejo Lodge, that Sec. 1, Art. VI., Subordinate Lodge Constitution, be amended, was laid on the table.

The resolution of J. H. Barrett, that the sessions of the Grand Lodge be held from 10 to 12 M., and from 1:30 to 5 P. M., prevailed.

The election of Grand officers was made a special order for Wednesday, April 5th, at 2 o'clock P. M.

The report of the Committee on Distributions was adopted.

The following, offered by A. O. Carpenter, seconded by Chas. G. Reed, was referred to Supreme Lodge representatives:

Resolved, That Sec 9 of Art. XIII shall be amended by the addition after the words "affixing the date thereto," the words "and the date of such payment of arrears to the Financier shall be the date of such removal of said beneficiary certificate."

By recommendation of the Committee on Resolutions, the following was not adopted:

Resolved, That our representatives be instructed to work in the Grand Lodge for the passage of such legislation as will provide for a fund in each Lodge to pay the assessments of indigent members. Said fund to be raised by taking 10% of the general fund and setting it apart for this purpose. Whenever this fund shall amount to $5 for each member, no more shall be taken out of the general fund until this indigent fund shall be less than the $5 to each member.

No member hypothecating his certificate, or transferring it to anyone outside of his family relations, shall be a participant. No member shall be entitled to participate in this fund without the written recommendation of the Trustees of the Lodge.—JOHN LANDIS, M. W., F. W. DAVENPORT, Recorder *pro tem*, Wheatland Lodge, No. 54, A. O. U. W.

The remainder of the report will be given in the next issue. In another column, however, some of the speeches under head 'Good of the Order," are printed.

A Presentation.

At the conclusion of the labors of the Grand Lodge, the superb hour of the session under "Good of the Order," a number of speeches were made, a few of which are here given.

The Grand Master was suddenly called away from the room on business, and during his absence a collection was taken up and an elegant Grand Master's jewel was purchased to present him. After his return, M. T. Brewer, P. G. M. W., presented the jewel with the following eloquent words.

Past Grand Master and Grand Master Barnes—MY DEAR BROTHER: It is with no ordinary pleasure that, representing this Grand Lodge and the Workmen of California, I address you at this time. You have just passed through a long and arduous term of 14 months, and from the moment you took the helm you have allowed nothing to impede you in carrying forward the mission and interests of our fraternity. You have put forth your great and versatile talents and energies, by day and by night, without stint or cessation, and achieved another grand success to add to the brilliant fraternal reputation you have enjoyed for many years.

My brother, in the name of humanity and fraternity, of widows and orphans, of this great Order, I thank you for your unceasing efforts. Your presence and voice have cheered and inspired tens of thousands; your able and facile pen has ever defended the right, and so clearly and unmistakably presented the benefits and advantages of our Order, and the sophistry of its antagonists, that it has won for our cause the commendation and good will of all impartial men.

My brother, we do not propose to endeavor to pay you for this noble service; that would be beyond our power. But we do propose to present to you a memento of our esteem, which, in days to come, will serve as a reminder of the estimation in which you are held, not only by the 15,000 members of the A. O. U. W. of this State, but, I may truly say, by the people of California, for you have lent your aid to every good cause wherever humanity could be benefited.

I therefore ask your acceptance of this Past Grand Master's jewel, typical, not only of your rank, but of our foundation principles, and symbolizing our beloved Order. It comes, no formal and routine gift, as a matter of course, but as a merited and nobly deserved recognition, which it is a pleasure and honored privilege to bestow upon a faithful officer and untiring brother.

By the unanimous voice of this Grand Lodge, you have been again chosen as its Grand Master. We feel that the interests of fraternity will never suffer while in your keeping. Go on, my brother, and may God bless your efforts. In the name of our Order, I extend to you this right hand—the hand of congratulation for the past, of cheer and confidence for the future.

May heaven still smile upon the efforts that may be made by the A. O. U. W. throughout the globe, until north, south, east and west, from mountain to sea, from hilltop and valley, shall the banners of Charity, Hope and Protection be seen above the dwellings of the people, and want and misery be known no more forever.

Upon receiving the jewel, Grand Master Barnes said: It is a pleasant emotion to receive the honest approval of our fellow-men, and to feel that the hearts of a great fraternity like this hold one in kind esteem. It is gratifying to receive even a slight recognition of labors performed; but, Bro. Brewer, when the medium is a man like yourself, whose daily practice, whose life, whose purse, illustrates fraternal love in its broadest and most comprehensive sense—when the approval comes from a multitude, when the recognition is from the united hearts of such a body as I see before me, second to none that has ever assembled in this great city—when the testimonial is this massive and rich jewel flashing with gems, I would be more than man if I could appropriately reply.

Brothers, I thank you, one and all! I thank you for your grand compliment in re-electing me to this distinguished position. I thank you for your leniency to errors made and kind approval of duties performed, and for this magnificent jewel. I will endeavor so to live and act as to give you no cause to regret that you have this day bestowed it upon me. Its symbols shall ever be emblematic of the love and duty I owe this Order and its membership, its stars and and broad stripes of that I owe my country and the commonwealth of California, and the pink band that bears the initials of our Order—the emblematic color of steadfast friendship—shall typify universal fraternity everywhere, unconfined by land or sea, by marks or boundaries, by nationalities or creeds.

Let fraternity be our polar star. Let it be the fire to light many altars in the year now before us. Let it be the life-blood that shall pulsate the heart and thrill through every vein of California Workmenship. Brethren, great as has been our success, we have but just commenced. United, energetic and constant effort will achieve results of which we have not even dreamed. Bro. Brewer, for your kindly and eloquent words, receive a brother's thanks; and brethren of this Grand Lodge, although I may be unable to express to you my keen appreciation of this and many other favors, yet, rest assured, while life remains to me and reason is vouchsafed, the memory of them will never be forgotten.

Grand Foreman's Speech

James T. Rogers, G. F., said:

G. M. W. and Brothers of the Grand Lodge:

"There is a tide in the affairs of men, which taken at its flood, leads on to fortune." So hath the great poet, high priest of nature spoken with the sweetest and sublimest minstrelsy born on earth. In other words there are supreme moments in the history of men and nations—moments in which acts are done, whose effects will be felt until "the last sylable of recorded time" and whose far-reaching moral and intellectual influences will be realized "on the boundless shores of eternity." It was such a moment when Moses led his hosts from out the sea. All humanity has been affected by that event. It has painted history; it has sculptured out in bold relief the loves, hopes and faith of man; it has given to the world the wisdom of a Solomon, and the salvation of a Christ; it has set upon the Jewish race a stamp, which remains unchanged amid the roll of centuries, and the shifting scenes of national life. It was a supreme moment when Charlemagne drove back the Saracen, and thus preserved civilization and religion to Europe and the West. In the cause of human freedom and a growing fraternity, it was a sublime hour. when a Lincoln in breaking off the chains of bondage, proved that "the pen is mightier than the sword."

So, too, though with different results and instrumentalities, it was a wonderful moment when the grandest conception of our age was practically embodied in our Order and sent on its mission of mercy by the master mind of an Upchurch. I say it was the grandest conception, because it has utilized and combined the two distinguished characteristics of the century. What are they? The one is expressed in one word—"gold"—and the other is the Godlike attribute of charity.

The one is rearing cities, building railroads, tunneling the Alps, cutting inter-ocean canals and bringing to man's use the treasures of earth.

The other is raising churches, planting universities, projecting sanitary measures, organizing secret societies and enthroning fraternity in the heart of man.

It was thus reserved for Upchurch to present the power of gold sanctified by charity. And hence our organization is two-fold, consisting of pecuniary protection and brotherly love.

In the money part of our Order there must be the strictest business principles observed. Honesty and punctuality make success attainable. And while this mercantile prudence is urged upon you, yet your souls must enshrine a conscientious fraternity, because this is the adamantine base of our Order.

You strike from the A. O. U. W. its brotherhood, and you have a statue without life, a flower without perfume, a corporation without conscience. Hence, allow me to press upon your attention the necessity of making your Lodges the nursery of good feelings. And let not your heart become cold to your obligation, nor your ear dull to the pleadings of philanthropy, nor your feet slow to obey the cry of distress.

With a correct money management and a high conception of our moral duties, we shall be able to make the Order a friend to good government and pure morals, a messenger of joy to many a home and a ray of light to the loved ones of our sleeping brothers.

And thus shall we realize that earth is but a pathetic and preparatory introduction to the world of gladsome light.

In the next issue the WATCHMAN will give the other speeches.

Payment of Death Certificates.

It behooves all persons who expect to leave any money behind them to very carefully arrange as to who is to get it, if they have any preference, as they generally have. In the case of Workmen having certificates to "will" or "order," and then dying without leaving any will or order, there may at any time be difficulty about collecting the money. In regard to this the *Call* says:

The decisions of Grand Master Barnes in regard to certificates to "will" or "order," claims of administrators, etc., were referred to a special committee, largely composed of the legal fraternity, unanimously approved by said committee, and said committee's report unanimously adopted. As this is now the law of the Order by enactment, as well as decision, the points are presented, as they may serve as a guide and precedent to other Orders, as well as give information: 1. The possession of a beneficiary certificate is of no value to the holder, unless made payable to said holder, and so recorded on the books of the Grand Recorder. 2. A beneficiary certificate, made payable to "will" or "order," is only *legally* payable upon the production of said "will" or "order." 3. Moneys due on a deceased brother's certificate are no part or parcel of his estate, unless said beneficiary certificate reads, "payable to my estate," or "subject to my debts," and no claim of any administrator, except in cases named, shall be recognized, admitted or allowed.

The action of the Grand Master in finding the true heirs of three deceased brethren, and paying the money to said heirs, on a fraternal principle, notwithstanding the certificates were made "subject to "order" or "will," and no will or order having been made, were virtually null and void, was commended and approved.

That this has been done, however, should not influence members of fraternal societies to leave their certificates in such unsatisfactory condition, but name some person or persons to whom the money shall go in the event of death. Beyond all question, in such cases, if no "will" or "order" is made, legally such certificates are null and void. It is California's practice to find the true heirs and pay them, at present, but this may not continue. Several States have positively said that they will only pay upon the production of said "will" or "order." Therefore, the necessity of complying with law, and naming the person to whom it is desired that the money should go.

WE take pleasure in calling attention to the card of Truman S. Clark & Co., 21 New Montgomery street, under the Grand hotel, manufacturers of Clark's gas-pipe bedstead and woven-wire mattresses. For cheapness, durability and comfort they are unexcelled. A majority of our hospitals, asylums, seminaries and public institutions use them. At the Pacific Grove, Monterey, and summer resorts on this coast, as well as in private families, they are in general use. They are now manufacturing a beautiful bed-lounge which has many superior qualities. The wire cloth is made from Bessemer steel-tined wire, and with the bedstead, is all made at their factory, 21 New Montgomery street.

THE firm of Schleuter & Volberg, importers and dealers in carpets and oil cloths, linoleum, etc., is one of the leading and reliable houses in this line. A large line of choice patterns and new designs have lately arrived and are offered at bottom prices. Bro. Volberg, of the firm, and G. W. Beigle, P. M. W., take pleasure in showing visitors through this palace of carpets, etc.

A. O. U. W. Directory.

Cards inserted in this list at the rate of 25 cents per month payable semi-annually in advance. If errors or omissions are noticed, please write the office direct.

CALIFORNIA.

OFFICERS OF GRAND LODGE.

CLAY W TAYLOR, Past Grand Master Workman Shasta
W. H. BARNES, Grand Master Workman....San Francisco

Arctic Geography.

The events connected with the cruise of the *Jeannette* have, within the past year or two, attracted more attention to the question of Arctic research than ever before. In this country, particularly, greater interest has been manifested in the geographical problems sought to be solved than was supposed would be the case. While the unfortunate ending of the *Jeannette* expedition has caused many to think that such expeditions are useless, yet all feel an interest in Arctic matters not formerly so noticeable.

The cruise of the revenue cutter *Corwin*, Capt. C. L. Hooper, in the Arctic ocean, to which we have before referred in these columns, developed some facts of more than passing moment. From Capt. Hooper's report we take the following description of Herald island, with a sketch by Dr. I. C. Rosse, surgeon of the *Corwin:*

On the morning of the 20th our reckoning placed us to the northward and eastward of Herald island. We stood in to the ice, and, after following its edge to the southward for a few miles, made the land through a break in the fog, bearing northwest (magnetic), distant about ten miles. We hauled up for it and entered the ice, which was quite open on the edge, and steamed in about six miles, where we were stopped by a solid barrier of unbroken ice extending nearly north and south, and from 12 to 40 ft. in hight.

After examining the island (which was only three or four miles distant) very carefully with the glass, and assuring ourselves of the impossibility of there being any human inhabitants, we worked our way back to clear water.

The sides of this island are perpendicular cliffs 800 ft. high, and its top, which was then covered with clouds, is said to be about 1,400 ft. in hight. Capt. Kellett, R. N., who discovered it, and who succeeded in getting a foothold on a projecting rock, says:

"The island on which I landed is 4½ miles in extent, east and west, and about 2½ miles north and south, in the shape of a triangle, the western end being its apex. It is almost inaccessible on all sides, and a solid mass of granite. * * * The extent we had to walk over was not more than 30 ft."

The icy barrier which we found surrounding the island had the appearance of being unbroken, and I am convinced that it was not of a recent formation. I have questioned the whalers closely in regard to it, and find that none of them went west of Herald island last year. I am of the opinion that the ice did not leave it, and that it is no unusual occurrence for the ice to remain two and even three years without leaving the island free. I believe, moreover, that the ice rarely breaks up between Herald island and Wrangel's sound.

After getting clear of the ice we steered to the southeast, and in the afternoon fell in with and boarded the bark *Fleetwing*, of New Bedford, working up toward the island.

While cruising in this vicinity we hauled the dredge several times; but, as on previous occasions, found the bottom very barren of life, a few minute radiates and mollusks and some pieces of broken shells being the only things brought up. The bottom consisted of blue mud or pebbles, and particles of broken shells, according to location. The soundings were found to agree very closely with those given on the chart.

While in the vicinity of Herald island, a small land bird resembling a snipe flew on board. It was caught and caged, but died in a few hours, and was put into alcohol for the Smithsonian Institution.

HERALD ISLAND, IN THE ARCTIC OCEAN.

A Remedy for Toothache.—Dr. F. P. Atkinson describes, in the *Practitioner*, an English medical work, a novel form of treatment for toothache, to which he was led by Dr. Murrell's results with nitro-glycerine in angina pectoris. Being afflicted with severe toothache, and proceeding on the similarity in effect following the employment of nitro-glycerine and nitrate of amyl, he applied to the aching tooth cotton wool, saturated with Richardson's compound anæsthetic ether, which contains the nitrate. Instant relief ensued, which was maintained for four hours by a pledget of wool previously soaked in laudanum. Dr. Atkinson adds that a 1% solution nitro-glycerine has the same effect in stopping pains as nitrate of amyl; and thus a means of relieving a most distressing complaint is opened up.

Can Insects Discriminate Different Colors?

A few years ago, when the problem of the connection between flowers and insects still remained much in the state where Sprengel left it at the end of the last century, it would have seemed quite impossible to answer this question. But nowadays, after the full researches of Darwin, Wallace, Lubbock and Hermann Muller into the subject, we can give a very satisfactory solution, indeed. We now know, not only that the colors of flowers as a whole are intended to attract insects in general, but that certain colors are definitely intended to attract certain special kinds of insects. Thus, to take a few examples only out of hundreds that might be cited, the flowers which lay themselves out for fertilization by miscellaneous small flies are almost always white; those which depend upon the beetles are generally yellow; while those which bid for the favor of bees or butterflies are usually red, purple, lilac or blue. Certain insects always visit one species of flowers alone; and others pass from blossom to blossom of one kind only on a single day, though they may vary a little from kind to kind as the season advances, and one species replaces another.

Certain blossoms which lay themselves out to attract wasps are, as Muller quaintly puts it, "obviously adapted to a less æsthetically cultivated circle of visitors." And some livid red flowers actually resemble in their color and odor decaying raw meat, thus inducing bluebottle flies to visit them and carry their pollen from flower to flower. Down to the minutest distinction between species, this correlation of flowers to the taste of their particular guests seems to hold good. Hermann Muller notes that the common galium of our hedges is white, and therefore visited by small flies; while the lady's bedstraw, its near relative, which is yellow, owes its fertilization to little beetles. Mr. H. O. Forbes noticed on one occasion that a particular bumble-bee sucked the honey from 30 purple nettles in succession, passing, without noticing them, all other flowers in the neighborhood. Sir John Lubbock long ago convinced himself by experiments in placing glass covered with honey upon yellow, pink or blue paper, that

Honey Bees Could Discriminate Colors,

And that they display a marked preference for blue above all other colors. The fact is, blue flowers are, as a rule, specialized for fertilization by bees, and bees therefore prefer this color; while conversely the flowers have at the same time become blue because that was the color which the bees prefer. As in most other cases, the adaptation must have gone on *pari passu* on both sides. As the bee-flowers grew bluer, the bees must have grown fonder and fonder of blue; and as they grew fonder of blue, they must have more and more constantly preferred the bluest flowers.

Keep the Children Warm.—Half the illness and fretfulness of little children might be prevented by keeping them warm enough. They are often so unequally dressed—some parts covered to excess, and others, more vital still, left almost unclothed, that they are in constant discomfort. They cannot tell the difficulty, and thoughtless mothers dismiss the whole subject with the general complaint of crossness.

Formula for Soap to Wash with Sea Water, After the Process of Rome and Mollard.—For one boiling of 116 gallons, take: Lye at 13°, 66 gallons; oil of copiah, 22 gallons; palm oil, 22 gallons, oil earth, nut, or olive oil, 2½ gallons; silicate of soda, 3½ gallons; total, 116 gallons, nearly.

A Singular Disease in Russian Chrome Works.—The manager of the single establishment in Russia for the manufacture of chrome, reports a curious disease among his men. He says: "The workmen suffer from the action upon the nose of the dust of bichromate of potash, and the disease manifests itself thus: A little hole is formed on the partition of the nose (dividing the two nostrils), and increases gradually until the partition entirely disappears, with the exception of the lower part of it, so that to a superficial observer there is nothing the matter with the nose, except perhaps a little outward depression. It must be remarked that as soon as the partition is gone the process seems to stop there, and neither the lungs, air-tubes, nor throat are in the least affected. Its influence is very different with different individuals. Some workmen, after having been employed for 10 years at the works, remain unaffected, while with others the hole in the nose begins to be formed after one month's work. A general inspection of all the men at the works not long ago, proved that more than 50% of them had diseased noses. When the disease sets in first, the man feels tickling in the nose; a week or so after, it bleeds, and in a few days more there is no uncomfortable feeling of any sort, and thus the hole is formed almost without any pain." There are, it is said, six works of the kind in the world—three in Glasgow, Scotland, one in Russia, one in Austria, and one in this country. It would be interesting to know whether the same trouble has ever been noticed outside of Russia.

Transparent Leather.—Messrs. L. Starck & Co., of Mentz, Germany, have patented a new process for manufacturing transparent leather. Common skins are deprived of the hair, cleaned and spread on frames, and are rubbed with a mixture containing 100 parts glycerin 26° B., 0.2 parts sallicylic acid, 0.2 parts picric acid, and 2½ parts boric acid. Before the skins are perfectly dry they are brought into a room from which sunlight is excluded, where they are impregnated with a diluted solution of bichromate of potash, and then dried. The skins are then covered with a diluted solution of shellac in alcohol of high degree. The transparent leather is said to be well-adapted for manufacturing such objects as must possess great strength with small dimensions, as thread for sewing leather, small belts for tools, looms, sewing-machines, etc. The coefficient of strength of this transparent leather is said to be three times greater than that of other leather. Its price is higher for the same weight, but lower for the same dimensions.

India-Rubber Varnish.—Dr. Elder gives the following recipe for making India-rubber varnish: Inclose 30 grams of finely-cut caoutchouc in a capacious linen bag, and suspend this within a flask containing a liter of benzine, by means of a thread held fast by the stopper, so that the bag remains near the surface of the liquid. In the course of six or eight days, the soluble portion of the caoutchouc—about 40% to 60%—will pass into the benzine, while the contents of the bag will expand enormously. The clear solution, which is quite viscous, and contains 1.2% to 1.5% of caoutchouc, is then carefully separated. The swelled contents of the bag retain one-fourth to one-third of the benzine used, and may be utilized for the preparation of an inferior kind of varnish. A solution of India-rubber in benzine, kept in half-full bottles, is decomposed on exposure to light, which may be seen by the change in the solution from a viscous to a thin fluid condition. Even in the dark this change goes on, but it takes about three times as long.

The Dust of Cities.

At a meeting of the San Francisco Microscopical Society this week, Mr. H. G. Hanks, State Mineralogist, read the following paper:

In passing through Montgomery avenue, on my way home, I have often noticed quantities of dusty matter drifted into winrows by the wind. In boisterous afternoons it is blown about, changing its position continuously. In rainy days it assumes the form of a dark-colored mud. Thinking it might contain the organic germs claimed by Tyndall to be inherent in dust, and particularly so in the dust of cities, I had the curiosity to collect a portion, which I submitted to chemical and microscopical examination with the following result:

Placed on the stage of the microscope under a low power, as taken from the street, it presents a disgusting appearance. The most noticeable constituents, as observed, were vegetable fiber, principally horse manure, and the decaying debris of Oregon pine and redwood planking, mixed with bits of coke and coal, broken glass, horse hairs, quart sand, some blue particles, the nature of which could not be determined, and a dark-colored, finely-divided, half-dried mud, which was neither pleasant to the sense of sight or smell.

Burned in a platinum crucible the thoroughly mixed mass gave off a little water, a pale yellow flame and a disagreeable odor. On continuing the heat to incineration there remained in the crucible a ferruginous red-colored ash. The loss was 26% which was mostly organic matter, the sample having been previously dried in a steam bath. The ash was boiled in hydrochloric acid, which dissolved much iron. The gray residue was examined under the microscope with a two-thirds objective, and was found to consist almost wholly of angular quartz fragments, the result, probably, of crushed quartz sand.

A portion of the original substance was then treated with distilled water, which was previously boiled to destroy any organic forms that might be contained in it. Immediately on the water cooling, it was poured over the dust in a clean bottle, which was set aside for microscopic examination. The solution, or rather muddy mixture, was inexpressibly filthy and vile, but on examination microscopically, no living forms were observed. In six hours it was again examined and found to be alive with monads; in twenty-four hours, and again in forty-eight hours, a high power showed the liquid to be teeming with living forms, both animal and vegetable, being an interesting study to the microscopist. I noticed one animalcule in particular which I did not find figured in the books, and which I have never observed before. It somewhat resembles the vibri ones, but it is more sluggish in its movements. When highly magnified it resembles an earth worm. It moves very slowly, without turning, and I could not decide at which end the head was, as it moved with equal facility in either direction. Great numbers of these forms could be seen in the field of the instrument at the same time, swimming with slow motion from side to side.

It is not pleasant to think that great quantities of this vile substance—useful only as a fertilizer—lie in our principal streets, and that it is blown about to be inhaled by ourselves and children. It finds its way into our houses, and when the carpet is swept or our clothes cleaned it rises in dusty particles to fill our lungs, and perhaps to deposit the germs of obscure diseases. It gets into the tanks on the house-tops, and we drink it in our tea and eat it in our food. May it not be that certain diseases which are charged to sewer gas have their origin in this cause

The Bay of Biscay Canal.—The project of uniting the Bay of Biscay with the Mediterranean is beginning to be seriously talked of. The length of the canal will be 270 miles, and the estimated cost $248,000,000. The projectors assume that the canal, when constructed, will take almost the entire trade from the Atlantic to the Mediterranean, leaving the famed fortress of Gibralter to watch over waters undisturbed by ships of traffic. The canal would undoubtedly reduce the importance which Gibraltar now holds as the key to the Mediterranean, but there seems some doubt if it can be made profitable as a business venture. There would be very little saving of time by the new route, after allowing for the slowness of canal travel, compared with that on the open sea. But, in the event of war, the French might find it convenient to run ships into the Mediterranean, without passing under the guns of Gibraltar.

PACIFIC STATES WATCHMAN.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and handsome," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1.25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞ For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter.

San Francisco, - April 15, 1882

A Proud Record.

It was a handsome thing that our Grand Lodge did, when its first act in session was the endorsement of the action of the Supreme Master in the Iowa matter. Nearly 300 of California's representative Workmen voted unanimously in favor of the proposition, and not content with this, they went farther, and, after due deliberation, put themselves on record as in favor of summarily expelling from the Order any member who would seek to escape the binding force of his solemn obligations, by invoking the interposition of the courts, or other means for such a reprehensible purpose. And this is right. If a fraternal society cannot control its own members, as a last resort it must have a right to expel them, or it has no rights at all that are worth anything, for it has no other means to sustain the dignity of its laws and edicts. It has neither army nor navy, swords nor muskets, shot nor shell, not even the strength of civil process, at its command. Its only strength lies in the faith of man pledged to man on a common altar. Therefore, to tolerate disobedience, is to give up government altogether, which is but to give up the ghost. It really seems that anyone of common intelligence should see this, but, either from the oblivious effects of selfishness, or willful blindness, some affect not to perceive. Such people have no place in a fraternal organization, and the sooner they find it out, the better for all concerned.

Our representatives will go to the Supreme Lodge knowing they will be fully sustained in every honorable measure they may support to uphold the dignity of our laws, and bring offenders to punishment. Feeling that, personally, each and every one of them is in accord with these views, it is not too much to expect that, so far as California is concerned, there will be no lack of effort to enact such measures as will strengthen our Order, insomuch that Iowa's defection will, in the end, make us far more closely united than ever before. The time is opportune. Dignified, considerate and firm action is what is needed now. There is no peril so great as certain destruction. Though one, two, three or more jurisdictions revolt, cut them off, the body can survive without them, but they cannot survive without the body. Part with a refractory member sorrowfully, but part with him, and without hesitation.

We expect, when the doings of the next Supreme Lodge shall go into history, it will mark an era in the existence of our Order from which will date its real permanence, and stamp it as one of the most remarkable institutions of the age.

In Memoriam.

The associate editor of this journal, Owen O'Neil, died suddenly on the 3d inst. He went to North Beach in the morning to bathe, and after coming from the warm salt-water bath went under a cold shower. He fell under the shock, although he had repeatedly bathed in this manner for a month or two previously. He retained consciousness long enough to give his address, and when taken home spoke to his wife, complaining of his head. In a few hours he died. Deceased was Overseer of Olympic Lodge, No. 127, A. O. U. W., and a member of Bohemian Lodge, A. L. of H. The funeral ceremonies took place under the auspices of both the orders. Mr. O'Neil leaves a wife and two children to mourn his loss. A member of his Lodge, Adley H. Cummins, who knew him well, contributes to his memory the following.

The young man whose career came to so untimely a close on the third instant, was born on the 26th of October, 1849. Being left motherless at a tender age, he and his brother were brought to California by the father, and settled in Shasta county. From thence the family removed to San Francisco, and young O'Neil received his literary education at St. Mary's college, and his preliminary business preparation at the Pacific Business college, from which he graduated in 1869. Having an inclination towards printing and journalistic pursuits, he was employed upon various papers, finally becoming identified with the WATCHMAN as its editor. He was married in 1876 to Miss Lizzie Mackey, and their children are two little boys, aged respectively three and five years. Up to within a few hours of his death there was fair promise of a long life of usefulness for this gentleman. In addition to possessing membership in the A. O. U. W., he had but just joined another Order, which, in addition to moral integrity, requires physical soundness, and the very last Lodge meeting he attended, five evenings before his death, was that of this sister Order, from which he had just received its certificate of insurance—a remarkable evidence of the wisdom of such forethought.

He was a valued member and Overseer of Olympic Lodge, No. 127, A. O. U. W., with whose members he enjoyed a greatly esteemed association. Such are the short and simple annals of this our friend.

The brilliant poet Keats, who passed away so young, with undoubtedly a clear conception of his own capabilities, and filled with poignant disappointment at his brief career, desired this melancholy phrase to be inscribed on his tomb: "Here lies one whose name was written in water." But he erred. Short as was his life, few and full of sorrow as were his days, he lived not in vain, for he who would see the more aimable divinities of the ancients, made instinct with existence, and given the beauteous hues of life and health, must turn to his eloquent and luxurious verse.

We hence derive this lesson: That it is not the part of wisdom to indulge a hasty judgment; that one cut off in the flower of his age has failed to attain some goodly end among his fellow men. One may not be a mighty Pharos, fiercely illuming sea and sky, but one may cast a humble and a genial ray that shall throw a soft and gentle radiance over the turbid waters of our daily business life. One may not preach, trumped-tongued, to human kind like Peter the Hermit, but he may plead with the resistless logic of a pure and upright life, that good deeds and unassuming virtues are the eloquent voices of success. Finally, while one may not be laid away to rest with the majestic pomp of the Order of the Golden Fleece, yet he may be followed to that house "that is narrow and small, but where there is great rest," by many who sincerely lament that inscrutable destiny that calls hence integrity and worth, and leaves here vice and wrong, to fling their inky banners to the breeze.

Will anyone arise and deny to this gentleman the excellent qualities enumerated above? In all the relations of life unexceptionable; a faithful friend and man of family, good citizen, and a thorough business man. We take leave of him with these words. It was something to have lived at all; it was much to have lived well—*Finis coronat opus.*

The following, by Edward P. Fish, P. M. W., of Olympic Lodge, is self-explanatory:

Worthy Sister of Honor, Officers and Members of Aurora Lodge, and Officers and Members of Olympic Lodge:

Since we last assembled in this Lodge-room, we have been required to perform the saddest and most solemn duty of our Order. The hand of the Destroyer has fallen upon us. It is fitting that at this time we should give expression to our sorrow and to our sympathy for the bereaved wife who shares it with us.

Death, the inexorable, yet impartial monarch of the charnel house, has claimed another sacrifice from us, and has summoned from our midst our beloved brother, Owen O'Neil, to "join the innumerable caravan" of the loved and lost.

Another chair in our fraternal circle is vacant; never more shall it hold the loved form of him who now treads the unknown way. A noble heart is enchained by the icy fetters of the tomb; never more may it throb responsive to our joys or our trials. Another voice is hushed; never more shall it speak the words of cheer, with which it was wont to greet us who loved its music best. The grim sepulchre holds all that is mortal of him who, but a few days since, was among us in the flesh—our honored brother, our genial companion, our trusted friend.

Those of you who were present at the last sad rites will remember the storm which preceded the ceremonies. You will also, perhaps, remember that scarcely had the pall-bearers placed their inanimate burden upon its temporary resting place, ere the sun, struggling through the overhanging clouds, threw a bright ray across the narrow couch, glorifying the features of its unconscious occupant. It seemed to me that the light of immortality, which gleams brightly on the boundless shores of eternity, had flashed a ray athwart his path to guide him safely to the realms of everlasting bliss and peace. It seemed an omen of the joy which awaited our brother in the home of the blest—a harbinger of the reward which he surely merited in the sunset land.

May "He who doeth all things well" imbue us with true charity toward her whose home is made desolate by this sudden bereavement. May he inspire us with hope that the promise made on Calvary shall be extended to this latest pilgrim from our midst. May He extend his protection to the little family circle whose head has been taken away, whose prop has been removed forever.

May the Supreme Overseer of the universe, who has

"A sovereign balm for every wound,
A cordial for our fears"

Guide and direct, and comfort us all, in this our great affliction, and inspire us anew with fraternal love and charity.

Our brother, you have gone but a little way before us, though we mourn thy loss, we will not deplore thee—

"All that breathe will share thy destiny, the gay will laugh
when thou art gone, the solemn brood of care
Plod on and each one, as before, will chase
His favorite phantom yet all these shall leave
Their mirth and their employments, and shall come,
And make their bed with thee."

Almighty God, Supreme Master of the universe, to whom all things are known, with whom all things are possible, who art the creator and preserver of all mankind, we would say, "Thy will be done."

"We see not, know not; all our way
Is night with thee alone is day:
From out the torrents troubled drift,
Above the storm our prayers we lift,
Thy will be done!

"The flesh may fail, the heart may faint,
But who are we to make complaint,
Or dare to plead, in times like these,
The weakness of our love of ease?
Thy will be done!

"We take with solemn thankfulness
Our burden up, nor ask it less,
And count it joy that even we,
May suffer, serve, or wait for thee,
Those will be done!

"Though dim as yet, in tint and line,
We trace thy picture's wise design,
And thank thee that our age supplies
Its dark relief of sacrifice.
Thy will be done!

"And if, in our unworthiness,
Thy sacrificial wine we press,
If from thy ordeal's heated bars
Our feet are seamed with crimson scars,
Thy will be done!

"If, for the age to come, this hour
Of trial hath vicarious power,
And, blest by thee, our present pain
Be Liberty's eternal gain,
Thy will be done!

"Strike, thou, the Master, we, thy keys,
The anthem of the destinies!
The minor of thy lottier strain,
Our hearts shall breathe the old refrain,
Thy will be done!"

Resolutions of Respect.

[IN MEMORIAM.]

HALL OF OLYMPIC LODGE, No. 127, A. O. U. W.,
San Francisco, April 11, 1882.

To the Master Workman, Officers and Members of Olympic Lodge, No. 127, A. O. U. W.—DEAR SIRS AND BROTHERS:—We, your committee, to whom was assigned the duty of preparing suitable resolutions on the death of our Overseer, OWEN O'NEIL, beg leave to submit the following:

WHEREAS, In the eternal providence of God, our friend and brother, OWEN O'NEIL, has been suddenly called hence; therefore, be it

Resolved, That we, the members of Olympic Lodge, No. 127, A. O. U. W., experience a deep and indelible sense of personal loss and sorrow, in realizing the fact that we shall no longer have with us this kindly and upright man, upon whose thoughtful and intelligent judgment we were used to rely, for whose strict integrity and unassuming virtues we have entertained the highest esteem, and of whose constant and genial companionship we have had the greatest appreciation.

Resolved, further, That if it be true that a good and upright man never lives in vain, we are convinced that, in a pre-eminent sense, the influence of a life such as that of our late brother has not been lost to those who have been privileged to know him, but that such lives, like the olives on the sacred mount, are destined to produce a perennial fruitage of good.

Resolved, further, That a copy hereof be transmitted to his bereaved family, and to the PACIFIC STATES WATCHMAN, with whose interests his life was identified, with the assurance that these resolutions are not adopted in a perfunctory or mechanical sense, but that they speak of the truth that is within us. And be it further

Resolved, That the charter of the Lodge be draped in mourning for the space of thirty days, as an outward evidence of the loss Olympic Lodge, No. 127, A. O. U. W., has sustained in the death of its Overseer, OWEN O'NEIL.

All of which is fraternally submitted in C. H. & P.

A. H. CUMMINS,
GEO. W. DIXON,
E. H. MORGAN,
Committee.

Adopted unanimously by Olympic Lodge, No. 127, A. O. U. W., April 11, 1882.

J. P. KEATING, M. W.
[Seal.] R. H. ORTON, Rec.

Concurred in by Aurora Lodge, No. 8, D. of H., at its regular meeting, April 11, 1882

MRS. F. HOLLAND, W. S. of H.
[Seal.] GEO. W. DIXON, Sec. *pro tem.*

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. PRATT, G. R.

WM. C. FLINT, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

WE write, as it were, beneath the shadow of the dark wing of the angel of death, and our pen falters in its office. But a few days since, the editor of this paper, our good, true and noble-hearted friend, Owen O'Neil, was stricken down in the flower of his youth—in the day of his brightest prospects and hopes. We had come to love him for his admirable qualities of head and heart. He has passed away from earth forever. There is a void which is unfilled, a silence that will never be broken till the grave shall give up its dead.

Following close upon this sad bereavement comes another. Rev. Dr. Hamilton lies in the tomb. He died in the pulpit, garnered by the Divine Husbandman like a shock fully ripe for the harvest; but yet our heart bleeds because of the loss of so dear a friend and brother. One by one the trees are falling about us; one by one the flowers fade away. The night follows the day, but the day will break again on the night—not here below, but in the land to which we are journeying. We shall meet there by-and-by. But for this hope, and this assurance, life would be but a dreary waste, with scarcely a green twig to gladden the eye or relieve the landscape. God's will be done!

WE are are in hopes to get the complete journal of the proceedings of the Grand Lodge ready for delivery in about 10 days—possibly sooner. The work is now going through the press.

MUCH business and much weariness is sufficient excuse for a paucity of matter in this department. Will try to make all proper amends in the future.

ANY questions relating to the Order that it may be desired should be answered in this department, will be cheerfully replied to, according to the best of our ability. But it must be borne in mind that the *opinions* of the Grand Recorder are the opinions of an individual, and in no wise judicial decisions. Such must come from the Grand Master or the Grand Lodge.

THE Grand Master wisely re-appointed all his old-standing committees. No more faithful and efficient brethren ever occupied such positions.

MUSICAL AND LITERARY ENTERTAINMENT.—Keystone Lodge, No. 64 (Oakland), will give a musical and literary entertainment Friday, May 5th, for the benefit of Dr. J. B. Williams. This worthy gentleman was the first medical examiner of the Lodge, and is most universally liked and commended. He was taken with lameness, and hung in the balance between life and death for months. His lovely and devoted wife (daughter of J. H. Wythe) died from over care and anxiety for him at a critical period, and during his most severe afflictions. Keystone pays no sick benefits, but in this instance has done its duty in donating its funds liberally, as far as consistent, and now seeks to further benefit, as well as compliment their brother, by tendering such an entertainment as will make those who attend and contribute, bless themselves doubly in well doing, and individually enjoying a splendid literary occasion.

THE brethren of Oregon are practically exemplifying what Charity is. It seems that one Bro. Trehart, through neglect, had failed to pay his assessment, and was consequently reported by his Lodge to the Grand Recorder as delinquent, and so marked on the books. In the meantime the brother died, leaving a family in destitute circumstances. The Finance Committee, to whom the facts were presented, held that as the brother had forfeited all claims upon the Order through his neglect, the claim could not be legally paid. They recommended, however, that the Lodges could voluntarily contribute the $2,000, which they are now doing, and the latest advices state that the full amount will be raised.

OWEN O'NEAL, of the PACIFIC STATES WATCHMAN, died very suddenly on the 3d inst. He was a genial, pleasant gentleman, an earnest and untiring Workman, and his loss will be mourned by the scores of friends he made wherever he went.—*Morning Call.*

REPRESENTATIVES to the Grand Lodge, by referring to our report of the session, may be able to return more complete information to their members than otherwise.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

Golden Gate, 8.

On Thursday evening, April 6th, Golden Gate, No. 8, was honored with a visit from a number of Grand officers. Under the head "Good of the Order," W. J. Rogers, G. F., made a short speech that was logical, and the ideas advanced were directed to a deduction of the fact that fraternity was the great factor in making this Order what we see it to-day. Harry J. Lask, G. Guide, was called and made some very pertinent and congratulatory remarks that were well received. Seneca Davis, G. O., made a humorous and pathetic speech, relating his trials and triumphs at this Grand Lodge, which created much amusement. Wm. H. Barnes, Grand Master elect, in one of his happiest moods roused the brethren up to a high pitch of enthusiasm. As the Grand officers had one more engagement, they retired with the honors of the Lodge, as they had been introduced by E. Lewis, P. M. W., with becoming dignity, at the time of their entrance. After this feast the J. W. degree was conferred on one candidate, and a profitable meeting was closed with speeches from a large number of our Grand Lodge representatives.

Yerba Buena, 14.

As a sample of the progress of the new term, we witnessed the conferring of the J. W. degree on seven candidates, on April 6th, in the old pioneer, Yerba Buena. The work was done admirably, and received several compliments from visiting brothers who had been attendants on the Grand Lodge as representatives. A significant feature was the youthful appearance of the new brethren, and by reference to the books of the Recorder we found their average age to be 28 years. There was a large attendance, and after the careful attention to business the usual shower of speeches was opened by A. O. Carpenter, P. M. W., of Ukiah, in a few humorous remarks that were well received. Seneca Davis, G. O., in his usual happy manner entertained his brethren by a short speech, in the course of which he paid the Yerba Buena Lodge a fine compliment, by saying that the body of men before him was as fine a set of representative men as he had ever seen in a subordinate Lodge. Frank B. May, P. M. W.; J. G. Severance, P. M. W.; A. A. Egleston, P. M. W.; C. H. M. Curry, P. M. W.; and John Henderson, Jr., gave cheering words in reference to the doings of the Grand Lodge, and hopeful prospects for the coming year. At the close of the meeting, Bro. Gleason, F., as critic, reviewed the proceedings of the evening.

Valley, No 30.

During the week of the meeting of the Grand Lodge at the regular meeting of Valley No. 30, four candidates received the J. W. degree, and a number of petitions read. Under "Good of the Order," Bros. J. M. Gleavis, P. M. W., and O J. Lawry, P. M. W., of Redding; H. W. Brewer, P. M. W., of Antioch; G. W. T. Carter, P. M. W., of Point of Timber; Carolan Sharpe, P. M. W., of Walnut Creek; Seneca Davis P. M. W., of Placerville; Chas. A. Gardiner, P. M. W., Eureka, St. Helena; E. H. Black, P. M. W., and Wm. H. Patterson, of Valley, made very acceptable and felicitous speeches, that were enjoyable to all. During the initiation of Yerba Buena, at her last meeting, Bro. Osgood of that lodge, witnessed with evident satisfaction the conferring of the J. W. degree on his son.

Magnolia, 41.

On April 3d, Magnolia, No. 41, conferred the J. W. degree on one, and the work was creditably done. Under the usual head, several visitors present paid the officers a high compliment for the manner in which the work was done. Speeches of a very interesting character were made by Bros. Sam Booth, P. M. W., and J. F. Jenness, F. of Excelsior; R. H. Witherill, P. M. W. of Ventura Lodge. Among many things he said was this: "We have doubled our numbers in a year, and as yet remain intact. We in the rural districts are banded together for a good purpose, with our noble brethren from the city." G. W. T. Carter, P. M. W. of Point of Timber Lodge, and others, made acceptable speeches.

Triumph, 180.

A really enjoyable meeting was held by Triumph No. 180, on Tuesday evening, April 4th. The J. W. degree was conferred on one candidate, after which the usual intellectual feast was indulged in by a large number of visiting brethren. James T. Rogers, Grand Overseer, in a logical and instructive manner gave a cursory review of the principles and grandeur of our organization, which was received with much favor. M. T. Brewer, P. G. M. W., made one of his happiest efforts, reviewing, criticising and fully discussing the different principles of our Order, particularly emphasizing the fraternal feature as the rock and chief corner-stone on which our security rests. His speech was listened to with close attention and heartily applauded. E. M. Reading, P. M. W., was called, and followed in a few eloquent remarks in the same line of argument. Mr. Conkrite, who acted as P. M. W., made a few felicitous remarks followed by Seneca Davis, G. O.; John Jonson, P. M. W., of Fresno Lodge; T. F. Durham, P. M. W., Maxwell Lodge Colusa Co.; Bro. Daly, P. M. W., of Lakeport Lodge; Jas. Waterman, P. M. W., of Triumph; Harry J. Lask, P. M. W. of Golden Gate; S. S. Russell of Bald Mountain Lodge 120; G. Cohen, Fin. of Harmony and others.

Oakland Lodge Locals.

Keystone, 64.

This Lodge has had initiatory ceremonies at each of the last four meetings. At the last meeting two brothers received the M. W. degree. This Lodge is quite flourishing, and has numerous active members, a goodly percentage of whom attend regularly. The officers are enthusiastic and intelligent. The Recorder of the Lodge, Chas. E. Alden, has been appointed District Deputy, an office he will fill creditably to himself and the Order, as he brings to it enthusiasm and energy, and an accurate knowledge of all that is necessary.

Lodge Locals.

Ashler, 165.

One of the most pleasing entertainments that has taken place in Alameda, was enacted by the members of Ashler Lodge, A. O. U. W., last evening. Mr. Harry Wheaton being about to start for the classic precincts of San Rafael, where he will remain about three months, for the benefit of Mrs. Wheaton's health, his brother Workmen resolved to present him with a substantial testimonial of their regard. The matter was placed in the hands of P. W., Barton, E. T. Barnes and J. E. Baker, with full powers; how well this committee performed the duties assigned it, was made manifest. Under the head of "Good of the Order," Bro. J. E. Baker presented to Past Master Wheaton a fine set of carvers, enclosed in a satin-lined box, with the best wishes of his many friends in Ashler Lodge. In a speech replete with happy points, and with a pathos born of sincerity and the fullest realization of fraternal affection, Bro. Wheaton was completely taken aback and for once the brothers surrounding him congratulated themselves of having the best of him; however, he soon recovered his equipoise and went manfully to work to recover lost ground. On his resuming his seat, he was forced to hold a levee and show what he knew of the art of hand shaking. No sooner had quiet been restored, that lest such a gift would be taken as a hint to cut himself clear of Alameda, Bro. E. T. Barnes stepped forth, and in the following glowing terms pictured the delights of home enjoyments, and in order to make it as comfortable as possible, presented the nonplussed Wheaton with a magnificent parlor easy chair.

Brother Master Workmen and Brothers: I am favored this evening with the performance of the most pleasant duty that has fallen to my lot since I have had the honor of being a member of that happy band of brothers known as Ashler Lodge, No. 165, A. O. U. W. The fitting recognition of sterling worth, of honest purposes and active successful efforts in behalf of this brotherhood is a part of our mission here to-night. The embodiment of these virtues so necessary to fraternal success, is with us to-night in the person of our worthy retiring Past Master, Bro. H. B. Wheaton. Active, zealous, faithful and unfearing, he has labored to build up this Lodge and establish that whole-souled feeling between its members that has made the name of Ashler the synonym of social enjoyment wherever it is known. Bro. Past Master Wheaton, as an evidence of our appreciation of your good offices to this Lodge, permit me to present to you on its behalf this chair, with the wish that when in its restful embrace you while away your leisure hours, you will remember with both pride and pleasure that it is a token of the very warmest feelings of fraternal love that beats in the heart of every Ashler boy when the name of "Harry" is spoken.

The picture of the astonishment of the recipient is best imagined, but soon he found his wits—he has plenty of them—and expressed his appreciation and pleasure in receiving such substantial and beautiful gifts. After a season of rare enjoyment, the Lodge was closed, and the remaining member of the committee, Mr. P. W. Barton, invited the members over to Smith's rotisserie, where a bountiful collation was served. It was here the Ashler boys came out as only they can, and during the evening, toasts, songs, choruses, and fun followed each other in quick succession. Bros. Callie, Ellsworth, Herbert, Edson, Prindeater, Larensen, and others, of the many gifted ones, taking part in the exercises, and one of the brothers being called upon as a representative of the quiet portion of the Lodge, offered the following production of his facile pen:

Tribute to Harry B. Wheaton, on his departure for San Rafael:

"Will Ashler miss him?" Do you ask?
To answer (feebly) be my task.
Words can never half reveal
What our hearts will surely feel.

Go, and ask the spring-time flowers
If they'd miss the sun's warm hours?
Or, ask the birdling in the nest,
With mother gone, where'd be its rest?
Ask of yonder maiden, too,
If she'd miss her lover, true?
Would the bee the honey miss?
And the rose the dew's soft kiss?
Or, would man have been forlorn,
Had there been no woman born?
Yes, ask Von Schneider, were he here,
How much he'd miss his lager beer?

Miss him! Very much, methinks,
When in Lodge, we hold "high jinks;"
Miss his kind familiar face,
Miss his gentlemanly grace,
Miss his fellowship—so rare,
Miss that head—so *shining* fair,
Miss his wit and repartee,
Miss his songs of happy glee,
Miss his eyes so full of light,
Miss him every Tuesday night.

Paint the picture—*Ashler sad!*
What on earth will make her glad?
Send for Harry—o'er the bay,
She'll be merry—right away;
Send for Harry—jolly boy,
He will bring her back to joy.

When he comes—our brother, friend,
Hearty welcome we'll extend.

Bro. J. B. Vesburgh, by several productions of this kind, has stamped himself Poet Laureate of Ashler. The absent brothers were not forgotten, Bro. P. M. Cheminant appeared as their representative and read an interesting letter from Bro. F. N. Delaney, who is making a tour of the world. At a late hour the festivities were brought to a close, with a toast to our country, the singing of "America," and "Auld Lang Syne." The occasion is one that will forever remain fresh and green in the hearts of all the brothers present, and was an evidence that their friendship for the departing brother is planted in "esteem's deep-fixed soil." We must part awhile; a few short months—though short, they will be long without thy dear society; but yet we must endure it, and our love will be the fonder after parting—it will grow intenser in yur absence, and again burn with a tender glow when you return.

Mt. Hamilton, 43.

We had the pleasure of visiting Mt. Hamilton Lodge, San Jose, on Wednesday evening, April 12th. Three candidates received the M. W. degree, and we are warranted in saying that the manner, style and correctness of the work was in keeping with the reputation which this subordinate enjoys of being equal to any in this jurisdiction. The average age of the candidates was under 27 years. Under the head, "Good of the Order," J. B. Finch, P. M. W., as Chairman of the delegation, made a report of the Grand Lodge. Bro. C. H. Clayton, of Hanford, made a short, fraternal speech that was well received. A. B. Hamilton, Dist. Deputy; J. B. Church, Grand Trustee; J. Blumenthal, P. M. W.; Wm. Vintor, Chas. N. Shortridge, Fin.; with interesting and timely remarks, closed a very happy and profitable meeting.

Covenant, 97.

This Lodge (Auburn, Placer Co.), was visited by G. M. W. H. W. Barnes, Grand Recorder Pratt and E. M. Reading, on Wednesday evening. The members repaired afterward to Music hall, where Grand Master Barnes addressed a large audience. There was good music, interspersed with recitations.

Honcut, 205,

At Moore's Station, Butte county, will have a picnic on May 1st, and there will be a ball in the evening. There will be a railroad excursion from Marysville and Oroville, several trains running. All Workmen and the public are invited. The locality referred to is in a beautiful foot-hill country, and well situated on the railroad between Marysville and Oroville. Some of the Chico brethren promise to attend.

Reception to the Grand Lodge and Distinguished Guests from San Jose.

Our brethren of Excelsior, 126, acquitted themselves in a highly commendable manner on Thursday evening, April 6th, at the large hall adjacent to their Lodge-room, Mayberry's building. It was a combined effort of Excelsior, 126, and Golden Dawn, D. of H., in getting up a musical and literary entertainment and grand banquet for Workmen and their families and distinguished guests. There were two long tables extending the entire length of the large hall, loaded with the best of good things, fruits and large floral decorations. The large company was seated around the table and J. F. Jenness, Foreman, as Master of ceremonies, introduced the following programme, and asked Wm. H. Jordan, P. G. M. W. to respond, which he did in that feeling and interesting manner, as in days gone by, when he instituted Excelsior, and gave them hearty cheer.

1. Duet, by Bro. Hahn and son. 2. "The A. O. U. W.—May its charity be as far-reaching as the universe, its hope as enduring as eternity, and the humblest of its members ever be enfolded in the mantle of its protection."—P. G. M. W. Jordan. 3. Song, "The Clough and the Crow," Mrs. Clark and Bros. Clark and Booth. 4. "Excelsior Lodge—May its character and achievements ever be in keeping with the aspirations implied in its name."—Bro. E. F. Adams. 5. "The Grand Lodge of Cal.—May its officers be distinguished for ability, its members for loyalty to the Order, and its legislation for wisdom and liberality."—G. M. W., Bro. Barnes. 6. Recitation, "The Cat and the Canary," Ina Jenness. 7. "The Degree of Honor—May it prove the blessed counterpart and compliment of our Order—a worthy helpmeet for a worthy consort."—P. M. W., Bro. E. M. Reading. 8. "The esthetic in our Order—May its path be strewn with sunflowers and lilies, and its moments Wilde away with pleasures too utterly utter substantial and real for any *fool*-ery.—Bro. Wm. A. White. 9 "The ladies—God bless them! Our mothers, wives and sweethearts."—P. M. W. Sam Booth; followed by a song. 10. "Our library and Librarian, one and inseparable.—May the former gain many leaves and the latter leave many gains for its growth and support."—Bro. S. A. White. 11. Song, "The Little Brown Cot," Bro. James Booth. 12. "The ladies of Golden Dawn, like our cream and confections, sweet and delicious."—P. M. W. Bro. F. S. Boland. 13. "Our homes, our wives and our babies.—Our homes, Lodges where we may remain all night; our wives, Grand Lecturers; our babies, Junior Workmen on probation, soon to fill our places."—Bro. Metcalf. 14. Glee, "Good-Night Beloved," by our quartette.

The song composed and sung by Past Master Workman, Sam Booth, was as follows:

I'll sing to you a modern song, made by modern pate,
Of a Past Grand Master Workman, who had a small estate;
Who lived in San Francisco, at a very modest rate;
An honest, loyal citizen, as the papers all relate—
This P. G. M. W., all of the modern time.

For many years he was a Master Workman, good and true,
And on the floor, or in the chairs, he wrought like me or you;
And so the brethren of his Lodge did promptly "put him through,"
Till he attained the honors, that so justly were his due—
This P. G. M. W., all of the modern time.

To the Grand Lodge he was sent, to represent the brethren there;
Performed his various duties with fidelity and care;
And his colleagues discovered soon his gifts, so rich and rare,
And he was quickly taken up, and boosted in the chair—
This P. G. M. W., all of the modern time.

For fourteen months he's labored hard, with brain, and voice, and pen,
With speech and counsel, interspersed with music, now and then;
And gained the golden eulogies of every kind of men;
And so we've put him back in the Grand Master's chair again—
This P. G. M. W., all of the modern time.

And so, with all his blushing honors fresh upon his brow,
To the Supreme Lodge, on our behalf, we've sent our brother now;
With his credentials all indorsed, that all the world may know
He has our love and confidence, wherever he may go—
This P. G. M. W., all of the modern time.

—*Sam Booth.*

A Compliment to the Watchman.

At the meeting of the Grand Lodge, the following report of Committee on "Good of the Order: "In regard to that portion of the report on page 21, in reference to the PACIFIC STATES WATCHMAN, your committee recommend the adoption of the following resolution:

Resolved, That we recognize and appreciate the valuable services rendered by the PACIFIC STATES WATCHMAN, as an able exponent of our Order. Its management, under experienced and responsible publishers, warrants us in fully endorsing and recommending it to the individual patronage of all members of the A. O. U. W.—D. S. HIRSHBERG, BENJ. KNIGHT, JR, GEO. T. SHAW, A. F. BLOOD, SAM. BOOTH.

Motions which were not carried, and resolutions introduced, but not in the main adopted, we have omitted from this report as not of essential interest to the general reader.

MEDICAL FEES.—One of the actions of the Grand Lodge was to settle the matter of medical fees in the case of rejected candidates. It was formerly the custom for the rejected candidate to receive back his fees, the Lodge paying them. Now the medical fee must be paid by the applicant; that is, if rejected, $1 of the $3 is returned to him by the Lodge, but the $2 examination fee is retained.

IT was our intention to publish with this issue a 24-page edition, but owing to the death of Bro. O'Neil, we have been compelled to defer it for the present.

THE TUNNEL FROM SICILY TO ITALY.—The length of the submarine tunnel between Italy and Sicily will be about 43,296 ft. The minimum depth of the sea above the line of the tunnel is 360 ft., and the thickness of rock between the roof of the tunnel and the bottom of the sea is 114 ft. The direction of the tunnel from St. Agata to Punta del Pizzo is almost due northwest to southeast, the two inclines leading to the tunnel running parallel with the above for some distance and then descending to the lowest level by spiral tunnels. The length of each of these inclines is 14,640 ft., and the degree of inclination will be about 35 per 1,000, this having been found by experience to be perfectly practical. According to the opinion of all geologists, the bottom of the Straits of Messina consists of crystalline rock (granite gneiss and mica schists). Neither in Calabria nor in Sicily can the upper strata that cover this crystalline rock be so thick as to reach the level of the bottom of the descending inclines. Geological and hydraulic considerations agree in the conclusion that the submarine isthmus between Punta del Pizzo and St. Agata cannot consist of material that is compact or easily corroded.

REMEDY FOR POISON OAK.—Dr. S. A. Brown who is stationed at Mare Island, in this State, announces he has discovered a certain remedy for poisoning from sumac, ivy, etc. It is bromine dissolved in olive oil, cosmoline or glycerine. He used 20 drops of bromine to one ounce of oil, rubbing it on the affected part 3 or 4 times a day, and washing it off occasionally with castile soap.

OUR U. S. AND FOREIGN PATENT AGENCY presents many and important advantages as a Home Agency over all others, by reason of long establishment, great experience, thorough system, intimate acquaintance with the subjects of inventions in our own community, and our most extensive law and reference library containing official American and foreign reports, files of scientific and mechanical publications, etc. All worthy inventions patented through our Agency will have the benefit of an illustration or a description in the MINING AND SCIENTIFIC PRESS. We transact every branch of Patent business, and obtain Patents in all countries which grant protection to inventors. The large majority of U. S. and Foreign Patents issued to inventors on the Pacific Coast have been obtained through our Agency. We can give the best and most *reliable* advice as to the patentability of new inventions. Our prices are as low as any first-class agencies in the Eastern States, while our advantages for Pacific Coast inventors are far superior. Advice and Circulars free. DEWEY & CO., PATENT AGENTS.

BEANS AS FOOD.—The nutritive value of beans is very great—greater than almost any other article of food in common use. Considering their richness, they are probably the cheapest food we have, but somewhat difficult of digestion, probably owing to the fact that we rarely cook them enough and masticate insufficiently. In preparing beans for the table, they should first be well soaked in cold water and then thrown into boiling water and cocked until of a medium consistency, between a fluid and a solid, neither too thick nor too thin. They require some acid on them when eaten, and a sufficient amount of salt to render them palatable. They may be eaten with potatoes or other vegetables which contain more starch and less albumen, rather than with too much bread or meat. In Germany there is a process patented by which beans and all leguminous seeds are reduced to a very fine flour, and rendered capable of being used as food by the most delicate persons. We have samples of this flour, which equals in fineness the best wheat flour, and it is used extensively for making soups for invalids. These soups are worth a hundred times as much as beef tea. There is a fortune awaiting any one who will prepare a flour from beans as perfect as this flour from Germany. Bean soup, rightly made, is exceedingly delicious and wholesome, and ought to be used more extensively than it is.—*Sanitarian.*

J. O. JEPHSON, Proprietor.

INCREASING NEED OF BRAIN-WORK IN THE ARTS.—At a recent gathering of the spinners and weavers of a large Paisley firm, one of the proprietors gave his men an account of his recent visit to this country. Speaking of the race for industrial supremacy between the English-speaking peoples of the old and new world, and the increasingly important part played by technical knowledge and inventive power in the great competition, he said: "The time was when physical exertion alone could win the battle; but in these days of scientific research, brain power is the element of success. A workman now requires to employ his head quite as much as his hands, and with every new invention physical labor will be lessened, but head labor will be increased. You cannot read too much, you cannot study too much, and you cannot tax your powers of thought too much. Specially would I say to young men: Never consider that your present machinery is perfect; look at it rather as crude compared to what it might be."

THE MOST DANGEROUS POISON.—The late Sir Robert Christison was the discoverer, by an experiment on himself which nearly proved fatal, of the properties of the Calabar bean, and was one of the last pupils of Orfila, the great toxicologist. At the Palmer trial, after testifying that he knew a vegetable alkaloid, the minutest dose of which was fatal, but which no test could detect in the body, he was adjured by the judge not to mention it, though he received hundreds of letters afterwards begging him for "the sake of science" to make the secret known. The poison in question was digitaline.

AN ELASTIC LACQUER.—A patent has been taken out in Germany for a new description of elastic and flexible lacquer, which will not peel off, and which is suitable for the coating of carriage cloths, plans, and other articles to be folded up, as well as for wood and iron work, walls, etc., but which may also be employed as an insolating layer for damp rooms as a means against dry rot, and in rendering stuffs water-proof. To produce the lacquer, 50 kilogrammes of linseed oil varnish are heated up to a boiling point. In another vessel about 15 kilogrammes of lime are slaked in 20 kilogrammes of water. As soon as the lime boils, about 50 kilogrammes of hot melted caoutchouc are added to the lime water, and the whole is then stirred until it has become thoroughly mixed. This composition is poured into the boiling varnish, the whole being stirred all the time. Further stirring takes place until a homogeneous mass is formed, which is afterward strained or filtered, and left to cool. After cooling, the lacquer has a pap-like consistency. To apply the lacquer it is diluted with the desired quantity of varnish, and put on with a brush, either in a warm or cold state; but it is said to be better to apply it warm, as then no varnish is required for diluting it. In rendering linen water-proof the lacquer may be put on by means of a brush or roller. After treatment, the linen or other stuffs, paper, etc., are hung up to dry. Stuffs are perfectly dry and ready for use in two days. The product is stated to be lustrous, elastic, not sticky, and perfectly water-proof.

Death of Rev. L. Hamilton.

While preaching to his people on Easter Sunday morning, the Rev. Laurentine Hamilton, of the Independent church, Oakland, sank down in his pulpit and died almost immediately. He was preaching a forcible sermon, and was speaking with his customary earnestness and eloquence. For a moment he hesitated, placed his hands to his head and then fell to the floor. He died in the midst of his labors, in fact in the very discharge of his ministerial duty—"died in the harness," as brave men desire to die.

The death of Mr. Hamilton produced a profound sensation everywhere. He was well and widely known for the purity of his character, his gentle nature, his candor and genuine nobility of manhood. The popular tribute of respect to his memory, and the feeling of bereavement at his loss, are discerned in the public and private utterances which followed his death. Memorial services have been held in several churches, and in the exercises there has been a commendable spirit of participation among ministers who honored the man, though they did not agree with him in matters of belief. Thus they have done honor to themselves and to the lamented one.

The Obsequies.

The last rites to the memory of the departed, were held in Independent Church, Oakland, on Tuesday last. The floral tributes and church decorations were very elaborate and beautiful, contributed, as they were, from every organization of which he was a member, his congregation and innumerable friends, who knew him as a man and a citizen. Long before the hour appointed for the services, the street in front of the church was thronged on pavement and sidewalk. The crowd was so dense, that even the Masons and A. O. U.W., in the regalia of the Orders of which he was a member, were left in the street, and at the time of the commencement of the services the side gates had to be locked on account of the crowd, which insisted on entering by the side door despite the polite refusal of the ushers. As it was, every sitting and standing portion of the church was occupied, and the most intense interest manifested. All through the vast concourse sobs were heard, and heads were bowed in deep humiliation over the solemn scene. In the front seats, were seated the ministers of the city, who, in unity and sorrow gathered, to pay their last tribute of love and brotherhood to their departed brother and friend. There were present Reverends T. M. Condit, E. S. Todd, David McClure, W. C. Bartlett, J. K. McLean. Benjaman Akerly, Rabbi Levy, J. A. Benton B. F. Thompson and Dr. Moore. The choir consisted of the members of the different choirs in the city under the leadership of Prof. A. M. Benham, with Prof. H. L. Mansfeldt, at the organ. A fervent prayer was made by Rev. Clarence Fowler at the family residence. Dr. Stebbins, of San Francisco, who was expected to lead in the services at the church, was detained by illness. Revs. W. E. Ijams, of San Francisco, and J. K. McLean, of Oakland, made very eloquent and affecting remarks. Other clergymen and W. H. Jordan, P. M. W. of A. O. U. W., contributed words of love and consolation worthy of the highest fraternal and Christian spirit. The grand organ, under Prof. Mansfeldt, pealed forth almost inspired tones of mournful melody. N. W. Spaulding was general manager of the ceremonies, and the following eight pall-bearers were appointed from the congregation and the Berkeley Club to act with the eight from the Lodges: J. H. Smythe, H. Greenman, A. T. Dewey, Walter Blair, O. H. Burnham, J. W. Mackie, Judge Jas. Lentell and Prof. Van Der Nailen. The pall-bearers, appointed by the Masonic Lodge, of which the deceased was a member, were in attendance as follows: P. N. Remillard, Luke Doe, Griffith Meredith and C. B. Rutherford. The pall-bearers in attendance from the Pacific Lodge of Workmen, were W. H. Barrett, H. T. Smith, A. T. Eastman and W. H. Jordan.

TESTIMONIAL.—On the first day of April, Bro. A. W. Bogart was the recipient of a slight testimonial at the hands of his brethren. It was arranged as a surprise. Bro. H. F. Morris, Fin., called Bro. Bogart to the altar and presented him with an ornamental stand, silver-plated napkin ring, engraved with the initial "B." By request, the reporter of the WATCHMAN followed this by presenting a duplicate ring, and as a third surprise, Jas. H. Barry, P. M. W., in a feeling speech, recounting the services of Bro. Bogart as Organist, presented him with a set of silver forks. Bro. Bogart, although recognized as a good musician, was out of his element as a speaker on this occasion, and could only utter his thanks.

BRO. T. P. WILLIAMS, our authorized agent, will visit some of the various Lodges of Alameda county during the present month, in the interest of the WATCHMAN. Bro. Williams is a pleasant speaker, and under "Good of the Order" will, if desired, briefly entertain the Lodges he visits.

WE are pleased to learn that Bro. Chas. N. Shortridge, Fin., of Mt. Hamilton Lodge, San Jose, was elected as a member of the Board of Education, at their recent election.

Insurance Inaccuracies.

In the Fraternal Department of the *Call* of March 5th is a lengthy answer to some insurance "figures," compiled by a monthly magazine of this city, and afterwards published in a daily paper because, forsooth, "it is a duty to truth." There is no man in California better able to deal with the sophistries put forth by so-called insurance sharps than the gentleman having control of that department, not only from the fact of his thorough knowledge of fraternal law and society statistics, extending through quarter of a century, but further from his practical acquaintance with the life insurance business in its various details. We quote from the concluding portion of the article in question, because it clearly sets forth the sentiments we uphold:

We have no war to make on insurance companies or any other legitimate line of business. They have their mission, and are entitled to attend to it. Fraternal Societies have theirs, and are equally entitled to pursue it. The studied and persistent effort of corporations to weaken Fraternal Societies, the adverse criticisms they make, or advertisements and pamphlets printed, will only result in antagonizing reflecting minds against them, and earn for them the ill-will of the people. If the Societies are wrong in their calculations, that is their own business. Figures and facts lead them to believe they are correct. They hold the idea that if an insurance company can collect a certain amount, return one-fourth of it back in dividends, use one-fourth of it for expenses, and roll up a mighty surplus beside; that if a society has no expenses for its endowment feature, does not wish to pay any dividends, and prefers keeping the surplus in the pockets of its members, that there is no use of collecting more than half the amount. They also find by taking the reports of the best companies, that of all the moneys paid for premiums, the death losses of none of them have ever required one-half of said premiums, scarcely a good third in the leading ones, and that the rest has gone to dividends, expenses and surplus, the latter of which is increasing year by year, until, after a while, unless some grand extraordinary dividend is declared, it will amount to the value of the whole United States, and when the fiat shall be proclaimed that "time henceforth shall be no more," and this world shall dissolve, there will have to be some special sphere created to hold the property and surplus of the great companies.

People see this; they are not as ignorant of insurance matters as some writers seem to believe, and knowing what it actually does cost to pay for the percentage of deaths that will occur in a society, with its constantly changing membership, that $18 or $20 per year will do it, and that they can pay in monthly instalments, and can see for themselves that every dollar, free of commission, goes direct to a brother's home, made desolate by death, it seems but reasonable that they should be permitted to do so. At least a large proportion of men on this coast intend to do so, whether it meets the approval of critics or not.

Whence comes this opposition? We are told by the aforesaid writer that the reason why money is spent in a long advertisement is because he feels "under an obligation to the public," "it is a duty to truth," "and a strong stroke in the people's interests to call attention to and expose this cancer in the organism of the several societies named." Yes, just so. If he will go into the homes where death has been, he will find some of the results of this "cancer," but the widow and orphan call it by a different name. Doubtless he would like to see these societies totter and fall, and their members buried in paupers' graves, and their families go over the hills to the poorhouse, or it may be that the companies envy the noble work of the Order, and would like to do it themselves. If so, there is room enough for all.

But of one thing the world may rest assured. Although in the future, as in the past, corporations may rise, flourish and disappear, yet humanity in the hearts of men will abide, and to the end of the universe there will be Fraternal Societies, and that it is and will be the duty of good men everywhere to aid and encourage them.

WE HAVE before us a prospectus of the California Piano Manufacturing Co.; capital $200,000; factory to be located at the corner of Fourth and Bryant streets; business office, 30 New Montgomery street. This company has ample facilities in machinery, skilled labor and capital, to make pianos to meet the wants of the most fastidious, by producing an instrument absolutely unexcelled. This new enterprise will be advantageous to our city, as we now import 2,500 pianos yearly from the East. Among the promoters of this enterprise we notice a number of our prominent Workmen: Walter S. Pierce, organist of Excelsior, is the Secretary; John Henderson, Jr., P. M. of Yerba Buena; F. W. Van Reynegom and Henry F. Marah, both of Excelsior, appear as directors.

BRO. H. J. SMITH, P. M. W. of Magnolia and one of the members of the Pacific Surgical Institute, 305 Kearny, is now making a professional tour through Oregon. From exchanges before us we learn that his services in treating chronic cases of deformity is meeting with much notoriety and commendation from the people of the Webfoot State.

A. O. U. W. GRAND MAY-DAY PICNIC, RAILROAD EXCURSION AND BALL.—One of the coming events of the year will be the picnic, railroad excursion and ball under the auspices of Honcut Lodge, No. 205, at Honcut, 12 miles from Marysville, on Monday, May 1, 1882. The picnic will be held at Gould's grove, near Moore's station, one of the finest in northern California; and the ball will be given at Merrill's hall, Moore's station, in the evening. A large number of leading citizens who form the several committees have made ample arrangements with the railroad and otherwise, to accommodate all that may come. Admission to grounds, 50 cents; to ball, including supper, $2. The several committees are made up of leading and representative men, and it is expected that this will be one of the grand events in northern California for this year.

PRESENTATION.—A happy episode in the life of Caleb Brind, D. D. G. M. W. of District No. 1, San Francisco, was enacted in Magnolia Lodge, No. 41. At the close of business B. F. Jacobs, P. M. W., in a speech that was eloquent and appropriate, presented Bro. Brind with a very fine, heavy, solid gold P. M. W. badge, on which were inscribed these words, "Magnolia Lodge 41, to Calib Brind, D. D. G. M. W., April 3d, 1882." The emblem was manufactured by Bro. Schaezlain, 13 Trinity street. Deputy Brind was certainly amazed and surprised, and although usually a good talker, failed on this occasion to make extensive remarks; but in a few well-chosen words feelingly responded, and with evident emotion and apparent satisfaction, pledged his best efforts to Magnolia Lodge and this grand Order.

PROF. H. C. EASTMAN, well and favorably known as a professional elocutionist, will receive a complimentary benefit at Dashaway Hall on Monday evening, April 17th. Bro. Eastman has frequently volunteered to assist at a large number of our literary and musical entertainments in the past, and it is hoped he will have a bouncing house. The exercises will be literary, musical and dramatic, and a number of our amateurs and professionals have consented to assist. Tickets 50 cents.

BRO. W. T. Y. SCHENCK, 36 California street, is the Agent for the Pacific Coast for Eureka Fire Hose Co., of New York. The cotton and linen hose (rubber lined), is the strongest and most durable of any yet manufactured. It is made one, two and three ply, and adapted to all uses, fire, garden, mining and domestic purposes. Those wishing hose should examine the cotton hose before purchasing any other kind.

THE Relief Committee has agreed to hold our annual picnic at Belmont park, on June 17th. An Executive committee of seven have been elected, and sub-committees have been appointed to make all necessary arrangements.

D. S. HIRSHBERG, P. M. W., as a business agent and collector, is reliable and trustworthy. Anything intrusted to his care in his line cannot be put in better hands. His office is 850 Broadway, room 14, Oakland.

OUR yearly picnic and excursion to Belmont park promises to be one of the largest and best yet held. Ample accommodations will be given in covered coaches by the S. P. R. R. for all who may wish to go.

THE City Parcel Delivery Co., No. 3 Post, is carried on by Bro. H. C. Dodge and Geo. D. Ross. They are prompt and reliable men, and any business entrusted to their care will be attended to in the best manner.

FROM the report of Wm. P. Cole, G. Rdr. of Texas, we learn the number of members in good standing in February was 1,500. This jurisdiction is working under the Supreme Lodge.

TOMBSTONE LODGE, No. 3, meets every Thursday evening in Masonic Temple, Samuel Block, M. W. Reports come of good meetings and that they are doing well for a new Lodge.

BRO. S. S. RUSSELL, of Bald Mountain Lodge, No. 140, at La Porte, "sailed" 20 miles on snowshoes to get to the Grand Lodge, and staged 45 miles to the station on the railroad.

Garey's Orange Culture.

* * * Mr. Garey's experience in orange culture in all its branches, his enthusiasm on the subject, and his fine judgment and natural adaptability, make him one of the most thorough teachers that those who are embarked in the industry could have. Besides, Mr. Garey is master of a very clear and pleasant diction, and handles his pen with a facility that gives his writings flow and attractiveness. The volume should have a wide circulation, and do good financially to its author as well as to orange-growers. We need not say that Mr. Rose's contribution in the appendix to the literature of the vineyard, will be read with interest and profit by all who wish light on a subject of the greatest importance to this section of the State.—*Los Angeles Daily Express.*

Price, postpaid, from PACIFIC RURAL PRESS office, $1.

SUBSCRIBERS, if they prefer, can have the PACIFIC STATES WATCHMAN sent them in place of the FRATERNAL RECORD, by simply notifying us by postal card or otherwise.

PATENTS AND INVENTIONS.

List of U. S. Patents for Pacific Coast Inventors.

From the official list of U. S. Patents in DEWEY & CO.'S SCIENTIFIC PRESS PATENT AGENCY, No. 252 Market St., S. F.

FOR THE WEEK ENDING APRIL 4, 1882.

255,918—FAUCET FOR REGULATING OVERFLOW FROM BASIN—F. A. Bishop, S. F.
255,838—BUCKLE—Alex. Cadwell, Petaluma, Cal.
255,935—ORE CRUSHER—A. N. Cameron, Greenville, Cal.
255,773—CURTAIN BRACKET—H. C. Clement, Albany, Oregon.
255,855—CHILD'S CARRIAGE—Adam Heim, S. F.
255,990—PUMP—Wm. D. Hooker, Oakland, Cal.
255,876—CUFF BUTTON—David Lubin, Sacramento, Cal.
255,802—NUT AND BOLT LOCK—B. Marks, Fresno, Cal.
255,882—CHECK FOR HORSES—M. M. Nathanson, S. F.
255,887—HAY-STACKING APPARATUS—Gamos Richardson, San Jose, Cal.
255,888—DUMPING CAR—I. B. Robbins, Stockton, Cal.
255,898—VINEYARD PLOW—A. C. Taylor, S. F.
256,079—SHACKLE—J. M. Trackwell, Skookumchuck, W. T.
255,842—TUYERE—James E. Day, S. F.
255,900—CUSHION PROTECTOR FOR BOTTLES—James M. Thorpe, San Jose, Cal.

NOTE.—Copies of U. S. and Foreign Patents furnished by DEWEY & Co., in the shortest time possible (by telegraph or otherwise) at the lowest rates. All patent business for Pacific coast Inventors transacted with perfect security and in the shortest possible time.

Canvassing Agents.

We want several canvassing agents who will make it their business to solicit subscriptions and advertising for our first-class progressive newspapers. Men of ability and experience can secure good pay and permanent employment. Send references and state your past occupation, etc., to the publishers of this paper.

Our Agents.

OUR FRIENDS can do much in aid of our paper and the cause of practical knowledge and science, by assisting Agents in their labors of canvassing, by lending their influence and encouraging favors. We intend to send none but worthy men.

G. W. MCGREW—Santa Clara county.
M. P. OWEN—Santa Cruz county.
B. W. CROWELL, San Benito and Monterey counties.
J. W. A. WRIGHT—Merced, Tulare and Kern counties.
JARED C. HOAG—California.
T. P. WILLIAMS.

DO NOT DELAY.—Send us your subscriptions promptly Don't let any break occur in your subscriptions to the WATCHMAN. Every live Workman needs every number of the paper, and we need his assistance to print as valuable a journal as we strive to for the special benefit of its patrons and the general good of the Fraternity. Send the cash direct, or, if more convenient, hand it in with your dues to the Financier and we will allow him for trouble and expense of remitting.

Employment.

A medium-aged man of family is desirous of immediate employment (at very reasonable wages), as carpenter, assistant book-keeper, or for office work. Will go to the country, but prefers S. F. Can give satisfactory reference in S. F. or Oakland. Is a member in good standing of one of our leading fraternal societies. Address C. E. L., at No. 412 Jones St., S. F.

Rooms and Board in Oakland.

Rooms (with or without board) can be had in Oakland on reasonable terms, with a family of English people, location, a pleasant one within 3 blocks of Postoffice. Good references furnished and required. Call or address No. 1274 Franklin St., Oakland, or enquire at the office of this paper.

MANSION HOUSE.—First-class in every respect, and reasonable prices.—When you visit Stockton stop at the Mansion House. Free Coach to the house.

J. H. CROSS, Proprietor.

HOME BENEFIT ASSOCIATION,

Of San Francisco, Cal.

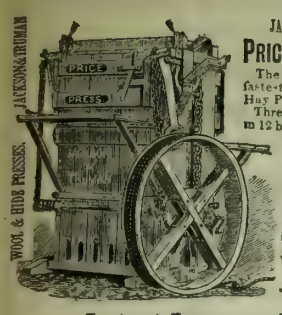
INCORPORATED UNDER CALIFORNIA LAWS.

The Home Benefit Association is an organization for Mutual Life Insurance. A Benefit Fund is created by payments from each member of sums assessed in proportion to age and amount of insurance.

The amount of insurance may be $1,000, $2,000, $3,000 or $5,000 in any one class.

The age to which persons are eligible for membership is 64 years, but those over 54, at the time of joining, are limited to $3,000 insurance in any one class. Vacancies, caused by deaths, or withdrawals, in any class, which has once been full, will be filled only from applicants under the age of 50 years.

TRUSTEES—Frank Eastman, Charles H. Fish, Jesse S. Wall, William C. Randolph, John H. B. Wilkins, Harvey W. Snow, George T. Hawley, Frank C. Havens, Ambrose Cornwall.



HENRY J. BOOTH, President.
ANDREW S. BROWNELL, Secretary.
SPENCER C. BROWNE, General Agent.
CHAS. N. ELLINWOOD, M. D., Medical Director.

Office—Safe Deposit Building, No. 328 Montgomery street, S. F.

N. B.—This is an important institution to those who wish to insure reliably and cheaply. Send for full plans and recommendations. No other equal to it has yet been established on this coast.

LAND Good land that will raise a crop every year. Over 12,000 acres for sale in lots to suit. Climate healthy. No drouths, bad floods, nor malaria. Wood and water convenient. U. S. Title, perfect. Send stamp for illustrated circular, to EDWARD FRISBIE, Proprietor of Reading Ranch, Anderson, Shasta County, Cal.

JACKSON & TRUMAN.

JACKSON & TRUMAN'S
PRICE HAY PRESS,
The cheapest because the fastest and most durable Hay Press made.
Three men baled 28½ tons in 12 hours. Average days work 18 tons per day.
No other investment is equal to it. 3 men can make more money on an outlay of $450 in a Price Press, than an investment of $1,000 in any other machine.
PRICE, $450; Weight, 2600 lbs.
Term Cash.

Read what the most Successful Raisin Grower on the Coast says:

"YOUR JACKSON VINEYARD HARROW fills a want long felt among Vine Growers. Its excellencies are many. Light Draft, Thorough in its Work, no Angles to Mar or Break Vines, Steers like a Plow. Accept my thanks for so good an implement."

R. B. BLOWERS

PRESSES HAY & WOOL

Most Rapid.

We ship Dederick Perpetual Presses direct from the Factory in Albany, at Factory Prices, consignees paying freight.

Reversible Lever Presses, $300.
Overcircle Presses, 400.

We can telegraph and have Presses shipped promptly.

Combined Circle and Reversible Power Lever Dederick Press.

PRICE—Mounted on trucks, $450. This cut represents a Perpetual Press that will be in great demand in certain parts of California and the adjoining States as soon as its merits are understood. It is very small and compact and has a most beautiful combination of the crank and toggle joint for obtaining the requisite power. It is so arranged that the crank (which exerts its power at right angles to the toggle levers) arrives at its center, the point of greatest effect, at the precise moment that the levers straighten, thus delivering a concentrated pressure on the hay that is limited by nothing but the strength of the machine. The weight of the entire machine is but 2,800 lbs, consequently it may be driven anywhere in the hills, up canyons and over difficult roads, and is ready for business as soon as it arrives at the stack. But one horse is required and he walks back and forth over a semi-circular track on one side of the Press. It is so made that the horse may also walk clear around the Press, instead of reversing, if it is desirable that he should do so.

Jackson's Self-Feeders, Elevators, Spreaders, Derricks,

LIGHT WEIGHT FORKS, FARMERS' IRON PULLEY BLOCKS, STEAM DERRICK FORK SPOOLS, HARROWS, WIND MILLS, ENGINES AND SEPARATORS.

The best, cheapest and most durable Wind Mill.
Runs in the lightest winds. Entirely reliable in storms.

Removing Paint.

A preparation, of which potash and soda are the principal components, has just been introduced into England, and is said to be a perfect paint remover. Some experiments made with the preparation upon various specimens of wood and metal, all old samples, well painted with several coats of good oil colors, were very successful. The compound, which is of a cream-like consistency, and quite white, is spread over the painted surface, and after being left on a few minutes is wiped off. Its action upon the body of the paint is thorough and complete, a saponification is set up which continues, the soda is liberated, and this process goes on, the alkali being liberated as it is wanted, till the whole of the paint is removed. Painted surfaces in about a quarter of an hour show every trace of paint cleanly removed, and the wood exposed as if it had been planed.

The action of this preparation seems to be two-fold. There is, first, the destructive action of the applied alkali, always caustic, and, next, a continued sponge-like action going on; in other words, a constant and perfect causticity is maintained. The result of the preparation on metal is equally convincing. A gas meter, if exposed to the compound about 20 minutes, has the japan removed and the bright metal exposed. Other forms of the preparation are of a weaker character, and nearer soap in their composition. They are intended to remove dirt, and their action is just the reverse of the compound already described. The preparations are liquid and are soluble in water, and their cleansing power upon cloth of an unmistakable dirty and greasy character is said to be almost magical. These solutions are adapted for delicate carvings and fabrics of all kinds and their use by restorers, decorators and others will be highly esteemed. The modification of the solution for cleaning cloth is well adapted for restoring the linings of railway carriages and stuff seats of all descriptions. No scraping or erasing is necessary, and there is nothing injurious, it is said, in the preparations which can attack or injure metals or cloths. They all produce a minimum action on brushes, which is a consideration, and, what is very important, the color is not taken out by the use of the solutions. The price is less than that of other preparations. The "paint remover" can be easily applied by being spread over the painted surface to be removed. It is sold in five-pound tins at about 60 cents.

A NEW PROCESS FOR MANUFACTURING GAS IS OUTLINED AS FOLLOWS:—First, in injecting air and steam into or through incandescent coal or carbon contained in a suitable furnace, causing the air and steam to combine with the carbon, and to produce carbonic oxide and carbonic acid, the hydrogen of the decomposed steam and the nitrogen of the air being at the same time set free. Secondly, in the separation of the nitrogen from the gas by converting it into ammonia, said conversion being effected by causing it to combine with carbon and alkali, so as to form cyanogen, and subsequently decomposing the cyanogen so formed by means of steam, the product being ammonia, the oxides of carbon, and alkali; and subsequently removing the ammonia. Thirdly, in decomposing the carbonic oxide in the gas and converting it into carbonic acid by means of incandescent steam, the product of said decomposition being carbonic acid and hydrogen gas. Fourth, in the removal of the carbonic acid from the gas by means of ammonia.

WASHINGTON MONUMENT.—The engineer in charge of the construction of Washington monument, in Washington, reports that the addition to the hight of the structure since the work was renewed, Aug. 7, 1880, is 100 ft. The monument is now 250 ft. high above the base. Seventy-four ft. were added last year. The balance of appropriation available December 1st was enough to carry the obelisk to the hight of 286 ft.

THE BROOKLYN BRIDGE.—Mr. W. A. Roebling, Chief Engineer of the Brooklyn bridge, states in a recent report, in giving a detailed account of what has been done to strengthen the superstructure, that the aggregate strength of the wire composing each of the four cables has been estimated to be 12,300 tons (of 2,000 pounds) and the elastic limit, two-thirds of that amount—namely, 8,200 tons. From all the tests made, the average strength of all the wires was not placed too high. The method of splicing the wires was such that the full strength of the wire was maintained at all points. The superstructure consists essentially of the floor system and stiffening trusses. One of the most serious difficulties to be contended with in this structure is the maintenance of the balance of spans arising from the exceptional length of the land spans. Mr. Roebling gives the total weight of the bridge, including the trasitory load, as 17,780 tons, from anchorage to anchorage—3,460 feet. Mr. Roebling adds: "It being the wish of the Board, as shown by the resolution annexed to the report of the committee, of which Mr. Kinsella was chairman, on the 6th of May, 1878, that the bridge should be adequate to the passage of the Pullman car, it became incumbent upon me to provide the necessary truss power with which to transfer the concentrated loads and to check the increased deformation of the cables resulting therefrom." He explains in great detail what he has accomplished, and finishes the report with the words: "The cables are strong enough to pull up the two anchorages."

COLOGNE TO BE MADE A SEAPORT.—It has been proposed in Germany to dredge the Rhine, so that Cologne may become a seaport. The proposition has been received with much favor and with some apprehension on the part of Hollanders and Netherlanders, through fear of serious injury to the ports of Antwerp and Rotterdam.

THE Austrian government now works 200 miles of railroad which it owns, and 1,194 miles belonging to companies, while 407½ miles that it owns are worked under contract by corporations.

MORAL EFFECT OF TEA, COFFEE, ETC.—Dr. Bock, of Leipsic, a famous German physician, writes as follows on the moral effect of different articles of food and drink: "The nervousness and peevishness of our times are chiefly attributable to tea and coffee; the digestive organs of confirmed coffee drinkers are in a state of chronic derangement, which reacts on the brain, producing fretful and crying moods. Fine ladies addicted to strong coffee have a characteristic temper, which I might describe as a mania for acting the persecuted saint. The snappish, petulant humor of the Chinese can certainly be ascribed to their immoderate fondness for tea. Beer is brutalizing, wine impassions, whisky infuriates, but eventually unmans. The alcoholic drinks, combined with a flesh and fat diet, totally subjugate the moral man, unless their influence be counteracted by violent exercise; but with sedentary habits they produce those unhappy flesh sponges, which may be studied in metropolitan bachelor halls, but better yet in wealthy convents. The soul that may still linger in a fat Austrian abbot is functional to his body only as salt is to pork—in preventing imminent putrefaction."—*Herald of Health.*

NEW HAIR DYE.—A one per cent. solution of nitrate of silver gives to human hair a dull reddish brown, which is particularly unnatural and disagreeable in a strong light; but this defect, which is visible in all cases in which nitrate of silver has been used, may be obviated by the addition of a certain amount of copper salt to the argentic solution. Nitrate of silver, 30 grams; sulphate of copper, 2.5 grams. Dissolve the two salts in 250 cubic centimeters of water, and add sufficient ammonia to dissolve the precipitate formed, and make it up to one liter. An instantaneous dye may be made by steeping the hair in a solution of pyrogallic acid in acetic acid, and then in the argenti-cupric solution dissolved above. The hair should be allowed to dry partially after the application of the pyrogallic solution. By varying the proportion of the pyrogallic acid from 1 gram to 50 grams per liter, any tint may be obtained from light brown to black.—*Moniteur Scientifique.*

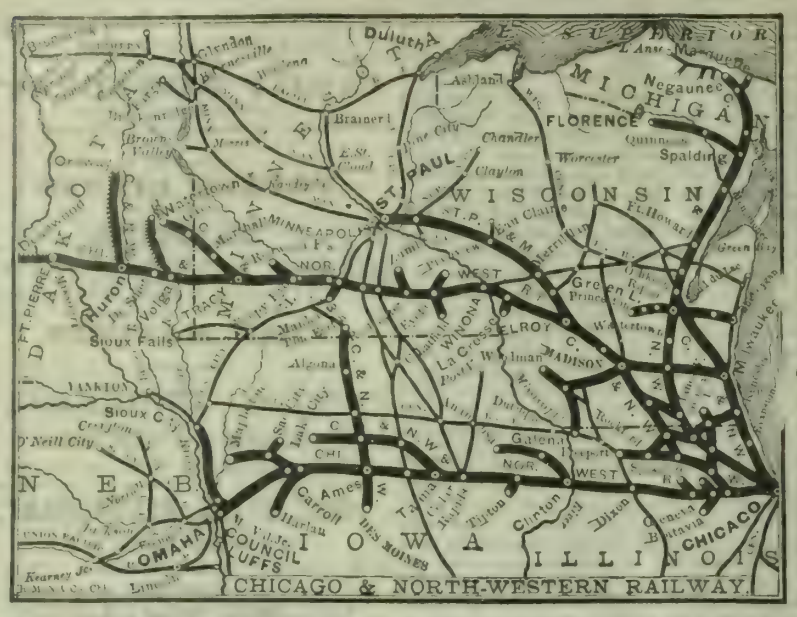
WILLIAMS'
BALSAMIC
CREAM OF ROSES.



For Beautifying the Complexion, Softening the Skin and Producing that Natural Freshness to the Complexion not obtained by any other Preparation.
DIRECTIONS:
Apply to the face and hands at night, just before retiring, and apply a little in the morning, rubbing it well into the skin. After being in the sun any length of time, or riding when the wind has been blowing, a small quantity of the Balsamic Cream of Roses will prevent tanning or roughness, and is sure to bring to the complexion that ruddy and healthy glow so much sought for, and seldom obtained. Its action on the skin is to restore natural circulation to the blood.
JOHN R. WILLIAMS, Proprietor,
Stockton, Cal.
Price, 50 cents. For sale by all Druggists.

LAND Good land that will raise a crop every year. Over 12,000 acres for sale in lots to suit. Climate healthy. No drouths, bad floods, nor malaria. Wood and water convenient. U. S. Title, perfect. NEW ENGLAND MUTUAL LIFE INS. CO.

OF BOSTON,

Is the Oldest Purely Mutual Life Insurance Co. in this Country.

INCORPORATED IN 1835.

ASSETS,	$16,210,465 92
SURPLUS, (by Mass. Standard)	2,635,894 93
Market Value of Stocks and Bonds over Cost	1,474,691.09

The NEW ENGLAND LIFE is the only Company doing business on this Coast that is governed by the MASSACHUSETTS NON-FORFEITURE LAW.

Every Policy-holder is protected by this law against the great risk of forfeiture and loss to which he is subject if a member of a Company organized outside of Massachusetts. The new law of 1880 provides that

FIRST—No Policy shall become forfeited or void for non-payment of premium after the payment of two annual premiums.

SECOND—In default of payment of subsequent premiums it is binding on the Company to issue a Paid-up Policy WITHOUT FURTHER NEGOTIATION OR STIPULATION.

THIRD—On failure of insurable interest the Policy-holder may demand and receive the net value of the policy in CASH.

LIBERALITY AND EQUITY in its relations with Policy-holders have always been the governing principles of this Company, and the conditions of its policies in regard to limits of Residence and Travel are of the most liberal description. Before insuring in any other Company examine the application and policy contract of the NEW ENGLAND LIFE, and practical working of the New Massachusetts Law.

The Fraternal Spirit.

"Keeping up the fraternal spirit" does not mean calling a man "brother" at the Lodge meeting and ignoring his existence entirely at all other times. It does not mean that once a week for an hour or so you shall mingle freely with a number of members of the Lodge, all on equal footing, and then when the door closes, you shall forget them until you give the password to the Watchman again. It does not mean that you shall look upon the Lodge simply as a convenient sort of insurance office, and upon the members as so many people who stand ready, each to give your family a dollar on your decease. Nor does it mean that *you* shall have the benefit of results flowing from fraternal association without contributing your share of the work and trouble as well as your dues.

The payment of certain half dollars and dollars per month is a simple business proposition, by which a member keeps his standing in his Lodge and pays his share in the mutual insurance feature. It has nothing to do with the fraternal part of the Order one way or another.

Yet there are many—too many by far—who imagine they have done their duty by the Order when they pay what is called for promptly. They do not interest themselves in the business of the Lodge; will not share the burdens of conducting the meetings, will not take office, stay away so as not to serve on committees, and generally leave the *work* to a few. If all were of this class the maintenance of the Order would be impossible and it would soon disband.

To foster the fraternal spirit, the members must be more unselfish and interest themselves in each other to some extent. If a brother is sick or unfortunate, some *personal* notice of each member of the Lodge would surely benefit him. A contribution of $25 from the general fund and an engrossed set of resolutions will not cheer him up as much as a visit from people who show an interest in him and his affairs; who are willing to aid him in a substantial manner and sympathize with him in affliction.

There is nothing Utopian in this. It is not necessary to attempt an ideal perfection. We assist and expect to be assisted in turn. We may never need help, but it is comforting to know it would be forthcoming if required. If each man should perform only a small personal share in the real fraternization, a recognition of the firm establishment of the Order would be forced upon even those whose business interests oppose it.

Any brotherhood must have a community of interests, either of business or pleasure, or of both. But business interests promote no good fellowship or fraternal feeling, and the pursuit of pleasure is of a selfish nature. A fraternal feeling must be the outgrowth of social intercourse and communion, and must be voluntary. It cannot be forced. In order that it shall be fostered, the members of the Lodges must attend the meetings, participate in the debates and show an interest in the proceedings, which are conducted for the common good.

VIEW ON SACRAMENTO RIVER LOOKING EASTWARD FROM TEHAMA.

BE PROMPT.—The Supreme Recorder calls the attention of Grand Recorders of Grand Lodges, under the immediate jurisdiction of the Supreme Lodge, to the fact that strict compliance with the law will hereafter be required; and their monthly reports on all assessments due, together with remittances, will be expected to be received not later than the 20th of each month. It will, therefore, require a strict compliance on the part of each subordinate Lodge in the jurisdiction to enable the Grand Recorder to do this.

SECURE your tickets at once for the A. O. U. W. picnic, March 17th, at Belmont park.

Fill the Ranks.

Never suffer a vacancy in your Lodge membership to remain long unfilled. There are always plenty of good men to fill all the empty places. If a member gets careless and falters by the way, it is not well to spend much time or money in doing for him what he is in duty bound to do for himself. Better let him go, and supply his place with a better man. It is the constant change in membership that keeps assessments down. If everyone who joins remained in the Order till he died, we should be called upon to pay more than four times as much as we do now, or disband the society. The man who joins the A. O. U. W. and keeps his standing unimpaired, has an investment more profitable than houses, or lands, or mines, or ships, or Government bonds. It will yield more than fourfold its cost, and one who cannot appreciate this fact, or cares for no one but himself, and so has no desire to provide for anybody else, had as well quit the Order. Let such people go, and welcome. Then fill up the ranks!

A GOOD OFFICER.—The present Deputy to District No. 2, Alameda county, Charles E. Alden, is also Recorder of Keystone, No. 64. He has been Recorder of that Lodge ever since its organization, except during the time he was Master Workman. He has always taken a very great interest in the Order, and has been present nearly every evening at the meetings since Keystone was instituted. The Lodges would be fortunate if they could all get as attentive, careful and interested officers as this gentleman; and it is to such as he that the Order owes much of its popularity with those connected with it.

DON'T fail to go to Belmont park, on Wednesday, May 17th.

Visiting Lodges.

Why should the visiting Lodge furnish the entertainment?

This question has, doubtless, been many times asked. It is a fact that when a Lodge visits another it seems to be considered necessary for the visiting members to amuse the visited. This is entirely opposed to all the social habits of the people outside the Lodge rooms, and why so very radical a change should have been grafted where it has, is by no means clear. When we visit a friend at his home, we expect him to amuse us. He must play or sing for us, exert himself in conversation, enlist the aid of his family, and entertain us to the best of his knowledge and ability. To a certain extent the visitor is passive. He must consider himself entertained, and express himself as having been so, whether it has been the case or not. An appreciation of a host's efforts, shown by an attentive manner and pleasant bearing, is, of course, expected of the guest, who may, of course, contribute toward the general amusement. But as to throwing the burden of the entertaining on the guest, that is never thought of. With Lodge visits, the reverse is the case. The one visited furnishes a room, lights and an audience. The visitors are expected to do all the talking, make all the fun, give all the music, and generally entertain the people they come to see. Therefore Lodges do not visit as frequently as they might. If, when a Lodge is visited, those of the members who possess the ability, should exert themselves to the utmost to entertain the visiting brethren, calls would be oftener made.

At any rate, if no set programme is practicable or desired, it is just as well for the Lodge members to recollect what common social usages are, and not expect to be entertained by people who come to see them. At least, help to make the evening pass off pleasantly.

BRO. J. G. SEVERANCE, Past Master Yerba Buena Lodge, No. 14, will deliver an original poem at the picnic of the General Relief Committee, and from what we know of the brother's talents in this direction we bespeak for those fortunate enough to hear it a rare treat indeed.

WHEATLAND, No. 54, Wheatland, Yuba county, will hereafter meet on the 1st and 4th Thursday of each month.

For our Boys and Girls.

Our Puzzle Box.

Numerical Enigma.

My [illegible] 1 is a kind of fuel.
My 12, 1 is an interjection.
My 1 [illegible] is a conjunction.
My 11, 7, 4 is the opposite of right.
My 9, 12, 3, 7 is a coat of steel.
My 13, 19, 9 is a kind of meat.
My 21, 14, 9, 16 is the same as moist.
My 18, 14, 9, 10 is a young sheep.
My 17, 6, 8 is a personal pronoun.
My 20, 1, 5 [illegible] is a part of a speech.
My whole consists of 21 letters and is the first line of a familiar song.

J. L. C., Calistoga, Cal.

Letter Changes.

1. A morass: change my initial, I am a domestic animal; change again, I am mist; again, I am a filthy animal; again, I am a heavy piece of unhewed wood.

2. The noise of a donkey: change my initial, I am a cart; again, I am a battle; again, I am a color; again, I am to supplicate; again, I am a salver for serving dishes.

LEO P.

Charade.

Upon a sunny morn,
Adown the rose and thorn,
My first reversed is seen
In diamonds' sparkling sheen.

My second serves to guard
The greedy miser's hoard,
The convict in his dreary cell,
And all the places where we dwell!

My whole has power to bless,
And give true happiness;
And yet I'm oft abused
By subjects when misused.

NED.

Syncopations.

1. Syncopate an animal and leave an obstruction to navigation.

2. Syncopate extent of duration and leave to form into a knot.

3. Syncopate locality or position and cave a measured step.

4. Syncopate a nickname and leave a conjunction.

Easter Hymn.

[By "GEM, aged 14 years.]

Let your hallelujahs rise!
To him who reigns above the skies,
He who died, the world to save,
Now has risen from the grave.

He has suffered death and pain,
Now he goes with God to reign,
Goes to reign with God above,
God of mercy, God of love.

He has risen from the dead,
Risen from his lowly bed;
Let the whole earth stand in awe
Of Him who reigns for evermore.

Stand in awe, but not in fear,
Feel him far, yet ever near,
Near with his protecting arm,
Near, to keep us from all harm.

Above us, being free from sin,
Above the world's loud noise and din;
But, though he reigns with God above,
He watches us with tender love.

Santa Cruz.

"Jip."

"—the poor dog, in life the firmest friend,
The first to welcome, foremost to defend,
Whose honest heart is still his master's own,
Who abors, fights, lives, breathes for him alone."
—*Lord Byron.*

I write of a most noble brute—a large, handsome fellow with well-shaped head and bright, intelligent eyes. In color he is that beautiful combination of black and white commonly called blue. Jip is the pride of his master and as obedient as a slave. At regular hours his meals are placed before him, and his long, soft hair is combed with as much care as a child's. A short time ago I spent an evening at the home of Jip's master, where I first formed the noble dog's acquaintance. Hearing his master's voice, he came bounding into the parlor as the door was opened by some one entering. At a word, he sat up and extended his paw to "shake hands."

"Now, Jip," said his master, "go, close that door."

The knowing dog turned, walked slowly back to the door, reared upon his hind feet and placed his fore paws against it, closing it effectually.

A handkerchief was then dropped upon the floor, whereupon the dog seized it and returned it to its owner.

Next, a chair was placed before him and he told to get up and sit down in it. This he did, sitting down with his back to the audience. It was some time before his master could induce him to face the lookers-on, but he finally did so, and a clay pipe was then placed in his mouth, the bowl of which he suffered to turn downward in the true aboriginal style. A large hat, with a huge sunflower on it, belonging to a young lady of the family, was then placed upon his head. He seemed to have a just appreciation of the part he was acting, and sat perfectly still, with a sort of injured air, like a child that had been whipped and stood in a corner. Anon he would roll his large eyes up under the broad-brimmed, sunflower-bedecked hat in a manner—with all due reverence to Mr. Wilde—that was most esthetic.—*E. Freemont Wood, in Rural Press.*

Household Hints

EGG BALLS FOR SOUP.—Egg balls to be served in soup make a welcome addition to a plain beef or mutton soup: Boil four eggs hard, say for 10 minutes, then put them in cold water; when cold cut the yelk soft with the yelk of one raw egg, and one teaspoonful of flour; add pepper and salt and some bits of parsley. Make in the shape of balls and drop them in the soup; let them boil for about two minutes. The whites of the eggs can be used to garnish a platter of cold meat for supper, or may be chopped fine or be added to the soup.

LIABILITY TO INFECTION.—A man wearing dark clothes is more liable to infection from contagious diseases than he who wears light-colored garments, because particles which emanate from diseased or decayed bodies are much more rapidly absorbed by dark than by light fabrics. This is easy of proof. Expose a light and dark coat to the fumes of tobacco for five minutes, and it will be found that the dark one smells stronger than the other of tobacco smoke.

APPLE OMELET.—Apple omelet to be served with broiled spareribor roast pork is very delicate. Take nine large, tart apples, four eggs, one cup of sugar, one tablespoonful of butter; add cinnamon or other spices to suit your taste; stew the apples till they are very soft; mash them so there will be no lumps; add the butter and sugar while they are still warm, but let them cool before putting in the beaten eggs; bake this till it is brown; you may put it all in a shallow pudding dish or in two tin plates to bake.

POTATO CAKES.—Potato cakes to be served with roast lamb or with game are made of equal quantities of mashed potatoes and of flour, say one quart of each, two tablespoonfuls of butter, a little salt and milk enough to make a batter as for griddle cakes; to this allow half a teacupful of fresh yeast; let it rise till it is light, and bubbles of air form, then bake in muffin tins. These are good also with fricasseed chicken; take them from the tins and drop in the gravy just before sending to the table.

BAKED OX TONGUE.—Soak the tongue well in lukewarm water for about 12 hours, scrape and trim it, stick it over with cloves (about 24), and boil slowly, according to size, for two or three hours. Then take it up and brush it over with the yelks of two eggs and sprinkle it with breadcrumbs (six oz.). Next bake it to a good brown, basting it constantly with a quarter of a pound of butter. Put it on a dish, and pour round it half a pint of good gravy. Serve with red currant jelly.

WHITE CANDY.—White candy made from this recipe has the merit of being pure: One lb. of sugar, two-thirds of a tumbler of water, one teaspoonful of vinegar, a piece of butter the size of a walnut, half a teaspoonful of cream of tartar; boil for 20 minutes, without stirring. Pour on buttered plates to cool, then butter your hands and pull; have a little vanilla or lemon in a sauce plate, and wet your hands with it occasionally.

RICE AND APPLE PUDDING.—Boil a cupful of rice for 10 minutes, drain it through a hair sieve until quite dry. Put a cloth into a pudding basin and lay the rice around it like a crust. Cut six apples into quarters, and lay them in the middle of the rice with a little chopped lemon peel, a couple of cloves and some sugar. Cover the fruit with some rice, tie up tight, and boil for an hour. Serve with melted butter, sweetened and poured over it.

MENDING LACE CURTAINS.—Old lace curtains that have little holes in the netting can be made to appear whole when they are laundered. Take a piece of lace, or very thin muslin, and when the curtain is starched starch this piece also and put it over the spot which needs mending. It will show very little if at all, and the starch will keep it in place.

FRIED POTATOES.—Cut a quart of cold boiled potatoes into cubes, prepare three tablespoonfuls chopped onion and one of chopped parsley. Fry the onions till done in three tablespoonfuls of butter, then add the potatoes, season with salt and pepper. Stir gently with a fork so as not to break them. When heated through, add the parsley and cook two minutes longer. Serve on a hot dish.

A NEW FRICTION match has a quantity of explosive compound sufficient to protrude slightly beyond the end of the splint placed in a cavity in the end of the splint. The end of the match is then dipped in paraffine or other suitable material.

Health Column.

Health in Town and Country.

An extended series of observations seem to have warranted two conclusions, both adverse to commonly received opinions·

1. There are more persons in lunatic asylums from the country than from the town.

2. The average of human life is greater in the largest cities, than in the country adjoining; yet farmers eat plain, fresh food, take abundant exercise, retire early, and get up by daylight, breathing the pure out-door air for at least half their existence. On the other hand, citizens retire late, rise late, eat food and fruits one, two, or a dozen days old; are in-doors three-fourths, if not nine-tenths of their time, breathing an air vitiated by furnace heat and a variety of other causes, and take comparatively little exercise.

It is practically useful to note some of the general reasons which may very rationally be considered as explanatory of such results.

The universal tendency of concentration of thought upon one subject is to monomania, madness. This is so palpable a fact that argument is not necessary. When, therefore, the subjects of thought are few in number, this same tendency exists. The weather, the crops, the market, are the idol trinity of most farmers; in a wide sense, they think, talk, dream about nothing else with any special interest; all besides is secondary, and if, by any novelty, the mind is compelled out of its wonted track, it soon relapses into the old tread-mill circle, into the same rut of ages gone. In great cities this destructive concentration is almost an impossibility; the morning papers, the prices current, the stock markets, the accidents, the wars of nations, the exhibitions of curious and stirring things, keep the mind on the look-out; in fact, almost too active; there is scarcely enough time for needed rest. The day begins with running over the state of the world, as exhibited in the newspaper. From nine until four the whole mind is absorbed in matters of business; from that until near midnight, there is a comparative abandon to dinner, to social ties, to giving or receiving visits from acquaintances, friends and kindred, in going to the concert, the lecture, the opera, to evening parties, or other sources of agreeable diversions or profitable intercommunications.

The farmer, glorying in his health and strength, thinks his constitution impregnable; scouts at method and system and precaution, considering them as nothing but doctors' whims and old women's notions. He believes in eating hearty suppers and late; he has done it all his life, and is not dead yet, and resolves so to continue until the end of the chapter, when some morning the news goes round, "Died last night" of apoplexy, cholera morbus, cramp colic, or the like. At other times, bilious fever carries him from health to the grave in 10 days, in consequence of going to sleep in the entry or on the front stoop after a hard day's work.

Farmers will become healthier in body and in mind, in proportion as agricultural papers are taken, for several reasons: These publications uniformly contain a large amount of unexceptionable family reading, as to health, temperance, and sound morals; they will also gradually waken up the mind of farming people to experiments, to what is often sneeringly styled "scientific farming." Every day the helter-skelter mode of agriculture is becoming less and less remunerative; every day it is becoming more and more necessary to study the laws of vegetable growth, the habitudes and needs of plants and grains and trees; and in proportion as this is done, and the analysis of soils becomes an indispensable pre-requisite, there will be a world of novelty and light to break in upon the farming mind, to interest, electrify, and enrich.

The time will come when, to attempt the successful management of a farm, large or small, without some considerable practical knowledge of chemistry and botany and geology, will be considered the extreme of Quixotism. Meanwhile, let farmers and farmers' wives, with their children, bear in mind that to diminish the chances of a dyspeptic or bilious madness, or a premature death from acute disease, they should practice habits of personal cleanliness and bodily regularity; should eat only at regular hours and never between meals or after sundown, eat slowly and of plain food; avoid damp clothing and cold or wet feet, and cultivate a cheerful spirit, a courteous temper, and a loving, generous heart.

TO KILL A FELON.—A correspondent of *Hall's Journal of Health* says: To kill a felon, or bring it to a head if too far advanced to kill, take poke root and boil till soft enough to make a poultice, apply, and if the felon is not too far advanced it will scatter it; if it is, it will hasten suppuration. It will deaden the pain in a short time and save much suffering. I have used this myself and know it to be good.

EXPECTANCY OF LIFE.—The chances of life have been carefully studied and tabulated by life-insurance men, and, barring accidents, seldom prove misleading. The life of an ordinary man or woman is about as follows: A person of 1 year of age may expect to live 39 years longer; of 10 years, 51; of 20 years, 41; of 30 years, 34; of 40 years, 25; of 50 years, 21; of 60 years, 14; of 70 years, 9; of 80 years, 4.

Worth Knowing.

Ancient Steel, Etc.

"A considerable steel-making industry exists at the present day in China, on the Upper Yangtze, whence the steel is sent to Tientsin for shipment and distribution. It fetches much higher prices than the Swedish steel imported into the country. The Chinese metallurgists recognize three kinds of steel, namely, that which is produced by adding unwrought to wrought iron while the mass is subject to the action of fire, pure iron many times subject to fire, and native steel, which is produced in the southwest. The different names for steel are twang kang, or ball steel, from its rounded form, kwan kang, or sprinkled steel, wei tee, or false steel. The Chinese apparently have known how to manufacture steel from the very earliest ages."—*English Journal.*

Dæmachus, in the fourth century, B. C., records that different sorts of steel are produced among the Chalybes, in Sinope, Lydia and Laconia. That of Sinope was used for smiths' and carpenters' tools; that of Laconia for files, drills for iron, stamps and masons' tools, and the Lydian kind for files, swords, razors and knives. In Laconia, iron is said to have formed the only currency in the days of Lycurgus.

Pliny mentions that the best steel used in Rome was imported from China, a country in which copper or bronze swords are said to have been in use B. C. 219,748.

Iron and steel are proved to have been considerably in general use at Rome during the period of her wars in Western Europe.

The Book of Job is among the very earliest of literary works, its date being not definitely known, but in it iron and steel are separately named in one verse, and considerable familiarity with other metals is shown in the reading: "Surely there is a vein for the silver, and a place for gold where they fine it. Iron is taken out of the earth, and brass is molten out of the stone." The Book of Numbers also deals familiarly with the metals; in fact the entire Hebrew scriptures do.

An ancient historical writer makes particular mention of the process by which the Celtiberians prepared the iron for the purpose of manufacturing swords, so tempered, that neither shield, helmet nor bone could resist them, by burying iron under ground as Chinese, Japanese and Spaniards have also done in making swords that would cut small bits of iron without injury to the edge.

Corrosion of Lead by Lime.

There is, perhaps, no metal in which not only chemists, but the general public, is more interested in than lead. Every lead pipe that enters into the construction of a house or laboratory, soon acquires a history of its own, and though instructive, this history is not always agreeable. If it is a water-pipe, it is apt to be burst during a frost, and lead to the inundation of the building when the thaw begins; if a gas-pipe, it may, after a while, give rise to minute leakages, difficult to discover, and often highly dangerous. If a soil-pipe, it invariably becomes more or less corroded in the course of 10 or 15 years, and then the noxious effluvia of the drain are insiduously infused through the house; children fall ill without apparent cause, and even the strongest adults suffer frequently from this dangerous source of infection of the air. Again, if the lead is employed to line cisterns for storing water, and the latter be very pure, a certain amount dissolves in the water, and may give rise to colic, neuralgia, or even paralysis, in those who drink it. In this manner also lead enters into medicines prepared with distilled water which has been stored in lead cisterns (slate or asphalt cisterns are to be preferred).

In 1869 a paper was read at the British Association, at Exeter, by a well-known London chemist, in which some of these facts were brought very prominently forward. Quite recently, another source of danger has been pointed out in the daily papers; and some letters have appeared in the *Globe* upon the effects of lime on lead. It would appear from these that, contrary to what is generally believed, the presence of lime in water does not prevent lead from being dissolved, but rather promotes the corrosion of pipes and cisterns. We know that chloride of lime, so often thrown into closets, with a view of disinfecting them, has a most injurious action, giving rise to chloride of lead, which dissolves and corrodes the pipes in every direction, so that in the course of a short time sewer gas easily permeates through them. Other disinfectants of an acid mineral nature would probably act in the same manner. It is now known that when lime, mortar, or plaster of Paris is left in contact with lead pipes, they corrode more or less rapidly in these parts, and another source of mischief is thus pointed out.—*Monthly Magazine* (Eng)

A HAPPY IDEA.—Forty years ago a Frenchman, with the usual practical views of the nationality, conceived a happy idea for easily creating intricate designs upon plush. This happy idea was simply the application of a hot iron to the surface of the goods. The discovery was made in an accidental way, and cost him the good looks of a velvet dressing-gown, which his over-zealous wife had attempted to iron. His experience, however, suggested what was afterward, and is still called embossed plush.

A. O. U. W. in Grand Council.

Fifth Annual Session of the Grand Lodge, A. O. U. W., of California.

CONVENED AT DASHAWAY HALL, SAN FRANCISCO, APRIL 4, 1882.

(Coutinued from our last issue.)

Wednesday—Second Day.

The Grand Lodge was called to order at 10 A. M.

On motion of E. Danforth, the first day's proceedings being in print, the reading of the minutes was dispensed with.

The Committee on Appeals, in the matter of the appeal of Gridley Lodge, No. 67, vs. John M. Boyles, recommended that the Lodge be directed to vacate its judgment of expulsion, and reinstate the accused to full membership. In this case, notwithstanding the committee before whom the accused was tried reported that the accused was not guilty, a judgment of expulsion was rendered by a vote of the Lodge itself. It seems, however, that the accused did not have the two weeks' notice required by Article XV, Section 9, of the Constitution of Subordinate Lodges, and on this ground the Committee on Appeals decided as above.

On motion of F. F. Carnduff, of No. 102, the report was received and adopted.

The Grand Master appointed to Committee on Degree of Honor, J. F. Parks, in place of A. J. Holloway, who was absent.

A telegram was received from Eugene Gregory, who was in Chicago, regretting his inability to attend the session.

The Grand Master appointed the following special Committee on Temperance: J. C. Hanover, of No. 97; E K. Hill, of No. 142; A. B Moffitt, of No. 214; A. McFarland, of No. 120; J. K. McKinstry, of No. 113.

The Committee on Appeals presented a report, which, on motion of L. G. Schord, was adopted.

[We shall in our next number summarize the action of this committee on all appeal cases.—EDS. WATCHMAN]

D. S. Hirschberg was appointed on Committee of Good of the Order in place of C. K. Robinson, absent.

The following resolutions were selected by recommendation of the committee:

"That our Supreme Representatives be requested to use their best endeavors to strike out the word "kneel," as used in the installation of the officers of subordinate Lodges.

Resolved, That in the monthly reports of deaths issued to the subordinate Lodges, the Grand Recorder be instructed to state the number of members in good standing, together with the number under temporary suspension.

Chairman Terrell, of the Finance Committee, reported the following, which was adopted:

In reference to the matters referred to us through the Committee on Distribution, we would respectfully report as follows: In reference to the statement of expenses found on page five, of the Grand Master's report, we recommend that the same be approved. [This refers to the Grand Master Workman's expenses from Feb. 1st, 1881, to April 1st, 1881, which includes $781 50 for traveling expenses, $56 45 for postage, express and telegrams, and $120 for copying letters; clerk fees, etc., (60 weeks) $120; total, $957.95.]

In reference to the matter of official bonds, found on page 17 of same report, we would make the same recommendation.

[This was to give approval of bonds of Grand officers, deputies, etc., to G. M. W., with consent of Finance Committee, instead of, as heretofore, to Grand Foreman and Grand Overseer, as these officers live at different points.]

In reference to the financial matters contained in the reports of the Grand Recorder and Grand Receiver, we have already passed upon them, and recommend that they be approved.

[We gave, in last number of the WATCHMAN, an abstract of the financial position of the Grand Recorder's report, and herewith present a condensation of the report of C. H. Haile, Grand Receiver:

1881	General Fund.	Beneficiary Fund.	Total.

By amount of cash on hand Dec. 31, 1881	5,896.44
Total	$196,074.43

The long list of separate disbursements we omit.]

The report of the Committee on Amendments was called up for action.

A substitute for the first five amendments (Proposition No. 1) offered was carried, to the effect that the rejected candidate only receives back from the Lodge $1 of his medical examination fee.

Proposition No. 2, providing that the Lodge *shall* pay, as sick benefits, a sum sufficient to keep members in standing during such sickness, was not adopted, as Article XIII of the Grand Lodge Constitution provided for the matter.

Proposition No. 3, also concerning sick benefits, was rejected by the committee.

Proposition No. 4 contained amendments 8, 9 and 10, which were considered by the committee as no improvements on the laws they were to amend, so the proposition was rejected.

Proposition No. 5 was for Lodges to elect officers annually instead of semi-annually. This was not adopted.

Propositions 6 and 7 were so acted upon that Sec. 13 of Art. 1 of the Laws of the Grand Lodge now read: "No subordinate Lodge shall charge more than $3 to a member who deposits his clearance card and is elected to membership thereon; nor more than $2 for the issuing of a clearance card." Within these figures, the matter is left to the Lodge.

Proposition No. 8 was with regard to terms of office of officers of subordinate Lodges, but it was not adopted, the committee and Grand Lodge thinking that six months in office was sufficient.

Proposition No. 9 was to amend Sec. 6, Art. XV. of the Constitution of subordinate Lodges so as to add the following:

"Excepting when a brother has been found guilty of a crime or misdemeanor by the courts of our State, and the penalty thereof is imprisonment in the State prison or any county jail, said brother shall be declared expelled by the Master Workman of his Lodge, without the above form of trial."

The committee recommended the adoption of this, but on motion of Mr. Terrill the report was laid on the table.

Proposition No. 10 included amendments Nos. 16 and 17, and provoked great discussion. The first was as follows:

Amend Sec. 2, Art. 2, of Grand Lodge Constitution to read as follows:

The territory under the jurisdiction of this Grand Lodge shall be divided into 50 districts, which shall be numbered from 1 to 50, and shall be composed of a certain number of Lodges, according to their membership in good standing, as appears by the semi-annual report of the 31st day of December previous. Said apportionment shall be made so as to group neighboring Lodges, and thus have each district contain as nearly the same number of members as may be, considering the interests and harmony of the Lodges.

The Lodges composing each district shall be arranged in a district list, according to their organization number. On the second meeting night in January of each year each Lodge in every district shall nominate (if a majority so desire) a P. M. W. in good standing, and holding membership within the district, as a Representative to the next Grand Lodge. And said Lodge shall thereafter immediately, under its seal, notify each Lodge in its district of the said nomination.

On the first meeting night in February of each year each Lodge in each district shall ballot for the P. M. W. so nominated, and by a majority vote express its preference for a certain P. M. W. as a Representative of the district in the Grand Lodge.

The Lodge, under its seal, shall issue a certificate of its preference thus indicated, stating therein the whole number of votes cast and the highest number so received by any P. M. W. Each Lodge shall thereafter immediately send said certificate to the Lodge coming first on the said district list.

On the last meeting night in February the Lodge to which the certificates are sent, shall open and canvass all of said certificates, count the votes and make a record thereof. And the P. M. W. having the highest vote, as shown by said certificates, shall be declared elected as the Representative of said district. And the said canvassing Lodge, under its seal, and attested by its M. W. and Rec., shall issue to said P. M. W. a certificate of his election, and officially notify him and each Lodge in the district thereof. And upon the presentation of his said certificate the said P. M. W., being otherwise qualified, shall be admitted as a Representative to the Grand Lodge.

For the purpose of being elected a Representative, in the case of the institution of a new Lodge, the P. M. W. shall be deemed eligible.

In the counting of said certified votes, if there should be a tie vote, then each P. M. W. having said tie vote shall be declared elected a Representative, but said district shall be entitled to one vote only, and the Representatives, between them, to but one mileage and one *per diem*.

Upon the institution of a new Lodge the G. M. W. shall assign said Lodge to the district to which it ought to belong, but his action shall be subject to the approval of the next Grand Lodge.

For the purpose of putting this amendment into effect, so that the Representatives to the next Grand Lodge shall be elected under it, the G. M. W., as chairman, Grand Trustees, and Grand Recorder shall constitute a committee, which shall, on or before the first day of October next, make said apportionment, and thereafter the G. M. W. shall officially notify each Lodge thereof, and appoint a Deputy for each of said districts.

All laws in conflict herewith are hereby repealed.

Amendment 17.—Amend Sec. 1, Art. III, by striking out "first Tuesday" and insert "second Tuesday."

Amendments Nos. 16 and 17. We are of the opinion that taxation without representation would not be a satisfactory feature to introduce into the laws of this jurisdiction. We think that the adoption of the proposed amendments would be a blow to the fraternity of this Order, from which it would never recover; that it would estrange Lodges and members to such an extent that the brotherly and fraternal intercourse would be in a great measure broken up. We believe that, if necessary, the representation to the Grand Lodge can be reduced in some manner more satisfactory to the membership. We recommend that neither amendment be adopted.

The report was adopted and the amendments were not carried.

Proposition No. 11 was to make the initiation fee for conferring degrees not less than $10. This had already been disposed of, and the committee reported adversely.

Proposition No. 12 bore on the subject of membership and payment of Examiners' fees, but neither amendment proposed was adopted.

Proposition No. 13 related to Medical Examiners and their fees, and was not adopted.

Proposition No. 14, which was amendment No. 2, was offered by D. S. Hirshberg, and was as follows:

Amend Art. VI, Constitution of the Grand Lodge, by adding a new section, to be known as Sec. 12, to read as follows:

The Grand Master Workman, Grand Recorder and Grand Receiver shall constitute the Medical Board for this jurisdiction. Each applicant's medical certificate shall be passed upon by them in accordance with the law of the Supreme Lodge, and no fee shall be charged or collected by said Board for this service, and no applicant shall receive either degree until his medical certificate shall have been approved by a majority of the Medical Board.

The report of the committee on this was as follows:

We are of the opinion that the membership of California is as select, and has been as carefully guarded as that of any other jurisdiction. We know that the work of examining medical certificates has been performed in the past by the Grand Masters without any expense to the Order. We believe it can be done as well in the future by the board named in the amendment, and without any expense to the Order. We are opposed to creating any more salaried positions, but as the Supreme Lodge makes it imperative that we shall either have a Medical Examiner or Medical Examining Board, we recommend that the amendment be adopted.

On this report of the committee coming up, Wm. H. Wood moved the previous question, which was sustained.

The ayes and noes were called for, and on calling the roll the votes stood as follows:

Ayes, 131; noes, 113. So the report of the committee was adopted.

Proposition No. 15 was to strike ont Article VIII of the Constitution, and the committee recommended the adoption, but the Grand Lodge refused to do so.

Proposition No. 16 was on a subject already disposed of in the first four amendments offered, and was, therefore, not adopted.

The election of officers then took place, the result of which will be seen in our directory.

The Grand Trustees reported that they had examined the books and records of the Grand Recorder's office, and that the accounts ware all correct and well kept. The Grand Receiver's books, accounts and vouchers agree with those of the Grand Recorder. They recommended that the Grand Recorder's bond be fixed at $15,000, and that of the Grand Receiver at $25,000.

The Committee on Resolutions reported in favor of adoption of a resolution to suspend or annul charters of any Grand or subordinate Lodge which seeks to avoid performance of duties; and that dignity of Supreme Lodge should be upheld.

The Committee on Good of the Order made the following report:

SIRS AND BROTHERS:—Your Committee on Good of the Order, to whom was referred that portion of the Grand Master Workman's report, found on pages 1, 2, 3, 4, 12, 17, 20 and 22, has been duly considered by your committee, and we recommend the approval of the same by this Grand Lodge.

In regard to that portion of the report under the head of "Charters Surrendered," on page 13, your committee recommend that the attention of District Deputies be called to the inadvisability of establishing Lodges in too sparsely settled districts.

That portion of the report in relation to circulars has been carefully examined by your committee and fully endorsed.

It affords your committee considerable satisfaction to recommend the approval of the action of the Grand Master in relation to beneficiary certificates refused.

In regard to that portion of the report, on page 21, in reference to the PACIFIC STATES WATCHMAN, your committee recommend the adoption of the following resolution:

Resolved, That we recognize and appreciate the valuable services rendered by the PACIFIC STATES WATCHMAN, as an able exponent of our Order. Its management, under experienced and responsible publishers, warrants us in fully endorsing and recommending it to the individual patronage of all members of the Ancient Order of United Workmen.

In regard to that portion of the report, on page our committee recommend its approval by this Grand Lodge, except that portion in relation to the Grand Receiver's contingent expense, and thereon your committee recommend that no action be taken.

The Committee on Good of the Order reported adversely on the request of certain Arizona Lodges to be admitted into the jurisdiction of California.

The committee also reported unfavorably on the request to reopen the case of Hartley and Soper, of Franklin Lodge, against Peterson, of Valley Lodge.

The committee also reported adversely on a petition for charter for a new Lodge in the northern part of San Francisco.

The committee also reported adversely on a petition for a new Lodge in Stockton.

To the question propounded to the Lodge and referred to this committee an answer was given, that a member of a subordinate Lodge, who had committed a crime, against the law and order, and was convicted and sent to the penetentiary, should *not* be expelled from his Lodge without trial therein.

Thursday—Third Day.

The Grand Lodge accepted an invitation from E. Lewis and A. C. Knudsen, Representatives, to visit Golden Gate Lodge in the evening.

During the year the G. M. W. rendered the following decision, numbered 31 in his report: "When a Lodge has intentionally or erroneously inflicted a penalty upon one of its members for infringement or violation of its local law, said Lodge possesses the inherent right and power, by its action at a subsequent meeting, to rescind or reverse its former action, whether said penalty was reprimand, fine, suspension for a definite period, or suspension for non-payment of dues. Three cases have occurred to which this decision has been applied."

This was referred to the Committee on Laws and Supervision, and the majority of the committee reported in favor of approving the decision. A minority report (by Wm. C. Flint) was to the effect that: "The question involved is, whether a Lodge can at any meeting reverse, cancel, or annul action taken by it at any previous time. To maintain this, would be to cause disorder and confusion, when system and law should prevail. I therefore recommend that the decision be not approved."

After some discussion the minority report was adopted.

The Committee on Appeals and Grievances, to whom was submitted the matter of appeal of E. F. Loud vs. Valley Lodge, No. 30, substituted the following report:

On the 24 day of November, 1881, Wm. P. Frost and W. S. Lucky, with others, members of Valley Lodge, No. 30, were reported to the Lodge, by its Receiver, as six months in arrears for dues, and the Master Workman, not being otherwise directed by the Lodge, thereupon declared said members suspended from the Order. Frost and Lucky subsequently applied for reinstatement, and we assume, although not shown by the record, paid all delinquencies; and, on the 18th day of January, 1882, the Lodge voted to rescind the action whereby they were suspended, and thereupon the Master Workman declared their beneficiary certificates renewed. From this action this appeal is taken.

Sec. 2 of Art. XII., of the Constitution of Subordinate Lodges, provides that if a member neglects or refuses to pay the dues as fixed by the by-laws of the Lodge, for the period of six months, he shall be reported to the Lodge by the Financier, and the Master Workman shall, unless otherwise directed by the Lodge, thereupon declare such member suspended from the Order. The term "shall thereupon declare," seems to contemplate immediate action; and it would be dangerous to give any other construction to the expression "unless otherwise directed by the Lodge," than that such direction is to be given before the declaration of suspension is made. Were it otherwise, suspensions would stand upon no fixed principle or law, but would be subject to the uncertain caprices and will of the Lodge, to be exercised within an indefinite period of time.

The fiat of suspension is the declaration of the Master Workman, acting ministerially under specific law, and when once suspended for non-payment of dues, a member can only be reinstated upon conforming to the provisions of Section 4 of Article XII of the Constitution of Subordinate Lodges.

We are, therefore, of the opinion, and so advise, that the action of Valley Lodge, No. 30, in rescinding the action of the Master Workman, whereby said members were suspended, was a nullity, and the order of the Master Workman renewing their beneficiary certificates was without authority and void.

On motion, the report was adopted.

The Committee on Appeals reported that they found nothing in the complaint of the San Diego Lodge against the Wilmington Lodge that would justify the committee in rendering any decision in the matter complained of, as it is merely a complaint of one Lodge against another, made *ex parte*.

In the report of the Committee on Appeals in the case of Colton, Hamon, Jones, Boyle and Cruff vs. Pacific Lodge, the action of the Grand Lodge was such as to acquit L. B. Edwards in adopting the report of the committee recommending the sustaining of the action of the Lodge, and ignoring the appeal.

A report of the Committee on Appeals and Grievances in the case of J. N. White vs. the Grangeville Lodge, recommended that the decision expelling the member be set aside and said charges be ordered dismissed.

A report of the Committee on Appeals and Grievances in the case of Chas. D. Coon vs. Yerba Buena Lodge dismissed the appeal on the ground "that the whole question of weekly sick benefits is left entirely with subordinate Lodges."

The Committee on Laws and Supervisions made a report which was adopted. This referred to their examination of sets of by-laws. Most of those sent were badly prepared. They recommend that hereafter all by-laws sent to the committee be sent direct to the chairman, and be written on good foolscap, with a suitable margin for notes.

G. M. W. Barnes called Jas. T. Rogers, G. F., to the chair, and retired from the Lodge-room to attend to an important business engagement. The Grand Lodge took this occasion to show its appreciation of his valuable services as Grand Master, and on motion, Wm. H. Jordan, P. G. M., M. T. Brewer, P. G. M., and Representative A. O. Carpenter, were appointed a committee to take up a collection and procure some suitable memento to present to him on behalf of the Grand Lodge.

[The presentation speeches we gave in the last WATCHMAN, and in another column of this issue we give a description of the jewel.—EDS. WATCHMAN.]

The Committee on Laws and Supervisions, to whom was referred certain parts of the report of the Grand Master Workman, approved decisions 1, 2, 3, 4, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 19, 20, 21, 22, 23 and 24.

[All these can be referred to by looking at the report of the G. M. W. in last week's WATCHMAN.]

They also approved all portions of the report referred to them, except the following:

Amend decision No. 5 by adding thereto the following words: "Except when required by Lodges paying sick benefits," and when so amended that the decision be approved.

That decision No. 6 be amended by adding thereto the following words: "But payment to the Financier should not be considered payment to the Lodge, until actually credited on the Lodge books," and when so amended, that said decision be approved.

For decision No. 18, substitute the following: "I deem it decidedly dangerous to admit to membership parties engaged in mills or works where explosive powder is manufactured."

That portion of the above report relating to decision No. 6 was not adopted by the Grand Lodge.

On recommendation of the committee a special committee of five was appointed to consider decisions 26, 27, 28, 29 and 30 of the Grand Master's report. This committee consisted of David McClure, C. K. Robinson, Alfred Daggett, Wm. E. Hopping, H. B. Davidson.

On motion of Representative Kinsley, the Geo. W. Green case (see Grand Master's report, p. 18), was taken up for consideration, and the decision of the Grand Master reversed.

On motion of W. H. Wood, speakers were limited to five minute speeches for the rest of the session.

A petition from Anchor Lodge, No. 216, at Lower Lake, Cal., was presented and granted, that it should hold semi-monthly instead of weekly meetings.

The Grand Lodge refused to take any action in the matter of compelling people to have beneficiary certificates made payable only to relatives, or to some person which is dependent on the Brother Workman for support. They thought this would be interfering with the individual rights of the members.

The report of the Committee on Resolutions recommending the adoption of the following resolutions, introduced by E. M. Reading, of Fidelity Lodge, was adopted:

Resolved, That any Grand or subordinate Lodge of the A. O. U. W., which seeks to avoid the performance of duties in accordance with the obligations of its members, whether by appealing to the courts or otherwise, should at once be suspended and its charter recalled.

Resolved, That our Representatives to the Supreme Lodge have the pledge of this Grand Lodge that they will be upheld in every honorable effort they may make to sustain the dignity of the Supreme Lodge; and that they are hereby instructed to aid and assist, by voice and vote, to bring all offenders against our laws, rules and regulations, to speedy and condign punishment.

By adopting the report of the Committee on Resolutions the Grand Lodge referred to the Supreme Lodge Representatives, without recommendation, the following resolutions introduced by A. O. Carpenter, of Ukiah Lodge:

WHEREAS, The wording of Sections 8, 9 and 10, of Article VIII, of the Supreme Lodge Constitution, is such as to admit of varied and conflicting construction, and may lead, in the future, to litigation to definitely settle the same, and

WHEREAS, This Order, while securing financial benefits to the widows and orphans of brothers taken from us by death, yet is based on purely fraternal principles, and not desirous of availing itself of technical law to avoid payment of such benefits, therefore

Resolved, That our Representative to the next Supreme Lodge be instructed to use his best endeavors to reconcile and make clear the said sections, to the end that a brother may pay arrearages of assessments at any time, whether in Lodge meeting or out, and that the renewal of his beneficiary certificate shall date from the time of payment of such arrearages to the Financier, whether formally reinstated by declaration in open Lodge or not, thereafter.

The Committee on Resolutions reported adversely on a proposition to require the members of the Grand Medical Examining Board to file with the Grand Recorder, certified copies of their authority to practice medicine, as is required of subordinate Medical Examiners.

E. F. Loud, D. G. M. W., offered the following, which was referred to Committee on Resolutions without reading:

Resolved, That in case of disagreement between our Representatives to the Supreme Lodge, as to how the vote to which this Grand Lodge will be entitled shall be cast, such vote shall be divided equally between the Representatives present, and that each cast his proportion of such vote.

The Committee reported in favor of the above resolution, and the report was adopted.

M. W. Fish, P. G. M. W., offered the following, which was referred to Committee on Resolutions without reading.

Resolved, That our Representatives to the Supreme Lodge be instructed to endeavor to obtain an amendment to the Constitution of Supreme Lodge, Article IV, Section 2, "voting," by striking out the words "but no Grand Lodge shall have more than five votes," in sixth and seventh lines.

The committee reported in favor of the above resolution, and the report was adopted.

The Committee on Amendments proposed the following substitute to the amendment to Article XV, Section 7, Subordinate Lodge Constitution, proposed by Geo. W. Lovie:

Provided, That when it is impossible for witnesses to be present, depositions taken, as provided by the laws of this State, may be received in evidence.

This report was adopted.

The Committee on Good of the Order reported as follows:

SIRS AND BROTHERS: Your Committee on Good of the Order, to whom was referred that portion of the Grand Master Workman's report, found on pages 1, 2, 3, 4, 12, 17, 20 and 22, has been duly considered by your committee, and we recommend the approval of the same by this Grand Lodge.

In regard to that portion of the report under the head of "Charters Surrendered," on page 13, your committee recommend that the attention of District Deputies be called to the inadvisability of establishing Lodges in too sparsely settled districts.

That portion of the report in relation to circulars has been carefully examined by your committee, and is fully endorsed.

It affords your committee considerable satisfaction to recommend the approval of the action of the Grand Master in relation to beneficiary certificates refused.

In regard to that portion of the report on page 21, in reference to the PACIFIC STATES WATCHMAN, your committee recommend the adoption of the following resolution:

Resolved, That we recognize and appreciate the valuable services rendered by the PACIFIC STATES WATCHMAN, as an able exponent of our Order. Its management, under experienced publishers, warrants us in fully endorsing and recommending it to the individual patronage of all members of the A. O. U. W.

This report was adopted.

The Committee on Good of the Order reported adversely on the request of certain Arizona Lodges to be admitted to the California jurisdiction.

The committee also reported adversely on a request to re-open the case of Hartley and Soper, of Franklin Lodge, No. 44, against Peterson, of Valley Lodge.

The committee reported adversely on the petition to charter a new Lodge in the northern part of San Francisco; and adversely on the petition to charter a new Lodge in Stockton.

The committee answered in the negative the question: "If a member of any subordinate Lodge commit a crime against the law and code, be convicted and sent to the penitentiary, should he be expelled from his Lodge without trial therein?"

The committee also reported in favor of the following, introduced by E. M. Reading, of Fidelity Lodge:

WHEREAS, The General Relief Committee of the A. O. U. W. of San Francisco, duly organized for the purpose of extending pecuniary aid and securing employment to or for those of our brothers in distress or out of work; and

WHEREAS, The only pecuniary support said committee has received for the prosecution of its work, has been from the donations from the Lodges of San Francisco, and the limited profits derived from the annual picnics; and

WHEREAS, Said Relief Committee has no legal authority to demand of any Lodge, the member of which said committee has assisted pecuniarily, for reimbursement of money advanced to said member; therefore,

Resolved, That this Grand Lodge, recognizing the good and timely work performed by the General Relief Committee of San Francisco, do hereby authorize said committee to make a request upon any Lodge whose member they have pecuniarily relieved, and do hereby recommend that all such Lodges reimburse said committee, when satisfied such assistance was warranted and called for.

The committee also reported on the question asked by George Moore, that the subject matter comes properly within the province of subordinate Lodges, and is a matter with which the Grand Lodge has noting to do. The question was: The general fund of each Lodge being a fund which accumulates, and upon which the Lodge can draw to meet any of the necessities which may come upon them, or any misfortune which may overtake a brother or his family, and it being a fund in which every member is thus personally interested, is it not repugnant to our constitution, for any subordinate Lodge, against the objections of one or more members, to make appropriations out of said fund, for purposes entirely outside of the purposes of the Order, however worthy the same may be?

All these reports of this committee were adopted.

Resolutions were adopted fixing the salary of Grand Receiver at $600 per annum and allowing his traveling expenses ($78.73) for the past 14 months to be paid by the Grand Lodge.

The Committee on Credentials presented a report, from which we take the following:

The Grand Lodge degree was conferred on: Representatives, 163; P. M. W.'s, not Representatives, 22; Recorders, 9; Financiers, 4; Receivers, 5; total, 203. Number of officers present, 17; number of Representatives present, 259; number of P. M. W.'s (not Representatives) present, 48; total number present, 324. We also report that the following Lodges failed to make returns of Representatives, viz.: Nos. 65, 139, 148, 160, 166, 176, 186, 192 and 195. We also find that the following Lodges were not represented at this session: Nos. 38, 65, 66, 83, 94, 129, 130, 139, 143, 148, 152, 160, 166, 168, 172, 176, 183, 184, 186, 192, 195, 199, 213 and 215.

The special committee to consider decisions 26, 27, 28, 29 and 30 in the Grand Master's report, reported verbally, through Representative McClure, endorsing the action of the Grand Master.

[These decisions were published last week.—EDS. WATCHMAN.]

Grand Trustees.

The report of the Grand Trustees was received as follows:

Brother:—Your Grand Trustees respectfully submit the following report: That we have carefully examined the books and other records of the Grand Recorder's office for the past year, and find the office in good condition, and the accounts kept in the best manner and in the best interest of all connected with our Order.

The amount of cash on hand Jan. 1, 1881, was	$ 3,402.87
Receipts from all sources to Jan. 1, 1882	184 671.55
Total receipts	$188,074.42
Total disbursements to Jan. 1, 1882	$184,177.99
Cash on hand Jan. 1, 1882	3,896 43
Total	$188,074.42

We have also examined the Grand Receiver's books, accounts and vouchers, and find that they agree with those of the Grand Recorder. We have calculated the probable revenue and expense of this Grand Lodge for the ensuing year, and submit the following estimate:

REVENUE.

13,800 Members at 60 cents per capita	$8,280.00
1 000 Members at 30 cents per capita	300 00
2 000 Members at 30 cents per capita	600.00
20 New Lodges at $15 each	300.00
Profit on beneficiary certificates	2,000.00
Profit on supplies	1,470 00
Total	$12 950.00

EXPENSES.

Salary of Grand Recorder, including pay of assistant at $15	$3,500.00
Contingent expenses of Grand Recorder at $75 per month	900.00
Rent of Grand Recorder's office	600.00
Printing and stationery	250.00
Grand Receiver's salary	600.00
Contingent expenses of Grand Master Workman	750.00
Four officers and Representatives to Supreme Lodge, in addition to mileage allowed $100 each	400.00
250 Representatives to Grand Lodge and officers of Grand Lodge, four days at $1	2,000.00
Mileage for same	2,000.00
Supreme Lodge tax, 16,000 members at 10 cents	1,600.00
Expenses of Grand Lodge session	500.00
Total	$13,100.00

We would recommend that a better safe be procured for keeping money in the Grand Recorder's office, and that the matter be referred to a committee of three, with power to act, if in their judgment they deem it best.

We would also recommend that Lodges be more particular, when sending money to the Grand Recorder, to accompany the same with the usual blank properly filled up.

We would further recommend that the Grand Recorder's bond be fixed at $15 000, and the bond of Grand Receiver at $25,000.

CHAS. G. REED,
M. S. LEVY,
J. A. DUNSMOOR,
Grand Trustees.

A motion to amend by striking out the words "including the pay of assistant at $1,500," from the Grand Recorder's salary, was carried.

A motion to amend by striking out "$25,000," and insert "$40,000," as the bond of the Grand Receiver, was carried.

The report as amended was adopted.

Temperance

The Committee on Temperance reported as follows: Your Committee, to whom was assigned that section of the Grand Master's report, referring to the subject of temperance, would respectfully submit the following report:

We most heartily endorse the sentiments and action of the Grand Master Workman, and recommend that the same be adopted as the sense of the Grand Lodge.

We also recommend the adoption of the following preamble and resolution:

WHEREAS, We recognize the principal mission of the Ancient Order of United Workman, in the protection of the hearths and homes of its members from every disaster, and in the elevation of all the fraternity physically, mentally and morally; and, WHEREAS, we recognize in the use of alcoholic stimulants the deadliest enemy to all these most sacred and vital interests:

Be it Resolved, That the Grand Master Workman be, and is hereby instructed to issue a circular letter of instuction to all the Subordinate Lodges in this jurisdiction, and to their Medical Examiners in particular, urging them to much greater vigilance and caution, to prevent the initiation into our order, of all persons addicted to the use of any kind of intoxicating beverages, and of all persons having a pecuniary interest in perpetuating such intemperate habits among the brethren.

That portion of the report of the committee relating to the Grand Master's Report was adopted.

The resolution contained in the report of the committee was indefinitely postponed.

Degree of Honor.

The Committee on Degree of Honor made two reports. The majority report signed by all the committee, except F. W. Rossbach, was as follows:

In reference to the matter of making the "Degree of Honor" a Beneficiary Order, your committee would say: that, having carefully read all the papers submitted to them bearing on the question, they find that six Lodges have expressed themselves on the subject; three of them having voted unanimously against the proposition, and three by a majority vote in favor. We are, therefore, of the opinion that it would not be for the interest of the Order to make so radical a change at this time, and, therefore, offer the following resolution:

Resolved, That your committee be discharged from the further consideration of the subject.

The minority report (signed by F. W. Rossbach) was as follows:

In reference to the matter of having the Degree of Honor placed on a beneficiary, as well as social basis, your committee beg leave to report as follows: That, in view of the fact that a great number of the members of the Degree of Honor are in favor of the same, I would respectfully recommend that in accordance with the views of those members, that this Grand Lodge appoint a committee of five members to draft a constitution and by-laws for the same, to report at the next session of the Grand Lodge.

On motion the minority report was adopted in lieu of the majority report. The Grand Master appointed the following committee in compliance with the above resolution: W. B. Lyon, No. 30; A. P. Murgotten, No. 17; F. W. Rossbach, No. 127; A. J. Holloway, No. 96; F. S. Poland, No. 126.

The report of the Committee on Degree of Honor was adopted, which reported adversely on a resolution introduced by Chas. A. Gardner, of Eureka Lodge, to permit wives to attend Lodges with their husbands. Representative Gardner made a worthy and earnest appeal for the advancement of women in the Order.

Appeals.

The Committee on Appeals upheld the decision of Oak Leaf Lodge, in the case of Thos. W. Thacker vs. Oak Leaf Lodge.

The Committee on Appeals also reported in favor of dismissing appeal of Geo. J. Vincent vs. Yerba Buena Lodge. The decision was to the effect that no appeal was taken from the decision of a subordinate Lodge upon questions involving sick benefits.

The committee also indorsed the action of the Lodge in the case of F. H. Mount vs. Fortuna Lodge.

These reports were adopted.

Fines for Non-Attendance

The Committee on Laws and Supervision presented the following:

QUERY.

Has a subordinate Lodge authority to *enforce* a fine under a by-law providing that a brother shall be fined for non-attendance at the funeral of a brother "unless absent from the city or prevented by sickness of self or family; or if in attendance upon a court as an officer, juror, witness or attorney, or if attending the funeral of a member of a kindred society.—GEO. B. KATZENSTEIN.

ANSWER BY COMMITTEE.

A "by-law" providing for fines against members for non-attendance at a funeral, or any other meeting of the Lodge, would be illegal, and any fine imposed under such "law" would be void, and could not be enforced.

The answer of the committee was not concurred in by the Grand Lodge.

MISCELLANEOUS.

The officers elect (with the exception of Grand Receiver), were duly installed by Supreme Foreman, M. W. Fish, assisted by Clay W. Taylor and W. H. Jordan, P. G. M. W.

On motion of Representative Katzenstein, the query was answered in the affirmative.

The Finance Committee presented the following, which was adopted:

Your Committee on Finance believing that the per capita tax and the authority to audit and pay the expenses should be fixed definitely by this Grand Lodge, would offer the following and recommend its adoption.

Resolved, That the per capita tax to and the same is hereby fixed for the ensuing year at 60 cents per member; 30 cents to be collected at the end of each term of the subordinate Lodges, and that the several amounts estimated as expenses for the Grand Masters, be authorized to be paid.

The following resolution was adopted:

Resolved, That the Order owes a debt of gratitude to some of the secular press who have consistently and continuously chronicled the progress, aims, and objects of this and other Orders for months and years, and to the *Morning Call* and *Examiner* of San Francisco our thanks are due and hereby tendered for their able departments on the subject of Fraternal Societies.

On motion of H. G. Pratt, Grand Recorder, the Representatives to the Supreme Lodge, in conjunction with the Supreme Foreman, M. W. Fish, were requested to prepare a ritual for a Grand Lodge and Supreme Lodge degree, and submit the same to the Supreme Lodge for its consideration.

On motion, the salary of the Assistant Grand Recorder of this session was fixed at $5 per day.

On motion, the Finance Committee was instructed to allow Representatives from southern California sufficient to pay their actual traveling expenses.

A vote of thanks was tendered to the retiring Grand officers, and also the committees, for the very able and efficient manner in which they had performed their duties.

The Grand Master appointed Past Grand Masters H. G. Pratt, M. W. Fish, Wm. H. Jordan, M. T. Brewer and Clay W. Taylor as a committee to prepare a memorial page on the honored dead, to be inserted in the printed proceedings of the Grand Lodge.

From Ione.

EDITORS WATCHMAN.—Enclosed please find a clipping of the *Semi-Weekly Record-Union*, issued on Saturday, April 8, 1882. In it they attempted to publish a synopsis of the Grand Recorder's report. Receipts, $183,497.90; disbursements, $196,074.43; leaving an impression to the public, and to the outsiders of the Order, that the Workmen were running in debt to the amount of $12,576.53. An outsider, as I may term him, first called my attention to it, and said, why is this thus; that the Workmen have such a bad showing. Now I have the Order at heart, and would like to see the mistake rectified. I soon convinced the gentleman that such was not the case. I showed him the Grand Recorder's report, also the summary report of the Grand Receiver, and he went away satisfied.

We have a Lodge of 53 members, all strong and healthy, and a live set of officers, prompt at their duties who have their work right up to the notch, equal to any officers in the district; and the greatest consolation of all, we have no drunkards, and none need apply. Our meetings are well attended and the greatest of harmony prevails. Our representative, Bro. J. A. Whitaker, has returned and made his report. He said he was inspired with a more deep and lasting feeling towards the institution than ever before, and only wished that we could all have been there to see such a fine body of men assembled at the Grand Lodge, and he felt satisfied that the Order would never sink, blow up, or retard, while we had such good and efficient Grand Lodge officers at the helm.

I see by the G. M.'s report that our Ex. D. D., J. Steinmetz has reported seven Lodges in this district. I have so far failed to find the whereabouts of the seventh Lodge.

W. A. BENNETTS,
Recorder, Ione Valley Lodge, No. 141.
Ione, April 18, 1882.

Testimonial to the Grand Master.

AT the close of the session of the Grand Lodge, a testimonial was given Wm. H. Barnes, G. M. W., which was worthy of the occasion. The souvenir is a badge of the regulation pattern, and of solid gold, that portion of the badge usually made of ribbon, being of gold, purple enameled, bearing upon the face of it a silver Bible. Pendant to this, hangs the circular medal, which represents a sun-burst, on which rests a solid gold anchor, supporting the American shield, enameled in red, white and blue, the stars of which are small diamonds. The pin-bar bears the initials, "C. H. P.," and the badge reads, "P. G. M. W., of California." Across the shield is a pink band bearing "A. O. U. W." On the reverse are the words "William Henry Barnes, from his brothers, April 7, 1882." The badge is a most elegant one, and is an exact counterpart of the one designed last year by Grand Master Barnes, and by him presented to Clay W. Taylor, P. G. M. W. The workmanship is by W. K. Vanderslice & Co., and reflects credit upon the artistic skill of that well-known firm.

THE prizes donated for the picnic will be more extensive in number and more valuable in amount than at any previous anniversary. Wednesday, 17th of May, extra trains will run sufficient to accommodate all.

WE had the pleasure of meeting Bro. N. S. Warren, of Bodie, No. 143, in Spartan, No. 36, on Friday evening. He reports general prosperity and gradual increase in membership in that locality.

HO FOR BELMONT.—The coming picnic at Belmont park promises to be one of the largest and best that will be held this year. It is expected that there will be over 4,000 in attendance.

San Francisco Lodge Locals.

Recorders are invited to correspond. Lodges may also find suitable reading here for "good of the Order."

A Fraternal Visit.

At the close of a very large meeting of Silver Spray, on Monday evening, April 24th, after the degree had been conferred on one candidate, the company marched to Pythian Castle, to make a fraternal visit to Alta Lodge, I. O. O. F. The company was about equally divided, as to brothers and sisters, and included several from Golden Dawn, D. of H. The programme was opened by a piano solo by Miss Tuttel; tragic recitation, Prof. N. Van Demark, who received a recall which was kindly answered by a fine poem, dedicated to the memory of Sir John Franklin and his comrades; comic character song, A. McLane, which created much amusement and a recall, which was answered by a better one. Mr. P. J. Flannigan made a short, racy and witty speech that was well received; song, Prof. Smith, Mrs. Frazer accompanying on the piano—a fine artistic effort that was heartily encored and answered; Adam Neal, late of Georgia, sang a fine sentimental piece that was cordially received; solo, Mrs. Fletcher—a meritorious effort that was well received; sentimental song, Miss Susie Galehouse. This lady has a cultivated and sweet voice, and her artistic effort was received with much favor and a hearty recall. By request, Bro. C. L. Stone, of Silver Spray, recited a soul-stirring piece that was listened to with close attention and heartily encored. The choice literary entertainment was suddenly changed, by the shouts of four stalwart brothers who came rushing into the room with great trays of ice cream and singing "Ice cream!" Refreshments were dealt out with great liberality, and a season of sociability of a cordial and fraternal character was indulged in for half an hour. Bro. J. C. Beatty, as master of ceremonies, was just the man for the position, and with his brethren of Alta Lodge, I. O. O. F., entertained the guests in that open-handed and fraternal manner that was alike pleasing and commendable.

Burns Lodge.

The regular monthly social of Burns, held in their hall in Pythian Castle on Thursday evening, April 27th, was a very creditable and elaborate entertainment. The business of the Lodge was short, after which the doors were opened to families and friends. Bro. John L. Duncan acted as chairman, and filled his position well. The programme was commenced by a piano overture by Prof. Streube, which was well received; trio, Messrs. R. Marshall, T. A. Grame and R. L. Duncan; recitation, Mr. T. Wise; piano solo, Mr. E. M. Toban—a pleasant effort that received a hearty recall; recitation, "Mag and I," T. C. Maher—Bro. Maher is of the profession, and his grand effort was the feature of the evening; solo with banjo accompaniment—a rare artistic performance that received a hearty recall; recitation, Miss Florence Neil—a very pleasing effort; recitation, J. J. Stephens, a double recall which was kindly answered; baritone solo, Bro. Wm. Edminster, a grand artistic performance that received a hearty recall and answer; recitation, H. C. Eastman, Organist, of Sts. John; this effort, as usual with him, was very kindly received; piano recital, Master E. Thompson, son of Bro. Thompson, Organist of Burns; in this effort he acquitted himself with much credit; song and double recall, Bro. Gus. Pohlman. This entertainment was one of the best, and the large audience were highly pleased and a number of visitors expressed warm terms of approbation at the close.

Hercules, No 53.

A grand meeting was held by Hercules on Friday evening April 28th. The M. W. degree was given to one candidate and the several leading officers, L. M. Manzer as M. W., J. H. Congdon, F., H. Miller, O., W. E. Powell Guide, are perfect, dignified and pleasing in their duties as officers. On this evening a large delegation from Fidelity, Friendship and Spartan, including several individual members, among whom was Wm. H. Jordan, P. G. M. W. Under head Good of the Order, Bro. Jordan was introduced by the M. W. in a felicitous and complimentary speech. In answer, he took occasion to say something of the features and benefits of the Workmens' Guarantee Fund Association, after which he said: The time has past and the question is settled at least in this jurisdiction that there is something beyond a mere cold business association, and that it combines with it a great fraternity. Can every Workman say, in his own heart, that he is ready and willing to practice fully what he has pledged theoretically; if not he is not a Workmen in the true sense of the term. E. M. Reading, Secretary of the Guarantee Fund, followed in a few remarks on the practical workings of the association. H. L. Smith, P. M. W. A. W. Prevost, P. M. W. took occasion to say that one of the great supports and strength of our Order was the attention given to finding employment for our brethren. E. Danforth, District Deputy, in a few remarks, showed the benefits to be derived from Lodge visits, giving a succinct statement of his pleasant experience in the East. His short speech was received with much favor. Mr. Creighton, P. M. W. of Friendship, Geo. Jordan, M. W. of Spartan, J. M. Belden, M. W. of Fidelity, O. B. Cole, of Fidelity, J. M. Farless, P. M. W., F. W. Symmes, P. M. W., and others, made good speeches that were well received and heartily encored. An interesting and profitable meeting was spent.

Yerba Buena, 14.

It is not detracting from the administration of any previous Master Workman of Yerba Buena when we say that this term under the wise, fraternal and conservative policy of S. F. Purdy, acting M. W. of this old pioneer has had and is enjoying a season of prosperity not excelled in its history. The membership has increased over 30 this term. On the last meeting of April four received the M. W. degree, and nine applications for the degrees. The membership is 232, and is expected to pass the 300 mark before the next Grand Lodge. There is a better average attendance until the close of each Lodge meeting than any Lodge in San Francisco.

A Great Social Event.

Valley, No. 30, Celebrates her Fourth Anniversary.

One of the most brilliant assemblages of the season was held at Union hall on Friday evening, April 21st, under the auspices of Valley, No. 30.

The policy and financial system adopted to bring about this very successful celebration is worthy of mention. Each member of Valley was allowed five invitation tickets, at a cost of $1. Any tickets given to friends were not transferable, making it strictly an invitation party. Union hall was elaborately trimmed, festooned, and transformed into an elegant saloon with esthetic combinations. At the entrance was a canvased walk. On each side of this were evergreens, while at the door were beautiful flags, on which were painted the lily, sunflower and fan, entwined with the stars and stripes, arranged so as to form arbors. The fountain of cologne, the abused sunflower, hanging flower baskets, with storks beneath, and other artistic devices, were the subject of admiration and frequent comment. The popular and leading decorators, Bros. Piper and McKay, acquitted themselves with much credit in their esthetic effort for this festive gathering. Over the door at the entrance was the word "Welcome" in gas jets. Across the stage, in golden letters, were the words "Valley, No. 30—4th anniversary," beneath which, and hidden almost from view behind evergreens, was Ballenberg's band of 15 pieces, discoursing the best of music to 600 merry and happy people. There were over 1,200 of a selected class in attendance, hall and gallery being completely filled.

At 9 o'clock the grand march was headed by Bro. Geo. C. Smart and wife, with 300 couples, who were tastefully and richly dressed. It was a triumphal march and a grand and pleasing sight. To undertake to describe the elegant dresses of our sisters would trespass on our columns; suffice to say, nearly all had especially prepared their costumes for this party, and were tastefully and richly dressed. There were many pleasing features connected with this reception; the handsome men of Valley were selected to escort the ladies from the main entrance to the ladies' dressing room, and their style and manner was certainly creditable and every one proved a wise selection. Most of the gentlemen were in dress suits and supported a tasty boutonniere. The programmes were a pattern of the invitation cards, only smaller and having four leaves. The sathin trimming and design was unique and artistic, with monogram and the letters A. O. U. W. on one side, while on the other were the names of the several committees and their colors.

At 12 o'clock a grand supper was served in the banquet room, gotten up by the prince of caterers, Chas. F. Seaburg. There seemed to be a happy, joyful spirit pervading the assemblage, and not a word or ripple of dissatisfaction was heard or seen. A cordial greeting on entering, a free hat and cloak room, and the attention given to their guests, among whom there was a number of our leading citizens, called forth frequent complimentary remarks during the evening.

This happy affair was continued until the morning hours in gliding through a list of 22 dances, with extras. The master hands who planned and so creditably managed this notable event are given here: Committee of Arrangements—Wm. Patterson, P. M. W., Wm. Broderick, P. M. W., Chris. Waller, P. M. W., Dan'l McCloud, P. M. W., Jos. Giusti, Wm. G. Buchanan, P. M. W., H. S. Dearborn, M. W., Geo. A. Case, P. M. W. Reception Committee—J. C. Beatty, J. F. Nounnan, Fred'k Filmore, P. M. W., Ben. A. Ingell, Dr. N. B. Colman, W. A. Nygh, E. Haquette, Henry Hoeber, P. M. W., Wm. H. Barnes, G. M. W., E. W. Blaney. Floor Committee—A. A. Burton, G. W. Timmerman, J. Henry Applegate, Jr., Fred. Vaughn, John Connor, Wm. E. Lutz, Frank P. Latson, Sam McDowell, Chas. E. Hunt, P. M. W., W. T. Galloway. Floor Manager—George C. Smart. This recherche reunion was on a scale of princely munificence, and must have been quite expensive. But when we consider results—that 900 men and their families have a closer union, and consequently a better protection, who will wish to assert that it was unwise liberality?

THE HANDSOMEST.—The handsomest of the fraternity papers which we receive in exchange is the PACIFIC STATES WATCHMAN, published at San Francisco.—*Kansas Workman*.

Los Angeles Items.

EDITORS WATCHMAN.—In compliance with promise I should have written sooner, but did not leave your busy city until the 15th, and you may bet your last sunflower I was glad to breathe again the exhilarant atmosphere of the gem of the Pacific coast, the city of the angels.

I attended the stated meeting of Southern California, No. 191, and found a good attendance and lively interest in the business transacted in 5th annual session of the Grand Lodge, all of which was heartily endorsed, so far as heard from. The re-election of Bro. Barnes to succeed himself, under the circumstances, meets with cordial approval.

"He that fights a goodly fight,
And doesn't run away,
May live to fight a goodly fight
On some other day."

Bro. Pratt's re-election gives particular satisfaction, in view of the efficiency and dispatch with which he discharges the duties of his office. It is certainly wise and prudential not to change a competent and worthy incumbent of this very important office.

We will shortly have a Lodge of the Degree of Honor instituted in this place, and made up of members and lady relatives of both Lodges. We expect it to accomplish great good in a social way.

Our weather is simply delightful, and the crops all over the valley are growing as if under the benign influence of some powerful magic wand, in the hands of a worthy representative of old Grandmother Ceres. HOMO.

Los Angeles, April 20, 1882.

Resolutions of Respect.

[IN MEMORIAM.]

WHEREAS, The shaft of death has laid low the form of our beloved Companion, OWEN O'NEIL; and,

WHEREAS, We feel that in this bereavement our Council has sustained an irreparable loss, the community will miss a faithful citizen, and his widow and children unceasingly mourn the absence of a loving husband and father; therefore, be it

Resolved, That, in testimony of our grief, the charter of this Council be draped in mourning for the space of 90 days.

Resolved, That the sympathy of this Council be, and the same is hereby extended to the sorrowing widow and children of our companion, with the sincere hope that the kind Father of all will comfort and bless them in this their great trial and affliction.

Resolved. That these resolutions be spread on the minutes of this Council, and a copy thereof presented to Mrs. O'Neil, in token of the esteem in which we held our Companion in life, and the sorrow we would wish to share with those to whom he was nearest.

W. J. YOUNGER,
E. D. FENSIN,
C. K. BONESTELL,
Committee of Bohemian Council, No. 261, A. L. of H.

[IN MEMORIAM.]

HALL OF STS. JOHN LODGE, No 73, A. O. U. W., San Francisco, April 20, 1882.

To the Master Workman, Officers and Members of Sts. John Lodge, No. 73, A. O. U. W.—DEAR SIRS AND BROTHERS:—We, your Committee, appointed to draft resolutions upon the death of BRO. EDWARD DENNY, herewith submit the following:

WHEREAS, It has pleased Almighty God, the Supreme Ruler of the universe, to remove from our midst our esteemed BRO. EDWARD DENNY; and

WHEREAS, It is but just and proper that this Lodge pay a tribute of respect to his memory; therefore be it

Resolved, That the charter of this Lodge be draped in mourning for 30 days.

Resolved, That this Lodge tender his bereaved wife and children its sincere and heartfelt sympathy in their deep affliction.

Resolved, That while this Lodge deeply deplore the loss of our departed Brother, whom we always found ready and willing to assist the needy, succor the destitute, and console the unfortunate, we hope he has gone to a better, brighter and happier world, and there will be justly rewarded for his good deeds and actions on this earth.

Resolved, That these resolutions be spread upon the records of this Lodge, a copy thereof sent to the bereaved wife of our deceased Brother, and a copy sent to the PACIFIC STATES WATCHMAN for publication.

J. O. JEPHSON,
J. N. PRATHER,
WM. B. MARSHUTZ.
} Committee.

[IN MEMORIAM.]

CALIFORNIA LODGE No. 1, A. O. U. W.,
WEST OAKLAND, CAL., April 18, 1882.

To the Master Workman, Officers and Members of California Lodge, No. 1, A. O. U. W.—SIRS AND BROTHERS: Your committee, appointed for the purpose of drafting resolutions of respect to the memory of our departed brother, respectfully submit the following:

WHEREAS, It has pleased Almighty God, in his infinite wisdom, to call from our midst our beloved brother, Henry Manning; and, while we bow in humble submission to Him who is the giver of all good and perfect gifts, yet we, the members of California Lodge, No. 1, desire to express our keen sense of the loss sustained by the death of our departed brother; therefore, be it

Resolved, That, by the death of Bro. Manning, this Lodge has lost a true Workman, the community an honest citizen, and his wife and mother a kind and affectionate husband and son.

Resolved, That we tender our heartfelt sympathy to the family and friends of our late brother, in this their hour of sad affliction.

Resolved, That the charter of this Lodge be draped in mourning for the period of 30 days, in his memory.

Resolved, That these resolutions be spread in full upon the minutes of this Lodge, and the Recorder be instructed to transmit a copy thereof to the family of our deceased brother, also to the PACIFIC STATES WATCHMAN for publication.

W. H. WILKINSON,
GEO. E. BUGBEE,
GEO. W. JONES.

OREGON & WASHINGTON TER.

OFFICERS OF GRAND LODGE.

W. D. HARE, G. M W.....Hill

A Man That Succeeded.

"My only daughter, sir," said Colonel Monteagle, "and, as I venture to hope, accomplished in her way. We are not much in the way of schools or academies here, but I have been her instructor myself, and she is a thorough mathematician, an excellent musician, and a linguist of no mean capacity. We are studying Hebrew now every day, she and I, and she devotes her evening to comprehensive reviews of her Latin and Greek. She will be a scholar sir, if I live to complete her education!"

Mr. Crofton looked curiously at the oddly-assorted pair—the silver-haired, shabbily attired old gentleman, with his bald forehead, eagle eye, and delicately white hands; and the dark-browed, sullen-looking girl, with a gypsy skin, untidy frock, and patched boots.

Pretty? Yes, she might be pretty under some circumstances. The diamond itself is not an attractive stone before the lapidary's art has polished its rude angles into glittering facets of white fire. But she certainly possessed no sweet, feminine graces now.

"How old are you, Miss Monteagle?" he asked, finding it imperatively necessary to say something.

And Mary Monteagle answered in words, "Seventeen," while her looks replied plainly, "None of your business!"

"Go, my child, and gather some flowers to deck our humble board," said the old gentleman, magniloquently, while he conducted the son of his oldest friend into the tumble-down, old stone house, where the carpets were moth-eaten, the furniture mildewed, and every trace of decayed gentility told the sad story of better days,

Mrs. Monteagle, who had been a beauty once, and had her portrait engraved in a "Gallery of American Rosebuds," was sitting up in state in a battered boudoir, in a black silk dress, that must have been quite a quarter of a century old, with a flower in her silver-sprinkled hair, and still preserving the girlish attitude in which the engraver's pencil had immortalized her, oddly contrasting with the sharpened outlines and haggard abruptness of her 60 odd years.

And this was the way in which the old couple lived, in the dead past as it were, Col. Monteagle starving contentedly on the recollection of his past grandeur, and his wife fondly fancying that time had stood still since the days in which she was counted worthy to be one of the "American Rosebuds."

Mrs. Monteagle sweetly welcomed her guest and touched the little hand-bell at her side.

"We will dine, Sarepta," she said to the maid.

"Please, ma'am," breathlessly uttered that young person, "there ain't nothin' for dinner. We ate the last of the cold beef yesterday, and the dog, he tipped over the pan of oysters, and—"

"That will do, Sarepta," said Mrs. Monteagle, with a red spot mounting to each of her cheek-bones. "I said—we will dine!"

And Sarepta withdrew with a jerk.

The dinner was served presently—an instance of the magnetic power of will—but there was no cold beef, neither were there oysters. Fruit, a thin, watery soup of herbs and parsley, tastefully garnished salad of lettuce and mayonaise, and a dish of peaches and cream, formed the meal.

"Quite Arcadian!" said Mrs. Monteagle, with a giggle.

"And very badly served," secretly commented Mr. Crofton to himself. "But the salad was nice."

"Where is Mary?" the colonel asked.

"Drinking in the beauties of the sunset, I presume," the lady answered, airily. "The dear child has an artist's soul, and we do not tie her down to any hours or rules."

The colonel fell asleep in his chair after dinner, Mrs. Monteagle and her painted fan withdrew themselves into the boudoir—and Mr. Crofton, inwardly bewailing himself that he had promised to stay a week at Monteagle Manor, sauntered out upon the heights which overlooked the valley below.

As he stood there, a rustling sounded in the bushes, and the dark-browed gypsy sprang up the hillside.

"You have a fine place here, Miss Monteagle," he said, by way of making himself agreeable.

"I hate it!" said Mary, darkly.

"I—beg your pardon!" exclaimed Mr. Crofton, in amazement.

"I do!" flashed out the girl. "I hate it all! The learning, and the purity, and the grand pretenses and miserable makeshifts!"

"But—"

"Ah!" said Mary Monteagle, "you don't know it all. You never heard the tradesmen howling at the back doors like a pack of howling wolves; you don't know that the house is advertised for sale for tax arrears. How should you? How should you be aware that the very clothes we wear are not paid for, or the coals on which we cook our dinner? Papa smokes his cigars and talks about the Mexican war, and mamma *poses* in the great chair and dreams of embroidery work and tapestry stitch, and I—I am expected to learn Arabic and Sanscrit, and nobody knows what else, and ignore our wretched poverty. But I can't! Who could?"

Mr. Crofton looked pityingly at the girl's sparkling eyes and pale, excited face.

"I am very sorry to hear this," said he. "Can nothing be done?"

"Yes," said Miss Monteagle, brusquely; "something can be done, and I am doing it, in so far as I can. But papa and mamma must not be allowed to suspect it. I am—learning a trade!"

"You!" he echoed. "A trade!"

"There's a factory near by here," she said calmly. "The country girls earn a little pocket money there sewing on shirts. I am to have a machine as soon as I have learned to manage it. I go every evening, while papa fancies I am at the Greek and Latin, to Farmer Pelham's, whose wife teaches me the use of the machine. I am learning housework, too. I made the mayonnaise for your salad to-day, and I baked the bread. Our servant can do nothing of the sort. But it would kill mamma to think that I stooped, as she would call it, to menial labor."

"You are quite right," said Mr. Crofton.

"That is what I wanted to know," said Mary, hastily. "Because, living here all by myself, in such a strange unnatural atmosphere, I sometimes get confused, and scarcely know right from wrong."

"But they will have to know it, when—"

"When I really go into the factory," said Mary. "Yes, I know that. But until then, I would fain spare them the pang. I am to have $1 a day, Mrs. Pelham says, if I operate the machine skillfully. And $1 a day will buy mamma many a little luxury, and go far toward paying the grocer and the baker."

"You are a noble girl," said Mr. Crofton, warmly; and in his eye, at that moment, Mary Monteagle was glorified with rare beauty, as she stood there, the fresh wind blowing her jetty curls about, the reflection of orange sunset deepening the color on her cheek, and the grave far-a-way sparkle of her eyes, halfveiled beneath the long lashes. "And if I could be of any assistance to you in this task—"

"You can," said the girl, abruptly. "You can stay here and amuse papa, so that he shall not suspect what occupies my time. You can divert his attention from Sanscrit and Arabic, and all these mysteries."

And, for the first time in his experience of her, Mary Monteagle laughed—a mellow, bird-like laugh.

"I will," said Mr. Crofton, heartily.

And so the compact was sealed between them.

Instead of the week he had promised his father to spend with old Col. Monteagle, the sojourn was extended to three.

At the end of that period, he gravely addressed himself to the dark-eyed daughter of the house.

"How is the trade?" said he.

"I am to have a machine next week," said Mary, with the conscious pride of one who has conquered fate; "and then—only think of it, Mr. Crofton,—I shall earn a dollar a day!"

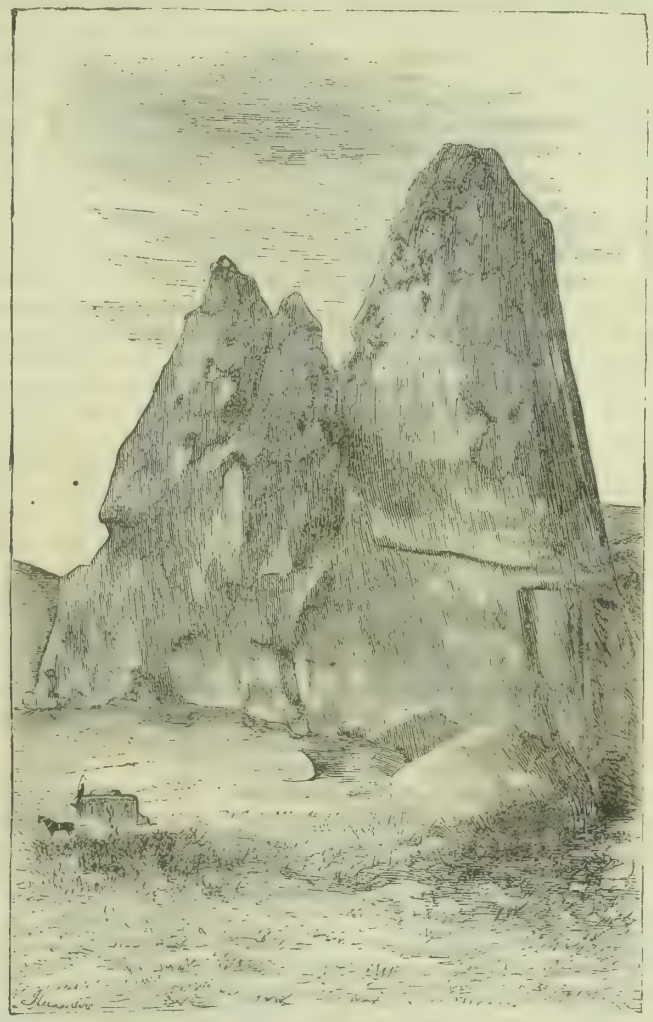
"Mary" said Mr. Crofton seriously, "I have been thinking of another plan for you. You tell me that this farmer's wife has made a first-class housekeeper of you."

"I baked mince pie yesterday," said Mary, exultingly; "and I quilted a quilt, and made soft soap within the week!"

"I don't like the idea of your going into a factory," said Mr. Crofton. "Suppose now, by way of variety, you were—to marry me?"

"But you're not in love with me!" said Mary, opening her bright, black eyes.

"But I am," said Mr. Crofton, with great gravity. "I have deliberately made up my mind that I can't be happy without you. And although I don't profess to be a rich man, I believe I can make you a better allowance than six dollars a week, while at the same time you will not be compelled to work ten hours a day for it. That is the business-like view of the question. Now on to the more personal one. Don't you think, Mary, that you could love me? Because I love you very much indeed!"



"I—don't know!" whispered Mary; "I might try!"

And then she blushed charmingly.

So Col. Monteagle's daughter went to the fair Floridian plantation, on the shores of the river St. John's, and astonished everyone there with her thorough knowledge of housekeeping in all its details. And the two old people, with their burden of insolvency and care lifted off their lives, dwell quietly on, and talk to everybody who crosses their path of "the excellent marriage which my daughter Mary has contracted."

"A thorough scholar," says Col. Monteagle, with dignity. "A musician, a linguist, a thorough Hebrew student, and a proficient in Latin and Greek. I myself was her instructor. It is not singular that a girl of such intellectual power should marry well."

But Col. Monteagle, honest man, never dreamed that it was the sewing machine and soft soap, the *mayonnaise* dressing and the vehement struggle to get free from debt, which conquered Mr. Crofton's heart. There are plenty of scholars and poetesses in the world—but a really womanly woman—is not her price far above rubies?

"LONE PEAK," ON THE ROAD FROM EHRENBURG TO PRESCOTT, ARIZONA

A Veteran Agriculturist.—We read in an English exchange that on March 5th, the National Agricultural Society of France gave a banquet to their president, M. Chevreul, at the Cafe Riche, Paris, in commemoration of the 50th year of his election. Nearly every member of the society present in the city attended. M. de Mahy and M. Dumas recounted the services and discoveries of M. Chevreul, attributing his successes to untiring work, regularity, and moderation in the conduct of life, love of method, respect of imagination, and culture of elevated ideas and search for truth. M. Dumas concluded by wishing the aged but robust president long life and good health. A complete ovation followed. M. Chevreul embraced M. Dumas, and M. Henze presented a colossal bouquet of camellias, which, says the report, hid the person, and blocked the remarks of the president. M. Chevreul is in his 97th year; he was elected a member of the National Society in 1832; and since 1849 has been 34 times Vice-President or President of the Society.

The Eye of the House Fly.—Prof. Fairfield thinks there are reasons to believe that the common house fly, with its numerous lenses, capable, as has lately been proved, of change of focus, like the human eye, by a circular muscle, overlooked by early entomologists, can avoid the serious difficulties we meet with in high powers, and could distinctly recognize objects only a twenty-millionth of an inch in diameter.

"Lone Peaks" in Arizona.

We take from "Picturesque Arizona," by E. Conklin, a glimpse at the peculiarities of Arizona scenery. In his account of these wondrous prominences on the level face of the country, the author says: The second night out from Yuma brought us to "Antelope Peak," a famous camping spot, and so named from a high towering peak jutting up from the ground in magnificent and haughty style, and shrouding you and the camp grounds surrounding, with its casting shadows. An adobe building for the stage company's office, and a corral for the protection and care of the horses, and the graceful flow of the Gila river, o'ershadowed by the towering "Antelope," constitute the main attraction for the camper. It is a very refreshing and cooling retreat for the traveler, who has had just enough of the sand and sun of Arizona by this time, to appreciate and enjoy it. This peak, instead of being called a peak, having the features of so much of the Arizona mountain scenery, would be better comprehended by being termed an isolated mountain; jutting, as it does, from the very level of the plains, and throwing itself grandly up to a hight of hundreds of feet into one single conical-shaped formation. There are several of these entertaining fellows over the plains of the Territory, relieving the eye of monotony, and without which the deserts and the traveler on them would yearn for some society. Their extreme contrast with the surroundings exalts them to a glorious standard. One of the most bold and pleasing of these peaks is to be seen on Stewart & Pearson's stage road from Ehrenberg to Prescott. After riding for miles and hours over the broad sandy plains, with the distant mountains forming a pleasing enclosure to a vast natural stage, upon which many a weird and midnight scene has been enacted, to come boldly upon these two lone peaks (there are two of them) standing side by side, is a scene worth the whole ride. As the stage passes by close to their base, they look down frowningly upon you; and were you superstitious, would almost think they spoke to you in the starry stillness of the night.

The occasion on which I first saw these peaks was in the middle of the night. It was a bright moonlight one, and the hazy light of the moon from behind, throwing the shadow far over our stage coach, produced a somber effect. Beholding these two giant figures o'erspreading me, as it seemed, I was held with awe for a few minutes, and then said to the driver, "What are these?" at the same time holding my face up at right angles to see the top.

"Oh! those?" said he, in a quiet, unconcerned voice—"Oh! those are stones that grow here in Arizona." I named the peaks "Lone peaks," as agreeable to the circumstances and conditions, as well as the sentiments of both myself and my friend, the driver.

The Efficiency of Faure's Accumulator.—Prof. W. E. Ayrton, F. R. S., read a paper before a late meeting of the Physical Society of London, on "Faure's Accumulator," giving the results of experiments made by him and Prof. Perry on the efficiency, storing power and durability of the battery. The efficiency was got by measuring the power put in and comparing it with that taken out, by means of Perry and Ayrton's voltameter and ammeter. The authors found that the cell has great resuscitating power if left insulated after all the current appears to have been discharged. Care had to be taken to see that the cell was quite discharged by letting it stand on open circuit for intervals, and discharging between whiles. When this was done they found that the total loss for charges up to 1,000,000 ft.-pounds need not be greater than 18%. With slower charges they got a loss of only 10%. As to the storage, a mean current of 10 Amperes gave after 18 hours' discharge (six hours on three consecutive days) 1,440,000 ft.-pounds of work, equivalent to one horse power in 43 minutes. This cell contained 81 lbs. of red lead, thus making a capacity of about 18,000 ft.-pounds per pound of red lead. The cell showed no deterioration after two months of work.

Scissors.—A new method of manufacturing scissors or shears consists in casting the handles of iron, and rendering them malleable; preparing the steel blades in the usual manner; welding the steel blades to the malleable iron handles by hammers or dies acting upon the parts that are welded together; and subjecting each handle and blade when cold, to a powerful pressure between dies that act upon the malleable portion to consolidate the metal, smooth the surface, and remove any imperfections in the shape.

Dr. Lambert says it is a common error that the joints of animals have always a synovial fluid which is in the nature of a lubricant. The elephant, with his relatively moderate motions and great weight, has admirable cartilages but absolutely no lubrication therefor.

The Senate has confirmed the nomination of Edward F. Burton, as Superintendent of the San Francisco Mint.

President Arthur has been presented with a petition a mile long. Its 350,000 signers want Mason pardoned.

A. T. Stewart & Co., of New York, have determined to close out their business.

PACIFIC STATES WATCHMAN.

Favorable to Advertisers.

By consolidating the large subscription lists of the *Pacific Workman* with the PACIFIC STATES WATCHMAN our advertisers gain an unusually great advantage. We doubt if any one weekly newspaper has ever been circulated to as many different readers on this coast, as have been served heretofore by the *Workman* and WATCHMAN together. It is certain that no other periodical is now patronized by a better class of industrial, professional and business men. In fact, our subscription list embraces many of the foremost business and representative men throughout the towns cities of the coast.

We have pride in making our paper "clean and hand some," and first class in all respects—to the benefit of both our readers and advertisers.

OFFICIAL RECOMMENDATION.

[*Resolutions adopted by Grand Lodge of Cal., Feb. 3, 1881*

WHEREAS, the PACIFIC STATES WATCHMAN, the pioneer A. O. U W. advocate on this coast, without official aid, has long rendered able and valuable services for the good of our glorious organization, we earnestly recommend that our Lodges and the brethren individually patronize the WATCHMAN as liberally as circumstances will justify.

ADVERTISING RATES.

One Square (½ inch), per issue	$ .75
One Square per month	1,25
Two Squares, per issue	1.50
Two Squares per month	2.50
Obituary notices and resolutions (with 25 copies post-paid for friends of deceased) per sq. (½ inch)	50

☞For reading notices, extraordinary display, special advertising and choice places permanently, extra rates will be charged. Reasonable reduction will be made for large and long-continued advertisements. No extra rates for the space occupied by engravings.

Entered at San Francisco P. O. as second-class matter

San Francisco, - - May 1, 1882.

The Arch Enemy.

The death record of the Supreme Lodge beneficiary jurisdiction has been issued for information of the brotherhood, and it contains ample food for profound reflection. Ohio, as usual, has furnished an undue proportion of the deaths; but the remarkable fact appears, that four-fifths of these deaths are of men whose names bear unmistakable evidence of Teutonic origin. Now, how are we to account for this? The Germans are not an immoral people; they are good, law-abiding, peaceable citizens. There is no good reason why Germans should not live as long as anybody, unless there exists something in their personal habits that tends to shorten life. The fact, however, is indisputable, that such of them as belong to the A. O. U. W. in Ohio are short-lived. As five is to one stands the fearful record against them, and this, too, on the presumption that a full half of the Ohio membership are Germans, or their immediate descendants. Ohio is a healthy State.

If there is any advantage in a Medical Board, or Chief Medical Examiner, the membership in Ohio ought to be a fair average, so far as health is concerned; but a terribly excessive mortality shows that it is not. There is—there can be but one way to account for the condition of things in that jurisdiction. Beer is the cursed thing that is doing the horrible business. Kentucky, with her whisky, shows gloriously in comparison with beer-stricken Ohio. Every day we are more and more convinced that from beer we are suffering far more than from all other drinks, with all excesses, of whatever nature, reckoned in. It breeds diseases of the liver, kidneys and heart. It bloats and inflames the whole system, inducing apoplexy, and otherwise putting its votaries in constant peril of life from the most trifling accidents. And yet because a person may be constantly full of it and still be quick and able to attend to business, it is popularly thought to be an innocent, and even a healthy beverage. But the awful death record must open the eyes of the most incredulous. It unmasks the secret enemy and shows us the adversary shorn of his hypocritical garb. Henceforth let no man claim immunity from intemperance because he "drinks only beer." Better to claim that he drinks only brandy, whisky, gin or rum. These are properly understood now in comparison with the other. An open enemy is less to be feared than one in the disguise of a friend. Forewarned is forearmed. He that hath eyes to see, let him see.

GRAND MASTER WM. H. BARNES will deliver the oration at the General Relief Committee's Penic, at Belmont, May 17th.

Food for Reflection.

As the time approaches for the meeting of the Supreme Lodge, we naturally canvass over in our minds the subjects that are likely to engage the attention of the highest legislative body of the Order. First in importance will no doubt be the consideration of matters in connection with the Iowa rebellion, and the action of the Supreme Master in the premises. That he will be fully sustained seems now a foregone conclusion. Indeed, anything less, it appears to us, would be suicidal in the last degree. As has been frequently stated, we see no hope for any fraternal organization, if it be denied the one only means at its command to enforce obedience to its laws, to wit: The right to cut off disobedient members and Lodges. Yield this point, and we yield everything. And mark, this is as true of *all* fraternal societies as it is of the A. O. U. W. Our position that we have not even the power by civil process to enforce any of our laws, is fully confirmed by a very able opinion of two of Iowa's best lawyers, Hon. J. N. Rogers and J. T. Lane, of Davenport, in that State. Really any other view would seem ridiculous when we consider that not only in an effort in that direction would we come in conflict with various State laws, but with the laws of the Dominion of Canada, a foreign country. No; we have only fraternal law at our command, and to give this up would be scarcely less than unadulterated wickedness. We are making history. We are making precedents. Care should be taken how we proceed, but our steps should not falter in the plain path of right. The A. O. U. W. has pioneered the pathway for all societies of its kind. Step by step it has encountered and, so far, triumphently overcome every obstacle, but the end is not yet. The battle on hand successfully disposed of, there will yet be plenty more to win or lose in the future.

The legal opinion above referred to was brought forth in reference to the Iowa defection. It is an able and lucid exposition of the fallacy of the arguments put forth by the rebellious leaders thereaway to make some sort of plausible justification for their palpable violation of the most solemn obligations that man can assume in behalf of his brother man.

This question disposed of, a look into the future should engage the most earnest and wise attention of the Supreme Lodge. If we do not need seers, we at least need statesmen. We may repair the broken bridge, but that is not sufficient. It should be so reinforced with added pillars and beams and girders, that it can never break again under like circumstances. He's but a poor engineer whose work is done the second time with the same fault that made his first effort a failure. Our Supreme Lodge should, if possible, make our structure so strong that our cheeks will never more tingle with a shame like that which comes because of Iowa's recreancy. Just what should be done in this direction it may be thought presumption in us to suggest, but yet we will venture a few ideas for the consideration of the thoughtful:

1. To avoid all legal difficulties, we would have the Supreme Lodge disincorporate, and then urge upon all Grand Lodges that are incorporated to do likewise. Very little good has or can come to the Order by the corporate existence of its various parts, and the evil we already endure is well nigh overwhelming. It would be a blessing if it were impossible for any member of a fraternal society to obtain redress outside of his society for any real or fancied grievance. Moreover, the ends of justice would, in 99 cases out of 100, be more fully met.

2. We would change the representation or otherwise the apportionment of votes in the Supreme Lodge, in such a manner that each jurisdiction should have a voice in accordance with its strength. Laws, to be effective, must have the willing support of a majority of the membership. To be certain of such support, the voice of the majority must find expression and govern the action of the chief legislative body.

3. We would have the maximum limit of assessments under the Relief Law readjusted, and that on the basis of our experience alone, without reference to that of any other society, or the U. S. census. We are only interested in such facts as affect us, and this readjustment should be made as often as necessary in the interests of equity.

4. Last, but not least, we would improve everything that pertains to the ritualistic work and ceremonials of the Order. By these are kept alive the fires of fraternity, and if they be quenched, our light will go out and darkness and oblivion swallow us up forever.

Speaking in Lodges.

When a man bends his elbow, his mouth involuntarily opens. And with a good many men, when they straighten their legs, the mouth involuntarily shuts. That is why, when some people are suddenly called on to speak they are struck dumb. As soon as they rise, the mouth shuts. Some are even struck dumb before they straighten their legs, the thought of doing so taking away the power of speech.

Perhaps in no one social feature is the Lodge meeting so instructive as in this, that it accustoms men to speak their thoughts before their fellow-men. People cannot attend meetings very often where subjects of interest and importance to them are discussed and decided, without partaking in the discussions and arguments more or less. This will soon familiarize a man with expressing his thoughts freely, and give him confidence in his ability to do his share of the talking.

At the same time, it is just as well for the older members of the Lodge to recollect that they did not possess the gift of talking off-hand when they first entered the Lodge, and they must not expect the new brothers to be apt at it. Some men never become proficient, and are always shy of being called upon. Such people have a nervous dread of being prominently brought forward, and their prejudices should be respected. Because one man feels it easy to stand up and talk glibly for half an hour, it is no reason he should insist on his more retiring brother coming forward too.

To the newly elected brother, particularly, more consideration should be shown than is always done. Some unthinking member will, at the proper time, call upon the new brother for remarks. He has just joined the Lodge, is fresh from the impressive initiatory ceremonies, is unknown to the majority of those present, may never have spoken publicly, and to be called upon suddenly may embarrass him exceedingly. He should at least be asked privately first whether he is accustomed to speaking,

We are not alone in the belief that the practice of fraternal visits of individuals to Lodges would be much more widely practiced were it not a common custom to call on the visitor for remarks. A visiting brother seems to be considered legitimate prey for that very common member who is always calling on some one else to do something. When the stranger rises in an embarrassed way and compliments the Lodge on its room, on the appearance of its members, or the way it does its work, all in set time, he does all that is usually done. There is seldom anything spontaneous about it. Why not tell the visitors they are welcome, and if they have anything to say, when the time comes, to say it, or to keep their peace if they prefer. Dragging an unwilling man forward, or calling attention to an embarrassed one is, to say the least, not polite. If the visitor is privately asked to make some remarks and acquiesces, very well. But he should not be suddenly called upon by name without his consent. The prevailing practice keeps a good many people from visiting Lodges we feel certain.

MAY-DAY FESTIVITIES.—The members of Mt. Diablo Lodge, No. 91, and their friends of Walnut Creek, have made extensive arrangements for a May-Day enjoyment, and, from what we learn, they are going to have a "way up" time. Grand Recorder Pratt, Past Masters E. M. Reading, D. S. Hirshberg, and others, have been invited to participate in the literary exercises, and are expected to be present. We hope the brothers of Mt. Diablo Lodge will take good care of Father Pratt, and return him and his boys all O. K.

THE picnic of Knights Pythians on the 8th of May will be one of the best of the season. The very efficient committees are working harmoniously and with good will, and are determined to make this a gala day for all who may attend, especially to the ladies and wee ones.

THE A. O. U. W. in Kansas is in a flourishing condition. Already it has 3,447 names enrolled, and the G. M. W. is hopeful that the number will be increased to 5,000 before the next session of the Grand Lodge.

Relief Call No. 2.

At the recent session of the Supreme Lodge Relief Board, A. O. U. W., a conclusion was reached that it was not absolutely necessary to append to Relief Call No. 2 a list of all the deaths that had occurred upon which relief was asked; and, with a view to economy, the names and other data were omitted. The Supreme Master Workman has, however, for the information of the Order, issued a special circular, in which the list of the deaths is given in full. During the fiscal year ending March 1st, 1882, there were 24 assessments levied and collected within the Supreme Lodge jurisdiction, from which nearly all the death losses were paid. After settlement, however, there still remained to be paid $20,000, as set forth in Relief Call No. 2. For the Indiana jurisdiction there were, during the fiscal year ending January 1st, 1882, 20 assessments levied and collected, and, after the losses were paid, there still remained death losses unpaid, requiring the sum of $26,000, as set forth in Relief Call No. 2.

All the details of the deaths, members, names, Lodges, date of death, cause of death, date of joining the Order, location, etc., are given in the circular to which we refer.

As most brothers know, the Relief Call was promptly responded to by all the Lodges in the various jurisdictions, except those in Iowa; and of what is going on in that State we speak elsewhere.

The Grand Lodge Committees.

In the report of the Grand Lodge, which occupies several columns in this week's WATCHMAN, we have simply mentioned the various committees by title each time they are mentioned. As a matter of reference we herewith append a list of the committees:

On Credentials—Henry Hueber, of No. 30; Andrew Brown, of No. 106; E. E. Mulloy, of No. 52.

On Resolutions—J. W. Kinsley, of No. 73; F. H. Payne, of No. 10; E. M. Reading, No. 136; L. Finigan, No. 17; F. R. Krauth, Jr., No. 5; Fred W. Bell, No. 111; George B. Nichols, No. 194.

On Good of the Order—C. K. Robinson, of No. 35; Benjamin Knight, Jr., No. 46; George T. Shaw, No. 159; Samuel Booth, No. 126; A. F. Blood, No. 158.

Degree of Honor—W. B. Lyon, No. 30; A. P. Murgotten, No. 17; F. W. Rossbach, No. 127; A. J. Holloway, No. 96; F. S. Poland, No. 126.

On Distribution—M. T. Brewer, No. 21; Wm. E. Hopping, No. 71; J. B. Finch, No. 43.

Appeals and Grievances—J. G. Severance, Wm. McWilliams, Edwin Danforth.

On Temperance—J. C. Hanover, E. K. Hill, A. B. Moffit, A. McFarland, J. K. McKinstry.

The standing Committees are as follows:

Finance and Mileage—Chas C. Terrill, of No. 30; Philip Peck, of No. 41; Edward H. Morgan, of No. 127.

Appeals and Grievances—Henry Vrooman, of No. 7; J. G. Severance, of No. 14; Wm. McWilliams, of No. 75.

Laws and Supervision—Wm. C. Flint, of No. 68; J. F. Brown, of No. 44; L. A. Jordan, of No. 31.

Amendments—C. H. Dunton, of No. 35; H. S. Ball, of No. 47; G. Winehill, of No. 27; S. Ehrmann, of No. 56; L. L. Dunbar, of No. 136.

LAWS AND DECISIONS.—The Supreme Recorder notifies the members of the Order that the Digest of the laws and decisions of the Order is now ready for distribution. The great need of this work in each subordinate Lodge has long been felt, and it is confidently expected that each Lodge will at once order at least one copy. The price to individuals or to subordinate Lodges is $1.50 per copy; to Grand Lodges, $1 per copy. Subordinate Lodges under a Grand Lodge will send orders to the Grand Recorder, and those in the Supreme Lodge jurisdiction to the Supreme Recorder. The revised copy-right edition of the Constitution and By-Laws of the Order containing the amendments of the last session of the Supreme Lodge, is also ready for distribution. Price, five cents per copy.

THE annual picnics held by the Ancient Order of United Workmen have been larger and more attractive than any others. It is expected that the picnic to be held at Belmont will be larger and more interesting than any preceding one.

WE have lately heard of several projected grand visitations, excursions and picnics to be held under the auspices of several of our city Lodges.

DO NOT forget the day of our grand picnic, Wednesday, May 17th.

Grand Recorder's Department.

Headquarters of Grand Lodge, A. O. U. W., Rooms 40 and 41, St. Ann's Building, corner of Eddy and Powell, San Francisco. H. G. Pratt, G. R.

Wm. C. Flint, Esq., 216 Sansome street, S. F., is Chairman of Committee on Laws and Supervision. All By-Laws, or amendments to same, should be sent directly to him.

Lodges will henceforth remember that no degrees can be legally conferred on an applicant till the Medical Examiner's report has been passed upon favorably by the examining board. If the report be disapproved by the board, the paper will not be returned to the Lodge from which it came, but such Lodge will be notified of the rejection, and record of the fact must be entered on the Lodge minutes and the name of the rejected applicant entered in the black book and reported on the monthly report of the Recorder to this office.

One assessment this month, but a probability of two for next. Nearly half our deaths are from accidents or violent causes. We are peculiarly subject to these things, and no human foresight can guard against them.

The Supreme Lodge should change the title of a "clearance card" to "transfer card." We would then have final cards and transfer cards, and their titles would indicate their true character. The effect of a clearance card is only to give the member the privilege to join some other Lodge during the life of the card. That is all. It does not sever the connection of the member with his Lodge, nor abridge any of his rights or privileges, or responsibilities in or to his Lodge. If he applies, and is actually elected into another Lodge his membership instantly changes from the one to the other—not before. This is where he is transferred within the same beneficiary jurisdiction. Otherwise his membership changes when he cancels his old beneficiary certificate after election. These are points that all Lodge officers should remember.

A set of supplies has gone forward for a D. of H. Lodge in Los Angeles. It is most earnestly hoped the Supreme Lodge will do something for this degree at the coming session. It ought to be made a tower of strength for the Order. Adopt the scheme submitted at the last session and the work would be done. Fifty Lodges could be organized here in 1882.

Inquiries and Answers.

[NOT OFFICIAL.]

A. B. asks: "Can a person holding a Final Card be readmitted to the Order after having passed the age of 50 years?"

We should say, no. A person holding a Final Card has completely severed his connection with the Order, having voluntarily surrendered all rights and privileges, of whatever nature, he once possessed therein, and is the same to all intents and purposes as one who never was a member. He can join, if accepted, in any Lodge anywhere. He should, therefore, have no special privileges over one who never belonged to the Order, except such as the law provides, to wit: Immunity from degree fees, as the degrees he is presumably in possession of.

J. H.—The anniversary of the A. O. U. W. is Oct. 27th. That of its introduction on this coast, Aug. 21st. The first picnic in honor of the Order here, was held on the University grounds in Berkeley, Aug. 21, 1876. Less than a score constituted the gathering. We believe that was the only anniversary picnic ever held to commemorate the introduction of the Order in California.

An inquirer is informed that a member who received his M. W. degree on the same date that a death occurred on which an assessment is levied, is not liable on the assessment. The law says those who receive the M. W. degree *prior*, etc. Prior cannot be on the same date.

In pursuance of a policy lately commenced by Spartan Lodge, in making regular fraternal visits, a return call was made to Spartan last week by a large delegation from Fidelity and Friendship. At the proper time, speeches were made by a number of the leading members of each Lodge, and a general interchange of ideas and congratulations.

The selection of Past Master Severance for Poet, Grand Master Barnes for Orator, and Past Master Reading for President of the Day, could not have been better, and argues success for the A. O. U. W. picnic.

The Picnic.

The General Relief Committee of the Order have nearly completed the arrangements for the annual picnic, to be held at Belmont park, on Wednesday, the 17th inst.

The various sub-committees appointed by the Executive Committee are as follows:

Executive Committee—W. I. McKay (President), 207 Montgomery St.; C. C. Gilmore (Secretary), 11 and 13 Beale St.; L. G. Schord, 407 Battery St.; H. J. Lask, 44 Third St.; C. Brind, 1510 Polk St.; F. W. Rossbach, 517 Washington St.; G. Winehill, 515 Market St. Transportation and Grounds—L. G. Schord (Chairman), 409 Battery St.; H. J. Lask, 44 Third St.; G. Winehill, 515 Market St. Printing and Supplies—C. C. Gilmore (Chairman), 11 and 13 Beale St.; J. D. Nield, 5 Ritch St.; A. F. Bell, 2609 Sacramento St. Decoration—C. W. Nevin, (Chairman), 532 Commercial St.; C. Creighton, 118½ Broadway St.; G. Powell, 15 Lapaige St. Games and Prizes—C. Brind (Chairman), 1510 Polk St.; G. W. Crawford, 123½ Thirteenth St; J. F. Brown, 535 Clay St.; F. W. Rossbach, 517 Washington St.; M. A. Smith, 1010 Vallejo St. Literary—E. M. Reading (Chairman), 111 Taylor St.; J. J. Severance, 637 Kearny St.; C. Usinger, 1906 Leavenworth St. Floor Committee—W. Decker (Chairman), 13 Second Ave. Reception Committee—F. W. Rossbach (Chairman), 517 Washington St.

Some of these committees have a great deal of hard work to perform in the management of details, and from what we have heard and seen, we are satisfied the A. O. U. W. picnic, under the auspices of the General Relief Committee, will eclipse all former efforts.

The Committee on Transportation and Grounds have secured a contract with the railroad company, by which several extra trains will be run, thereby giving every opportunity to visit the grounds. No open or flat cars will be run on this occasion, thus avoiding dust, heat and accident.

The Committee on Games and Prizes have prepared one of the best and most complete programmes we have ever seen, making the heart of the average prize winner, whether man or woman, envious with expectation. The young and old, ugly and pretty, lean and fat, have all been considered and duly cared for.

The decorations will be in keeping with the occasion, and the music furnished by Blum's band such as will delight the thousands that will crowd the park. Great care has been taken in the selection of the latest and most improved music for dancing, and the committee having this part of the day's sport in hand have been and will be efficient in their duties. Complete arrangements have been perfected by which no improper person will be allowed on the trains or grounds, and of this the members of the Order and their families can be assured.

The Committee on Literary Exercises will present a very attractive programme and one that will redound to the credit of the committee and the advancement and honor of the Order.

Grand Master Wm. H. Barnes has been invited, and will deliver the oration. Past Master E. M. Reading, of Fidelity Lodge, No. 136, has been solicited by the Executive Committee to act as President of the day, and he will act in that important capacity.

The General Relief Committee appeals to the public generally to aid it in securing funds to carry out the object of its organization, which is to afford temporary relief to members of the Order who may call upon it in sickness and distress.

We hope this appeal will not be in vain, but that Belmont Park, on the 17th inst., may witness one of the grandest turn-outs ever made by the A. O. U. W. and their friends, and that the Relief Committee will realize what it justly deserves for its unselfish purposes—a most satisfactory pecuniary result.

Let every member of the Order do what he can towards making it a complete success, and Belmont won't be large enough to hold the crowd.

Tickets for the round trip, adults, 75 cents; children, between 5 and 12 years of age, 25 cents; secured in any Lodge-room, and of the various committees.

A New Feature.—Spartan, No. 36, has adopted a new system for fraternal visits that is an advance step in sociality. A committee of five, with the Master Workman as chairman, are requested to make one visit each week for one month, and report the same at the following meeting of their own Lodge. The experience thus far has been very pleasant.

The reputation that Workmen have from one end of the State to the other in their social reunions, picnics, balls and parties is the best. Every lady in attendence will be sure to be treated as such and every Workman will certainly act as a gentleman. Any disturbing influence that shall undertake to intrude itself in any of our celebrations will be effectually extinguished.

The Order in Iowa.

Most of the members of the Order are aware of the details of the trouble arising from the recalcitration of the Iowa Lodges; and that for the refusal to comply with the obligations the Supreme Lodge has suspended the charter of the Grand Lodge of that State. Some of the Lodges have remained loyal, and many of the members of seceding Lodges have also been loyal.

Among the loyal ones is Cedar Falls Lodge, No. 32, which, on the Order No. 2 from Supreme Master Workman Baxter being read, voted and forwarded to the Grand Recorder the 10 cents therein called for. A special meeting was then called to discuss Order No. 2. Agreeable to said order the Lodge assembled, and after an earnest discussion, pro and con, the following resolutions were presented and adopted, with but three dissenting voices:

Whereas, This Lodge was the first in this Grand Jurisdiction to announce to the Order at large its adherence to the Supreme Lodge, A. O. U. W. of the United States, instructing its Representative in the last Grand Lodge of Iowa to so vote and act, since which time the charter of the said Grand Lodge has been suspended by reason of its treason to the Order, and

Whereas, The Grand Lodge of Iowa exists by and through the authority of the Supreme Lodge, from whom it derives all its powers, and

Whereas, The said Grand Lodge, when it accepted its charter from the Supreme Lodge, obligated and bound itself to conform to all the laws, rules and edicts then in existence, or that might at any time thereafter be made by the Supreme Lodge, and

Whereas, The said Supreme Lodge did, at a regular session held in the city of Boston, Mass., in March, 1880, in conformity with the law of the Order, amend its Constitution, creating a law "applicable to the whole Order, providing relief to overburdened jurisdictions," and

Whereas, The Grand Lodge of Iowa was regularly represented in said session of said Supreme Lodge by three Delegates, viz.: Past Grand Masters P. S. Towle, H. B. Fouke and J. W. Willett, who participated in said session (said H. B. Fouke as chairman of the Committee on Laws, reporting said "Relief Law," said committee recommending its adoption), and by their presence, consented to and joined in creating said Relief Law, thereby binding the Grand Lodge of Iowa, and

Whereas, Believing that we, as Workmen, are bound by our obligation to "aid and enforce a strict observance of the constitution, laws and edicts of the Supreme Lodge," which we violate in following the *secession* element now ruling the Grand Lodge of Iowa. Therefore be it

Resolved, That it is the sense of this Lodge, No. 32, A. O. U. W., that the Supreme Lodge be sustained and the Relief Law be obeyed.

Resolved, That until such time as a new Grand Lodge shall be organized in the State of Iowa, all reports be made and assessments forwarded to the Supreme Recorder, and that no further notice be given to the communications of the suspended Grand Lodge of Iowa.

Resolved, That we call upon all loyal Lodges or loyal members of "seceded" Lodges to join with us in reorganizing a loyal separate beneficiary jurisdiction of A. O. U. W. in Iowa.

W. R. Graham, Deputy Supreme Master Workman and Acting Grand Master Workman of Iowa, has issued a circular to Lodges in Iowa, which is as follows:

By authority of the laws of the Order, the Supreme Master Workman, Ancient Order United Workmen, did, on March 1, 1882, suspend the charter of the Grand Lodge, Ancient Order United Workmen, of Iowa, thus rendering its acts null and void thereafter. For the purpose of placing the members of loyal Lodges, Ancient Order United Workmen, and the loyal members of "seceded" Lodges in position to preserve their rights as members of the Order, a provisional Grand Lodge has been formed by appointment of the S. M. W. as follows: W. R. Graham, Deputy S. M. W. for District of Iowa; L. O. Howland, Deputy Recorder for District of Iowa; B. F. Murdock, Deputy Receiver for District of Iowa, and acting, respectively, Grand Master Workman, Grand Recorder and Grand Receiver of Iowa.

Now, therefore, by the authority in me vested as Deputy Supreme Master Workman, Ancient Order United Workmen of the United States, for the District of Iowa, and acting Grand Master of Iowa, I forbid the forwarding of official reports or remittances of moneys under the name of Ancient Order United Workmen to any other person than L. O. Howland, Deputy Supreme Recorder and acting Grand Recorder, at Cedar Falls, Iowa. Further, I warn all bodies heretofore and now working under a charter issued by authority of the Supreme Lodge, Ancient Order United Workmen, that they will be held responsible for all acts performed since March 1, 1882. Seven or more loyal members of any Lodge will be recognized as the Lodge proper (and as such should report immediately), and are authorized to elect officers and take possession of the charter and all books, moneys and properties of said Lodge.

Valley, No. 30, closed her last meeting night by giving the M. W. degree to seven candidates.

Temperate Habits.

The following construction by the courts of the scope and significance of the words "temperate habits," occurring in the medical examinations of so many beneficiary Societies, would seem to indicate that the warning of G. M. W. Barnes published in our last issue was timely, and that too much care can not be exercised by Medical Examiners. We quote from the *Knights' Journal* of Cincinnati: It is interesting to know precisely what is meant by this oft-quoted expression, and there has recently been a decision of the U. S. Supreme Court on the subject, which we suppose settles it, at least in its legal application, though we are very much afraid the decision will give great "aid and comfort" to a large class of people who are given to frequent periods of thirst, and occasional excesses in the effort to satisfy it. The Knickerbocker Life Insurance Co., of New York, contested the claim of the heirs of a policy-holder named Badenhop, on the ground that he had untruthfully answered the questions: "Is the party of temperate habits?" and "Has he always been so?" The company introduced evidence to show that Badenhop had delirium tremens before the time when he made application for insurance. The Court charged the jury that the occasional use of intoxicating liquors did not make the deceased a man of intemperate habits, nor would an exceptional case of excess create such a condition as to justify the application of this character to him; that an attack of delirium tremens may sometimes follow a single excessive indulgence, and that if the habits of the assured in the usual ordinary and everyday routine of his life were temperate, the representations made were not untrue within the meaning of the policy, even although he might have an attack of delirium tremens from an exceptional over-indulgence. Against this construction the company appealed to the U. S. Supreme Court, which sustained the views of the court below, and affirmed the judgment.

And bearing directly on this question, we take the following from a circular from Supreme Recorder Sackett, of the A. O. U. W.:

Out of 138 deaths that occurred in the Supreme jurisdiction of this Order during the year ending January 16th last, 53 were from Ohio. This portion of the Order has suffered severely for some years. Many attribute the mortality to the free use of malt liquors, and there is at least a sufficient appearance of probability on the face of the facts to justify the exercise of extreme caution on that point by the beneficial Orders.

A Growing Order.—Seventeen new members were added to the Ancient Order of United Workmen at the meeting on Monday evening. This is a combined membership of 42 on the charter roll. The next move will be for a suitable hall in which to hold their meetings, and if any one of the several proposed building propositions are carried out, other Orders can be formed to unite with the A. O. U. W., and greatly reduce expenses.—*Candelaria True Index*, (*Nev.*)

The collapse of the American Electric Light company of Massachusetts, of which Col. Fred Grant is President, is announced. Among the directors were Wm. Windom, ex Secretary of the Treasury, and other prominent Washington gentlemen. The company owes $150,000 and has no assets.

The *Fraternal Censor* says that 8,000 out of the 10,000 Workmen of Iowa will remain loyal to the Supreme Lodge.

ARTIFICIAL LEATHER.—Numerous attempts have been made in years past to produce a material bearing a resemblance to, and useful for the same purposes as leather. Nothing practical ever grew out of these efforts, so far as we are aware, until Mr. Evans, an Eastern man, took the matter in hand. Like all investigators in untrodden fields, he worked to little advantage for many years, but each effort was a step nearer the object aimed at, and finally, after almost innumerable experiments and many discouragements, he succeeded in producing a substance which not only looks like leather but wears as well and for many purposes is superior to leather. The new material, which is called Evan's artificial leather, presents a handsome appearance, is durable, is not affected by heat or cold, and is impervious to water. We have seen shoes made from it that wore well, and, to all appearances, were leather. Makers of cheap shoes should make note of this fact. This leather is prepared in all colors, and being largely used for the tops of boys' boots, for which purpose its water-proof qualities and cheapness make it especially fitted. It can also be used for covering furniture, and for the tops of carriages it forms a durable substitute for leather, as well as for upholstering carriage seats.—*Blacksmith and Wheelwright.*

THE land department of the Northern Pacific Railroad Company answered in March 3,000 letters of inquiry from prospective immigrants.

OVER 16,000 European immigrants landed in New York during the week ending April 8th.

HORSES DOWN A SHAFT.—The *Inter-Mountain* (Butte, Montana) tells this: About noon to-day, had anyone cast his eye on the hill west of the Original Butte hoisting works, his blood would have curdled at the sight presented. Coming over the brow of the hill at a break-neck pace was the team of Tadder & Walker, pulling a load of wood upon which were seated two men, one of them endeavoring to bring the frightened animals to a halt, a result he was powerless to effect. When about half way down the hill, and while traveling at a fearful rate of speed, the horses suddenly left the road and ran in a bee line for a prospect hole 16 ft. deep which they did not see in time to avoid. Both horses went headlong down the hole, the driver followed suit, and the wagon would have fallen in had there been room enough. The driver was painfully bruised and he is now suffering considerably, but is not believed to be permanently injured. His escape from instant death is miraculous. The horses were not killed, but when extricated one of them was found to be severely cut about the flanks and was bleeding like a stuck pig. The wagon did not suffer serious injury. The injured man is receiving the necessary medical attention. His companion escaped unhurt.

THE shipment of fresh Truckee river trout from Wadsworth thus far this season, amounts to 140,500 lbs.

IMPERIAL EGG FOOD.

Will make your Hens Lay, keep them in the best possible condition and ward off disease. When fed according to directions, sick and drooping fowls are never seen. It furnishes the needed material for forming bone, muscle and feathers, and is

Invaluable for Young Chicks and Moulting Fowls. It comes packed in various sized packages, and being a powder, is easily mixed with the customary feed. Give it a trial. Send Stamp for Circular and Testimonials.

Price.—Single pound, 50 cents; Two and a half pounds, $1.00; Six pounds, $2.00; 25 pound keg $6.25. Address,

G. G. WICKSON,
General Pacific Coast Agt.
No. 319 Market St.,

MONEY IN CHICKENS AND EGGS.

—The— Eclipse Self Regulating Incubators are now in actual use in most parts of this State, and giving general satisfaction. They are a success, and being such are invaluable to all who attempt to raise chickens; are easy to manage, and cost merely a trifle to keep in operation and will do much better work than can be done with hens, with a small portion of the labor and risk.

☞ The "ECLIPSE" is the only entirely self-regulating incubator known; is the only one that will bear investigating, so it is the only safe one to purchase. Send stamp for Circular of California Testimonials (not Eastern.)
